Lifelines 2022

Advancing Lifeline Engineering for Community Resilience

Selected Papers from the Lifelines 2022 Conference

Online
31 January – 11 February 2022

Editors:

Craig A. Davis
Kent Yu
Ertugrul Taciroglu

ISBN: 978-1-7138-6368-7

Printed from e-media with permission by:

Curran Associates, Inc.

Contents

Hazards

San Andreas Fault Displacement Hazard Characterization of the Los Angeles Aqueduct at the Elizabeth Tunnel 1
Scott Lindvall, Scott Kerwin, Stephen Thompson, Patricia Thomas, Arash Zandieh, Craig Davis, and Christopher Heron

Monte Carlo Simulation to Perform Liquefaction Evaluation of Conveyance Systems 13
Mohsen Beikae

Monte Carlo Simulation of Probabilistic Fault Displacement Hazard Analysis for Lifelines Crossing Active Faults 25
Mohsen Beikae

Geologic Hazard Characterization for Metropolitan Water District's Replacement of Casa Loma Siphon Barrel No. 1, San Jacinto, California 39
Robert Givler, Ross Hartleb, Scott Lindvall, Stephen Thompson, Arash Zandieh, Christopher Kemp, Thomas Rockwell, Darren Baune, Justin Davidson, Tim Taylor, Mahmoud Hachem, Roger Parra, Cathy Chau, and Robert Bell

West Shore Lake Oroville Lineament Geologic Investigation, Northern California 52
Özgür Kozacı, Don F. Hoirup, Judith A. Zachariasen, Christopher Bloszies, Christopher S. Hitchcock, Rich D. Koehler, Scott C. Lindvall, Eric V. McDonald, Leah Feigelson, Hans Abramson-Ward, Ross Hartleb, and Matt Huebner

2.5D Ground Motion Effects from Excitation of Underground Tunnels by Obliquely Incident Seismic Waves 66
J. Zhu, X. Li, J. Liang, and B. Zhang

Seismic Performance of PVC-U Pipe and Design Prediction Tool 80
David J. Edkins, Rolando P. Orense, and Richard S. Henry

Techno-Economic Assessment of Liquefaction Mitigation by Microbially Induced Desaturation 91
Caitlyn A. Hall, Leon A. van Paassen, Soheil Kamalzare, Dominic Parmantier, and Edward Kavazanjian Jr.

© ASCE

Field Monitoring of the Persistence of Microbially Induced Desaturation for Mitigation of Earthquake Induced Soil Liquefaction in Silty Soil 101
K. Sorenson, A. M. Preciado, D. Moug, A. Khosravifar, L. van Paassen, E. Kavazanjian Jr., K. Stokoe, and F. Menq

Evaluating Cyclic Loading Response of a Low Plasticity Silt with Laboratory and Field Cyclic Loading Tests 114
A. M. Preciado, K. Sorenson, A. Khosravifar, D. Moug, K. Stokoe, F. Menq, and B. Zhang

Site-Specific Seismic Ground Motion Analysis in the New York City Area—A Case Study 126
Kun Li and Cassandra Wetzel

Comparing Existing and Novel Methodologies for Estimating Risk of Liquefaction Triggering and Damage 135
Zach Bullock, Shideh Dashti, Abbie B. Liel, and Keith A. Porter

Support for Peak Ground Velocity in the US Geological Survey National Seismic Hazard Model 144
Peter M. Powers, Jason M. Altekruse, and Norman A. Abrahamson

Deep, Dynamic In Situ Excess Pore Pressure Response of a Medium Dense Sand 152
Amalesh Jana, Armin W. Stuedlein, Tom Wharton, and Jason Bock

Earthquake Ground Motion Conditioned Simulation Using Sparsely Distributed Observed Motions for Analysis and Design of Lifeline Structures 167
A. Tamhidi, N. Kuehn, S. F. Ghahari, A. J. Rodgers, E. Taciroglu, and Y. Bozorgnia

A Platform for Efficient Ground Motion Selection Considering Multi-Target Spectra 175
Mehrdad Shokrabadi, Yousef Bozorgnia, and Henry V. Burton

Machine Learning-Based Selection of Efficient Parameters for the Evaluation of Seismically Induced Slope Displacements 185
Farahnaz Soleimani, Jorge Macedo, and Chenying Liu

Accounting for Site Effects to Improve Seismic Hazard Resilience of Pipelines 194
Ashly Cabas and Cristina Lorenzo-Velázquez

Evaluating Impact of Adjacent Tall Buildings on Seismic Response of Underground Structures 207
Yuamar I. Basarah, Ozgun A. Numanoglu, and Youssef M. A. Hashash

© ASCE

Variations in Ground Motion Amplification in the Los Angeles Basin due to the 2019 M7.1 Ridgecrest Earthquake: Implications for the Long-Period Response of Infrastructure 216
Monica D. Kohler, Filippos Filippitzis, Robert Graves, Anthony Massari, Thomas Heaton, Robert Clayton, Julian Bunn, Richard Guy, and K. Mani Chandy

Seismic Slope Stability Analysis and Mitigation for Transmission Power Lines in Southern California 228
Zia Zafir, Esam Abraham, and Alex Wright

Parametric Investigation of Ground Failure at Balboa Boulevard during the 1994 Northridge Earthquake via Nonlinear Deformation Analyses 241
Renmin Pretell, Katerina Ziotopoulou, and Craig A. Davis

Polymer Injection to Remediate Liquefaction Induced Foundation Settlement: Numerical Simulation of Shake Table Experiments 255
Athul Prabhakaran, Kyungtae Kim, Zhijian Qiu, Ahmed Elgamal, and Cliff Frazao

Tunnel Lining Design for a Strike Slip Fault Rupture on Westside Purple Line Extension Project–Section 2 266
Angel Del Amo, Robert Goodfellow, Bradley Hoffman, Bingzhi Yang, Matt Fowler, Roupen Donikian, and Roy Cook

A New Landslide Runout Model and Implications for Understanding Post Wildfire and Earthquake Threats to Communities in California 278
Richard Guthrie, Kyla Grasso, and Andrew Befus

Case Study: A Moving Mud Spring Threatens Critical Infrastructure, Imperial County, California 289
R. Travis Deane and David K. Lynch

Selection of Multihazard-Based Damage Scenarios for the Los Angeles Water Transmission Network 299
Nafiseh Soleimani, Rachel A. Davidson, Craig Davis, Thomas D. O'Rourke, and Linda K. Nozick

Post-Event Investigations and Longitudinal Studies

Lessons Learned from Two Earthquakes That Afflicted Mexico City—After a Pause of 32 Years 310
Robert C. Lo

Damage to Drinking Water Supply System in the 2018 Hokkaido Iburi-Tobu Earthquake 322
M. Miyajima

© ASCE

Telecommunication Performance during Puebla Earthquake M7.1, 19 September 2017 330
Alex K. Tang and Alexis Kwasinski

Performance of Water Pipelines at Fault Crossings from the 2019 Ridgecrest Earthquakes 343
Chukwuebuka C. Nweke, Craig A. Davis, Kenneth S. Hudson, Kenneth W. Hudnut, Scott J. Brandenberg, and Jonathan P. Stewart

Investigation of Water Pipeline Failures at Balboa Boulevard during the 1994 Northridge Earthquake 356
Katerina Ziotopoulou, Craig A. Davis, and Renmin Pretell

Community Resilience

Seismic Resilience of Intermodal Freight Transportation Networks with Ties to Economic Impact Modeling 372
Anibal Tafur, Jamie E. Padgett, and Andres Gonzalez

Assessment of Protective Actions and Adjustments Taken by Shelter-in-Place Households Facing Disruptions in Critical Lifeline Services 384
Natalie Coleman, Amir Esmalian, and Ali Mostafavi

Households' Protective Actions in Response to a Nighttime Earthquake: The 2018 Eastern Taiwan Earthquake 397
Thomas Ryan Brindle, Shih-Kai Huang, Hao-Che Wu, Chih-Chun Lin, Jing-Chein Lu, and Michael K. Lindell

Applying Consequence-Driven Scenario Selection to Lifelines 411
Yolanda C. Lin, David J. Wald, Eric M. Thompson, and David Lallemant

Survival Functions of the Shelter-in-Place Households for Disruptions in Infrastructure Services 423
Amir Esmalian, Shangjia Dong, and Ali Mostafavi

Incorporating Infrastructure Damage and Household Disaster Preparedness to Assess Emergency Water Needs 434
Rodrigo Costa, Chenbo Wang, and Jack W. Baker

Emergency Restoration Strategy for Water Distribution System from the Viewpoint of Disaster Resilience Curves 443
Nagahisa Hirayama, Taiki Okano, and Jotaro Tamai

© ASCE

Planning for Post-Earthquake Fires Considering Performance of Transportation and Water Networks....453
Amir Sarreshtehdari, Max Coar, and Negar Elhami Khorasani

Understanding the Consequences of Wellington's Infrastructure Vulnerability to a Major Earthquake....464
Richard Mowll, Vinod K. Sadashiva, Anthony Delaney, Fran Wilde, Colin Crampton, Ayolt Wiertsema, and Craig Muirhead

Novel Framework for Resilience Assessment of Tall Buildings....474
Vesna Terzic and Kristijan Kolozvari

Seismic Resilience Analysis of Circular Tunnel in Soft Soil Deposits....488
Z. K. Huang, D. M. Zhang, S. Argyroudis, and K. Pitilakis

Benefit-Cost Optimization of Resilient Lifeline Networks....499
Charles Scawthorn, Keith Porter, and Craig Davis

CUWNet: A Practical Seismic Resilience Model of Buried Water Pipeline Networks....510
Keith A. Porter, Joy Eldredge, and Sri Kamojjala

Economic Consequences of the HayWired Earthquake Scenario....523
Ian Sue Wing, Dan Wei, Adam Z. Rose, and Anne M. Wein

The Economic Effects of the HayWired Scenario Using the Association of Bay Area Governments Regional Growth Forecast—A Focus on Network Disruption and Resilience....534
Cynthia Kroll, Shijia Bobby Lu, Anne Wein, and Aksel Olsen

Emerging and Advanced Technologies

Extraction of Bridge Damage in the 2016 Kumamoto Earthquake Using Airborne SAR Data....546
Fumio Yamazaki and Wen Liu

Seismic Behavior of Masonry Building with Spread Base Isolation Using Natural Rubber....556
Nawaz Md. Zoheb, S. C. Mohan, and J. S. Kalyana Rama

Depth Completion from Sparse 3D Maps for Automated Defect Quantification....566
Jake McLaughlin, Alexander Thoms, Nicholas Charron, and Sriram Narasimhan

Exploring the Generalizability of Deep Convolutional Neural Networks for Post-Hurricane Damage Assessment....577
Chih-Shen Cheng, Amir H. Behzadan, and Arash Noshadravan

© ASCE

Deep Metric Learning for Disaster Damage Classification in Remote Sensing Images **586**
Molan Zhang and ZhiQiang Chen

Experimental Investigation of 3D-Printed Elastomeric Dampers **595**
Mohammed Jaradat, Eslam Soliman, and Mahmoud Reda Taha

Monitoring Defects in Attention Allocations of Nuclear Power Plant Operators through Operational Knowledge Representation **605**
Jinding Xing, Pingbo Tang, Alper Yilmaz, Ronald Laurids Boring, and G. Edward Gibson

Earthquake Damage Prediction of Underground Steel Pipe with Screw Joint Using Machine Learning **613**
A. Ito, M. Okutsu, A. Furukawa, G. Shoji, and T. Suzuki

Probabilistic Modeling and Inference for Building Structures under Earthquake Sequences Using Matrix-Based Bayesian Network **621**
Changuk Mun, Jong-Wha Bai, and Junho Song

Correlation and Neural Network Modeling of Shear Wave Velocity of Macau Soils Using SPT and CPT Data **632**
T. M. H. Lok and Z. Zhou

Cepstral Coefficients for Earthquake Damage Assessment of Bridges Leveraging Deep Learning **639**
Seyedomid Sajedi and Xiao Liang

Estimating Peak Floor Acceleration Using Artificial Neural Networks **648**
Wael Aloqaily, Monique Head, and Nii Attoh-Okine

Experimental Methods to Identify Modal Parameters of Bridges, Viaducts, and Other Civil Structures **660**
Paul Ibanez and Boaz Norton

Structural Damage Detection under Uncertain Parameters Using Non-Probabilistic Meta-Model and Interval Mathematics **670**
Ramin Ghiasi, Mohammad Noori, Wael A. Altabey, Tianyu Wang, and Zhishen Wu

Use of Geoelectrical Techniques to Detect Hydrocarbon Plume in Leaking Pipelines **680**
Mostafa Ebrahimi, Hamid Rostami, Abdolreza Osouli, and Rosanna Saindon

© ASCE

A New Denoising Technique via Wavelet Analysis of Structural Vibration Response for Structural Health Monitoring Applications 691
Ahmed Silik, Mohammad Noori, Wael A. Altabey, Ji Dang, and Ramin Ghiasi

Real-Life Investigations of Inverse Filtering for Frequency Identification of Bridges Using Smartphones in Passing Vehicles 707
Nima Shirzad-Ghaleroudkhani and Mustafa Gül

Critical ShakeCast Lifeline Users and Their Response Protocols 715
Kuo-Wan Lin, David J. Wald, Daniel Slosky, Sterling Strait, Justin Smith, Sharon Yen, and Nick Burmas

Comparison of Traditional and Emerging Technologies for Assessing Slope Stability in an Urban Environment 726
Brian Albin, Ozgur Kozaci, Nikolas Sokol, Adam Wade, and Reza Baradaran

Policy and Governance

A Review of Portland, Oregon's URM Policy Recommendations and the Potential Impacts on Low-Income Communities 737
Jazalyn Dukes, Zakiya Seymour, and Denise Smith

The Need for Utility Data Governance Policies for Improving Lifeline Recovery 749
James H. Anspach, Arthur G. Robison, Shawn T. Clark, and Matthew J. Tomanek

Recommendations toward Functional Recovery Performance of Lifeline Infrastructure Systems 756
Craig A. Davis, Ryan Kersting, Sissy Nikolaou, and Kent Yu

Community Resiliency Infrastructure and Sustainability Protocol 767
Ross B. Corotis, Craig A. Davis, and Keith A. Porter

© ASCE
