TABLE OF CONTENT

1. Preface

Jeremy Dunning-Davies, p. 5

Preface references, p.21

2. Overview of historical and recent verifications of the EPR argument and their applications to physics, chemistry and biology,

Ruggero Maria Santilli, p. 25

Acknowledgments, p. 169

Overview references, p.169

Index, p.199

TABLE OF CONTENT

1. FOREWORD, p. 30
2. THE EPR ARGUMENT, p. 32
3. CONCEPTUAL FOUNDATIONS, p.34
 - 3.1. Insufficiencies of quantum mechanics in particle physics, p.34
 - 3.2. Insufficiencies of quantum mechanics in nuclear physics, p. 36
 - 3.3. Insufficiency of quantum mechanics for irreversible processes, p. 38
 - 3.4. Insufficiencies of quantum mechanics for antimatter, p. 40
 - 3.5. Insufficiencies of quantum mechanics in chemistry, p. 42
4. EXPERIMENTAL FOUNDATIONS, p. 44
5. HISTORICAL EPR COMPLETIONS, p. 45
6. HADRONIC MECHANICS, CHEMISTRY AND BIOLOGY, p. 48
 - 6.1. Hadronic mechanics, p. 48
 - 6.2. Hadronic chemistry, p. 51
 - 6.3. Hadronic biology, p. 51
7. VERIFICATIONS OF THE EPR ARGUMENT, p. 52
 - 7.1. Foreword, p. 52
 - 7.2. Recovering of classical images, p. 54
 - 7.2.1. Rudiments of isomathematics, p. 54
 - 7.2.2. Recovery of classical images, p. 60
 - 7.2.3. Realization of the EPR entanglement, p. 61
 - 7.3. Recovering of Einstein's determinism, p. 62
 - 7.3.1. Rudiments of isomechanics, p. 62
 - 7.3.2. Confirmation of the EPR argument, p. 65
 - 7.4. Achievement of attractive force between valence electrons, p. 66
 - 7.5. Removal of quantum divergencies?, p. 71

- 7.6. Representation of irreversible processes, p. 72
- 7.7. EPR completion for matter-antimatter annihilation, p. 75
- 8. APPLICATIONS OF EPR COMPLETIONS, p. 77**
- 8.1. Foreword, p. 77
- 8.2. Applications of EPR completions in nuclear physics, p. 79
 - 8.2.1. Representation of nuclear magnetic moments, p. 79
 - 8.2.2. Representation of the neutron synthesis, p. 82
 - 8.2.3. Etherino or neutrino?, p. 85
 - 8.2.4. Industrial synthesis of neutrons from the hydrogen, p. 88
 - 8.2.5. Representation of Deuteron data, p. 90
 - 8.2.6. Reduction of matter to isoprotons and isoelectrons, p. 93
 - 8.2.7. The synthesis of the pseudo-proton, p. 95
 - 8.2.8. The synthesis of then pseudo-Deuteron, p. 96
 - 8.2.9. New clean nuclear energies, p. 98
 - 8.2.9-I. Nuclear energies via stimulated neutron decays, p. 98
 - 8.2.9-II. Intermediate Controlled Nuclear Fusions, p. 101
 - 8.2.9-III. HyperFusions of natural nuclei and pseudo-nuclei, p. 107
 - 8.2.10. The problem of recycling nuclear waste, p. 111
 - 8.2.10-I. Recycling of radioactive hospital waste, p. 112
 - 8.2.10-II. Recycling nuclear waste via stimulated neutron decays, 114
 - 8.2.10-III. Recycle nuclear waste via pseudo-proton irradiation, p. 114
- 8.3. Applications of EPR completions in chemistry, p. 115
 - 8.3.1. Representation of valence electron bonds, p. 115
 - 8.3.2. Representation of molecular data, p. 116
 - 8.3.3. The new chemical species of magnecules, p. 118
 - 8.3.4. Experimental verifications of new species of magnecules, p. 121
 - 8.3.5. Magne-Hydrogen and Magne-Oxygen, p. 124
 - 8.3.6. The HHO combustible gas, p. 126
 - 8.3.7. Hyper-Combustion, p. 127
- 8.4. Applications of EPR completions to special relativity, p. 130

- 8.4.1. Foreword, p. 130
- 8.4.2. Applications of the EPR argument for Galileo's relativity, p. 131
- 8.4.3. Special Relativity (SR), p. 133
- 8.4.4. Special Isorelativity (SIR), p. 134
 - 8.4.4-I. Verification of ISR within liquid media, p. 140
 - 8.4.4-II. Verification of ISR within gaseous media, p. 141
 - 8.4.4-III. Verification of ISR in astrophysics, p. 143
 - 8.4.4-IV. Verification of ISR with mean-lives of unstable hadrons, p. 146
 - 8.4.4-V. Verification of ISR in the Bose-Einstein correlation, p. 148
 - 8.4.4-VI. Verification of ISR with superluminal speeds, p. 150
 - 8.4.4.VIA. Solution of the historical Lorentz problem, p. 150
 - 8.4.4.VIB. Geometric locomotion, p. 153
 - 8.4.4.VIC. Interstellar travel, p. 153
- 8.5. Application of EPR completions to exterior gravitation, p. 155
 - 8.5.1. Universal invariance of Riemannian intervals, p. 155
 - 8.5.2. Isogeometric unification of special and general relativity, p. 156
 - 8.5.3. Resolution of century-old controversies in gravitation?, p. 157
- 8.6. Application of EPR completions to interior gravitation, p. 161
 - 8.6.1. Exterior and interior gravitational problems, p. 161
 - 8.6.2. Interior General Isorelativity (IGIR), p. 162
 - 8.6.3. Black or brown holes? p. 163
 - 8.6.4. Studies in the origin of gravitation, p. 163
 - 8.6.5. Experimental test of the origin of gravitation, p. 165
- 8.7. Application of EPR completions to high energy scattering, 166
- 9. CONCLUDING REMARKS, p. 168

Acknowledgements, p. 169
