Table of Contents

Workshop

Building Trust and Conducting Research with Minoritized Communities 1
Nichol Castro and Natasha Tokowicz

Category Theory for Cognitive Science 3
Britt Anderson, Steven Phillips, Toby St Clere Smithe, and Geoffrey Cruttwell

From Images to Symbols: Drawing as a Window into the Mind 5
Kushin Mukherjee, Holly Huey, Timothy Rogers, and Judith Fan

Deep Learning for Brain Encoding and Decoding 8
Subba Reddy Oota, Jashn Arora, Manish Gupta, Raju Bapi, and Mariya Toneva

Fostering shared intentionality for diverse learners through cross-sensory interaction design 10
David Barter, Tamara Crasto, Erin Lee, Robert Ingino, and Peter Coppin

Symposia

Universality and Diversity in Event Cognition and Language 12
Yue Ji, Ercenur Ünal, Anna Papafragou, Lilia Rissman, Saskia van Putten, Asifa Majid, Francie Manhardt, Asli Özyürek, Arrate Isasi-Isasmendi, Caroline Andrews, Sebastian Sauppe, Monique Flecken, Roberto Zariquiey, itziar laka, Moritz Daum, Martin Meyer, and Balthasar Bickel

Innateness, Universals, Diversity 14
Iris Berent

Race, Culture, and Language: A SPARK-Sponsored Symposium 16
Nichol Castro and Natasha Tokowicz

Bilingual Sentence Processing: when Models Meet Experiments 18
Stefan Frank, Xavier Hinaut, Edith Kaan, Yung Han Khoe, Lin Chen, Irene Elisabeth Winther, and Yevgen Matusevych

Distorted constellations: interdisciplinary perspectives on understanding reality and the self 20
Nwando Ebizie, Simon Cropper, Francesca Puledda, Erinma Ochu, and Professor Sophie Scott

Diversity in Children's Temperament: Perspectives on Shyness in Interaction 22
Nils Tolksdorf, Fanziska Viertel, Matt Hilton, Kristie Poole, and Sarah Kucker

Dimensions of Diversity in Spatial Cognition: Culture, Context, Age, and Ability 24
Benjamin Pitt, Alexandra Carstensen, Isabelle Boni, Steven Piantadosi, Edward Gibson, Tyler Marghetis, Kevin Holmes, Maya Star-Lack, Sandra Chacon, Holly Huey, Matthew Jordan, Yuval Hart, Moira Dillon, and Roberto Bottini

Competing perspectives on building ethical AI: psychological, philosophical, and computational approaches 26
Sydney Levine and Zhijing Jin

Papers with Oral Presentation

Inferring epistemic intention in simulated physical microworlds 28
Stephanie Droop and Neil Bramley

Modeling the effect of chained study in transitive inference 35
Douglas Markant

Ethical Explanations 42
Casey Lewry and Tania Lombrozo

From doggy to dog: Developmental shifts in children's use of register-specific words 49
Kennedy Casey and Marisa Casillas

The Role of Alternatives in Children's Reasoning about Constrained Choices 57
Jamie Amemiya, Gail Heyman, and Caren Walker

Readers do not strongly rely on full-context information, but might utilize local word statistics, when 'correcting' word transposition errors in text 64
Kuan-Jung Huang and Adrian Staub

The Wisdom of the Crowd and Framing Effects in Spatial Knowledge 71
Lauren Montgomery and Michael Lee

Categorizing Dogs' Real World Visual Statistics 79
Madeline Pelgrim and Daphna Buchsbaum

Partner effects and individual differences on perspective taking 86
Jia Loy and Vera Demberg

Testing a Unified Model of Arithmetic 93
David Braithwaite and Robert Siegler

Retention of Exemplar-Specific Information in Learning of Real-World High-Dimensional Categories: Evidence from Modeling of Old-New Item Recognition 100
Robert Nosofsky and Brian Meagher

'An ounce of loyalty': Children's expectations about loyalty and preference for in-group members and authority figures 107
Megan Norris and Nicholaus Noles

Semantic priming supports infants' ability to represent and name unseen objects 114
Elena Luchkina and Sandra Waxman

Transferring Novel Causal Knowledge 122
Daniel Czarnowski and Jessecae Marsh

Limitations to Optimal Search in Naturalistic Active Learning 129
Lisheng He, Russell Richie, and Sudeep Bhatia

A Right Way to Explain? Function, Mechanism, and the Order of Explanations 135
Amanda McCarthy and Frank Keil

Young children learn equally from real and thought experiments 142
Igor Bascandziev and Susan Carey

A Rational Speech-Act model for the pragmatic use of vague terms in natural language 149
Alexandre Cremers

Categorizing Ambiguous Facial Expressions 156
Ilya Nudnou and Benjamin Balas

An experimental study of semantic extension in a novel communication system 163
Josephine Bowerman and Kenny Smith

Learning depends on knowledge: The benefits of retrieval practice vary for facts and skills 170
Paulo Carvalho, Napol Rachatasumrit, and Kenneth Koedinger

Effects of Iconicity in Recognition Memory 176
David Sidhu and Gabriella Vigliocco

Explaining patterns of fusion in morphological paradigms using the memory–surprisal tradeoff ... 184
Neil Rathi, Michael Hahn, and Richard Futrell

Can a pressure against homophones explain phonological neighborhoods? 192
Sean Trott and Benjamin Bergen

Defending Diversity: Providing Examples from Different Domains Enhances Application of System Principles Beyond the Domains Covered by the Examples 200
Verónica D'Angelo and Maximo Trench

Bridging DFT and DNNs: A neural dynamic process model of scene representation, guided visual search and scene grammar in natural scenes 207
Raul Grieben and Gregor Schöner

'Sally the Congressperson': The Role of Individual Ideology on the Processing and Production of English Gender-Neutral Role Nouns 215
Brandon Papineau, Rob Podesva, and Judith Degen

Beyond the physical divide of Greek Cypriots and Turkish Cypriots: Social and political variables shape geographical estimates 223
Alexia Galati, Miria Plastira, Alinda Friedman, and Marios Avraamides

Getting Situated: Comparative Analysis of Language Models With Experimental Categorization Tasks 230
Andy Edinger and Robert Goldstone

Learnability and constraints on the semantics of clause-embedding predicates 237
Mora Maldonado, Jennifer Culbertson, and Wataru Uegaki

Diversity in Mathematical Insight Experiences in the Wild: Evidence of Opportunistic Assimilation 244
Stacy Shaw

Fuzzy Performance Profiles: Towards Personalized CPR Refresher Training 251
Florian Sense, Lauren Sanderson, Joshua Onia, Michael Krusmark, Joshua Fiechter, Michael Collins, and Tiffany Jastrzembski

Fractional Binding in Vector Symbolic Architectures as Quasi-Probability Statements 259
Michael Furlong and Chris Eliasmith

In the Dark: Agent-Based Modeling of Uninformed Individuals within Polarized Groups 267
Shannon Werntz and Daniel Oppenheimer

A Computational Model of Unintentional Mind Wandering in Focused Attention Meditation 274
Isaac Christian and Mayank Agrawal

Thinking about doing: Representations of skill learning 282
Xiuyuan Zhang, Samuel McDougle, and Julia Leonard

Sensorimotor processes are not a source of much noise: Sensory-motor and decision components of reaction times 289
Neda Meibodi, Anna Schubö, and Dominik Endres

So much for plain language: An analysis of the accessibility of United States federal laws (1951-2009) 297
Eric Martinez, Francis Mollica, and Edward Gibson

New Analyses of Lexical Influences on the Processing of Pseudo-homophones in the Lexical Decision Task: Still More Challenges for Models of Visual Word Recognition 304
Robert McCann, Blair Armstrong, Michael Reynolds, and Derek Besner

Structural vs. Superficial Similarity During Unprompted Analogical Retrieval: Which one Exerts a Greater Force? 312
Ricardo Minervino and Maximo Trench

Does Social Sampling Differ Between Online and Offline Contacts? A Computational Modeling Analysis 319
Marlene Hecht, Thorsten Pachur, and Christin Schulze

Cultural Invariance in Musical Communication 326
Lidya Yurdum, Manvir Singh, Luke Glowacki, Tom Vardy, Quentin Atkinson, Courtney Hilton, Disa Sauter, Max Krasnow, and Samuel Mehr

Effects of Language on Social Essentialist Beliefs and Stigma about Mental Illness 334
Katherine Williams, A. Alban Foulser, and Katharine Tillman

Culture, communicative need, and the efficiency of semantic categories 342
Shan Gao and Terry Regier

A Hierarchical Model of Attention over Time 350
Jaeah Kim, Shashank Singh, Dan Yurovsky, Anna Fisher, and Erik Thiessen

Exploring the Racial Bias in Pain Detection with a Computer Vision Model 358
Sarah Fabi, Xiaojing Xu, and Virginia de Sa

Statistical learning of orthotactic constraints: new insights from typing 366
Nilsu Atilgan, Elizabeth Chu, and Nazbanou Nozari

Preschoolers and adults make inferences from novel metaphors 373
Rebecca Zhu and Alison Gopnik

Mathematical insights as novel connections: Evidence from expert mathematicians 380
Shadab Tabatabaeian, Artemisia Deluna, David Landy, and Tyler Marghetis

An Experimental-Linguistic Study of the Folk Concept of Pain: Implication, Projection, & Deniability 388
Sabrina Coninx, Pascale Willemsen, and Kevin Reuter

A Mentalistic Semantics Explains "Each" and "Every" Quantifier Use 395
Tyler Knowlton, John Trueswell, and Anna Papafragou

Of mouses and mans: the role of production and feedback in language learning 402
Megan Waller, Nazbanou Nozari, and Dan Yurovsky

Revisiting Agreement: Do Children and Adults Compute Subject-verb Agreement Differently? 409
Nazbanou Nozari and Akira Omaki

Auditory and visual category learning in children 416
Casey Roark, Erica Lescht, Amanda Hampton Wray, and Bharath Chandrasekaran

Use of clustering in human solutions of the traveling salesperson problem 424
Vijay Marupudi, Rina Harsch, V. N. Vimal Rao, Jimin Park, Jeffrey Bye, and Sashank Varma

Information sampling explains Bayesian learners' biases in correlation judgment 431
Xiumei Zhang, Lisheng He, and Sudeep Bhatia

Event structure predicts temporal interpretation of English and German past-under-past relative clauses 439
Elena Marx and Eva Wittenberg

Measuring and Modeling Confidence in Human Causal Judgment 446
Kevin O'Neill, Paul Henne, John Pearson, and Felipe DeBrigard

Emphasizing associations from encoding affects free recall at retrieval 453
Bryan Hong, Carleigh Pace-Tonna, Morgan Barense, and Michael Mack

Relation Representations in Analogical Reasoning and Recognition Memory 461
Nicholas Ichien, Katherine Alfred, Sophia Baia, David Kraemer, Silvia Bunge, Hongjing Lu, and Keith Holyoak

Generative Inferences in Relational and Analogical Reasoning: A Comparison of Computational Models 468
Nicholas Ichien, Angela Kan, Keith Holyoak, and Hongjing Lu

Two's company but six is a crowd: emergence of conventions in multiparty communication games . 475
Veronica Boyce, Robert Hawkins, Noah Goodman, and Michael Frank

Distrubutional Semantics Still Can't Account for Affordances 482
Cameron Jones, Tyler Chang, Seana Coulson, James Michaelov, Sean Trott, and Benjamin Bergen

Infinite mixture chaining: Efficient temporal construction of word meaning 490
Lei Yu and Yang Xu

A model of free recall for multiple encounters of semantically related stimuli with an application to understanding cognitive impairment 498
Holly Westfall and Michael Lee

Biological Softmax: Demonstrated in Modern Hopfield Networks 505
Mallory Snow and Jeff Orchard

What carries greater social weight, a linguistic variant's local use or its typical use? 512
Charlotte Vaughn

Evidence for Multiple Mechanisms Underlying List-Method Directed Forgetting 519
Hannah Dames, Daniel Brand, and Marco Ragni

Climbing the Tree: Structured Hierarchical Representations in Visuomotor Maps 526
Juliana Trach and Samuel McDougle

Alignment of Knowing Versus Feeling the Emotion in Music During Middle-Childhood 533
Rista Plate, Callie Jones, Joshua Steinberg, Grace Daley, Sylvia Zhao, and Rebecca Waller

The Power of Nudging: Exploring Three Interventions for Metacognitive Skills Instruction across Intelligent Tutoring Systems 541
Mark Abdelshiheed, John Hostetter, Preya Shabrina, Tiffany Barnes, and Min Chi

Need for Structure and the Emergence of Communication 549
Tom Kouwenhoven, Roy de Kleijn, Stephan Raaijmakers, and Tessa Verhoef

Quantifying cross-situational statistics during parent-child toy play 556
Ellis Cain, Rachel Ryskin, and Chen Yu

I Know Your Next Move: Action Decisions in Dyadic Pick and Place Tasks 563
Diana Babajanyan, Gaurav Patil, Maurice Lamb, Rachel W. Kallen, and Michael Richardson

Does Contextual Diversity Hinder Early Word Acquisition? 571
Tyler Chang and Benjamin Bergen

The impact of mask use on social categorization 578
Yueyuan Zheng, Danni Chen, Xiaoqing Hu, and Janet Hsiao

Attentional Bias for Self-Face: Investigation using Drift Diffusion Modelling 586
Aditi Jublie and Devpriya Kumar

Dissecting causal asymmetries in inductive generalization 592
Zeyu Xia, Bonan Zhao, Tadeg Quillien, and Chris Lucas

Computational Complexity of Segmentation 599
Federico Adolfi, Todd Wareham, and Iris van Rooij

What is the CRT? Intelligence, Personality, Decision Style or Attention? 607
Matthew Welsh

Towards Situated Communication in Multi-Step Interactions: Time is a Key Pressure in Communication Emergence 615
Aleksandra Kalinowska, Elnaz Davoodi, Kory Mathewson, Todd Murphey, and Patrick Pilarski

Evaluations of Causal Claims Reflect a Trade-Off Between Informativeness and Compression 621
David Kinney and Tania Lombrozo

Individuals differ cross-linguistically in cue weighting: A computational evaluation of cue-based retrieval in sentence processing 628
Himanshu Yadav, Garrett Smith, Daniela Mertzen, Ralf Engbert, and Shravan Vasishth

Regularization or lexical probability-matching? How German speakers generalize plural morphology 635
Kate McCurdy, Sharon Goldwater, and Adam Lopez

Empirical and Computational Evidence for Reconfiguration Costs During Within-Task Adjustments in Cognitive Control 643
Ivan Grahek, Xiamin Leng, Mahalia Prater Fahey, Debbie Yee, and Amitai Shenhav

Mouse-mole-vole: The inconspicuous benefit of phonology during retrieval from semantic memory . 651
Abhilasha Kumar, Nancy Lundin, and Michael N. Jones

How the cognitive mechanisms underlying fast choices influence information spread and response bias amplification in groups 658
Alan Novaes Tump, Tim Pleskac, Pawel Romanczuk, and Ralf Kurvers

Conceptual recoding of new ideas during and after solution of an insight problem 665
Thomas Ormerod, James N. MacGregor, Adrian Banks, and Patrice Rusconi

Social Interaction Dynamics Modulates Collective Creativity 671
Maor Rosenberg, Goren Gordon, Lior Noy, and Kristian Tylen

Categorization in Environments that Change when People Learn 680
Manuel Villarreal, Sahar Vaday, and Michael Lee

Uncovering children's concepts and conceptual change 687
Pablo Leon Villagra, Isaac Ehrlich, Chris Lucas, and Daphna Buchsbaum

No privileged link between intentionality and causation: Generalizable effects of agency in language 694
Sehrang Joo, Sami Yousif, Fabienne Martin, Frank Keil, and Joshua Knobe

The role of production expectations in visual world paradigm linking hypotheses 701
Judith Degen and Stefan Pophristic

Trusting algorithms: performance, explanations, and sticky preferences 708
Garston Liang and Ben Newell

Affective Factors Affect Visuospatial Decision-making: A Drift Diffusion Modeling Approach 715
Yaxin Liu and Stella Lourenco

Generalizing Syllogistic Reasoning: Extending Syllogisms to General Quantifiers 722
Daniel Brand, Maximilian Mittenbühler, and Marco Ragni

The polarity effect of evaluative language 729
Lucien Baumgartner, Pascale Willemsen, and Kevin Reuter

Inhibitory Control Predicts Academic Performance Beyond Fluid Intelligence and Processing Speed in English-Immersed Chinese High Schoolers 736
Adam John Privitera, Yu Zhou, Xiaoyi Xie, and Dandan Huang

Temporal Dynamic Weighted Graph Convolution for Multi-agent Reinforcement Learning 743
Yuntao Liu, Yong Dou, Yuan Li, Xinhai Xu, and Donghong Liu

Children's Cardinality Knowledge Isn't Always Beneficial 750
Jike Qin and John Opfer

An EZ-circular diffusion model of continuous decision processes 756
Hasan Qarehdaghi and Jamal Amani Rad

The bouba-kiki effect in a production task 763
Mahayana Godoy and Thayná Ananias

Communicative Feedback as a Mechanism Supporting the Production of Intelligible Speech in Early Childhood 771
Mitja Nikolaus, Laurent Prévot, and Abdellah Fourtassi

Semantic features of object concepts generated with GPT-3 779
Hannes Hansen and Martin Hebart

A Naturalness Gradient Shapes the Learnability and Cross-Linguistic Distribution of Morphological Paradigms 787
Carmen Saldana, Borja Herce, and Balthasar Bickel

The emergence of moral foundations in child language development 795
Aida Ramezani, Emmy Liu, Renato Ferreira Pinto Junior, Spike W. S. Lee, and Yang Xu

Speech Rhythm Auto-Recurrence is Negatively Linked to Quality of Mental-Health Counseling Interactions 803
Vera Kempe, Mark A. Adams, George Lovell, Janet McLean, and Kate Smith

Studying the Effect of Oral Transmission on Melodic Structure using Online Iterated Singing Experiments 810
Manuel Anglada-Tort, Peter Harrison, and Nori Jacoby

How does the latent scope bias occur?: Cognitive modeling for the probabilistic reasoning process of causal explanations under uncertainty 818
Yuki Tsukamura, Taisei Wakai, Asaya Shimojo, and Kazuhiro Ueda

What Are Men and Mothers For? The Causes and Consequences of Functional Reasoning About Social Categories 824
Emily Foster-Hanson and Tania Lombrozo

From Vision to Reasoning: Probabilistic Analogical Mapping Between 3D Objects 833
Shuhao Fu, Hongjing Lu, and Keith Holyoak

Rule discovery performance unchanged by incentives 840
Pamela Osborn Popp, Ben Newell, Daniel Bartels, and Todd Gureckis

A Neural Dynamic Model Perceptually Grounds Nested Noun Phrases 847
Daniel Sabinasz and Gregor Schöner

Reasoning about the antecedents of emotions: Bayesian causal inference over an intuitive theory of mind 854
Sean Houlihan, Desmond Ong, Maddie Cusimano, and Rebecca Saxe

Modeling Cue-integration in Emotion Inferences 862
Srishti Goel, Julian Jara-Ettinger, and Maria Gendron

Structured, flexible, and robust: benchmarking and improving large language models towards more human-like behavior in out-of-distribution reasoning tasks 869
Katherine Collins, Catherine Wong, Jiahai Feng, Megan Wei, and Josh Tenenbaum

Language learners' unacceptability judgments improve with repeated exposure to acceptable sentences 876
Karina Tachihara and Adele Goldberg

There must be another way! Girls are disadvantaged when divesting from inaccurate teaching is required 882
Mia Radovanovic, Ece Yucer, and Jessica Sommerville

Word formation supports efficient communication: The case of compounds 890
Aotao Xu, Charles Kemp, Lea Frermann, and Yang Xu

Habituation reflects optimal exploration over noisy perceptual samples 898
Anjie Cao, Gal Raz, Rebecca Saxe, and Michael Frank

Flexibility in Moral Cognition: When is it okay to break the rules? 905
Joseph Kwon, Josh Tenenbaum, and Sydney Levine

Differentiating Exceptions in Rule-Plus-Exception Category Learning 912
Yongzhen Xie and Michael Mack

Revisiting the Inverted-U: Congruency Tasks Reveal Divergent Developmental Trajectories 919
Christopher Erb, Laura Germine, and Joshua Hartshorne

Sticks, leaves, buckets, and bowls: Distributional patterns of children's at-home object handling in two subsistence societies 927
Kennedy Casey, Mary Elliott, Elizabeth Mickiewicz, Anapaula Silva Mandujano, Kimberly Shorter, Mara Duquette, Elika Bergelson, and Marisa Casillas

Cross-modal perceptual learning in learning a tonal language 934
Xin Wang, Luan Li, and Bob McMurray

Task Unrelated Thoughts (TUT) affecting mood in ecological settings: from adaptive mind-wandering to maladaptive rumination. 940
Monika Kornacka, Thierry Atzeni, Izabela Krejtz, Catherine Bortolon, and Celine Baeyens

Credit assignment in hierarchical option transfer 948
Jing-Jing Li, Liyu Xia, Flora Dong, and Anne Collins

The Perceiver Architecture is a Functional Global Workspace 955
Arthur Juliani, Ryota Kanai, and Shuntaro Sasai Sasai

Core words in semantic representation 962
Andrew Wang, Simon De Deyne, Meredith McKague, and Andrew Perfors

The Diversity of Argument-Making in the Wild: from Assumptions and Definitions to Causation and Anecdote in Reddit's "Change My View" 969
Robin Na and Simon DeDeo

Decision-Making with Naturalistic Options 976
Can Demircan, Leonardo Pettini, Tankred Saanum, Marcel Binz, Blazej Baczkowski, Christian Doeller, Mona Garvert, and Eric Schulz

Fishing Free-Riders using Altruism: Zero-Sum Fitness Competition in Prey-Predator System 983
Jehun Hong, Jain Gu, Yoon Kyung Lee, and Sowon Hahn

Woman or tennis player? Visual typicality and lexical frequency affect variation in object naming 990
Eleonora Gualdoni, Thomas Brochhagen, Andreas Mädebach, and Gemma Boleda

Can Humans Do Less-Than-One-Shot Learning? 997
Maya Malaviya, Ilia Sucholutsky, Kerem Oktar, and Tom Griffiths

Eye-tracking mental simulation during retrospective causal reasoning 1004
Kristina Krasich, Kevin O'Neill, and Felipe DeBrigard

The Influence of Category-specific and System-wide Preferences on Cross-Linguistic Word Order Patterns 1011
Annie Holtz, Simon Kirby, and Jennifer Culbertson

What is a consumer product for? How teleology guides judgments of product liability 1019
Maureen Gill and Frank Keil

An Affective Probability Weighting Function for Risky Choice with Nonmonetary Outcomes 1025
Kamil Fulawka and Thorsten Pachur

Fast and frugal memory search for communication 1033
Collin Kovacs, Jasper M. Wilson, and Abhilasha Kumar

Modeling punishment as a rational communicative social action 1040
Setayesh Radkani, Josh Tenenbaum, and Rebecca Saxe

Clarifying the Causal Logic of a Classic Control of Variables Task 1048
Elizabeth Lapidow and Caren Walker

"Most" is easy but "least" is hard: Novel determiner learning in 4-year-olds 1056
Angela Xiaoxue He and Alexis Wellwood

A Neural Network Model of Continual Learning with Cognitive Control 1064
Jacob Russin, Maryam Zolfaghar, Seongmin Park, Erie Boorman, and Randall O'Reilly

Question-answer dynamics in deductive fallacies without language 1072
WooJin Chung, Nadine Bade, Sam Blanc-Cuenca, and Salvador Mascarenhas

Large-Scale vs Small-Scale Spatial Abilities: Development of a Broad Spatial Activities Questionnaire 1079
Mitchell Munns, Bailey Tranquada-Torres, Elizabeth Chrastil, and Mary Hegarty

Backgroundedness Predicts Island Status of Non-finite Adjuncts in English 1087
Savithry Namboodiripad, Nicole Cuneo, Mathew Kramer, Yourdanis Sedarous, Felicia Bisnath, Yushi Sugimoto, and Adele Goldberg

Prior Spatial Knowledge Differentially Impacts Learning in Children and Young Adults 1094
Merron Woodbury, Chunan Duan, Eryk Brol, Rena Patricia Seeger, and Margaret Schlichting

Adolescents are most motivated by encouragement from someone who knows their abilities and the domain 1102
Mika Asaba, Melissa Santos, Julian Jara-Ettinger, and Julia Leonard

Diversity and homophily in social networks 1109
Sina Fazelpour and Hannah Rubin

Neighborhoods, Directions and Distances: Segmentation Effects in a Real-World City 1117
Merve Tansan, Thomas Shipley, and Nora Newcombe

Culture and Commutativity 1124
Isabelle Boni and Steven Piantadosi

Distinct Developmental Trajectories In The Cognitive Components Of Complex Planning 1131
Ili Ma, Camille Phaneuf, Bas van Opheusden, Wei Ji Ma, and Catherine Hartley

The perceptual generalization of normalized cue distributions across speakers 1138
Wei Lai and Aini Li

The complexity of a language is shaped by the communicative needs of its users and by the hierarchical nature of their social inferences 1145
Vlad Nedelcu and Kenny Smith

Learning and enforcing a cultural consensus in online communities 1152
Necdet Gurkan and Jordan Suchow

Where Questions Come From: Reusing Old Questions in New Situations 1160
Emily Liquin and Todd Gureckis

Teasing apart models of pragmatics using optimal reference game design 1168
Irene Zhou, Jennifer Hu, Roger Levy, and Noga Zaslavsky

Children's Judgments About Asking for Past, Present, and Future Information from Google and a Person 1176
Lauren Girouard-Hallam and Judith Danovitch

Eight-Month-Old Infants' Social Evaluations of Agents Who Act on False Beliefs 1184
Brandon Woo and Elizabeth Spelke

Improving a model of human planning via large-scale data and deep neural networks 1190
Ionatan Kuperwajs, Heiko Schuett, and Wei Ji Ma

A joint analysis of dropout and learning functions in human decision-making with massive online data 1197
Ionatan Kuperwajs and Wei Ji Ma

Towards a Model of Visual Reasoning 1204
Ekaterina Y. Shurkova and Leonidas A. A. Doumas

Regularization of Word Order in the Verb Phrase differs from the Noun Phrase: Evidence from an online silent gesture perception paradigm 1211
Monica Do, Simon Kirby, and Susan Goldin-Meadow

A descriptive Bayesian account of optimism in belief revision 1218
Derek Powell

Understanding intuitive theories of climate change 1226
Brittany Schotsch and Derek Powell

No Such Thing as the Average Listener: Belief-driven versus Action-driven Strategies in Signaling 1234
Stephanie Stacy, Yiling Yun, Max Potter, Naomi Moskowitz, and Tao Gao

Does mere exposure to ideas encourage belief in them? 1241
Justin Mikell and Derek Powell

Mapping words to the world: Adults prioritize grammar, but children prioritize descriptions 1249
Gabor Brody and Roman Feiman

Immature vocalizations simplify the speech of Tseltal Mayan and US caregivers 1256
Steven Elmlinger, Michael Goldstein, and Marisa Casillas

"Because I want to": Valuing goals for their own sake 1263
Junyi Chu and Laura Schulz

Mapping language onto mental representations of object locations in transfer-of-possession events: A visual-world study using webcam-based eye-tracking 1270
Sarah Hye-yeon Lee and Elsi Kaiser

Mechanisms of Belief Persistence in the Face of Societal Disagreement 1277
Kerem Oktar and Tania Lombrozo

A Developmentally-Inspired Examination of Shape versus Texture Bias in Machines 1284
Alexa Tartaglini, Wai Keen Vong, and Brenden Lake

Evaluating models of referring expression production on an emerging sign language 1291
Leyla Kursat, Brandon Waldon, Rabia Ergin, and Judith Degen

Noun phrase representational complexity reduces maintenance cost in working memory by increasing distinctiveness between referents 1298
Chi Dat (Daniel) Lam and Ming Xiang

Ingroup-Biased Copying Promotes Cultural Diversity and Complexity 1306
Marcel Montrey and Thomas Shultz

Three-Dimensional Object Completion in Humans and Computational Models 1314
Eunice Yiu, Jasmine Collins, and Alison Gopnik

CogNGen: Building the Kernel for a Hyperdimensional Predictive Processing Cognitive Architecture 1322
Alexander Ororbia and M. Alex Kelly

Narrating the "what" and "why" of our moral actions 1330
Judy Kim and Molly Crockett

Modeling risky food sharing as rational communication about relationships 1337
Michelle Hung, Ashley Thomas, Setayesh Radkani, Josh Tenenbaum, and Rebecca Saxe

Exploring an Imagined "We" in Human Collective Hunting: Joint Commitment within Shared Intentionality 1344
Ning Tang, Siyi Gong, Minglu Zhao, Chenya Gu, Jifan Zhou, Mowei Shen, and Tao Gao

Language Learning from Communicative Goals and Linguistic Input 1351
Hao Zhu, Yonatan Bisk, and Graham Neubig

Stop, children what's that sound? Multi-modal inference through mental simulation 1359
Joseph Outa, Xi Jia Zhou, Hyowon Gweon, and Tobias Gerstenberg

Examining Real-time Attention Dynamics in Parent-infant Picture Book Reading 1367
Yayun Zhang and Chen Yu

How do people incorporate advice from artificial agents when making physical judgments? 1375
Erik Brockbank, Haoliang Wang, Justin Yang, Suvir Mirchandani, Erdem Bıyık, Dorsa Sadigh, and Judith Fan

Language universals rely on social cognition: Computational models of the use of this and that to redirect the receiver's attention 1382
Marieke Woensdregt, Julian Jara-Ettinger, and Paula Rubio-Fernandez

Getting to the root of linguistic alignment: Testing the predictions of Interactive Alignment across developmental and biological variation in language skill 1389
Ruthe Foushee, Dan Byrne, Marisa Casillas, and Susan Goldin-Meadow

Abstracts with Oral Presentation

Inferring the internal structure of social collectives 1395
Isaac Davis, Yarrow Dunham, and Julian Jara-Ettinger

The value of host-country language: The effect of Dutch language proficiency on immigrants' income, savings and financial wealth in the Netherlands 1396
Yeqiu Zheng, Yan Gu, Albert Backus, and Arthur van Soest

The left hand of time: Roles of cultural and bodily experience in constructing the mental timeline . 1397
Daniel Casasanto, Tom Gijssels, and Jason Hamm

Grounding meaning in the motor system: A p-curve analysis of the TMS and tDCS evidence 1398
Pablo Solana, Laura Miccoli, and Julio Santiago

Contractualist Concerns Shape Moral Decisions and Moral Judgments 1399
Arthur Le Pargneux, Nick Chater, and Hossam Zeitoun

Learning as Programming: Modeling Efficient Search in Human Concept Learning 1400
Joshua Rule, Steven Piantadosi, and Josh Tenenbaum

A Visuo-Sensorimotor Network of Processing Gesture-Speech Semantic Variation 1401
Kawai Chui, Kanyu Yeh, Ting-Ting Chang, and Chan-Tat Ng

Rational Inference from Number Agreement Mismatch 1402
Peng Qian, Edward Gibson, and Roger Levy

The source and type of feedback influence children's mathematics performance 1403
Megan Merrick and Emily Fyfe

Using pretense behavior to explore counterfactual self-simulation 1404
Matan Mazor, Chaz Firestone, and Ian Phillips

The Geometry of Map-Like Representations under Dynamic Cognitive Control 1405
Maryam Zolfaghar, Jacob Russin, Seongmin Park, Erie Boorman, and Randall O'Reilly

Building Blocks of Recursive Pattern Processing in Human Adults 1406
Abhishek Dedhe, Steven Piantadosi, and Jessica Cantlon

The development of commitment: Attention for intention 1407
Shuyi Zhai, Shaozhe Cheng, Naomi Moskowitz, Mowei Shen, and Tao Gao

Domain-general modal spaces play a foundational role throughout high-level cognition 1408
Eli Hecht and Jonathan Phillips

Estimating demographic bias on tests of children's early vocabulary 1409
George Kachergis, Nathan Francis, and Michael Frank

May the Force be against you: Better sensitivity to speed changes opposite to gravity 1410
Hong B. Nguyen and Benjamin van Buren

Declarative and imperative pointing acts by infants can be distinguished by accompanying preverbal vocalisations 1411
Johanna Schick, Carmen Saldana, klaus zuberbühler, and Sabine Stoll

Great Apes and Human Children Rationally Monitor their Decisions 1412
Cathal O'Madagain, Katharina Helming, Marco Schmidt, Eli Shupe, Josep Call, and Michael Tomasello

Papers with Poster Presentation

Word-final orthographic priming as a function of word frequency, prime duration, and morphological status 1413
Jeonghwa Cho and Jonathan Brennan

Pre-boundary lengthening and pause signal boundaries in action sequences 1420
Matt Hilton, Isabell Wartenburger, Julius Verrel, and Birgit Elsner

Investigating the Composite Effect in Prototype-Defined Checkerboards vs. Faces 1427
Emika Waguri, IPL McLaren, and Ciro Civile

Learning from Word Books: Does the Type of Illustration Matter? 1434
Jennifer Weber and Eliana Colunga

Do speakers and listeners remember the speech errors or the repairs in communications? 1441
Nikhil Lakhani and Nazbanou Nozari

"He only changed his answer because they shouted at him": children use affective cues to distinguish between genuine and forced consensus 1448
Emory Richardson and Frank Keil

Intuitions and Perceptual Constraints on Causal Learning from Dynamics 1455
Tianwei Gong and Neil Bramley

Maximum Entropy Function Learning 1462
Simon Segert and Jonathan Cohen

Inferring truth from lies 1469
Lauren Oey and Ed Vul

Manipulating the face contour affects face recognition performance leaving the Face Inversion Effect unaltered 1476
Siobhan McCourt, IPL McLaren, and Ciro Civile

Can Adults Revise Their Core Beliefs about Objects? 1483
Rongzhi Liu and Fei Xu

Limits on Neural Networks: Agent-First Strategy in Child Comprehension 1490
Gyu-Ho Shin and Seongmin Mun

Investigating the Presence of NegFirst Biases in Learning and Communication 1498
Danielle Burgess

The efficiency of dropping vowels in Romanised Arabic script 1505
Zeinab Kachakeche, Gregory Scontras, and Richard Futrell

The Myside Bias in Argument Evaluation: A Bayesian Model 1512
Edoardo Baccini and Stephan Hartmann

Syntactic harmony arises from a domain-general learning bias 1519
Jennifer Culbertson and Simon Kirby

Willingness to Interact Increases When Opponents Offer Specific Evidence 1526
Benjamin Scheve, Xiuyuan Zhang, and Frank Keil

The Influence of Mean Product Ratings on Review Judgments and Search 1533
Daniel Katz and Daniel Bartels

How Do People Use Star Rating Distributions? 1539
Jingqi Yu, David Landy, and Robert Goldstone

Do I need to repeat myself? Getting to the root of the Other Accent Effect 1546
Madeleine Yu, Jessamyn Schertz, and Elizabeth Johnson

Effects of negation and knowledgeability on pragmatic inferences 1553
Alice Rees and Hannah Rohde

Learning Through Collaboration: Designing Collaborative Activities to Promote Individual Learning 1559
Katherine Moore and James E. Corter

The paradox of learning categories from rare examples: a case study of NFTs & The Bored Ape Yacht Club 1566
Jordan Suchow and Vahid Ashrafimoghari

Training flexible categorization to improve arithmetic problem solving: A school-based intervention with 5th graders 1573
Eric Iacono, Hippolyte Gros, and Evelyne Clément

Modeling Reward Learning Under Placebo Expectancies: A Q-Learning Approach 1581
Nick Augustat, Li-Ching Chuang, Christian Panitz, Christopher Stolz, Erik Mueller, and Dominik Endres

Evidence for Dynamic Consideration Set Construction in Open-Ended Problems 1588
Jonas Nelle and Fiery Cushman

Do people use social information to improve predictions about everyday events? 1595
Stephen Payne and Alan Jern

Framing biodiversity Conceptions 1602
Laura Leon Perez, Catherine Audrin, and Emmanuel Sander

Efficient and Effortful Theory of Mind Reasoning in the AToM Cognitive Model 1609
Irina Rabkina and Clifton McFate

Origins of Art: the Intersection of Cognitive and Cultural Evolution 1616
Larissa Mendoza Straffon

Extending the Predictive Performance Equation to Account for Multivariate Performance 1623
Michael Collins, Florian Sense, Michael Krusmark, and Tiffany Jastrzembski

Walking munu and jumping bibi: Sound symbolism in (non)words produced by Turkish speakers . 1630
Selin Topel, Junko Kanero, Noburo Saji, and Tilbe Göksun

Rhythmic Coordination Affects Children's Perspective-Taking during Online Communication 1636
Yingjia Wan, Yipu Wei, Baorui Xu, and Michael Tanenhaus

Fact-checking Instruction Strengthens the Association between Attitudes and Use of Lateral Reading Strategies in College Students 1644
Jessica Brodsky, Arshia Lodhi, Catherine Messina, and Patricia Brooks

Grapho-Syllabic Systematicity in Chinese: Chinese Pictographs Have a Non-Arbitrary relation with their Pronunciations 1651
Fiona Du, Hana Jee, Monica Tamariz, and Richard Shillcock

Test-retest reliability of task-based measures of voluntary persistence 1658
Yixin Chen, Daniel Fulford, and Joseph McGuire

Proto-trust and trust attribution: a theory of intuitive, affective forms of trust and the means by which trust decisions are made 1665
Lauren Fell and Peter Bruza

User-Generated Star Ratings Are Not Inherently Comparable: How Star Ratings Structure Leads to Poor Choices 1674
Matt Meister and Nicholas Reinholtz

Moving past indirect proxies for language experience: 'Native speaker' and residential history are poor predictors of language behavior 1682
Lauretta Cheng, Mathew Kramer, Ria Upreti, and Savithry Namboodiripad

Modeling the regular/irregular dissociation in non-fluent aphasia in a recurrent neural network .. 1690
Alexandra Krauska and Naomi Feldman

Neural Language Model-based Readability Assessment of Computer Science Introductory Texts for English-as-a-Second Language Learners 1698
Yo Ehara

Hering's opponent-colors theory fails a key test in a non-Western culture 1705
Bevil Conway, Saima Malik-Moraleda, and Edward Gibson

Measuring Meaning: Alignment and Misalignment Across Indices of Verb Semantics 1713
Lilia Rissman

Homophily and Incentive Effects in Use of Algorithms 1720
Riccardo Fogliato, Sina Fazelpour, Shantanu Gupta, Zachary Lipton, and David Danks

Is the Language Familiarity Effect gradual ? A computational modelling approach 1728
Maureen de Seyssel, Guillaume Wisniewski, and Emmanuel Dupoux

Modeling aberrant volatility estimates in Autism Spectrum Disorder 1736
Hauke Niehaus, Sanna Stroth, Inge Kamp-Becker, and Dominik Endres

The Pure Poet: How Good is the Subjective Credibility and Stylistic Quality of Literary Short Texts Written with an Artificial Intelligence Tool as Compared to Texts Written by Human Authors? ... 1744
Vivian Emily Gunser, Steffen Gottschling, Birgit Brucker, Sandra Richter, Dîlan Çakir, and Peter Gerjets

How does Sustaining and Interleaving Visual Scaffolding Help Learners? A Classroom Study with an Intelligent Tutoring System 1751
Tomohiro Nagashima, Elizabeth Ling, Bin Zheng, Anna Bartel, Elena Silla, Nicholas Vest, Martha Alibali, and Vincent Aleven

Task-Based and Individual Differences Influence the Effect of Gesture Observation on Novel L2 Speech Sound Learning 1759
Laura Morett

The Effects of Reflective Reasoning on Philosophical Dilemmas 1765
William T. Ervin and Daniel Corral

Emotion Evaluator: Expanding the Affective Lexicon with Neural Network Model 1771
Junho Lee, Jaeseo Lim, Jooyong Park, and Cheongtag Kim

Talker identification as a categorization problem 1779
Casey Roark, Gangyi Feng, and Bharath Chandrasekaran

Improving Systematic Generalization Through Modularity and Augmentation 1787
L.E. Ruis and Brenden Lake

Color Overmodification Emerges from Data-Driven Learning and Pragmatic Reasoning 1796
Fei Fang, Kunal Sinha, Noah Goodman, Christopher Potts, and Elisa Kreiss

Memory without Imagery: No Evidence of Visual Working Memory Impairment in People with Aphantasia 1804
Kathryn Knight, Fraser Milton, and Adam zeman

Of a Different Persuasion: Perception of Minority Status and Persuasive Impact 1811
Lindsay Fields, Zaid Marji, and John Licato

Powering up causal generalization: A model of human conceptual bootstrapping with adaptor grammars 1819
Bonan Zhao, Neil Bramley, and Chris Lucas

Adjusting the Use of Generalizations Based on Audience Expertise 1827
Jeff Coon, Alexander Etz, Gregory Scontras, and Barbara Sarnecka

Familial Guilt: A Cross-Society Comparison of Judgments of Collective Family Responsibility 1834
Junho Lee and Keith Holyoak

Teleological essentialism across development 1841
David Rose, Sara Jaramillo, Shaun Nichols, and Zachary Horne

Trees neural those: RNNs can learn the hierarchical structure of noun phrases 1848
Yevgen Matusevych and Jennifer Culbertson

Making the Question Under Discussion explicit shifts counterfactual interpretation 1855
Ebru Evcen and Eva Wittenberg

Modeling cognitive diversity in group problem solving 1863
Samuli Reijula and Jaakko Kuorikoski

How long are real-life events? 1870
Luz Sastre, Jeffrey Zacks, and Simon Dennis

Cognitive and Emotional Impact of Politically-polarized Internet Memes About Climate Change .. 1877
Emily Wong, Keith Holyoak, and Hunter Priniski

Retrieval Practice Promotes Learning of Turkish as a Foreign Language: A Computer-Assisted Language Learning Study 1884
Maya Rose, Patricia Brooks, Arshia Lodhi, and Angela Cortez

Towards Augmenting Humans in the Field: A Review of Cognitive Enhancement Methods and Applications 1891
Alexandre Marois and Daniel Lafond

Data-driven Crosslinguistic Syntactic Transfer in Second Language Learning 1903
Zoey Liu, Tiwalayo Eisape, Emily Prud'hommeaux, and Joshua Hartshorne

Gesture and Speech Disfluency in Narrative Context: Disfluency Rates in Spontaneous, Restricted, and Encouraged Gesture Conditions 1912
Can Avcı, Burcu Arslan, and Tilbe Göksun

Modeling atypicality inferences in pragmatic reasoning 1918
Ekaterina Kravtchenko and Vera Demberg

Criticality-Based Advice in Reinforcement Learning 1925
Yitzhak Spielberg and Amos Azaria

Understanding and Modeling Coordination in the Minimum Effort Game 1932
Alexander Hough and Ion Juvina

The relationship between individual differences in mental imagery vividness and emotional distress 1940
Aaron Necaise, Daniel McConnell, and Mary Amon

Modeling the Learning and Use of Probability Distributions in Chimpanzees and Humans 1947
Thomas Shultz and Ardavan S. Nobandegani

IPOWER: Incremental, Probabilistic, Open-World Reference Resolution 1954
Will Culpepper, Thomas Bennett, Lixiao Zhu, Rafael Sousa Silva, Ryan Blake Jackson, and Tom Williams

Leveraging Intentional Factors and Task Context to Predict Linguistic Norm Adherence 1962
Cailyn Smith, Charlotte Gorgemans, Ruchen Wen, Saad Elbeleidy, Sayanti Roy, and Tom Williams

"A fork is a food stabber": Linguistic creativity in English L1 and L2 speakers 1970
Stephen Skalicky, Nancy Bell, Mihai Dascalu, and Scott Crossley

A Property Induction Framework for Neural Language Models 1977
Kanishka Misra, Julia Rayz, and Allyson Ettinger

The role of reading test strategy in reading comprehension: An eye-movement study 1985
Jocelyn Ching Yan Kwok and Janet Hsiao

Compositional Generalization in a Graph-based Model of Distributional Semantics 1993
Shufan Mao, Philip Huebner, and Jon Willits

Eliciting Human Beliefs using Random Generation 2000
Pablo Leon Villagra, Lucas Castillo, Nick Chater, and Adam Sanborn

Temporal Gestures in Different Temporal Perspectives 2007
Emir Akbuga, Uras Gülhan, Sudenur Güngör, and Tilbe Göksun

Does word boundary information facilitate Chinese sentence reading in children as beginning readers? 2014
Weiyan Liao, Wing Chi Chong, and Janet Hsiao

Clickbait's Impact on Visual Attention – An Eye Tracker Study 2022
Vivek Kaushal, Sawar Sagwal, and Kavita Vemuri

The Impact of Prior Knowledge in Narrative-Based Learning on Understanding Biological Concepts in Higher Education 2030
Samuel Tobler, Tanmay Sinha, Katja Koehler, Ernst Hafen, and Manu Kapur

Absence Makes the Trust in Causal Models Grow Stronger 2037
Samantha Kleinberg, Eren Alay, and Jessecae Marsh

No evidence for short-timescale temporal declines in expectations within a controlled cognitive task 2044
Daniel Bennett

Timing relationships between representational gestures and speech: A corpus based investigation . 2052
Ed Donnellan, Levent Emir Özder, Hillarie Man, Beata Grzyb, Yan Gu, and Gabriella Vigliocco

Coding Strategies in Memory for 3D Objects: The Influence of Task Uncertainty 2059
Christopher Bates and Samuel Gershman

Does One Size Fit all in Crosslinguistic Dependency Length Minimization? 2066
Zoey Liu, Ria Upreti, Mathew Kramer, and Savithry Namboodiripad

Who owns your information? Young children's judgments of who owns the general and personal information users share with apps. 2074
Shaylene Nancekivell and Jason Fahey

Reinforcement Learning Agents for Interacting with Humans 2079
Ido Shapira and Amos Azaria

Meta-Learning of Dynamic Policy Adjustments in Inhibitory Control Tasks 2087
Soumya Chatterjee, Aakriti Kumar, and Pradeep Shenoy

Posttraumatic stress disorder and differences in eye gaze during a visual search task with cognitive load 2094
Heather Roy, Leah Enders, Thomas Rohaly, Bianca Dalangin, Jessica Villarreal, and Angela Jeter

Intentional Forgetting of Habits? Combining List-Method Directed Forgetting and Item-Specific Stimulus-Response Priming 2101
Hannah Dames, Andrea Kiesel, Christina U. Pfeuffer, and Marco Ragni

Frequently produced semantic features reflect principled connections 2109
Hillary Harner and Sangeet Khemlani

A Bayesian Multilevel Analysis of Belief Alignment Effect Predicting Human Moral Intuitions of Artificial Intelligence Judgements 2116
Yuxin Liu and Adam Moore

Intolerant Data: Testing The Tolerance Principle 2126
Xiaomeng Ma, Martin Chodorow, and Virginia Valian

Interaction dynamics affect the emergence of compositional structure in cultural transmission of space-time mappings 2133
Tessa Verhoef, Esther Walker, and Tyler Marghetis

A conflict-based model of speech error repairs in humans 2140
Jack Burgess and Nazbanou Nozari

Predicting Human Judgments of Relational Similarity: A Comparison of Computational Models Based on Vector Representations of Meaning 2147
Bryor Snefjella, Nicholas Ichien, Keith Holyoak, and Hongjing Lu

Viewers Spontaneously Represent Event Temporal Structure 2155
Yue Ji and Anna Papafragou

Events and Objects Are Similar Cognitive Entities 2163
Yue Ji and Anna Papafragou

Modeling Fixation Behavior in Reading with Character-level Neural Attention 2171
Songpeng Yan, Michael Hahn, and Frank Keller

Low Spatial Proximity Between Text and Illustrations Improves Children's Comprehension and Attention: An Eye Tracking Study 2178
Morgan Boyd, Karrie Godwin, Emma Gurchiek, Anna Fisher, and Cassondra Eng

The Compelling Complexity of Conspiracy Theories 2185
Jessecae Marsh, Cayse Coachys, and Samantha Kleinberg

Reasoning from Samples to Populations: Children Use Variability Information to Predict Novel Outcomes 2193
Elizabeth Lapidow, Mariel Goddu, and Caren Walker

Modeling Causal Inference from Emotional Displays 2200
Dennis Teo, Zheng Yong Ang, and Desmond Ong

Is the learning of artificial phonotactic rules interfered with by the concurrent experience of English? 2207
Suyeon Hwang, Gary Dell, and Cynthia Fisher

The driving forces of polarity-sensitivity: Experiments with multilingual pre-trained neural language models 2214
Lisa Bylinina and Alexey Tikhonov

Leveraging psychometrics of rational inattention to estimate individual differences in the capacity for cognitive control 2222
Huang Ham, Ivan Grahek, Laura Bustamante, Nathaniel Daw, Andrew Caplin, and Sebastian Musslick

The Counterintuitive Interpretations Learned from Putatively Intuitive Simulations 2230
Sebahat Gok and Robert Goldstone

Learning from Failure with Self vs Task Focused Feedback 2236
Sebahat Gok and Emily Fyfe

Verbal Labels Affect Holistic and Analytic Thinking Styles in Native English Speakers 2242
Meg Richter, Birgit Koopmann-Holm, and Lang Chen

Interaction in Acting Training and its Manifestations in Novices and Actors 2250
Jingyan Sun and Takeshi Okada

Bayesian gates: a probabilistic modeling tool for temporal segmentation of sensory streams into sequences of perceptual accumulators 2257
Mamady Nabé, Jean-Luc Schwartz, and Julien Diard

Bayesian comparators: a probabilistic modeling tool for similarity evaluation between predicted and perceived patterns 2264
Alexandra Steinhilber, Sylviane Valdois, and Julien Diard

Effect of stimuli congruency on gaze behavior and memory 2271
Vivienne Kraeter, Veronika Kritskaia, Travis Wiltshire, and Silvy Collin

A neural implementation of MINERVA 2 2278
Erik Reichle, Aaron Veldre, Lili Yu, and Sally Andrews

Improving the Perception of Fairness in Shapley-Based Allocations 2285
Meir Nizri, Amos Azaria, and Noam Hazon

Acceptability of technology involving artificial intelligence among future teachers 2292
Salomé Cojean and Nicolas Martin

Exploring the Structure of Predecisional Information Search in Risky Choice 2297
Florian Bolenz and Thorsten Pachur
