Table of contents

Preface	III
<i>Terzaghi Oration</i>	
10th Terzaghi Oration: Geotechnical engineering in a deltaic environment <i>A. Gens</i>	3
<i>State of the Art Papers</i>	37
<i>State of the Art 1: Transportation Geotechnics</i>	39
State of the Art in Transportation Geotechnics <i>A. Gens, R. Kelly, B. Indraratna, W. Powrie, C. Zapata, Y. Kikuchi, E. Tutumluer and A.G. Correia</i>	41
<i>State of the Art 2: Energy Geotechnics</i>	93
Energy geo-engineering <i>J.C. Santamarina, A. Aftab, D.N. Espinoza, M. Dusseault, A. Gens, H. Hoteit, S. Kim, J.Y. Lee, L. Lei, G. Narsilio, J.-M. Pereira, M. Sanchez, K. Soga, M.V. Villar and M. Violay</i>	95
<i>State of the Art 3: Tailing and Mine Wastes</i>	119
Geotechnics of mine tailings: a 2022 State of the Art <i>A. Fourie, R. Verdugo, A. Bjelkevik, L.A. Torres-Cruz and D. Znidarcic</i>	121
<i>State of the Art 4: Environmental Geotechnics</i>	185
Protecting the environment from contamination with barrier systems: advances and challenges <i>R. K. Rowe, S. Jefferis, F.B. Abdelaal, A. Dominijanni, K. Legge, E.M. Palmeira, J. Scheirs, C.D. Shackelford, J. Scalia IV, T.L.T. Zhan, C.H. Benson, A. Bouazza, G.D. Emidio, J.C. Evans, E. Fratolocchi, M.G. Gardoni, T. Katsumi, M. Manassero and D. Parra</i>	187
<i>State of the Art 5: Unsaturated Soils</i>	295
State of the Art Report. Advances in Unsaturated Soil Mechanics: Constitutive modelling, experimental investigation, and field instrumentation <i>N. Khalili, E. Romero and F.A.M. Marinho</i>	297

<i>State of the Art 6: Earthquake Geotechnics</i>	349
Nonlinear dynamic analyses involving soil liquefaction or cyclic softening <i>R. W. Boulanger</i>	351
Nonlinear dynamic analyses for evaluating seismic ground deformation—Delayed flow failure <i>R. Harran, D. Terzis & L. Laloui</i>	381
<i>State of the Art 7: Biogeotechnics</i>	403
State of the Art: MICP soil improvement and its application to liquefaction hazard mitigation <i>J.T. DeJong, M.G. Gomez, A.C.M. San Pablo, C.M.R. Graddy, D.C. Nelson, M. Lee, K. Ziotopoulou, M.E. Kortbawi, B. Montoya and T.-H. Kwon</i>	405
<i>Corporate Associates Presidential Group</i>	509
Are we overdesigning: Results of ISSMGE survey <i>P. Day and J.-L. Briaud</i>	511
<i>Invited Papers</i>	531
<i>Artificial Intelligence</i>	533
Deep learning for rainfall prediction: data enhancement, forecasting, and estimation <i>L. Chen, J. Wang, J. Li, C.W.W. Ng and Y. Shen</i>	535
Machine learning in geotechnical engineering: opportunities and applications <i>Z. Liu and S. Lacasse</i>	543
<i>Planetary Geotechnics</i>	559
The first ever landing and experiments on the far side of Moon & Future geotechnical considerations <i>H. Liu, G. Xie and W. Zhang</i>	561
The mechanical properties of the Martian soil at the InSight landing site <i>P. Delage, E. Marteau, M.P. Golombek, K. Hurst, W.B. Banerdt, S. Piqueux, S. Kedar, M. Lemmon, N.R. Williams, N. Brinkman, P. Edme, J. Robertsson, D. Sollberger, S. Stähler, C. Schmelbach, P. Lognonné, K. Onodera, C. Vrettos, V. Asan-Mangold, M. Grott, N. Mueller, N. Murdoch, T. Spohn, N. Warner, R. Widmer-Schmidrig, B. Caicedo-Hormaza, J.P. Castillo-Betancourt, L. Lange and N. Verdier</i>	567
<i>Engineering Geology</i>	583
The impacts of climate change on chains of geological hazards on the Tibetan Plateau and its margins <i>X. Fan</i>	585

<i>Rock Mechanics</i>	595
Application of satellite technology (GPS and SAR) for monitoring ground surface displacements in rock and geotechnical engineering <i>N. Shimizu</i>	597
<i>Bright Spark Papers</i>	617
Prediction of earthquake-induced ground motions using simulation methods and their validation against observations <i>B.A. Bradley</i>	619
Soft peaty clay stabilization in Sri Lanka: sustainability through utilizing secondary raw materials <i>A. Ranathunga and A. Kulathilaka</i>	625
Author Index	631

20th International Conference on Soil Mechanics and Geotechnical Engineering (ICSMGE 2022)

Sydney, Australia
1-5 May 2022

Volume 2 of 2, Part 1

Table of contents

Appreciation to reviewers LIV

TC 101: Laboratory Stress Strain Strength Testing of Geomaterials

Laboratory investigation of the effects of asperity concentration and geotextile-type on geomembrane/geotextile interface shear characteristics <i>D. Adeleke, D. Kalumba, L. Nolutshungu & J. Oriokot</i>	3
Experimental evaluation of shear strength fluctuations of clayey soils due to multiple cyclic loads <i>B. Ajmera, B. Tiwari, M. Iqbal & T. Meeks</i>	9
Maximum shear modulus and shear modulus reduction curves of silt-clay mixtures <i>B. Ajmera, B. Tiwari & Q. Phan</i>	15
An experimental study on the effects of the sample size and geometry on the liquefaction behaviour of sands <i>J. Oliveira, L. Araújo Santos, P. Coelho & D. Taborda</i>	21
Comparison of deformation modulus determined by triaxial, compression and plate load tests of loamy soils <i>T. Awwad, R. Lukpanov, S. Enkebaev, D. Tsygulev, D. Dussebinov & D. Bazarbayev</i>	27
Experimental and numerical assessment of fabric anisotropy using multi-orientation shear wave velocity measurements <i>M. Basson & A. Martinez</i>	31
Large shearing device – influence of swing suspension on direct simple shear device <i>E. Bergliv, Q. Jia, J. Laue & T. Edeskär</i>	37
An efficient tool to determine S_u of soft soils <i>M. Bouassida & D. Azaiez</i>	43
Estimation of strength and stiffness of expandable foam grout using elastic and electromagnetic waves <i>W. Han, J. Lee, J. Park & Y. Byun</i>	49
Effect of drained cyclic preshearing on the undrained cyclic response of dense sand in triaxial tests <i>P. Carotenuto, H. Jostad & Y. Teng</i>	53
Behavior of Mexico City soil under cyclic shear stresses <i>J. Díaz-Rodríguez</i>	59
A new fabric evolution monitoring method using continuous bidirectional shear wave velocity measurements in sand <i>K. Fakharian, F. Kaviani-Hamedani, A. Sooraki & M. Amindehghan</i>	63
S-wave velocity assessment using time-scale approaches with wavelets <i>A. Fernández-Lavín & E. Ovando-Shelley</i>	69
Comparison of small and full scale shear box tests on large particle size aggregate <i>G. Tanghetti, M. Davies & R. Goodey</i>	75
Experimental estimation of tailings rheological properties using the inclined plane ramp <i>A. Halabi, V. Sakano, G. Brasileiro, M. Futai & R. Pileggi</i>	81
Required pressure to counteract specimen expansion of tight shales under oedometric and triaxial loading in the laboratory <i>K. Halvorsen, M. Soldal, H. Smith & B. Bohloli</i>	87
Permanence of enhanced compressibility of bio-cemented sands with stress and time <i>R. Harran, D. Terzis & L. Laloui</i>	93
Characteristics on liquefaction behavior of undisturbed sample subjected to aging effect <i>T. Honda & N. Adachi</i>	99

Experimental study on the particle breakage of calcareous sand <i>L. Cheng, M. Hossain, Y. Kim, Y. Hu & S. Ullah</i>	105
Evaluating shear strain accumulation of sands exhibiting cyclic mobility behavior <i>F. Humire, K. Ziotopoulou & J. DeJong</i>	111
Liquefaction characteristics of sand due to various irregular waves by cyclic torsional shear test <i>K. Ishikawa, S. Yasuda & K. Oikawa</i>	117
Low stress direct shear interface tests and their application to pipeline engineering <i>H. Joer, H. Zhou & F. Lee</i>	123
The influence of lateral confinement on the results of cyclic direct simple shear tests on sand <i>M. Konstadinou, A. Bezuijen, M. Zuidhoek & M. Korff</i>	129
Studies of clay soils with a loading prehistory <i>I. Mirsayapov & I. Koroleva</i>	135
Determination of deformation and strength parameters in Eemian gyttja <i>Z. Lechowicz, K. Golawska, M. Wdowska & M. Sulewska</i>	141
A fractional state hardening model for rockfills <i>H. Li & S. Zhang</i>	147
A procedure to reach high liquefaction resistance in laboratory testing on reconstituted sand specimens by applying pre-shear history <i>W. Liu & J. Koeski</i>	153
Dynamic driving resistance analysis for penetrometers in sandy soil samples <i>S. López Retamales, J. Canou, J. Dupla & M. Navarrete</i>	157
Shear band measurement in transparent sand <i>D. Marx & J. Zornberg</i>	163
Experimental study on the shear strength of medium-coarse rockfill <i>M. Muñiz-Menéndez & J. Estaire</i>	169
Structure of cemented granular materials <i>T. Murthy & S. Singh</i>	175
Separation of the primary and secondary consolidation of freeze-dried clay <i>H. Ohta, T. Kondo, T. Hashimoto, T. Sakagami & A. Iizuka</i>	179
Effects of particle shape and orientation on anisotropy of granular materials observed in elastic wave velocities <i>J. Liu, M. Otsubo, R. Kuwano & Y. Kawaguchi</i>	185
Laboratory testing of water flow in building materials <i>M. Pap, A. Mahler & S. Nehme</i>	191
Comparison of shear strength characteristics of sandy and clayey soils reinforced with glass fibres <i>S. Patel & B. Singh</i>	197
The effect of salt content on the determination of maximum and minimum dry densities of Marine Sands <i>J. Powell & V. Sadasivan</i>	203
Layering – the missing factor in fabric studies? <i>D. Reid, A. Fourie & R. Fanni</i>	209
Advanced laboratory testing of a sand-resin mixture liquefaction mitigation measure <i>L. Miranda, L. Caldeira & J. Bilé Serra & R. Gomes</i>	215
Experimental study on the evolution of internal stress in desiccation cracking process <i>M. Sawada, Y. Sumi, K. Yoshikawa & M. Mimura</i>	221

Post cyclic monotonic shearing behavior of carbonate sediments <i>S. Sharma, H. Joer, N. Boylan</i>	227
Effect of nonplastic fines in the undrained response of sand under high pressures <i>D. Silva & F. Ochoa</i>	233
Calibration of a cyclic constitutive model to Bay of Campeche carbonate sand <i>E. Vega Fernández, F. Flores López, V. Taboada, D. Roque & P. Nabor</i>	239
Image-processing to identify soil particles for fabric quantification using X-ray μ -CT scanning <i>A. Valverde Sancho & D. Wijewickreme</i>	245
Shear strength behaviour of a coral sand in Vietnam <i>A. Vu, D. Pham, V. Vu, T. Nguyen & D. Phung</i>	251
An automated image-based technology for soil 3D deformation measurement and constitutive parameters derivation <i>Z. Wang, W. Du, J. Doherty, B. Lehane, S. Sam, D. White & Q. Liu</i>	255
One-dimensional swelling deformation of compacted bentonite without stress history after saturation <i>Y. Watanabe</i>	261
Evaluation of residual strength characteristics of reconstituted volcanic soil at Atsuma town, Hokkaido with stacked-ring shear tests <i>K. Watanabe, H. Kyokawa, T. Onodera, J. Koseki & Y. Aoyagi</i>	267
Three-dimensional finite element analysis of a pipe box tunnel in sedimentary rock <i>E. Woon, I. Tse, S. Teo & T. Ng</i>	273
Undrained deformation responses of K_0 consolidated stiff clays under cyclic traffic loadings <i>Z. Yang, X. Liu, Y. Cai, K. Pan & R. Jardine</i>	279
Behavior of a rockfill material with the independent variation of the stress Lode's angle <i>Y. Zhou, J. Pan, Z. Cheng & Y. Zuo</i>	285
Small and large strain approach in triaxial testing <i>C. Zwanenburg, H. Teunissen, M. Konstadinou & M. Van</i>	291
 <i>TC 102: Laboratory Stress Strain Strength Testing of Geomaterials</i>	
Assessing the nonlinear load-deformation relationships of vertically loaded shallow foundations on clays using the seismic piezocone testing <i>S. Agaiby & S. Ahmed</i>	299
Evaluation of Becker penetration test and its correlations <i>M. Almasi & A. Ramezankhani</i>	305
Evaluation of the bulking factor of soils <i>J. de Camargo Barros, R. Rocha & R. Vieira</i>	311
Profiling hydraulic conductivity using a Permeafor <i>S. Wuebbolt, J. Benoit, & P. Reiffsteck</i>	317
Shallow foundation design based on load-transfer curves obtained from DCLT test <i>P. Reiffsteck, T. Luong, F. Szymkiewicz, M. Navarrete, Q. Tran, C. Oliveira, A. Teyssier & C. Jacquard</i>	323
An automated system to determine constitutive model parameters from in situ tests <i>R. Brinkgreve, H. Lengkeek, I. Van Berkom & A.K. De Jong</i>	329

Assessment of liquefaction triggering by seismic dilatometer tests: comparison between semi-empirical approaches and non-linear dynamic analyses <i>A. Chiaradonna & P. Monaco</i>	335
Evaluation of selected procedures for estimating shear wave velocity with SCPTu and bender element <i>M. Dahl & E. Haugen</i>	341
Use of acoustic data to complement CPTu in identifying a significant soil layer for fjord sediments <i>S. Degago, A. Kavli, T. Tomassen, H. Kjennbakken & A. Watn</i>	347
Sensitivity of CPT-based liquefaction assessment to sleeve friction depth correction <i>R. Dhakal, M. Cubrinovski & J. Bray</i>	353
An application of lightweight portable impulse and variable energy dynamic penetrometer devices for compliance testing of performance-based rail formation <i>A. Doe, V. Blanchet, D. Tun, K. Polli & L. Yang</i>	359
A proposed correlation between downhole shear wave velocity and unconfined compressive strength for weak sedimentary rock formations: insights from Dubai's geology <i>M. El-Sherbiny, A. Fayed & A. Mousa</i>	365
Soil site stiffness categorization based on MASW field testing <i>S. Erlingsson, E. Olafsdottir & B. Bessason</i>	371
Evaluation of pre-consolidation pressure and undrained shear strength of marine clays from CPTu data <i>D. Ferreira & F. Massad</i>	377
A new approach to evaluate the soil disturbance due to tube sampling <i>A. Gens, L. Monforte, M. Arroyo & J. Carbonell</i>	383
Optimal test methods for determining material parameters <i>J. Hambleton, A. Nally & S. K�uc�kyavuz</i>	389
Detection of thin clay layers in sand using a standard CPTU probe <i>H. Hammer, S. Nordal & J. L'Heureux</i>	395
Determination of stiffness parameters by means of numerical recalculation of CPTu in silty deposits <i>L. Hauser, S. Oberhollenzer, H. Schweiger, R. Marte & C. Fabris</i>	401
Characteristics of transferred energy according to effect of rods in standard penetration test <i>G. Park, J. Lee, N. Kim & W. Hong</i>	407
Spectral-analysis-of-body-waves (SABW) method for crosshole seismic testing <i>S. Hwang & K. Stokoe II</i>	411
Comparing dissipation tests of CPTu and DMT <i>E. Imre, M. Heged�s, D. Marchetti, M. Juh�sz, Z. Hortob�gyi, D. Bishop & L. Bates</i>	417
Monotonous and cyclic pressuremeter tests with pore pressure measurements – application to CSR evaluation <i>P. Karagiannopoulos, P. Reiffsteck & M. Peronne</i>	423
Measurement of the pore pressure around the pressuremeter probe in a calibration chamber. Numerical, analytical and physical approaches <i>P. Karagiannopoulos, M. Peronne & P. Reiffsteck</i>	429
Challenges of deflection wall design for the protection of existing bridge piers—a rail case study <i>M. Narayana, R. Kingsland & N. Shrestha</i>	435
Predicting accurate thermal conductivity of laboratory samples based on the thermal piezocone penetration probe test (T-CPTU) <i>X. Liu, S. Congress, G. Cai, S. Liu & A. Puppala</i>	441

Determination of non-linear elasticity parameters from innovative pressuremeter tests. Strain transformed approach for hyperbolic undrained behaviour <i>A. Lopes dos Santos, A. Puech, J. Dupla & J. Canou</i>	447
Stability analysis of large diameter tank foundations in mixed cut & fill with cavities <i>S. Matchala, J. Park, S. Jung, E. Cho & B. Kim</i>	453
Screening for flow liquefaction for tailings and natural soils by CPTU <i>P. Mayne & J. Sharp</i>	459
A numerical model for penetration and heat conduction of thermal cone penetration test with an optimization method for interpretation <i>P. Mo, Y. Hu, Z. Ren & F. Gao</i>	465
Validation of Medusa DMT test procedures in Fucino clay <i>P. Monaco, D. Marchetti, G. Totani, F. Totani & S. Amoroso</i>	471
Membrane correction for pressuremeter test <i>J. Monnet, L. Boutonnier, D. Mahmutovic & M. Ouedraogo</i>	477
Equivalent CPT Method for estimation of shear strength parameters for a project site in Kolkata using combination of SPT, DMT and CPT – a case study <i>S. Nandi, K. Bandyopadhyay, A. Halder & D. Basu</i>	483
CPT-DMT correlation for loess subsoil from Lublin area in Poland <i>K. Nepelski & R. Malgorzata</i>	489
Express assessment of deformation modulus of dispersive soils by multichannel analysis of surface waves <i>V. Ofrikhter & V. Antipov</i>	495
Non-invasive active- and passive-source stiffness characterization at a loose sand site <i>E. Olafsdottir, B. Bessason & S. Erlingsson</i>	501
The effects of cone geometry and testing deployment on CPT measurements – practical examples in a normally consolidated deep-water clay <i>N. Ramsey</i>	507
Prediction of shear wave velocity V_s from PMT <i>P. Reiffsteck, C. Jacquard, E. Jandel, E. Petitjean & J. Benoît</i>	513
CPT-DMT correlations for settlement prediction in some Brazilian tropical soils <i>B. Rocha & H. Giacheti</i>	519
Lessons learnt from seabed cone penetration testing in Sydney Harbour <i>G. Scholey & F. MacGregor</i>	525
Equipment limits and parameter determination of cone penetration and flat dilatometer tests in hard soils and soft rocks (HSSR) <i>S. Stauder, T. Marcher & M. Harmuth</i>	531
Energy transfer characteristics of standard penetration test using high-speed camera and instrumentations <i>E. Sze, P. Chung, E. Wong & L. Wong</i>	537
Towards improved image of geotechnical profession <i>I. Towhata, K. Azuno, H. Imanishi, S. Sawada & T. Nojima</i>	543
Effect of penetration rate on push force for the Norwegian total sounding <i>S. Valsson & G. Eiksund</i>	549
Influence of different starting models on near-surface two-dimensional full waveform inversion <i>J. Vantassel & B. Cox</i>	555

Field experimental study to investigate pull-out mechanism of flip-type ground anchors installed in clay <i>S. Yoshida, T. Matsumoto & M. Yoshida</i>	561
Static & dynamic probing of rough breakable sands <i>N. Zhang, M. Arroyo, A. Gens & M. Ciantia</i>	567
 <i>TC 103: Numerical Methods</i> 	
Numerical study on aseismic reinforcement method for leaning-type retaining wall <i>K. Abe</i>	575
The effect of the variation of the modulus of subgrade reaction on the design of large shallow foundations <i>G. Abou-Jaoude & H. Alzoaby</i>	581
A rate-dependent hydrodynamic-plastic model for crushable sand <i>E. Alaei, B. Marks & I. Einav</i>	585
2-D basin-scale seismic response investigations of the Kitimat valley, B.C., Canada, by using a coupled FE/BE numerical method <i>D. Amini, P. Maghoul, D. Perret & B. Gatmiri</i>	591
Ground displacement at Lyttelton Port; A comparison between Plaxis 2D models and monitored movements <i>J. Arefi, R. Young & C. Chin</i>	597
Three-dimensional finite element analysis of a single pile subjected to negative skin friction <i>G. Bande, R. Sujawat & A. Dey</i>	603
A novel nonlinear analysis of piles and monopiles subjected to lateral loads <i>D. Basu & B. Gupta</i>	609
Finite element modelling of inclined pullout behaviour of geosynthetic sheet <i>R. Bhowmik, J. Shahu & M. Datta</i>	615
Pressure grouting of microfine cements in soils: micromechanical processes <i>K. Boschi, M. Ciantia & C. di Prisco</i>	621
Heat exchange potential of thermally-activated embedded retaining walls <i>T. Freitas, D. Silva & P. Bourne-Webb</i>	627
Hierarchical Multiscale SPH (HM-SPH): A new continuum approach to model desiccation cracking in clay soils <i>G. Nguyen & H. Bui</i>	633
Experimental and numerical study on the behavior of soil nailing excavations in volcanic soils <i>V. Capa, P. Calderón & F. Torrijo</i>	639
Numerical analysis of one-dimensional consolidation of unsaturated soil with non-Darcian fluid flow <i>M. Chakraborty & A. Singh</i>	645
Estimation of piled raft settlement based on linear elastic finite element analysis <i>T. Chakraborty, P. Bhartiya & D. Basu</i>	651
Finite difference analysis on settlements of piled mat foundation considering the effects of soil springs and pile-to-pile interactions <i>D. Chang, M. Hung, Y. Lai & A. Zhussupbekov</i>	657
Experimental and DEM study of monotonic and cyclic simple shear testing of an angular sand <i>M. Ciantia, M. Previtali & T. Cakir</i>	661
Discrete element simulation of the response of a double-twisted mesh subject to cyclic loads <i>M. Previtali, M. Ciantia, S. Spadea, R. Castellanza & G. Crosta</i>	667

An advanced constitutive model for silts and clays: a PLAXIS implementation of PM4Silt <i>I. Del Brocco, S. Brasile, X. Yang, G. Vilhar & R.B.J. Brinkgreve</i>	673
Effect of time-varying concreting pressure on the ground movement during diaphragm wall panel construction <i>Y. Dong</i>	679
A coupled particle-fluid numerical analysis of failure initiation of non-cohesive granular soils induced by upward seepage flow <i>Y. Fukumoto & S. Ohtsuka</i>	685
Numerical approach for predicting large deformation of soil structures using the Convected Particle Domain Interpolation (CPDI) method <i>C. Moormann, S. Giridharan & D. Stolle</i>	689
FEM simulations of long-term loaded piled raft foundation models with different numbers of piles on saturated clay ground <i>L. Hoang & T. Matsumoto</i>	695
Numerical simulation of heat and mass transfer during the in-situ thermal remediation process of NAPLs-impacted soil <i>Z. Chen & L. Hu</i>	701
Approximate solution of the problem on pressure of cohesionless soil on the displacing retaining wall <i>F. Ikramov, M. Yakubov, S. Ikramov & A. Rakhimov</i>	707
Statistical parameters and grading curves <i>E. Imre, Z. Hortobágyi, Z. Illés, L. Nagy, I. Talata, D. Barreto, S. Fityus & V. Shingh</i>	713
Numerical modelling of fluid leak-off during hydraulic fracturing treatments in saturated porous media <i>A. Jafari, S. Hashemi, M. Vahab & N. Khalili</i>	719
Numerical modeling of soil-pipe interaction of pipelines buried in muskeg subjected to lateral ground displacements <i>T. Jayasinghe & D. Wijewickreme</i>	723
SLIDE-PM: a 2D-FEM prototype to quantify the vulnerability of buildings with respect to mud flows <i>C. Jost, S. Commend, J. Abbruzzese, T. Miteva & E. Howald</i>	729
Effect of anisotropic creep on the convergence of deep drifts in Callovo-Oxfordian claystone <i>S. Jung, A. Pouya, S. Ghabezloo & M. Vu</i>	735
Numerical study on cyclic response of offshore wind turbine foundations <i>M. Ochmański, J. Duque, D. Mašin & T. Kadlíček</i>	741
Large deformation finite-element modeling of pile jacking in sensitive clay <i>R. Karmaker & B. Hawlader</i>	747
The theoretical solution of the task for determining the ultimate load on the basis <i>A. Khasanov, Z. Khasanov, N. Nabieva & B. Kurbanov</i>	753
Fabric anisotropy of granular soils: a DEM study <i>F. Khayyer, M. Rahman & R. Karim</i>	757
Validated 3D FEM analysis of the geotechnical performance of a semi-integral bridge <i>E. Koch, P. Hudacsek & Á. Wolf</i>	763
Effect of rock joint spacing and joint stiffness on the stability of a cross-tunnel under seismic event using discrete element analysis <i>K. Kiran & A. Juneja</i>	769
Performance of deep excavation using island method- temporary berms and buttress wall retaining system <i>W. Lai, Q. Ye, H. Qu & C. Veeresh</i>	775

Modelling the time-dependent behaviour of London Clay <i>T. Le, D. Potts & L. Zdravkovic</i>	781
3D FEM analysis of group effect on instrumented Continuous Flight Auger (CFA) in stratified underground with soft soil layer <i>P. Maia, L. Leite, G. Marquezini & A. Farfán</i>	787
New constitutive equation for viscoplastic material behaviour <i>S. Leppla</i>	793
Smoothed particle hydrodynamics method for fully coupled soil-water interactions <i>X. Chen, A. Leung, H. Mori & S. Uchida</i>	799
A scalable three-dimensional multiscale framework for modeling of granular column collapse <i>W. Liang & J. Zhao</i>	805
Analysis of pull-out behavior for a tunnel-type anchorage considering joint characteristics <i>H. Lim, S. Seo, Y. Ko & M. Chung</i>	811
Development and application of a GPGPU-parallelized hybrid finite-discrete element method for modelling geo-structure collapse and resultant debris flow <i>H. Liu & D. Fukuda</i>	815
Large deformation finite element analysis to predict penetration resistance of offshore pipelines <i>S. Liyanapathirana</i>	821
Protection works for Kompleks Budaya Kraf located within MRT2 tunnel horizon in Kuala Lumpur limestone formation <i>Y.-C. Tan, C.-L. Low, & Y.-P. Kang</i>	827
On the use of elasto-plastic models with hardening for excavations on the gravel of Lima <i>R. Madrid & Y. Gomez</i>	835
Hydromechanical analysis of structure-soil-interactions at the flood barrier “Eider-sperwerk” in Germany <i>D. Maier, H. Montenegro, B. Odenwald & T. Nuber</i>	841
Numerical analysis of a segmented tunnel lining subjected to regional consolidation <i>S. Martinez, J. Villagrán-Alegria & M. Juárez-Camarena</i>	847
Discrete element modeling of the anchor-tip interactions during self-penetration of a bio-inspired probe <i>Y. Chen, A. Martínezf & J. DeJong</i>	853
A coupled computational framework for modelling fluid pressurised crack evolution in porous media <i>M. Mousavi Nezhad & N. Sarmadi</i>	859
Simulation of pile penetration in sand employing Lagrangian and CEL based FE approach: a comparative study <i>M. Mukherjee & B. Chand</i>	865
Oedometric-continuous corrected law for the stress-strain relationship of soils under shallow foundations <i>W. Naime</i>	871
DEM modelling for geogrid-reinforced ballast <i>T. Ngo, B. Indraratna, Y. Qi, C. Liu & A. Siddiqui</i>	877
Application of coupled Eulerian-Lagrangian approach on pile tip damage and extrusion buckling with comparisons to centrifuge tests <i>J. Nietiedt, M. Randolph, C. Gaudin & J. Doherty</i>	883
An open-source finite element approach complementary to a data-driven approach for assessment of line-infrastructure <i>A. Noordam & B. Coelho</i>	889

Three-dimensional discrete element analysis of triaxial tests on crushable pumice sand <i>R. Orense & S. Bahmani</i>	893
Simulation of damage evolution of cut-and-cover tunnels with 3D nonlinear finite element analysis <i>D. Park, Y. Lee, V.-Q. Nguyen & B. Kim</i>	899
Simulation of the seismic response of the Santiago Basin, Chile – Preliminary results <i>C. Pastén, J. Bustos, M. Acevedo, S. Ruiz & R. Astroza</i>	905
Simplified FE-simulation of pile installation effect on bearing capacity of displacement piles in sand <i>L. Phung, H. Ho, W. Cheang & E. Tan</i>	911
Numerical assessment of jet-grouting columns for deep excavation support <i>B. Pulko & J. Logar</i>	917
Modeling of stress-strain relationships of soils from Ted Davis to current practice <i>R. Pyke</i>	921
Particle motion features of dense sand under different confining pressure subjected to biaxial shearing <i>Y. Gao, C. Qing & Q. Yuan</i>	927
Numerical modelling of slope stability for tailing materials with strain-softening and strength anisotropy <i>R. Ragni, H. Jostad & H. Zhou</i>	931
Numerical simulation of driven displacement piles with respect to installation effects on the basis of in-situ test results <i>J. Berndt, A.-K. Hundertmark, O. Reul & Y. Tian</i>	937
A bounding surface constitutive model with moving projection centre for highly overconsolidated clays <i>M. Rezania & H. Dejaloud</i>	943
Evaluation of a practice-oriented nonlinear soil constitutive model for site response analyses on liquefiable soil deposits <i>P. Rousé, J. Ramirez & A. Lucarelli</i>	947
Thermo-hydro-mechanical hypoplastic modelling of bentonite buffers for nuclear waste disposal: model calibration and performance <i>G. Scaringi, D. Mašín, J. Najser, H. Sun, Z. Sun, T. Koudelka, T. Krejčí & J. Kruis</i>	953
Soil-structure interaction calculations as a basis of interactive monitoring at construction and operation <i>A. Shashkin, K. Shashkin, V. Shashkin, V. Paramonov & V. Ulitsky</i>	959
3D DEM analysis of lunar soil excavation test under different gravity fields <i>M. Jiang, A. Shi, L. Lv & B. Xi</i>	967
Features of modeling the soil base stress-strain state under the action of dynamic loads from metro operation <i>A. Ter-Martirosyan & V. Sidorov</i>	973
Finite Difference Method (FDM) in driving of open-ended steel pipe pile <i>L. Silva, C. Vargas, M. Sales & J. Ferreira</i>	979
3D Finite element analysis of a deep excavation: a case study from Budapest <i>Z. SzilvÁgyi & O. Varga</i>	985
Influence of constitutive model on undrained passive earth pressure <i>F. Tschuchnigg & H. Schweiger</i>	991
A fully coupled absorbing boundary to simulate wave propagation through saturated partially drained porous half space using the Scaled Boundary Finite Element approach <i>M. Hassanzadeh & M. Ülker</i>	997
Effect of the preloading on the mitigation of creep behavior of soft soils: numerical modelling <i>P. Venda Oliveira, A. Correia, S. Santos & L. Lemos</i>	1003

Settlement analysis of column-like elements <i>D. Wanatowski, W. Al-Ani & A. Grizi</i>	1009
A simple method to verify soil model implementation by observing the performance on π plane <i>Z. Wang, Y. Qin & Y. Tian</i>	1013
Hydraulic permeability and ageing behaviour of Dublin Port Tunnel <i>C. Wang, Z. Li & M. Friedman</i>	1019
Simulation of reliquefaction of sandy soil using combined loading elasto-plastic constitutive model <i>S. Yamada & T. Takaine</i>	1025
Case histories of deep excavation in London Clay and limit states design in accordance with Eurocode 7 using advanced soil model <i>H. Yeow</i>	1031
Two types of water absorption failure mechanism of unsaturated silt triaxial specimen <i>T. Noda & T. Yoshikawa</i>	1037
Centrifugal and theoretical modelling of cyclic laterally loaded pile in clay <i>J. Yu, M. Huang, J. Zhu, C. Zhang & L. Mu</i>	1043
Numerical analysis of the effect of pile group stiffness on settlement in sedimentary soil <i>N. Zampirolli, A. Farfan & P. de Almeida Maia</i>	1049
 <i>TC 104: Physical Modelling in Geotechnics</i>	
Influence of rubberized soil underneath the foundation of a structure investigated by dynamic large-scale tests <i>G. Abate, M. Massimino, D. Pitilakis, A. Anastasiadis & A. Vratsikidis</i>	1057
Cyclic lateral pipe-soil interaction in clayey soils under constant vertical force <i>M. Almeida, J. Oliveira, M. Almeida, J. Pessin, P. Trejo & F. Saboya Jr.</i>	1063
Cavity expansion analysis of pile installation in chalk using synchrotron X-ray computed tomography <i>F. Alvarez-Borges, R. Atwood, T. Connolley, N. Vo, S. Ahmed, B. Madhusudhan & D. Richards</i>	1069
Landslide initiation in small-scale sandy and clayey slopes exposed to artificial rain <i>J. Peranić, V. Jagodnik, N. Čeh, S. Pajalić, P. Jagodnik & Ž. Arbanas</i>	1075
Overflighting screw piles in sand, a detrimental effect? <i>B. Cerfontaine, M. Brown, J. Knappett, Y. Sharif & C. Davidson</i>	1081
Calcination of Singapore Marine Clay <i>S. Chian & Y. Fu</i>	1087
Centrifuge modelling of earthquake induced submarine landslides <i>C. Qin & S. Chian</i>	1093
Analysis of a level site liquefaction using a centrifuge model subjected to biaxial shaking <i>O. El Shafee, M. Zeghal & T. Abdoun</i>	1099
Acceleration response of geocell barriers subjected to vibration loads <i>H. Venkateswarlu & A. Hegde</i>	1105
Influence of long-term episodic cyclic loading with rest periods on pipe-soil interaction <i>Z. Hou, F. Sahdi, C. Gaudin & M. Randolph</i>	1111
Centrifuge shaking table tests on damage level of embankments before sliding failure during earthquakes <i>J. Izawa, T. Doi, K. Kojima & A. Takahashi</i>	1117
Centrifuge tests on the soil-foundation-superstructure interaction under static loading <i>B. Liu, J. Xue, B. Lehane & A. Grime</i>	1123

Centrifuge modelling of embankment failure on soils with different degrees of consolidation <i>F. Liu, G. Lei, W. Wang, C. Dai, L. Chen, G. Ren & G. Xu</i>	1129
Investigation of mud flow from boreholes during horizontal directional drilling <i>I. Moore & H. Lan</i>	1135
Experimental study on the effect of cyclic piling behavior on the penetration resistance and bearing capacity <i>S. Moriyasu, S. Taenaka & S. Kobayashi</i>	1139
A tomographic technique for measuring shear wave velocity in a drum centrifuge <i>T. Newson, A. Ahmed, C. Lara, G. Cascante & E. Ginzal</i>	1145
Physical modeling and analytical derivation of soil consolidation around permeable pipe pile <i>P. Ni, Z. Chen & G. Mei</i>	1151
Dynamic centrifuge model tests on plate-shaped building's pile foundation in soft clayey ground; effect of building's moment of inertia <i>T. Okumura & J. Hamada</i>	1157
Centrifuge model test on seismic active earth pressure acting on retaining wall with cohesive backfill soil <i>T. Ozaki & S. Nakajima</i>	1163
Side anchored flexible barriers subjected to debris flow impact <i>S. Poudyal, A. Bhatta, C. Ng, C. Choi, H. Lam & E. Sze</i>	1169
A method for creating larger clay samples with permeability anisotropy for geotechnical centrifuge modelling <i>E. Ritchie, S. Divall & R. Goodey</i>	1175
Centrifuge modelling of the behavior of a tunnel in soft soil subjected to pore water pressure drawdown <i>J. Rodríguez Rebolledo, R. Pérez León & B. Caicedo Hormaza</i>	1181
Centrifuge modelling for the investigation of the load-transfer mechanism of rigid inclusions foundation <i>J. Rodríguez Rebolledo, J. Garcia & B. Hormaza</i>	1187
1-G Experimental study of dynamic pressures and soil displacements in Yielding Rigid Retaining Walls using a transparent laminar box <i>E. Sáez, H. Segaline, J. Ubilla & B. Llanquilef</i>	1193
Centrifuge model tests on dynamic behavior of group pile foundation with ground improvement during liquefaction <i>Y. Sawamura, K. Inagami & M. Kimura</i>	1199
A novel miniature tunnel boring machine for use in a geotechnical centrifuge <i>C. Shepherd, A. Alagha, G. Viggiani & S. Haigh</i>	1205
Tsunami overflow tests of levee reinforced by deep mixing method in centrifuge <i>H. Takahashi</i>	1211
Mechanical behaviour of an experimental embankment dam during initial impoundment <i>J. Toromanovic, H. Mattsson, S. Knutsson, J. Laue & C. Bernstone</i>	1217
Centrifuge modelling of cyclic freezing and thawing impact on embankments <i>Y. Wang, C. Ng, Z. Li & C. Zhou</i>	1223
Model tests of cast-in-place piles formed by using different types of auger <i>A. Krasinski, P. Więclawski M. Wiszniewski, & T. Kusio</i>	1227
Centrifuge tests on the liquefaction resistance of sand deposits in multiple seismic events <i>B. Ye & X. Xie</i>	1233
Physical modelling of submarine debris flows: effects of bed conditions <i>J. Yu, J. Du & C. Choi</i>	1239

Examining the initiation mechanisms of earthquake-induced flow failure of tailings impoundments using centrifuge shaking table tests <i>Z. Zhang, J. Hu, X. Zhang & J. Liang</i>	1243
Progressive failure mechanism and load evolution for trapdoor problem with granular materials <i>Y. Zhao, Q. Gong, Z. Tian & Y. Wu</i>	1249
Visualization testing system of spatial deformation based on transparent soil and 3D reconstruction technology <i>H. Zhao, C. Liu, X. Tang & H. Wei</i>	1255
An improved generalized scaling relation for dynamic centrifuge model tests <i>Y.-G. Zhou, Q. Ma, D. Meng & Y. Chen</i>	1263
 <i>TC 105: Geo-Mechanics from Micro to Macro</i>	
Soft-rigid particle mixtures: direct shear behavior from macro to micro <i>G. Chiaro, K. Chew, A. Tasalloti, J. Vinod & K. Allulakshmi</i>	1269
Quantitative analysis of SEM micrographs for clay particles orientation by means of computer vision: a sensitivity analysis <i>G. Di Remigio, I. Rocchi & V. Zania</i>	1275
Limitation of the discontinuity designation. A new joint definition according to the stress state in the rock mass <i>R. Garcia & E. Romero</i>	1281
Chemo-mechanical models for acidizing assisted hydro-fracturing <i>M. Hu & X. Tang</i>	1287
Experimental tests regarding the estimation of soil preconsolidation pressure <i>A. Ilaş & A. Stanciu</i>	1293
Characterization of water retention states in partially saturated sand based on morphology of pore water and pore air using X-ray micro computed tomography <i>R. Kido & Y. Higo</i>	1299
Influence of pore water composition on the compressibility of a Danish high plasticity Paleogene clay during sedimentation <i>E. Kinslev, O. Hededal, I. Rocchi & V. Zania</i>	1305
Effects of sandy soil structure on various mechanical behaviors <i>T. Kodaka, K. Fujita, Y. Kubo & K. Lee</i>	1311
Experimental study of volume effects in geophysical flows <i>C. Kwok, G. Yang, J. Lu & Y. Sobral</i>	1317
Physical-mechanical analysis of carbonatic rocks in the Potiguar Basin, Rio Grande do Norte, Brazil <i>L. Lago, A. Zhemchuzhnikov, F. Souza, R. Velloso & C. Cazarin</i>	1321
Binary-medium constitutive model for geological materials: a multi-scale approach <i>E. Liu</i>	1325
A three-dimensional non-orthogonal plastic flow rule for geomaterials <i>D. Lu, J. Liang, X. Zhou & X. Du</i>	1329
Evaluation of the effectiveness of sand compaction pile method due to micro-structural change of surrounding soil using X-ray CT <i>J. Otani, H. Umeda, K. Harada, A. Ezoe & T. Sato</i>	1337
Influence of soil arching and loosening around a subsurface cavity on wave propagation <i>Y. Nakata, U. Ali, M. Otsubo & R. Kuwano</i>	1343

Application of enhanced rotational hardening rules to an anisotropic clay model <i>H. Dejaloud & M. Rezanian</i>	1349
Particle-scale simulation of drained cyclic loading of sand at a constant mean effective stress <i>T. Sassel & C. O'Sullivan</i>	1353
Experimental and numerical study on the crushing behavior of lightweight clay aggregate particles <i>Z. Shen, S. Xia, H. Gao, Z. Wang & L. Liu</i>	1359
Multiscale analysis of the influence of grain size distribution on sand crushing <i>K. Shi, J. Zhao & F. Zhu</i>	1365
Virtual reality testing for more reliable design in sand <i>Ø. Torgersrud, H. Jostad, K. Huynh, V. Quinteros, A. Page & S. Lacasse</i>	1369
Effect of slope angle on the runout evolution of granular column collapse for varying initial volumes <i>Q. Wang, R. Hosseini & K. Kumar</i>	1375
The strength characteristics and treatment mechanism of MICP in stabilizing expansive soil <i>R. Wei, H. Cai, J. Xiao, S. Wu & Z. Wang</i>	1381
Image-based study of granular column collapse over controlled-roughness surfaces <i>S. Yang, L. Jing, C. Kwok, G. Yang & Y. Sobral</i>	1387
A semi-coupled resolved CFD-DEM method for simulation of thermal-induced phase changes in granular media <i>T. Yu & J. Zhao</i>	1393

TC 106: Unsaturated Soils

Influence of suction on the dilatancy of an unsaturated lateritic sandy lean clay <i>D. Akinniyi, C. Ng & C. Zhou</i>	1401
An elastoplastic damage-healing model for unsaturated soils <i>G. Alipour Esgandani & A. El-Zein</i>	1407
Rapid determination of the unsaturated hydraulic conductivity for sandy soils utilizing the continuous pressurization method <i>A. Alowaisy, N. Yasufuku, R. Ishikura, M. Hatakeyama & K. Shuu</i>	1413
Tensile strength criteria for unsaturated soils <i>H. Arroyo, J.M. Gutierrez-Villalobos, X. Chavez-Cardenas & E. Rojas</i>	1419
Conceptual framework for determination of volume changes in expansive clays <i>M. Ito, S. Azam & W. Clifton</i>	1423
The combined effect of clay and moisture content on very small strain stiffness of compacted sand-clay mixture <i>V. Matziaris & M. Bagheri</i>	1427
Desiccation cracking behaviour of a compacted soil with different microstructures <i>Q. Cheng, C. Tang & B. Shi</i>	1433
Research on autogenous healing of cracks in clay <i>A. El-Zein, D. Airey, Y. Gao, S. Chen, Y. Gan, D. Dias-Da-Costa, B. Yu & G. Proust</i>	1437
Volume change behavior of Argentinean collapsible loess inundated by organic liquids <i>F.M. Francisca, I. Giomi & M. Montoro</i>	1443
Swelling and swelling pressure of a low activity clay soil: model simulations and experimental results <i>F. Esfahani, A. Gajo, J. De Rosa & C. Di Maio</i>	1447
Comparison of swell behaviour of highly expansive clay through field monitoring and centrifuge modelling <i>R. Murison, S. Jacobsz, T. da Silva Burke, T. Gaspar & A. Osman</i>	1453

Centrifuge modeling of a rocking shallow foundation on variably saturated ground <i>M. Ghayoomi, M. Turner, K. Ueda & R. Uzuoka</i>	1459
Effects of saturation degree and suction on dynamic properties of sand at medium shear strains <i>F. Jafarzadeh & A. Ahmadinezhad</i>	1465
Water-retention and shear-strength characteristics of unsaturated fine-grained soils with dual-porosity microfabrics <i>Z. Lin, J. Qian & Z. Shi</i>	1471
New models for design footings for buildings in ‘abnormally’ wet or ‘abnormally’ dry conditions <i>D. Lopes & K. McManus</i>	1477
An experimental study on abrasion behavior of hydrophobized sands by Micro-Deval abrasion test <i>S. Lourenço, Y. Wong & H. Lin</i>	1483
Saturated permeability of water repellent soil: a critical review <i>X. Xing, S. Lourenço & H. Lin</i>	1487
Modelling the migration of per- and polyfluoroalkyl substances in unsaturated soil into the groundwater <i>R. Mahinroosta & L. Senevirathna</i>	1491
An efficient scheme for the calculation of unsaturated flow in geomaterials with coarse textures <i>D. Maier, H. Montenegro & B. Odenwald</i>	1497
An alternative plasticity formulation for modelling of unsaturated soils <i>H. Moghaddasi, A. Osman, D. Toll, F. Shazani, M. Taha & N. Khalili</i>	1503
Applicability of digital twin with merging particle filter to predictions of volumetric water contents of soils <i>K. Oda, K. Koizumi & S. Ito</i>	1509
Contribution of suction to the shear strength of fine sand through direct shear testing <i>P. Osinski, E. Koda, V. Matziaris & J. Vimalan</i>	1515
Particle size effects on water-shielding performance of water repellent soil <i>B. Kim, D. Ren, H.-S. Park, S.-W. Park & S. Kato</i>	1521
Full-range water retention properties of a collapsible soil with focus on osmotic potential <i>H. Sadeghi, A. Heydari & H. Nasiri</i>	1527
Questions concerning the usefulness and validity of the Soil Water Characteristic Curve in Unsaturated Soil Mechanics <i>P. Stott & E. Theron</i>	1533
Rapid shrinkage curve generation using small samples and highly volatile non-polar liquids <i>P. Stott & E. Theron</i>	1539
Application and verification of the effects of soil suction in embankment stability assessment <i>G. Swarbrick</i>	1545
Testing of hydromechanical properties of the variably saturated residual dolomite (wad) <i>D. Swart, T. Gaspar & M. Dippenaar</i>	1551
Desiccation cracking of polymer-bentonite mixtures: Effects of mixing method, dosage and polymer degree of substitution <i>S. Taheri & A. El-Zein</i>	1557
On understanding hydromechanics of unsaturated soils: A novel model accounting for fully coupled hydro-mechanical behavior including hydraulic hysteresis <i>M. Ülker & M. Eyüpgiller</i>	1563

Development and validation of deformation analysis method for unsaturated soil based on new effective saturation degree considering trapped air 1569
T. Yoshikawa & T. Noda

TC 107: Tropical Residual Soils

The response of granite residual soil to high strain-rate impact loading 1577
X. Zhang, L. Kong, C. Chen, X. Liu, & G. Wang

Geogrid reinforced soil walls in Myanmar: an overview 1583
R. Mahajan, S. Ramasamy, F. Rosiello & D. Ghoshal

TC 201: Geotechnical Aspects of Dykes and Levees and Shore Protection

Hydraulic performance and microstructure evolution of kneading compacted lime-treated silty soil permeated with low ionic strength solution 1591
G. Das, A. Razakamanantsoa, D. Deneele & G. Herrier

On the effect of intrinsic soil variability on the stability assessment of river embankments in partially saturated conditions 1597
G. Gottardi, C. Gragnano, M. Ranalli & L. Tonni

Numerical study on seismic performance of high mudstone embankment against two types of seismic wave 1603
S. Inukai & M. Nakano

Geotechnical and seismic design considerations for dikes and coastal protection for reclaimed lands in Manila Bay 1607
G. Reyes, R. Luna, J. Tanap, M. Zarco & A. Reyno

Dredged sea sand as an alternate material for use in internal drainage system in dyke embankment 1613
V. Mauriya

Ensuring stability and raising of a 16 metre high ash dyke through ground improvement techniques – a case study 1617
S. Mittal, N. Tyagi, S. Ladol, S. Iqbal & S. Singh

A design approach for levees considering the failure path of inner slope instability 1623
A. van der Meer, W. Kanning, T. Schweckendiek, N. Jan van Veen, F. den Heijer & R. Jongejan

TC 202: Transportation Geotechnics

Embankment stability works with quick solutions to improve resilience in roadway infrastructures 1631
F. Collazos Arias & M. Alonso Plá

Development of smart earthwork platform with intelligent compaction technology 1637
S.-H. Baek, C. Choi, M. Chung, J. Cho, J. Kim, J. Kim & N. Kim

A mechanistic formation design in cohesive soil based on Li and Selig Method 1643
V. Blanchet & L. Yang

Geotechnical challenges in the design and construction of Sydney Metro works at Central Station 1649
W. Deng, T. Lavorato, N. Waterman & G. McKay

Design method of subgrade structure for ballastless track in China's high-speed railway 1655
Y. Ye, D. Cai, H. Yan, J. Yao, S. Wei & Y. Shi

Vibration compaction characteristics and compaction effect evaluation method of high-speed railway subgrade 1661
D. Cai, Y. Ye, H. Yan & S. Wei & J. Yao

Challenges of deflection wall design for the protection of existing bridge piers—a rail case study <i>M. Narayana, R. Kingsland & N. Shrestha</i>	1667
Dynamic stress response of track layers under high speed trains <i>R. Malisetty, B Indraratna, A. Tucho & T. Ngo</i>	1673
The effect of degree of saturation and cyclic stress ratio on the resilient response of railway formation material during principal stress rotation <i>A. Mamou, W. Powrie, C. Clayton, L. Blackmore, J. Priest</i>	1679
Early strengthening and restoration method of damaged embankment with soil reinforcement and gabion <i>S. Nakajima & T. Sato</i>	1683
Rheology and moisture susceptibility of Eskom Ash modified asphalt concrete <i>F. Okonta & B. Mpofo</i>	1689
Finite element simulation of the soil arching in a pile-supported railway embankment considering train loading <i>N. Meena, S. Nimbalkar, & B. Fatahi</i>	1695
Drained tunnel impacts on groundwater: Observations and implications from recent experience of tunnelling in Sydney, Australia <i>D. Pennington, K. David & P. Clark</i>	1699
Subballast compaction in track rehabilitation by means of plate compactors <i>J. Pistorol, D. Adam, T. Hofbauer, F. Kopf, B. Antony & F. Auer</i>	1705
Contribution to the improvement of bituminous overlain: application to the development works of the Yaounde-Douala motorway in Cameroon <i>J. Possie</i>	1711
Advancement of rail track testing and design implications with special reference to recycled rubber inclusions <i>B. Indraratna, Y. Qi, T. Ngo & C. Rujikiatkamjorn</i>	1717
Design methods for geocell stabilisation of roads and railways <i>P. Rimoldi & N. Brusa</i>	1723
Resilient modulus of siliciclastic unbound granular materials under repeated wheel loading <i>S. Rimoy & B. Mdzovela</i>	1729
Field monitoring of asphalt pavement response: a case study from Thailand <i>A. Sawangsurriya, S. Malaikrisanachalee & A. Jotisankasa</i>	1735
A full-scale field approach for evaluating the geogrid reinforcement effectiveness in flexible pavement <i>V. Schaefer, H. Alimohammadi, J. Zheng & D. White</i>	1739
Geotechnical and geophysical characterization of the Guadalupe Tuff Formation – the regional bedrock of Metro Manila, Philippines <i>R. Luna, R. Quebral, J. Gargullo, K. Leobrera, P. Selda, E. Marasigan, M. Armario, M. Baniquett, S. Shibata, T. Shiga, K. Yamamoto & R. Albea</i>	1745
The design and construction of new quay walls and gates at the Port of Boston, UK <i>S. Solera, L. Allievi, J. Gelder, M. Mullholland, J. Newhouse, M. Schaefer, L. Stedman & S. Van Eeden</i>	1751
Use of plastic waste and lateritic gravel in bitumen macadam mix design <i>I. Sow & I. Cisse</i>	1757
Three-dimensional reconstruction and segmentation of an aggregate stockpile for size and shape analyses <i>E. Tutumluer, H. Huang, J. Luo, I. Qamhia & J. Hart</i>	1765
Quantification of the geogrid-aggregate stiffened zone using bender element field sensors <i>E. Tutumluer, M. Kang, I. Qamhia, H. Wang & J. Tingle</i>	1771

Performance degradation of high-speed railway foundation due to train traffic loading and rainfall infiltration <i>X. Bian, Y. Wu, J. Jiang & Y. Chen</i>	1777
Dynamic performance of railway subgrade under high-speed train running using elaborate numerical simulation <i>F. Xue</i>	1781
Improvement of railway trackbeds using geogrids – field tests and monitoring <i>O. Yaba, J.-F. Ferrellec, A. Dhemaied, Q. Pham, F. Emeriault & O. Jenck</i>	1785
Effect of geocell inclusion on railway ballast stability <i>R. Zikria & S. Ullah</i>	1793

TC 203: Earthquake Geotechnical Engineering and Associated Problems

A study on the effects of vertical earthquake on horizontal and vertical acceleration of structures with underground stories based on a SSI 3D model <i>A. Akhtarpour & M. Amin Mohammadyar</i>	1801
Two-dimensional site effects on the seismic response of alluvial valleys: the case study of the Aterno river valley (Italy) <i>G. Alleanza, L. Allegretto, A. d'Onofrio & F. Silvestri</i>	1807
Investigation of ground settlement due to dissipation of excess pore water pressure after liquefaction <i>B. Bahari & T.-H. Kim</i>	1813
A numerical analysis of reverse fault rupture-suction caisson interaction <i>A. Barari, L. Bo Ibsen & V. Papavasileiou</i>	1819
Liquefaction risk analysis of reclaimed soil deposits in central Wellington <i>C. Cappellaro, M. Cubrinovski & R. Dhakal</i>	1825
The effects of gradation on the dynamic response of embankments <i>T. Carey, J. DeJong, K. Ziotopoulou, A. Martinez & A. Chiaradonna</i>	1831
Method to estimate excess pore pressures from total stress seismic site response analyses <i>B. Carlton & B. Dahl</i>	1837
Influence of mis-assignment of groundwater level on liquefaction assessment of soils <i>M. Chang, M.-S. Chan, R.-C. Huang, T. Upomo & R. Kusumawardani</i>	1843
3D nonlinear seismic response analyses of nuclear island structure in soft deposits <i>G. Chen, S. Zhu, W. Chen & Y. Wang</i>	1849
Geologic and topographic proxy-based V_{S30} map for Republic of Korea <i>I. Choi & D. Kwak</i>	1855
Sample reconstitution for evaluating the cyclic liquefaction resistance of iron ore tailings <i>P. Coelho, D. Camacho, F. Gobbi & L. Santos</i>	1861
A vector-IM based fragility model for man-made earth slopes subject to seismic shaking <i>W. Du, W. Wang & D.-Q. Li</i>	1867
Evaluation of soil liquefaction and its mitigation using a coupled SPH-DEM scheme <i>U. El-Shamy & S. Sizkow</i>	1873
Microscale simulations of the seismic response of flexible retaining walls <i>U. El-Shamy & S. Sizkow</i>	1877
Seismic analysis of rock tunnels: a parametric analysis <i>A. Salem O. Ezzeldine & M. Amer</i>	1881

Deterministic assessment and numerical simulations of buckling instability of piles in liquefiable ground <i>M. Fansuri, M. Chang, T. Upomo & R. Kusumawardani</i>	1891
Micromechanics of grain size effects on liquefaction response of sand <i>B. Lakkimsetti & M. Gali</i>	1897
Assessment of liquefaction triggering potential of Sabkha soils in the U.A.E. and development of probabilistic ground motion estimates <i>C. Jung, E. Kang, A. Giannakou & J. Chacko</i>	1903
An updated SPT-based seismic soil liquefaction triggering database <i>M. Ilgac, K. Cetin, R. Kayen</i>	1909
Applicability validation of energy-based liquefaction prediction method by comparison using a centrifugal model test <i>M. Ishimaru & M. Sawatsubashi</i>	1915
Measuring stress conditions in the embankment model during a shaking event of the centrifuge test—towards a validation of effective stress analysis <i>T. Kawai</i>	1921
Impact of retaining walls' structural solution on their stability increase in seismic regions <i>I. Khojagali & V. Khomyakov</i>	1927
Data processing for shear-wave velocity monitoring on geotechnical downhole array <i>T. Kishida, D. Nambiar, C.-C. Tsai & C.-H. Kuo</i>	1933
On the repeated liquefaction during successive shaking table tests <i>Y.-Y. Ko, Y.-T. Li & C.-H. Chen</i>	1939
Energy-based evaluation of liquefaction-induced strain and settlement <i>T. Kokusho</i>	1945
Evaluation of deep liquefaction triggering using in-situ and laboratory test data <i>H. Kristiansen, N. Denby & A. McIntyre</i>	1951
Mitigation of liquefaction-induced differential settlement by stabilised gravel rafts <i>A. Lees</i>	1957
Application of 3D non-linear dynamic soil-structure interaction analysis in practical seismic design <i>A. Hokmabadi, E. Leung, J. Yiu & J. Pappin</i>	1963
Interpreting plant root effects on the failure modes of soil liquefaction <i>A. Leung & A. Karimzadeh</i>	1969
Integrated approach to liquefaction hazard assessment <i>G. Li Destri Nicosia, G. Nicolai & S. Hyldal Sørensen</i>	1975
The effects of cyclic loading and lateral unloading on the undrained behavior of a kaolin clay <i>Z. Liu, J. Xue, M. Yaghoubi & T. Baumgartl</i>	1981
Numerical analysis of a wharf on piles under seismic motion <i>S. Louadj & M. Zidane</i>	1987
Seismic behavior of strip footings on slopes <i>B. Maheshwari</i>	1993
Evaluation of pile-cap embedment effect on the seismic behavior of pile foundation using dynamic centrifuge tests <i>S. Manandhar, S.-R. Lee, G.-C. Cho, D.-S. Kim, J.-G. Ha, M.-T. Yoo & H.-J. Park</i>	1999
Numerical analysis of the seismic response of a cracked soft soil clay deposit <i>G. Auvinet-Guichard, S. Martínez-Galván & M. Juárez-Camarena</i>	2005

Basin boundary seismic effects in Mexico City southern region <i>J. Mayoral, D. De La Rosa & J. Alacaraz</i>	2011
Mitigation of building-tunnel detrimental seismic interaction <i>J. Mayoral & G. Mosqueda</i>	2017
Experimental study on seismic deformation modes of steel-strip reinforced earth wall induced by segmental wall panels <i>Y. Miyazaki, Y. Sawamura, J. Ito & M. Kimura</i>	2023
Influence of silt content on cyclic liquefaction of sand: conflicting effects of relative density <i>Y. Tütüncü, S. Kendir & M. Monkul</i>	2029
Localized/enormous subsurface seismic damage induced by complex propagation and interference of surface waves and body waves <i>K. Nakai & H. Murao</i>	2035
Displacement compatibility analysis of retaining systems subject to liquefaction induced lateral spread with evacuation <i>M. Neves</i>	2041
A pragmatic approach to estimating earthquake design spectra for structures on deep foundations <i>A. Orton, H. Poulos & P. Wong</i>	2047
Liquefaction characteristics of loose sand by cyclic triaxial and simple shear tests <i>S.-S. Park & Z.-Z. Nong</i>	2053
Prediction of seismically induced acceleration and settlement of slopes <i>D. Park, M. Irslan Khalid, Y. Lee & H. Ban</i>	2059
Mapping of liquefaction hazard for Lebanon: a macrozonation study <i>G. Sebaaly, M. Rahhal & J. Seoud</i>	2065
Experimental study on the cyclic behavior and liquefaction potential of a typical silty sand from Tigray region in Ethiopia <i>O. Reul, A. Abdelkadr & L. Ojha</i>	2069
Evaluation of pore pressure prediction models from centrifuge tests in liquefiable soils <i>A. Viana da Fonseca, S. Rios & M. Millen</i>	2075
A solution for evaluating seismic soil pressures acting on a circular reservoir from plane strain analysis <i>C. Chin, P. Robins & S. Sadeghian</i>	2081
Seismic fragility evaluation of an inverted T-type wall considering various ground motion characteristics in South Korea <i>H. Seo, B. Kim & D. Park</i>	2085
Additional foundation settlements prediction considering the earthquakes repeatability <i>R. Sharafutdinov, O. Isaev, V. Morozov, D. Kuznetsova & L. Stavnitser</i>	2091
Site-specific probabilistic seismic hazard assessment for Nuku'alofa, Kingdom of Tonga <i>C. Sigarón-Loría, C. Gies & S. Marinatou</i>	2097
Seismic response analysis for representative ground profile in the area of city of Zagreb <i>I. Sokolić & T. Ivšić</i>	2103
In-situ and laboratory cyclic response of an alluvial plastic silt deposit <i>A. Stuedlein, A. Dadashiserej, A. Jana, T. Evans, B. Zhang, Z. Xu, K. Stokoe II & B. Cox</i>	2109
Practical reliability-based approach for liquefaction vulnerability <i>V. Tandjiria</i>	2115

Simplified liquefaction triggering assessment of coral-derived carbonate sands <i>M. Taylor & R. Green</i>	2121
Large scale levee failures at the Rixin section during the 2016 Meinong earthquake <i>C.-C. Tsai, M.-H. Chung, Z.-X. Yang, J.-S. Chiou & S.-Y. Hsu</i>	2127
Geotechnical seismic isolation system based on rubber-soil mixtures: analytical modelling, experimental testing and field measurement <i>H.-H. Tsang, D.-P. Tran, E. Gad, K. Pitilakis, A. Anastasiadis, D. Pitilakis, S. Li & W.-Y. Hung</i>	2133
Post-earthquake stability and deformations analysis of an existing tailings dam using a nonlinear dynamic analysis with excess pore pressure generation models and the finite element-based limit equilibrium method <i>C. Vargas-Moreno, J. Guillén-Guillén, A. Hernández, O. Luna, C. Dumas & J. de Dios Alemán</i>	2139
Liquefaction mitigation of sands with microbial induced desaturation <i>B. Wang, X. Chen, X. Chang & B. Du</i>	2145
Importance of dilatancy and anisotropy in seismic soil liquefaction analysis <i>R. Wang, J. Yu & J.-M. Zhang</i>	2151
Identifying optimal ground motion intensity measures for liquefaction hazard evaluation <i>Q. Wu, W. Du & D.-Q. Li</i>	2157
Fabric anisotropy and overburden pressure effects on liquefaction resistance <i>E. Sze, J. Yang & X. Wei</i>	2163
Estimation of complex soil cross sections at the sites where graben occurred in Aso caldera during the Kumamoto Earthquake <i>S. Yasuda, K. Ishikawa, H. Machida & K. Oikawa</i>	2169
Lateral spreading force to pile foundation on liquefiable slope <i>B.-S. Yoo, K.-Y. Gu, N. Tran, S.-R. Kim & M. Yoo</i>	2175
 <i>TC 204: Underground Construction in Soft Ground</i>	
The numerical study of umbrella arch behavior in soft ground tunneling <i>S. Kuder, J. Logar & J. Klopčič</i>	2183
High-resolution subsurface resistivity imaging incorporating borehole measurements for monitoring underground construction <i>C.-P. Lin, D. Mok, P.-L. Wu, H.-C. Liu & H. Wang</i>	2189
Developing the ground model for the Sydney Metro Harbour crossing tunnels <i>A. Merritt, B. Estrada, B. Rouvray & S. Simmonds</i>	2195
Monitoring of a large displaced anchored diaphragm wall in soft soil conditions <i>M. Nalçakan</i>	2201
Virgin Compression Index of normally consolidated clays with high organic matter content <i>C. Reina-Leal & J. Colmenares</i>	2207
Insertion and pull-out response of snakeskin-inspired 3D printed friction rock bolts <i>B. Wala, V. Gayathri & P. Vangla</i>	2213
Discussions on numerical modelling with Plaxis for ERSS design during deep excavation <i>H. Xiao T. Ng, E. Lim, S. Tjahyono, H. Pan & Z. Zhang</i>	2219

TC 205: Safety and Serviceability in Geotechnical Design

- Lessons learned from LRFD calibration of reinforced soil wall limit states 2227
R. Bathurst
- TMI soil moisture index for South Australia under current and future climate scenarios 2233
R. Karim, M. Raham, H. Nguyden, P. Newsome & D. Cameron
- Monitoring and protection of structural safety of the unique underground sewage structures, long-operating in difficult soil conditions for the sake of sustainable development of geotechnical infrastructure of the megacity (the experience of St. Petersburg) 2237
N. Perminov, A. Zhitenev & A. Perminov
- The role of excavation-induced pore water pressure reduction in the damage assessment for buildings: an application of the GIBV method 2243
L. Piciullo, S. Ritter, J. Langford & F. Nadim
- Ensuring geotechnical safety as a key issue for landfill reclamation: practical examples from the Polish landfill site 2249
E. Koda, A. Podlasek & M. Vaverková
- Effect of soil layering on the serviceability of a large circular slab under uniformly distributed load 2255
H. Seo, W. Lawson, P. Jayawickrama & S. Gunerathne
- Variability of shear strength and compressibility properties of Glaciolacustrine sediments in Northern Germany 2261
J. Sorgatz, M. Pohl & J. Kayser
- Design of personal soil guard system for safer trench excavations in shallow depths 2267
S. Tamate, T. Hori & R. Kikuta
- Lateral earth pressures within the near-surface and the impact on emergency rescue trench shoring 2273
O.-D. Taylor, K. Winters, W. Berry, S. LaBaw, G. Barrier & R. Zawlocki

TC 206: Interactive Geotechnical Design

- Modelling the chemical stabilization of soils through statistical design of experiments (DOE) 2281
A. Correia, L. Lopes, M. Reis, P. Venda Oliveira, L. Lemos & J. Ortega
- Use of observational method during the construction of Carlebach Subway Station in Tel-Aviv 2287
T. Jeanmaire, I. Gutjahr, V. Vrba, S. Tan, J. van der Schrier, J. Klein, B. Klein & O. Hezi, N. Teboulle & D. Shefer
- Design and construction challenges of soil nail wall in unsaturated clay with sand lenses 2293
B. Poon & P. Mitchell
- The design and construction of 120 m deep diaphragm wall shaft at Woodsmith 2299
D. Puller, F. Haddad, R. O'Rourke, M. Pooleman & F. Tradigo
- Anchor lock-off testing – improvements on equipment and interpretation 2305
M. Rebhan, H.-P. Daxer, F. Tschuchnigg, R. Marte, J. Stadlbauer, M. Scharf, P. Zopf, F. Haas & J. Edler
- Field monitoring to support use of the observational method for retained excavations in overconsolidated clays 2311
A. Ridley
- Design guidance for evaluating storage tank settlements and acceptable tank settlement criteria 2317
I. Thusyanthan & H. Enriquez
- Prediction of the bearing capacity and optimization of the pile length based on the geoinformation database 2323
S. Akhazhanov, A. Zhussupbekov, N. Alibekova, I. Zhumadilov & A. Zhanay

TC 208: Slope Stability in Engineering Practice

Experimental and numerical investigation of the different root analogue systems effect on the soil strength and slope stability <i>A. Al Shafiee, E. Ibraim & E. Holcombe</i>	2329
The interface shear strength reduction between argillaceous rock and soil overburden in slope stability due to the increasing of the rain fall intensity <i>I. Alatas, P. Simatupang, M. Irsyam, B. Supandji & F. Sagitaningrum</i>	2335
Effect of climate change on rainfall induced failures for embankment slopes in Timor-Leste <i>T. Amarthunga, K. Chieh Chao & J. Nelson</i>	2341
Rockfall analyses and rockfall protection at the Raspadalica Rockfall, Croatia <i>Ž. Arbanas, D. Udovič & S. Arbanas</i>	2349
Utilization of UAV in the evaluation of susceptibility to mass movements in urban expansion areas in the municipality of Rio Piracicaba-MG, Brazil <i>E. Marques, L. Assis, D. Araújo, C. Lima & S. Menezes</i>	2355
Geotechnical modeling on susceptible landslides initiation zones in Três Rios-RJ (Brazil) city <i>C. Lima, E. Marques, L. Assis & S. Menezes</i>	2359
Evaluation of geological-geotechnical hazard associated with the triggering of landslides in the urban area of Além Paraíba – Minas Gerais, Brazil <i>E. Marques, L. Assis, L. Souza, L. Roque & C. Lima</i>	2363
Stability analysis of a slope during pile driving <i>Y. Attari, G. Eiksund & H. Jostad</i>	2369
Non-linear strength criteria applied to the stability of rock mass with tension crack <i>N. Belandria, R. Ucar Navarro, A. Corredor & F. Hassani</i>	2375
Evaluation of coefficients of restitution for rockfall modeling <i>J. Benoît, B. Souza, H. Miller & N. MacAdam</i>	2381
Weathering of mudstone and its effect on the long-term stability of a cut slope <i>S. Bhowmik, M. Kikumoto & M. Nagata</i>	2387
Bushfire affected slope instability on steep forested terrain at Jenolan Caves Road, New South Wales Australia <i>N. Bridgement</i>	2393
Use of downscaled SMAP L4 soil moisture data in landslide stability analysis <i>L. Bryson, D. Francis & M. Imarah</i>	2399
Estimating fully softened and residual shear strength parameters of fine-grained soils <i>B. Castellanos, T. Brandon & J. Kingrey</i>	2405
Stability analysis of seismically induced landslide using coupled Eulerian-Lagrangian finite element analysis <i>T. Das & D. Choudhury</i>	2411
Deterministic analysis of the debris flow propagation phase for hazard zoning <i>N. Moraci, M. Ciurleo & M. Mandaglio</i>	2417
The effect of geotechnical creep on the safety and reliability of rehabilitated mine pit-lake slopes <i>A. Dyson, M. Moghaddam, A. Zad & A. Tolooiyan</i>	2423
Experimental study on the energy partition between sphere fragments upon dynamic impact <i>D. Guccione, A. Giacomini, S. Fityus, K. Thoeni & O. Buzzi</i>	2427
Consolidation project of an urban landslide: Case study on Tetarom Park Cluj-Napoca <i>N.M. Ilies, V.-S. Farcaș, D.-M. Pașca, V.-F. Chiorean & A.-C. Nagy</i>	2433

Effects of fine fraction outflow from surface layer caused by rainfall history on slope stability <i>T. Murakami, T. Ishikawa, K. Sako & T. Tokoro</i>	2439
Success cases of an innovative embankment treatment in Mexico and Latam <i>E. Jiménez Ontiveros & F. Blanco</i>	2445
Long-term bonding behavior between grout and strand in ground anchor <i>B. Jo, G.-B. Shin, S.-R. Kim, C.-K. Chung & K.-S. Yang</i>	2451
Research of the mechanism of destruction of a block mass in the evaluation of the slopes stability in open cast mining <i>G. Kadyralieva, O. Nikolskaya, B. Abdrahmanova & M. Nurgozhina</i>	2457
Soil failures during construction on the slopes in Kyiv <i>K. Iurii, T. Volodymyr, I. Yurii, S. Yurii, T. Oleksandr, L. Olexii, B. Viktoria, B. Yaroslav & S. Volodymyr</i>	2461
Effectiveness of radial sub-horizontal drainage in improving the landslide stability: A case study on central highlands, Sri Lanka <i>L. Kankanamge, A. Kulathilaka & M. Wijerathna</i>	2467
Structural mitigation of a deep-seated slow moving landslide along a major national road in Sri Lanka <i>A. Karunawardena, M. Toki, T. Thilakarathne & W. Galhena</i>	2473
Use of reinforced concrete drilled shafts for supporting a building on landslide prone site - A case study <i>S. Kibria, A. Masud & O. Ur Rehman</i>	2479
Remedial design of failed embankment founded on clay shale in East Kalimantan, Indonesia <i>L. Lailatin, N. Laras, H. Jitno & F. Pratiwi</i>	2487
The impact of driven plate piles to cohesive slope behaviour <i>R. Laurito</i>	2493
Analysis of stability and serviceability of steep creeping slopes <i>S. Leppä, R. Katzenbach & M. Seip</i>	2499
Numerical simulation of seismic landslide behaviors in a shaking table model test <i>M.-L. Lin, M.-H. Zou, T.-T. Wang & K.-L. Wang</i>	2505
Large slope stability problems in projects with complex geology <i>C. Marulanda</i>	2511
Performance of a tied-back concrete pile wall for slope stabilization near Peace River, Alberta <i>L. McLaren, D. Proudfoot, S. Russell, M. Taala & S. Brown</i>	2517
The effect of rainfall pattern on unsaturated tropical slopes <i>A. Mohd Taib, N. Rahman, I. Razail, N. Yusoff, D. Hasbollah & M. Taib</i>	2523
Case study of remediation of a landslide south of Sydney, NSW, Australia <i>R. Beeston, S. Morrison & A. Parsa-Pajouh</i>	2529
Numerical analysis of the nonlinear behaviour of a masonry building undergoing slow-moving landslide-induced displacements <i>G. Nicodemo, S. Ferlisi, D. Peduto, L. Aceto, L. Borelli & G. Gullà</i>	2535
Stability analysis of a natural slope at left bank of Eresma river in the historical town of Coca, Spain <i>F. Pardo de Santayana, J. Díez & Á. Perucho</i>	2541
Effect of degree of saturation on pullout resistance <i>N. Priyankara & A. Fernando</i>	2547

Novel techniques to monitor changes in near-surface water content for a slow-moving retrogressive landslide in British Columbia, Canada <i>K. Slatter, D. Elwood, M. Hendry, D. Huntley, J. Holmes, J. Chambers, P. Wilkinson, P. Meldrum, S. Donohue & W. Clifton</i>	2553
Regional seismic landslide susceptibility considering geomaterial strength reduction <i>M. Shinoda & Y. Miyata</i>	2559
Towards an understanding of the mechanisms of debris flow-bed interaction: physical modelling <i>P. Song & C. Choi</i>	2565
Developing a geotechnical database to improve slope stability assessments in Quito, Ecuador <i>P. Vardanega, R. Hen-Jones, C. Zapata, E. Jiménez & E. Holcombe</i>	2569
Stability analysis of the slope with mud-intercalated cracks <i>F. Wang & Y. Liu</i>	2575
Case studies of early warning system of unstable slopes using tilting sensor array <i>L. Wang, M. Fukuhara, T. Uchimura & G. Chaminda</i>	2581
An early-warning method using displacement for slope and foundation pit <i>G. Yang, S. Wu, Y. Jiang, Z. Zhong, Y. Zhang & Y. Zhang</i>	2587
Behavior of soil slope under application of wetting and drying cycles <i>G. Zhang & F. Luo</i>	2593

TC 209: Offshore Geotechnics

Lateral behavior of a pre-installed single pile subjected to cyclic lateral loads in saturated silty sand <i>S.-H. Baek, S.-H. Lee, B. Kim, C. Choi, J. Cho & C.-K. Chung</i>	2601
Using near-surface CPT data to predict pipeline embedment in sands <i>F. Bransby, H. Eng Low, C. O'Loughlin, F. Bhatti & N. Aljabury</i>	2607
Rapid soil-structure interactions in saturated sand <i>S. Chow, B. Bienen, M. Randolph & A. Roy</i>	2615
Application of the PISA framework for slender jacket piles <i>J. Kragelund, P. Duroska, A. Shonberg, G. Perikleous, F. Schroeder & D. Potts</i>	2621
A comparison study of soil-conductor stiffness from centrifuge and laboratory testing <i>M. Guevara, J. Doherty, P. Watson, D. White, N. Boylan & Y. Teng</i>	2627
Cable burial risk assessment methods for layered soil <i>M. Haertsch & P. Knight</i>	2633
Numerical analysis for underwater noise caused by offshore monopile driving <i>R. He, Y. Xiang & Z. Guo</i>	2639
A unified lateral soil reaction model for monopiles in soft clay and sand considering various length-to-diameter (L/D) ratios. <i>Y. Hong, L. Wang, Y. Lai & H. Wang</i>	2645
Centrifugal and theoretical modelling of cyclic laterally loaded pile in clay <i>M. Huang, J. Zhu, J. Yu, C. Zhang & L. Mu</i>	2651
A comparison of soil lateral reaction models for monopile design in clay <i>L.-M. Lapastoure & D. Igoe</i>	2657
Plate anchors for floating offshore facilities: soil-anchor-floating system interactions <i>K. Kwa & D. White</i>	2663

Estimating hysteretic soil damping for skirted offshore foundations <i>D. Moellenbeck, N. Sivasithamparam, J. Johansson & Y. Zhang</i>	2671
MIDAS: Monopile Improved Design through Advanced cyclic Soil modelling <i>F. Pisanò, A. Askarinejad, H. Wang, S. Maghsoodi, K. Gavin, M. Segeren, A. Elkadi, D. de Lange & M. Konstadinou</i>	2677
Simplified method for determining the design failure curve of marine silty sand under dynamic loading <i>S.-W. Son, J.-C. Yoon & J.-M. Kim</i>	2683
Impact of the constitutive contact model on the simulation of model tests on monopiles with high-cyclic loading <i>P. Staubach, J. Machacek & T. Wichtmann</i>	2685
Deflection recovery of large diameter monopile under cyclic loading for offshore wind turbines <i>H. Wang, Y. Hong, L. Wang, B. He & Y. Lai</i>	2691
Pile ageing in clay to support life extension of offshore platforms <i>E. Bittar, B. Lehane, P. Watson, & B. Huang</i>	2697
On the behaviour of rock berms to arrest axial walking of offshore pipelines <i>C. O'Beirne, P. Watson, C. O'Loughlin, M. Banimahd & M. Kuo</i>	2703
Soil–water coupled elasto–plastic analysis on the formation process of normal faults in submarine ground due to its uplift and inclination <i>E. Yamada, K. Nakai & A. Asaoka</i>	2709
SPT and CPTU for soil characterization: Case studies in offshore windfarm development <i>S. Yang, J. Liu, T. Lunne & B. He</i>	2715
Experimental investigation on novel mechanical plate anchors for onshore and offshore anchorages <i>A. Zad, M. Moghadam & N. Dastaran</i>	2721
 <i>TC 210: Embankment Dams</i>	
Influence of clogging rate of toe drainage blanket on the response of homogeneous earthen dam resting on impervious foundation bed <i>A. Dey & P. Talukdar</i>	2729
Behavior measurement and monitoring of Esfarayen rockfill dam and providing a suitable method by examining the existing problems <i>H. Haj Ghassem, S. Mirkhani & M. Tadayon</i>	2735
Quantifying the performance of piping mitigation measures with two-dimensional, adaptive finite element analysis <i>B. Robbins & D. Griffiths</i>	2741
Slope stability and seepage analyses of earth dam embankment by empirical and numerical modelling techniques <i>A. Salahudeen, K. Onyelowe, M. Jalili, D. Eidgahee & M. Kabiri</i>	2747
Pertinence of parametric based breach models for rockfill dams <i>S. Sigurjónsson, F. Sigtryggsdóttir & G. Kiplesund</i>	2753
Effects of hydraulic loading on the internal erosion by suffusion of glacial till dam cores <i>I. Silva, P. Viklander & J. Laue</i>	2759
Breach analysis of clustered check dams within a small watershed in the loess plateau of China <i>X. Zhang & Z. Chen</i>	2765

TC 211: Ground Improvement

Soil reinforcement using rigid inclusions under three oil storage tanks – Overview of design methodologies, execution aspects, and settlement monitoring <i>A. Abboud, F. Cuira, C. Borely, H. Duplaine & G. Maubert</i>	2771
Improving the characteristics of expansive soils by using geofoam technique <i>G. Abdelrahman, M. Hosni & W. Mohammed</i>	2777
Quantifying the hydraulic conductivity of the “smear/intrusion” zone for sand-column reinforced clays <i>A. Almikati, A. Kahiel, S. Sadek & S. Najjar</i>	2783
Model of load transfer of shallow foundation on improved ground with compaction piles for fuel tanks <i>M. Amorim, A. Gusmão & G. de Brito Maia</i>	2787
Particle crushing during compaction of laterite and lateritic soils <i>S. Ampadu, F. Ayeh & T. Arthur</i>	2793
Eccentrically loaded circular surface foundation on loose and dense sand of limited thickness <i>C. Atalar, C. Patra, B. Sethy, K. Sobhan & B. Das</i>	2799
Influence of vacuum preloading to nearby non-treated area for Bangkok soft clay <i>S. Atapattu, K. Chao & S. Sorahump</i>	2803
Effect of time-dependent behavior on the pile-soil settlements <i>T. Awwad & S. Al Kodsi</i>	2809
Experimental analysis of physical, mechanical and durability performances of a clay treated with special lime-based hydraulic binder <i>L. Batali & G. Andries</i>	2813
Temperature effects on the mechanical behavior of saline soils stabilized with lime <i>E. Bittar, A. Quiñonez & R. López</i>	2819
New innovative material for vibro replacement columns <i>C. Boley, P. Pratter & L. Wang</i>	2825
Effects of cyclic freezing-thawing on the durability of biopolymer treated sand <i>M. Lee, J. Im, G.-C. Cho, I. Chang & M.-K. Chung</i>	2829
Efficient use of self-drilling bars for consolidation and foundation works <i>I. Ciocaniu, P. Uta, R. Ciortan & E. Vasilache</i>	2835
A trial of soil mixing options for a lattice cell ground improvement design in Holocene sandy soils containing pumice <i>K. Kudoic, P. Clayton & K. de Graaf</i>	2839
Application of CMC rigid inclusions for treatment of steel fuel tank foundations in Kwinana, Western Australia <i>T. Dinard & A. Hubaut</i>	2845
Static tension load tests performed on resin grouted micropiles <i>N. Denies, M. Allani, N. Huybrechts, P. Kempnaers & D. Smits</i>	2851
Surf Snowdonia: how geogrids brought waves to inland Wales, UK <i>C. Doulala-Rigby, T. Rigby, J. Rigby & M. Ainscough</i>	2857
A comparison on mechanical performance and durability of VA-based geopolymer and Portland cement for soil stabilization <i>P. Ghadir, H. Miraki, N. Malekhamadi, N. Shariatmadari & A. Javadi</i>	2863
Errors in the interpretation and execution of vacuum preloading <i>T.-L. Gouw</i>	2869

Theoretical prediction of jet grout column dimensions in stratified soil <i>C. Ho</i>	2875
Field trial study on offshore stone columns for liquefaction mitigation in coral sand areas <i>L. Hu, X. Liang, M. Zhu, Y. Jing & X. Xu</i>	2881
Quality assessment of in-situ cement stabilized soil by using inserting-type needle penetration apparatus <i>H. Ishii, M. Kobayashi & K. Kasama</i>	2887
Laboratory investigation of clay improvement using Nano-Bentonite <i>A. Jafary Shalkoohy & S. Esgandani</i>	2891
Shear strength behavior of bio-cemented carbonate sand treated by biochar-enhanced bio-stimulation approach <i>N.-J. Jiang, X. Han, Y. Wang & Y.-J. Du</i>	2895
Experience in soil stabilization with lime and cement on the A-44 Sierra Nevada Highway <i>E. Jiménez Ontiveros & F. Salvador</i>	2901
Application of double driving to accelerate consolidation by vertical drains for construction of oil tank farm at Willingdon Island, Cochin, India <i>A. Joseph, Chandrakaran S. & B. Jose</i>	2907
Injection ratio of high-performance eco-friendly grouting materials <i>J. Ryou & J. Jung</i>	2915
Application of visual programming for as-built review of ground improvement works <i>M. Kahlström, P.-A. Mortensen, M. Rømoen, T. Sandene & N. Hansen</i>	2919
Using microbial induced carbonate precipitation for improving the undrained shear strength of soft clayey soil <i>M. Karkush, N. Ali & S. Imran</i>	2925
Mechanical and chemical properties for self-healing cement-treated clay <i>K. Kasama & T. Ueda</i>	2931
Ultimate resistance of geogrid-reinforced working platforms for tracked plants over cohesive subgrade <i>A. Khansari, L. Vollmert, J. Klompmaker & A. Shahkolahi</i>	2937
Experimental feasibility study of stabilization and solidification of arsenic-contaminated soil with alkali-activated slag cement <i>A. Noorzad, A. Komaei, N. Shariatmadari & P. Ghadir</i>	2943
Strength and stiffness correlations of lime, cement, and fly ash stabilised soils <i>S. Likitlersuang, T. Chompoorat, P. Jamsawang & P. Jongpradist</i>	2949
Specific surface, clay mineralogy, water adsorption and free-swell behavior of fine-grained soils <i>A. Lutenegeger</i>	2955
Tension measurements on geogrid-reinforced soil using flexible load <i>B. Corrêa, C. Macedo & P. Maia</i>	2961
Analysis the displacement of fields a underground with Geogrid <i>C. Macedo, B. Corrêa & P. Maia</i>	2967
Settlement behavior of a square footing on stone column treated dry sand bed under seismic conditions <i>P. Maheshwari, S. Saxena & J.P. Sahoo</i>	2973
Effects of lignin in behavior of an expansive clay <i>S. Orlandi, C. Laskowski, J.C. Barria, D. Manzanal, M. Fernandez & T. Piqué</i>	2979
Jet grout column construction and quality controls for seismic strengthening Auckland's waterfront. <i>F. Mathieu, H. Harbuz, M. de Canecaude & L. Storie</i>	2985

Installation effects of soil exchange drillings on sheet pile driving <i>U. Matthiesen & M. Pohl</i>	2991
Coastal lagoon deposits treated by compaction grouting for liquefaction mitigation <i>F. Maucotel, C. Plomteux & J. Devynck</i>	2995
Russian heavy mass tampers for consolidation of thick mass foundation soils <i>O. Minaev</i>	3001
Study on long-term strength property of compacted soil with treatment by cement <i>Y. Miyashita, S. Aoyama & D. Sanjeewani</i>	3007
Amplitude as on-line compaction control parameter for vibro-compaction in 1g model tests <i>S. Nagula, J. Katt & J. Grabe</i>	3013
Measurement of pore water pressure in saturated sand during deep vibro compaction <i>P. Nagy, D. Adam, C. Kummerer & F. Kopf</i>	3019
Mechanical properties of stabilized deflocculated residual semi-arid soil <i>F. Okonta, K. Hlatshwayo & L. Makaralala</i>	3025
Evaluation on the performance of field embankment testing biodegradable drains based on spectral method analysis <i>T. Nguyen, B. Indraratna, C. Rujikiatkamjorn & B.-H. Xu</i>	3031
A methodology for evaluating the level of improvement of the soils by physical and chemical mixing and its application in several projects in Romania <i>E.-D. Olinic, S. Manea, C.-A. Burlacu & T. Olinic</i>	3037
Effects of polypropylene fiber on the compaction and strength characteristics of cement-bound lateritic soils <i>M. Owusu, S. Ampadu, F. Owusu-Nimo & T. Arthur</i>	3043
Design of ground improvement in the future EN 1997-3 <i>P. Pandrea, C. Bohn, C. Plomteux & N. Vogt</i>	3049
Review of optimum spacing of prefabricated vertical drains considering effect of smear zone <i>A. Peiris, F. Siahaan, K. Chan & G. Yip</i>	3055
Determination of compaction curves by utilizing the gyratory compactor <i>N. Perez & P. Garnica</i>	3061
Mechanical properties of a marginal soil stabilized with various additives <i>N. Perez & P. Garnica</i>	3067
Mitigating ettringite-induced heaving in lime-treated sulfate-rich soils using crystalline silica admixture <i>N. Biswas, A. Puppala & S. Chakraborty</i>	3071
Use of isotache for long term radial consolidation analysis <i>C. Rujikiatkamjorn, B. Indraratna, J.-H. Yin, P. Baral & S. Leroueil</i>	3079
<i>GeoTechTools</i> : development, implementation, and future <i>V. Schaefer, R. Berg, S. Nichols & J. Collin</i>	3085
The ventilated well method as an alternative solution for dewatering of soft soils <i>A. Scheuermann, P. Mishra, Y. Zhang, K. Tehrani & T. Bore</i>	3091
Multiphase deep vibro solution for biodiesel plant expansion in Singapore <i>S. Selvaraju, Z. He & K. Leong</i>	3099
Use of bio-cementation for prevention of coastal erosion against wave attacks <i>M. Obeida, M. Shahin & L. Cheng</i>	3105

Soil improvement for tilt rectification, case history <i>A. Shaposhnikov & V. Semkin</i>	3111
An experimental study of the behaviour of granular columns reinforced with post-consumer plastic bottles <i>L. Sobhee-Beetul & D. Kalumba</i>	3115
Ground improvement by creating a silicate grouted permeation plug in building pits <i>T. Sweijen & A. van der Stoel</i>	3121
Strength and stiffness of crushed concrete aggregate and its cement-mixture <i>F. Tatsuoka, Y. Iguchi & D. Hirakawa</i>	3125
Failure behaviour of deep cement mixed columns under embankment loading <i>A. Tyagi & P. Tyagi</i>	3131
Abutments placed on reinforced soil structures on partially cemented stone columns in soft peat and clay layers <i>B. van Dijk, L. Versmissen, J. Ruigrok, O. Heeres, B. Van Zegbroeck & H. de Jong</i>	3137
Influence of frequency on the mechanical behaviour of a soft soil reinforced with fibres <i>J. Villarroel-Ortega, A. Correia, P. Oliveira & L. Lemos</i>	3143
Experimental study on the microbial cementation of desert aeolian sand cementation under different calcium sources <i>H. Guo, X. Xu & M. Li</i>	3149
Prediction of compressive strength of cement stabilized sand with recovered Carbon Black <i>C.-Y. Yune & K. Chhun</i>	3155
Settlements of an erection bay of the Mavčiče Dam founded on a backfill <i>P. Žvanut</i>	3159
 <i>TC 212: Deep Foundations</i>	
Pile settlement under vertical static load: SLS design method based on Belgian experience <i>M. Allani & N. Huybrechts</i>	3165
Pile group settlement under vertical static load using pile to pile interaction factor: points of attention and influence of soil nonlinearity <i>M. Allani & N. Huybrechts</i>	3171
A novel nonlinear analysis of piles and monopiles subjected to lateral loads <i>B. Gupta & D. Basu</i>	3177
Numerical modeling and calibration of a mixed pile-raft foundation for an 18-stories building with 3 basements <i>L. Batali, H. Popa, D. Iancu, D. Knappe & G. Florea</i>	3183
Evaluation of pile foundation performance in parts of the Niger Delta <i>W. Beresibo & S. Ejezie</i>	3189
Field investigation to evaluate the uplift capacity and installation performance of screw piles in sand <i>E. Bittar, B. Lehane, D. Richards, A. Blake, D. White, C. Davidson & M. Brown</i>	3195
Dynamic coupled responses of 3-pile groups with different pile arrangements <i>S. Choudhary, S. Biswas & B. Manna</i>	3201
Contribution of superstructure stiffness to building foundation design <i>H. Chow & H. Poulos</i>	3205
A simplified analytical model for developing “t-z” curves for axially loaded piles <i>A. Bateman, J. Crispin & G. Mylonakis</i>	3211

Quantifying settlement reduction from two design codes for piles in London clay <i>J. Crispin, E. Voyagaki & P. Vardanega</i>	3217
Simple approaches for piled foundations under combined axial-moment loading <i>M. Iovino, L. de Sanctis, R. Di Laora & C. Iodice</i>	3223
Analysis of experience of using bored displacement piles in the conditions of heterogeneous weak water-saturated soils <i>R. Mangushev, I. Dyakonov, E. Lashkova & V. Smolenkov</i>	3229
Calibration of resistance factors for driven piles using local data from an Argentinian site <i>B. Diaz Amar, P. Covassi, M. Zeballos</i>	3235
Experimental study on the horizontal bearing characteristics of pipe pile considering the influence of vertical load <i>X. Ding, Y. Zhang & S. Zhou</i>	3241
Ensuring the piles bearing capacity under pressing loads <i>M. Doubrovsky, V. Dubravina, V. Shokarev & F. Gabibov</i>	3247
Field testing of axially loaded piles in dense sand <i>K. Duffly, K. Gavin, A. Askarinejad, M. Korff, D. de Lange & A. Roubos</i>	3253
Simulation of gentle pile driving (GDP) using the Material Point Method <i>M. Martinelli, V. Galavi & A. Elkadi</i>	3259
Bi-directional static load tests in the context of sustainable foundation design – A case study, Dubai, U.A.E. <i>H. Enriquez & I. Motara</i>	3265
Distribution of axial force and shear stress along a compression pile embedded in saturated and unsaturated swelling soil <i>S. Fadhil, R. Al-Omari & M. Fattah</i>	3271
Possibility of skin friction reduction of piles embedded in sand with increase in relative density through extensive interface testing <i>K. Fakharian & N. Vafaie</i>	3277
Bearing capacity of caisson foundations under combined loading <i>A. Rosati, S. Rampello, D. Gaudio & C. di Prisco</i>	3283
G-PFEM: an open access numerical tool for the simulation of spudcan penetration in clays <i>M. Ciantia, E. Dilberoglu, L. Monforte, M. Arroyo, A. Gens & J. Carbonell</i>	3289
Axial behavior and construction methodology of a new micropile developed in Brazil: an experimental study <i>L. Fiscina, Y. Barbosa, P. Albuquerque, D. de Carvalho & J. Neto</i>	3295
Large-scale load tests on bearing capacity of piled raft foundation with grid-form deep mixing walls <i>J. Hamada, K. Yamashita & T. Tanikawa</i>	3301
The deep foundation design of the first 40-story tower in the Atlantic coast of Guatemala, verified with bi-directional barrette load tests <i>A. Herrera & J. Paulín</i>	3307
Prediction method for bearing behavior of non-displacement piles on a thin bearing layer overlying a clay layer Y. <i>Horii, T. Nagao & T. Watanabe</i>	3311
Design charts for piles socketed into rock <i>I. Johnston</i>	3317
Basic research on the resisting mechanism of the uplifting belled pile <i>T. Kiriyaama, Y. Asaka & T. Hirai</i>	3323
Field and Centrifuge tests to validate a novel type of foundation <i>L. Lalicata, A. McNamara, S. Stallebrass & J. Panchal</i>	3329

Performance of large diameter bored piles in varying degree of weathered sedimentary and metamorphic rock formations <i>J. Lim & K. Kwang & P. Lee</i>	3335
Experimental study of failed drilled shafts' residual capacity <i>A. Lemnitzer, R. Farrag, C. Cox & B. Turner</i>	3341
Tensile pile calculation <i>L. Quirin</i>	3347
Case study on excessive pile deviation and lateral soil displacement due to massive pile installation in soft coastal alluvium in Northern Peninsular Malaysia <i>S.-S. Liew, F.-W. Chee & X.-B. Neoh</i>	3351
Study and application of pre-bored precast pile with enlarged base in China <i>L. Zao, W. Jiangbin, W. Weidong & Z. Rihong</i>	3357
Deformation characteristics of large-scale deep foundation pit in Nanjing floodplain area <i>G. Cai, L. Liu, S. Congress, S. Liu & A. Puppala</i>	3365
Assessing the bearing capacity of driven cast iron piles using different design approaches and comparison with test results <i>J. Lüking, M. Dimpker, F. Hörtkorn & E. Steinlechner</i>	3369
Calculation methods for axial pile resistance of driven piles after the German recommendation on piling (EA-Pfähle) in comparison with international standards <i>J. Lüking, M. Dimpker & F. Hörtkorn</i>	3375
Behaviour of driven battered minipile groups in sand under lateral loading <i>S. Mondal, M. Disfani & G. Narsilio</i>	3381
Foundation support and underpinning of an existing hotel with expander bodies to increase axial resistance <i>A. Marinucci, M. Terceros Herrera & M. Terceros Arce</i>	3387
Optimizing design of bored piles via tip post-grouting using Smart Cells <i>A. Marinucci, M. Terceros Herrera & M. Terceros Arce</i>	3393
Pile behavior in a long-term loaded piled raft foundation model on saturated clay <i>L. Hoang & T. Matsumoto</i>	3399
Punching settlement of raft-pile foundation under cyclic loading <i>I. Mirsayapov Ilizar</i>	3405
Time-dependent behaviour of pile groups under combined axial and lateral loads <i>V. Kami & A. Mishra</i>	3411
Effects of tunnelling on existing pile foundations: the TULIP Project <i>W. Mohamad, E. Bourgeois, A. Le Kouby, F. Szymkiewicz, L. Soyez, C. Kreziak, A. Noureldeen, D. Branque, A. Rallu, A. Michalski & N. Berthoz</i>	3417
Effect of stress release on vertical capacity β of pile <i>D. Naresh</i>	3423
Performance-based design of pile foundations for wind turbines in African unsaturated expansive soils <i>T. Gaspar, A. Osman, C. Augarde, W. Coombs, D. Toll, H. Moghaddasi, T. Charlton, S. Jacobsz, G. Smit, T. da Silva Burke, R. Murison, G. Biscontin, S. Haigh, K. Al-Haj, M. Elshafie, H. Elarabi, A. Elsharief, A. Zein, A. Abdelatif & S. Rimoy</i>	3427
Pile foundation design comparison with load testing <i>W. Paniagua & J. de Dios Alemán V.</i>	3433
Soil-foundation interaction analysis of a piled raft system supported by single helix screw piles <i>A. Parsa-Pajouh, W. Theunissen, N. Smith & L. Speechley</i>	3439

Numerical investigation of the long-term settlement behaviour of piled rafts in over-consolidated clay <i>A. Franzen & O. Reul</i>	3445
Experimental and numerical studies on pile groups under cyclic lateral loading <i>O. Reul, C. Niemann, C. O'Loughlin, Y. Tian & M. Cassidy</i>	3451
Stability of axially cyclic loaded displacement piles in sands <i>S. Rimoy, M. Silva & R. Jardine</i>	3457
A new type of pile: the shaft grouted driven concrete pile <i>P. Ruiz-Terán, C. Millán, J. Álvarez, C. Barreiro & R. Lablanca</i>	3463
Design of 462 meters high Lakhta Center Tower and monitoring results during construction process <i>O.A. Stanislav Shulyat'ev, I. Bokov, A. Shakhramanyan & Y. Kolotovichev</i>	3469
Centrifuge study of downdrag on axially loaded piles in liquefiable soils <i>S. Sinha, K. Ziotopoulou & B. Kutter</i>	3475
Development of the automatic management system for hydraulic static pile driver <i>H.-Y. Song, W.-S. Seo, J.-M. Lee, H.-W. Kim, I.-S. Jeon & H. Park</i>	3481
Design of composite well-pile foundation (CWPF): A case study of bridge foundation in Nepal <i>J. Mishra, M. Subedi & K. Sharma</i>	3487
A new design of a combined pile raft foundation for a multi-storey building with determination of its main parameters <i>O. Samorodov, D. Mulyar, S. Tabachnikov, O. Krotov, Y. Vynnykov, M. Zotsenko & V. Shapoval</i>	3493
Effect of the use of the Expander Body on the stiffness response of piles constructed by different drilling technologies <i>M. Terceros & C. Medeiros</i>	3499
Pile running problem and large deformation modelling <i>Y. Tian, M.J. Cassidy & H. Zhao</i>	3505
Skin friction of driven piles in weak rock <i>M. Tran</i>	3511
Distinctions of modern technologies for pile foundation <i>A. Tulebekova, A. Zhussupbekov, A. Zhankina, Z. Shakhmov & B. Abdrakhmanova</i>	3517
A theoretical study of progressive failure mechanism of tension piles in moderately strong rock <i>P. Wong & H. Poulos</i>	3523
Load-deformation response of laterally-loaded large diameter piles in rock considering shaft vertical interfacial friction <i>R. Xu & N. Vitharana</i>	3529
Review of driven pile design, construction & performance in extremely soft clay condition for a major bridge link project in Southeast Asia <i>H. Tang, J. Yiu, J. Ngan & E. Tam</i>	3535
Vertical displacement of bored piles group for project of LRT using numerical analysis <i>A. Zhussupbekov, N. Shakirova, A. Omarov, D.-W. Chang & V. Kaliakin</i>	3541

TC 213: Scour and Erosion

Experimental study on the external and internal erosion behaviors of biopolymer-treated earthen levee structures assessed via open channel hydraulic flume apparatus <i>I. Chang, S. Lee, Y.-M. Kwon, M. Lee & G.-C. Cho</i>	3549
---	------

Effect of fine content on the hydraulic performance of sand-structure interface subjected to direct shearing <i>C. Chen, S. Chen, Y. Tang, Z. Fu & S. Mei</i>	3553
Scour effect around a large 3D printed artificial reefs in sand <i>E. Escobar-Valencia & J. Capet</i>	3559
Combined effects of scour and earthquake on lateral responses of piles in sands <i>C. Lin & W. Jiang</i>	3565
Experiments on filter criteria under gentle hydraulic gradients <i>C. MacRobert, M. Masango & O. Mkebe</i>	3571
Multi-scale geo-mechanics on scour <i>K. Yasue, K. Maeda & T. Matsuda</i>	3577
Scour effects on the bearing capacity of bridge shallow foundations <i>K. Papadopoulou & G. Gazetas</i>	3583
Experimental investigation on internal erosion and its impact on mechanical response of gap-graded and well-graded soils <i>J. Prasomsri & A. Takahashi</i>	3589
Suffusion and mechanical characteristics of soils affected by seepage before and after shearing in triaxial test apparatus <i>M. Suzuki, T. Ishimaru & T. Wakamatsu</i>	3595
Modelling of granular soils subjected to internal erosion considering the evolution of particle size distribution <i>C.-X. Tong, M.-Y. Li, S. Zhang & D. Sheng</i>	3601
Evaluation of the Material Point Method for the modeling of suffusion processes <i>A. Yerro, J. Murphy & K. Soga</i>	3605
 <i>TC 214: Foundation Engineering for Difficult Soft Soil Conditions</i>	
Clay fabric under the brightest light <i>G. Birmpilis & J. Dijkstra</i>	3613
Validation of an Elastic-ThermoViscoPlastic constitutive model for clay <i>M. Fathalikhani, P. Maghoul, J. Graham & D. Kurz</i>	3619
Buckling of micropiles in soft soil conditions – comparison of analytical approaches, FEM and real-scale in-situ pile loadtests <i>P. Ganne</i>	3625
Long-term behaviour of deep soil mixed columns for soft ground improvement-lessons learnt from project <i>A. Kamruzzaman</i>	3631
Evaluation of threshold stress for high-speed railway foundation on Bangkok soft clay under cyclic loading <i>S. Kongpanickul, F. Mudden, K. Chao & K. Saowiang</i>	3637
A framework for the time-dependent behaviour of soft structured clays <i>M. Mánica, E. Ovando-Shelley, E. Botero, A. Gens & J. Vaunat</i>	3643
Geotechnical properties of peat of Estonia <i>S. Melentijevic & A. Saez</i>	3649
Deep circular excavations, remarkable projects in Mexico <i>J. Paulin Aguirre</i>	3655
Effects of installation of drilled columns with partial and full displacement of the soils on the surrounding ground deformations <i>A. Purwodihardjo, A. Lesmana, M. Brown & D. King</i>	3661

Numerical prediction of the Ballina test embankment using an advanced constitutive model <i>J. Barron, M. Rouainia, & T. Charlton</i>	3667
Mutual effects of microstructure and water salinity on compressibility and shear strength of a collapsible soil <i>H. Sadeghi, S. Khodadadi, P. AliPanahi & A. Motlagh</i>	3673
Settlement and stability of bridge approach embankments on soft clays – Two case histories <i>S. Srihar</i>	3679
Multi-stepwise CRS consolidation test and its application to predict long-term consolidation based on the isotache concept <i>Y. Watabe, A. Yoneda & H. Hashizume</i>	3685
Impacts of tunnelling induced groundwater under-drainage on soft soil settlement <i>D. Watson, R. Hatley & S. Mirlatifi</i>	3691
Microscopic mechanism on permeability anisotropy of Hangzhou clay <i>J. Zhou, H. Hu, X. Zhang & L. Luo</i>	3697
 <i>TC 215: Environmental Geotechnics</i>	
Gas permeability of cement-bentonite for cut-off walls <i>S. Al-Baiaty, A. Bouazza & W. Gates</i>	3705
Bibliometric research to determine characterization tests for solid waste disposal areas: case study of a controlled landfill in Brazil <i>J. Santos, C. Baran, P. Sousa, A. Cavalcante</i>	3711
Potential effects of climate changes on slope stability <i>L. Baby, A. Siaccara, M. Futai & R. Bezerra</i>	3717
TOC value as an indicative parameter for determining the spread of grouting materials <i>S. Wagner, C. Boley & Y. Forouzandeh</i>	3721
Assessment of Soil – MSW Ash mixture mechanical behavior through laboratory testing <i>G. Vizcarra & M. Casagrande</i>	3727
Long-time behaviour of exposed geomembranes on dams in Europe <i>D. Cazzuffi & D. Gioffrè</i>	3733
Numerical computer modelling of a sustainable road structure with geogrids in a karst hazard environment <i>A. Conrado-Palafox & L. Equihua-Anguiano</i>	3739
Comparative study between the strength development in alkali activated and red mud blended fly ash <i>S. Das, M. Mahamaya & P. Mishra</i>	3745
Thermal properties of marine sediments <i>A. Deu & M. Devincenzi</i>	3751
Influence of adding polymeric fibers on engineering properties of clayey soils <i>E. Eminan</i>	3757
In situ chemical oxidation/reduction using the jet grouting technique (HaloCrete®) <i>P. Freitag, A. Zöhrer & T.G. Reichenauer</i>	3763
Experimental and theoretical studies of mud pumping in railway embankments: phase transition and material migration <i>F. Gao, S. Zhang & D. Sheng</i>	3769
Column test for arsenic attenuation by sandy soil amended with calcium-magnesium composite of different particle sizes <i>L. Gathuka, T. Kato, A. Takai & T. Katsumi</i>	3775

Investigation of soil stabilization by cross-linking chitosan and sodium alginate biopolymers <i>P. Ghadir, M. Tasuji, N. Shariatmadari, H. Fatehi & K. Shabani</i>	3781
Modeling of methane emissions from a municipal solid waste landfill <i>J. Hanson, D. Manheim, G. Swarbrick & N. Yeşiller</i>	3785
Evaluation of gravel-tire chips mixtures for their use in marine landfill leachate collection systems <i>C. Hao, H. Hazarika & Y. Isobe</i>	3791
Simulation of mechanical dispersion by an anisotropic pore-network model <i>X. Zhang, D. Lin & L. Hu</i>	3797
Experimental study to elucidate cementation effect on swelling pressure and montmorillonite basal spacing of bentonite ore <i>D. Ito & H. Komine</i>	3803
Effect of freeze-thaw cycles and two different permeant fluids on GCL/Geomembrane interface transmissivity <i>F. Jabin, R. Rowe & R. Brachman</i>	3809
Fundamental properties of polyacrylamide-based polymers for bored piling and diaphragm walling <i>S. Jefferis & C. Lam</i>	3815
Predicting post-construction settlement of waste material in a superfund site pre-loaded with a surcharge embankment <i>M. Kamalzare & M. Sater</i>	3821
Stability of crude urease extract for enzyme induced carbonate precipitation (EICP) <i>E. Kavazanjian, N. Javadi & H. Tirkolaei</i>	3827
Real assessment of the use of secondary energy products <i>J. Košťál & P. Černoch</i>	3831
Investigation on environmental and mechanical properties of reinforced construction and demolition materials with used tires <i>L. Li, W. Li, H. Xiao, W. Chen & L. Qin</i>	3835
Review of the application of filter rules for geosynthetics based on a new experimental study <i>J. Liebl & C. Moormann</i>	3841
Soil water content regression analysis of measurement data from hyperspectral camera in weathered granite soils <i>H.-H. Lim, S.-R. Lee, E. Cheon, D.-H. Lee, Y.-E. Nam & M.-S. Kim</i>	3847
Microbially induced carbonate precipitation in a medium-sized sand <i>S. Lourenço, L. Chung, L. Jinsong & T. Zhang</i>	3853
Multiyear assessment of F-gas emissions and climate impacts from a municipal solid waste landfill <i>D. Manheim, N. Yeşiller & J. Hanson</i>	3857
Impact of lead on the swelling, hydraulic and consolidation behaviour of bentonite <i>A. Mishra</i>	3863
Evaluation of emulsion of residual oil and pore water in soil using ultrasonic wave via X-ray CT <i>T. Mukunoki, S. Shikita & J. Yang</i>	3867
An investigation of the geomechanical behavior of fiber-reinforced clay soil <i>A. Palat & M. Hendry</i>	3873
Analysis of the correlation between modified secondary and primary compression index on the example of old municipal waste in Serbia <i>D. Rakić, I. Ikodinović, J. Janković & T. Djurić</i>	3879
Geogrid reinforced soil walls in Myanmar: an overview <i>R. Mahajan, S. Ramasamy, F. Rosiello & D. Ghoshal</i>	3885

Applicability of coal bottom ash for the rehabilitation of clay mines: Potential as a backfill material <i>S. Suloshini, A. Ranathunga, A. Kulathilaka & B. Gunawardana</i>	3891
Thermal and chemical effects on buffer materials in a rad-waste disposal repository: experiments and numerical simulation by a double-structure hypoplasticity model <i>F. Teng, Y.-C. Sie, C. Kuo, C.-R. Huang & B.-S. Hwang</i>	3897
Exploring hydrological effects of plant height on geotechnical infrastructures <i>Z. Wang & Y. Wang</i>	3903
Measuring the hydraulic performance through a Geosynthetic clay liner overlap in the horizontal flow direction <i>I. Weerasinghe, C. Gallage & L. Dawes</i>	3909
Short-term hydraulic conductivity and consolidation properties of soil-bentonite backfills exposed to CCR-impacted groundwater <i>Y.-J. Du, Y.-L. Yang, S.-Y. Liu, Z.-B. Liu, F. Wang & R.-D. Fan</i>	3915
 <i>TC 216: Frost Geotechnics</i>	
Field performance and numerical simulation of embankments in the Arctic <i>E. De Guzman, M. Alfaro, G. Doré & L. Arenson</i>	3923
Influence of an instrumented culvert crossing on the thermal-mechanical performance of a highway embankment in the Arctic <i>S. Kaluzny, M. Alfaro, E. De Guzman, G. Doré & L. Arenson</i>	3929
Experimental study on the mixed-mode fracture of frozen sand <i>B. Hwang, W. Cho & H. Ban</i>	3935
Consolidation theory applied to the segregation potential in freezing soils <i>H. Jin & J. Lee & B. Ryu</i>	3941
Influences of unit cement content and fine fraction on freezing and thawing characteristics of soil pavement <i>T. Kawamura & T. Umezaki</i>	3947
Geotechnical study for Arctic-Circle resource development using evaluation of environmental impact and frozen soil experiment <i>S. Kim, S.-S. Hong & Y. Kim</i>	3953
Freezing and thawing effect on the coefficient of lateral earth pressure at rest (K_0) with changes in degree of saturation <i>I. Kim, G. Kim, Q. Abbas & J. Lee</i>	3959
Stress-dilatancy performance of frozen compacted clay-gravel mixtures <i>Y. Lu, S. Liu, Y. Zhang, E. Alonso & A. Ramon</i>	3963
Field footing test for foundation settlement estimate of marine saline permafrost in Longyearbyen, Svalbard <i>C. Lyu, G. Eiksund, S. Nordal, K. Høyland, G. Grimstad, A. Shestov & A. Aalberg</i>	3969
Volumetric changes in clays during freeze-thaw cycles: Case of quick freezing <i>S. Nishimura, S. Okajima & Y. Higo</i>	3975
Freezing and thawing characteristics in highway pavements and subgrade in conditions of Kazakhstan <i>B. Teltayev, E. Suppes, K. Tileu & A. Sarsembayeva</i>	3981
Heat flow and temperatures in three culverts embedded in road embankments subjected to seasonal frost <i>K. Tommik, S. Knutsson, J. Laue & N. Lintzén</i>	3987

TC 217: Land Reclamation

- Unload-reload cycling effects on the compression and swelling response of a reconstituted dredged soft marine deposit 3995
S. Chian, H. Halai, N. Lee, S. Chian & C. Leung
- Land reclamation using soft clay or excavated soil 4003
J. Chu, H. Chen, S. Wu & W. Guo
- Optimization of consolidation procedures for dredged fine sediments in confined disposal facilities 4007
E. Fratolocchi, M. Felici, F. Pasqualini, I. Bellezza & E. Pasqualini
- Innovative earthworks to achieve settlement performance of a very deep fill 4013
R. Olds & D. Yang
- Predicting sequential swelling and creep after unloading 4019
T. Vergote, C. Leung & S. Chian

TC 218: Reinforced Fill Structures

- Behavior of closely spaced back-to-back MSE walls considering compaction and surcharge loads at ultimate limit state 4027
U. Balunaini, R. Sridhar & S. Mouli
- Comparative study on the reinforced earth retaining walls design methods 4033
O. Col & A. Stanciu
- Modelling the effect of in-soil temperature and relative humidity on performance of PET strap soil reinforcement products 4039
A. Moncada, I. Damians, S. Olivella & R. Bathurst
- Soil-geogrid interaction under cyclic and post-cyclic pullout loading conditions 4045
F. Ferreira, C. Vieira, M. Lopes & P. Ferreira
- Mechanically stabilized earth wall monitoring technique based on image processing gathered from single view of camera 4051
Y. Ha & Y. Kim
- Experimental investigation on benefits of geosynthetics in mitigating backfill surface settlement behind integral bridge abutments induced by seasonal temperature changes 4057
J. Han, H. Liu & R. Parsons
- Optimizing reinforcement lengths of very steep geosynthetic reinforced slope 4063
A. Jha, M. Madhav & G. Reddy
- Geosynthetic reinforced column supported embankments with defective columns 4069
L. King, M. Larisch, D. King & A. Bouazza
- Direct shear test results of lahar sand with rice hull ash for reinforced fill application 4075
A. Madrazo, H. Hernandez, J. Calzo, J. Hoo, K. Llave & B. Paracale
- Comparison of the AASHTO and EM methods for reinforced soil walls design under operational conditions 4079
S. Mirmoradi & M. Ehrlich
- Lateral response of 0.6m pipe piles near a Mechanically Stabilized Earth (MSE) wall 4085
K. Rollins & A. Wilson
- Performance of geosynthetic-reinforced soil walls with marginal backfill subjected to rainfall 4091
H.-M. Wu, K.-H. Yang, L. Ge, T.-L. Tseng & B. Hsiung

Implications of nonlinear shear strength and interface envelopes of reinforced compacted sand fills in very high earth structures 4097
G. Zavala & M. Pando

Reliability analysis of a compacted fill slope reinforced with geogrids 4103
D. Zheng, C. Dreger, B. Zhang & R. Chalaturnyk

TC 219: System Performance of Geotechnical Structures

Decision process for selection of the toe improvement pattern in retaining structures – Case studies 4111
Ö. Akçakal, B. Koçak, N. Velioglu, O. Sevim & H. Kulaç

Melbourne Metro Tunnel portal temporary earth retention works - design approach and measured performance 4115
S. Amatyia, B. Lee & S. Srithar

Numerical analysis of deep ground movements induced by circular shaft construction 4121
E. Bilotta, N. De Falco, S. Divall & R. Goodey

A deep excavation case history in the KVMRT-SSP Line: design and construction challenges in geotechnical engineering practice 4127
C. Boon, L. Ooi, J. Tan & D. Lim

The concept and design methodologies of resilient geotechnical and underground engineering 4133
X. Cheng, G. Zheng, Y. Diao, H. Zhou, T. Zhang, R. Wang & Fan Yi

Milagres tunnel instrumentation (Pernambuco-Ceará, Brazil) 4139
L. Ferreira

Basement diaphragm walls and foundations of Sydney's tallest building, Crown Sydney Hotel Resort – challenges and solutions 4145
S. Mirlatifi, B. Azari, H. Buys, A. Parsa-Pajouh & I. Cullen

Embedded walls as a measure to mitigate the ground deformations at Section 63 of Lisbon Metro, Portugal 4151
A. Pedro, J. Grazina & D. Massicano

Jet grouted tie-back piles at high loads in an aggressive soil environment 4157
M. Pohl, J. Abratis & G. Peschken

Fiber optic distributed acoustic sensing monitoring acoustic emissions for geotechnical structure performance in the field 4163
M. Quinn, C. Baxter, G Potty, K. Winters & J. Picucci

Adaptation of a strutting support system for a diaphragm wall initially designed and executed for a considerably smaller excavation depth 4169
A. Szerzo, L. Sata, C. Vintila, H. Kulac & O. Akcakal

Eurocode 7, design approach 1, for design of deep excavations in South Africa – a comparison between working stress and limit state design 4173
F. Van Der Merwe & N. Chang

Design and observed performance of Wuhan Greenland Center excavation near the Yangtze River 4179
Z. Xu, W. Wang, Q. Li & Q. Weng

Performances of deep braced excavation in anisotropic soft clay by different construction methods 4185
Y. Li & W. Zhang

TC 220: Field Monitoring in Geomechanics

Design and construction of an L-shape D-wall panel 4193
M. Angeles & D. Bali

Integrated characterisation and analysis of landslide areas combining Finite Elements Method modelling and Interferometric Synthetic Aperture Radar (InSAR) techniques applied to Taquiña Basin in Cochabamba-Bolivia <i>F. Antezana López, C. Salinas Rodríguez & J. Torres Navarro</i>	4199
An experimental study of load distribution in CPRF with first measurement result comparison <i>S. Bodus & G. Kacprzak</i>	4205
Ground settlement and excavation volume measurement using remote sensing photogrammetry <i>S. Wong, S. Chian, K. Yeoh, C. Foo, K. Goh, W. Shi & K. Tan</i>	4211
Ground response due to deep excavations in Sydney sandstone <i>P. Hewitt & M. Kitson</i>	4217
Fabrication of smart optical fiber pressure sensors using 3D printing technology <i>C. Hong, J. Huang, W. Chen, J. Li & C. Xu</i>	4223
Full-scale field observations of the thermo-mechanical behavior of different type of energy pile <i>G. Jiang, D. Shao, H. Lu, C. Zong, C. Lin & J. Huang</i>	4227
Embankment monitoring. Techniques and risk control <i>E.J. Ontiveros & F. Blanco</i>	4233
Geotechnical applications of the technology of Global Navigation Satellite System, GNSS <i>G. Auvinet, E. Méndez-Sánchez & M. Juárez-Camarena</i>	4239
Shear strength measurement in soft mud deposits: application of GraviProbe and RheoTune <i>E. Meshkati, J. Terwindt, T. van Kessel, A. Kirichek, A. Talmon & A. Bezuijen</i>	4245
Electrical resistivity characteristics of rock fractures according to aperture size <i>T.-H. Kong, T.-M. Oh, J.-W. Lee & H. Lee</i>	4251
Design optimization of Rigid Inclusions with results of fiber-optic instrumented static and dynamic load tests <i>M. Lerch, T. Neidhart & M. Bubenicek</i>	4255
Improving the prediction of soil displacement considering soil heterogeneity <i>K. Liu, Y. Wang & W. Yuan</i>	4261
Instrumentation and response of drilled piers under overturning moments for a viaduct in the Metropolitan Area of Mexico City <i>M. Mendoza, S. Mendoza & D. Garcia</i>	4267
Production rate of self-drilling soil nails in a coastal slope stabilisation project in Scotland <i>S. Mickovski</i>	4273
The impact of sampling intervals on the evaluation of coastal ground water data for a proper design of engineering structures <i>T. Nuber, W. Pfeiffer & M. Pohl</i>	4279
Monitoring swelling clays via space-borne soil moisture and ground movement measurements <i>S. Perdikou, D. Kouhartsiouk & M. Valanides</i>	4285
Experience report on the use of distributed fibre optic sensing on ground anchors <i>V. Račanský, C. Fabris, H. Schweiger & H. Woschitz</i>	4291
Comparing two- and three-dimensional finite element analysis of a cement stabilized trench with actual displacement monitored after excavation <i>S. Sadeghian, C. Grimes & N. Ridgley</i>	4297
Installation of a low-cost unsaturated soil monitoring system in Howick, South Africa <i>M. Schulz-Poblet, F. van der Merwe & T. Gaspar</i>	4303
Evaluation and monitoring of man-made slope failure at Øysand, Norway <i>Y. Shin, J. Choi, S. Quinteros, B. Carlton, J.-S. L'Heureux & J. Seong</i>	4309

Investigation of the deformation mechanism and the stability of deformable body in the reservoir area based on the D-InSAR monitoring <i>Y. Wang, L. Jiang, P. Sun & X. Lin</i>	4315
Screw displacement pile shaft deformations measured by vibrating wire and fiber optic systems during a static load test <i>M. Wiszniewski & A. Krasiński</i>	4321
Experimental investigation and field monitoring of recycled material mixtures used for backfilling sewer trenches <i>E. Yaghoubi, A. Al-Taie, S. Fragomeni, M. Disfani, E. Gmehling & S. Trikha</i>	4327

TC 221: Tailing and Mine Wastes

Influence of the grain size variation of waste rock from iron mining on the resistance parameters of the waste rock-geomembrane interface through the direct shear test <i>C. Barriga Paria, E. Pereira, H. de Lima & L. Ferreria</i>	4335
Simulation of the effects of extraordinary conditions caused by the El Niño phenomenon in the settling and consolidation stages of low-density mining tailings <i>C.J. Barriga Paria & E. Pereira</i>	4339
Application of electro-osmosis to the consolidation of sand quarry tailings <i>X. Chen, M. Jaksa, A. Deng & F. Pooya Nejad</i>	4345
The implications of transitional behaviour for tailings <i>A. Cartwright, M. Coop & A. Fourie</i>	4351
The influence of standpipe piezometer lag time on the stability of Tailings Storage Facilities <i>L. Geldenhuys, Y. Narainsamy & F. Hörtkorn</i>	4357
Research results on soil liquefaction of mine dumps in Eastern Germany <i>W. Kudla, T. Rosenzweig, S. Szczyrba & J. Weissbach</i>	4363
Shear strength estimation of very coarse mine waste using Barton's empirical criterion and a Bayesian analysis <i>S. Linero-Molina, L.-F. Contreras & J. Dixon</i>	4369
A review of liquefaction potential assessment in engineering practice <i>Y. Narainsamy, S. Jacobsz, L. Geldenhuys & F. Hörtkorn</i>	4375
Evaluation of the physical stability of leaching waste deposits for the closure stage <i>A. Fourie, G. Villavicencio, J. Palma, P. Valenzuela & P. Breul</i>	4381
Permeability of materials used in the construction of a tailings dam <i>H. Patiño, R. Galindo & C. Olalla</i>	4387
Towards sustainable and safe tailings dams <i>L. Piciullo, G. Dublet-Adli, Y. Suzuki, Ø. Torgersrud, M. Vöge, Z. Liu, S. Quinteros, V. Capobianco, G. Okkenhaug, G. Breedveld, H. Liu & S. Lacasse</i>	4393
Natural weathering as a surface crusting tool for tailings management <i>U. Rima & N. Beier</i>	4399
Liquefaction of mine dumps in Eastern Germany – new findings after a five-year monitoring research project <i>T. Rosenzweig & W. Kudla</i>	4405
Flow liquefaction triggering analyses of a tailings storage facility by means of a simplified numerical procedure <i>M. Sottile, I. Cueto, A. Sfriso, O. Ledesma & A. Lizcano</i>	4411
The concept of static liquefaction and its application in the stability analysis of tailings dams <i>R. Verdugo</i>	4417

Flow liquefaction susceptibility of iron ore mining tailings from CPTu data: State parameter and yield-stress-ratio approaches 4423

A. Viana da Fonseca, F. Molina-Gómez, A. Fonseca, D. Besençon & M. Arroyo

Critical state and instability locus of a silty-sand iron tailing 4429

A. Viana da Fonseca & D. Cordeiro

TC 301: Preservation of Historic Sites

Constructing a cut and cover tunnel under a four storey heritage building without any damage 4437

M. Chung & J. Marwick

Jet Grouting to mitigate damage induced by tunneling near the church of San Francisco de Asis in Guadalajara, Mexico 4441

E. Ovando-Shelley, E. Botero-Jaramillo & M. Díaz-Guzmán

Mitigating the effects of tunneling on the structural integrity of the Guadalajara Cathedral in Mexico 4445

M. Díaz-Guzmán, E. Ovando-Shelley & E. Botero-Jaramillo

Case studies on the restoration and retrofitting of heritage churches and buildings in the Philippines 4451

R. Luna, E. Abiad, J. Santos, E. Kasilag, R. Perez, M. Casuncad, M. Folloso, R. Garcia, F. Bernales, & J. Razon

Geotechnical measures for stabilization of the Aqueduct in Skopje 4455

J. Papić, I. Peševski, R. Jovanova & A. Strašeski

Desiccation control under a historical building founded over clayey soils: a case study 4461

C. Ramírez, L. Parra-Gómez, C. Reina-Leal & J. Colmenares

Study of mechanism of continuous tilting of the tower of Pisa over 700 years 4467

K. Kozhogulov, A. Mochizuki, A. Zhussupbekov, G. Tanyrbergenova & M. Nurgozhina

TC 302: Forensic Geotechnical Engineering

Investigating the slope instability of an aging water retaining earth fill dam 4475

I.O. Ubay-Anongphouth & M. Alfaro

Forensic investigation of the old E10 road in Kiruna, Sweden 4481

T. Bansal, S. Knutsson & J. Laue

Global instabilities of certain reinforced earth slopes 4487

R. Jessep

Novel vibration based integrity testing for deep foundation piles 4491

A. Kirlangic & L. Gelman

Case Study: Lessons learned from large scale pile driving in Waikeria, New Zealand 4497

I. Li, M. Vinod & J. Hsi

The failure of an earth retaining wall: investigation and assessment of the causes 4503

G. Scarpelli, P. Ruggeri, V. Fruzzetti, A. Vita & D. Segato

TC 304: Engineering Practice of Risk Assessment and Management

The use of independent technical assessment in geotechnical engineering 4511

R. Boyd

A technical note on the nature of uncertainty in geotechnical engineering 4515

R. Boyd

An investigation of probabilistic analysis in relation to the design of pile groups <i>M. Randolph & S. Buttlng</i>	4519
A probabilistic analysis to assess the most probable design parameters for use in the observational method <i>A. Cañavate-Grimal, D. Nicholson & Y. Chen</i>	4525
Is the scale of fluctuation the only important parameter in geotechnical spatial variability? <i>J. Ching</i>	4531
Probabilistic modelling of shear strength parameters for tailings dam design <i>B. Dareeju, T. Rowles & Y. Xu</i>	4537
Probabilistic modelling of landslide frequency due to coalescence of earthquake and rainfall events <i>P. Ering, H. Rana & G. Babu</i>	4543
Databases to assess the hydraulic conductivity of road construction materials <i>S. Feng, E. Ibraim & P. Vardanega</i>	4547
Risk assessment of ground movement rebound effects associated with Hazelwood mine closure and mine pit flooding <i>D. King, C. Haberfield & J. Faithful</i>	4553
Risk assessment and risk management for dams <i>S. Lacasse, F. Nadim, Z. Liu, K. Høeg, U.K. Eidsvig & L. Piciullo</i>	4559
Application of statistics to CPT-based parameter selection <i>H.J. Lengkeek, M. Hauth & S.N. Jonkman</i>	4565
Influence of undrained shear strength random fields on probabilistic analysis of embankment stability <i>T.S. Nguyen, S. Likilersuang & D.T. Bergado</i>	4571
Current state-of-practice of geohazard assessment in Philippine infrastructure <i>A. Acacio, R. Luna, R. Quebral, R. Cabungcal, & J. Pallarca</i>	4577
Influence of site sampling plan on differential foundation settlement prediction using conditional-random-field-based finite element method <i>Z. Luo, N. Luo & B. Das</i>	4583
Statistical analyses of variability of sensitive soils and effects on roads geotechnical design <i>E. Milutinovici & D. Mihailescu</i>	4589
Probabilistic back analysis of a Copenhagen metro station <i>E. Olbakk, F. Petrella, A. Cañavate-Grimal & I. Rocchi</i>	4595
A functional-geostatistics approach to deal with soil variability in project management and deep foundation design <i>L. Parra-Gómez, J. Colmenares & M. Bohorquez</i>	4601
Probabilistic post-failure analysis of landslides using stochastic material point method with non-stationary random fields <i>G. Ma, M. Rezanian & M. Nezhad</i>	4607
A case study on the investigation and mitigation of dolomite area in Graskop, South Africa <i>C. Sikwanda, S. Phalannawa & D. Oliver</i>	4613
Communication of risk and opportunity in geotechnical engineering <i>T. St John</i>	4617
Probability-based geotechnical site characterization for deep foundations in onshore Niger Delta Area of Nigeria <i>N. Temple & S. Ejezie</i>	4623
Trans-dimensional Bayesian inversion of soil-structure interaction pressures on in-service underground structures <i>Z. Tian, Q. Gong & Y. Zhao</i>	4631

Tolerable risk chart <i>A. Timchenko, A. Shidlovskaya & J.-L. Briaud</i>	4637
Reliability analysis of a shallow foundation <i>A. Torrico Siacara, M. Futai & A. Beck</i>	4643
A reliability-based design of lining structures for underground space against water seepage <i>C. Wang</i>	4649
Stratigraphic uncertainty quantification using Bayesian machine learning and Markov random field <i>H. Wang & X. Wei</i>	4655
Risk assessment for spontaneous soil liquefaction on dump sites <i>J. Weißbach & W. Kudla</i>	4661
Probabilistic landslide hazard in a recurrent landslide in Colombia <i>J.E. Yepes-Heredia</i>	4667
 <i>TC 305: Geotechnical Infrastructure for Megacities and New Capitals</i>	
Vibration measurement during blast induced controlled demolition of a 17 storied building at Vochin, India <i>A. Boominathan, J. Dhanya, R. Varghese & A. Joseph</i>	4677
Design of geotechnical structures for Thames Tideway Tunnel East Section <i>A. Carvalho, D. Hard, S. Sayavong, M. Stanley, R. Talby, P. Rutty, G. Pereira, T. Newman & M. Hanscomb</i>	4683
Advanced technologies in shield tunneling – A case study in Taiwan <i>J.-F. Chang, C.-R. Chou, H.-C. Tseng, Z.-C. Moh & T. Mitsui</i>	4689
Case History: Identification and quantification of collapsible soil potential by implementing robust in-situ and laboratory testing campaign for a project located in north Riyadh, Saudi Arabia <i>A. El-Orabi & A. Ismael</i>	4695
Infinity Tower, high rise building in Lisbon: innovative solutions for a deep and complex excavation <i>C. Fartaria & A. Pinto</i>	4701
The Great Wall of St Peters – Design and construction of a two-tiered trapezoidal reinforced soil wall retaining landfills in a former shale quarry in Sydney City <i>Y. Huang & V. Tandjiria</i>	4707
Assessment of soil cracking mechanism in the south-east area of Mexico City based on deep geotechnical exploration <i>G. Auvinet-Guichard, M. Juárez-Camarena, E. Méndez-Sánchez, F. Hernández-Vizcarra, S. Martínez-Galván, M. Pérez-Ángeles & J. Sánchez-Guzmán</i>	4713
Load tests to optimize the foundation design of the Bogota Metro <i>C. Marulanda & E. León</i>	4719
Unique characteristics of silty soils of loess soil in Kazakhstan, silty rock at Bamiyan in Afghanistan, and manmade platform mound in Angkor, Cambodia <i>Y. Iwasaki, A. Zhussupbekov, A. Montayeva, A. Bespaev & M. Averina</i>	4725
Underpinning large buildings on Mexico City soft clays <i>M. Pérez Angeles & G. Auvinet-Guichard</i>	4731
Optimization of urban transportation obtained through mixed geotechnical engineering solutions, Decebal Parking project <i>C. Radu</i>	4735
Experimental and analytical studies of the seasonal temperature effect on the “excavation – soil” system <i>M. Tupikov & I. Khritin</i>	4741

Geostatistical analysis of the spatial variation of geotechnical properties in Mexico Valley subsoil in presence of soil cracking 4745
G. Auvinet, M. Delgado-Muñiz & M. Juárez-Camarena

TC 306: Geo-engineering Education

Eurocode 7 – a toolbox for geotechnical engineering 4753
G. Franzén & A. van Seters

National implementation commission for Eurocode 7 for joint development of geotechnical engineering practice 4759
G. Franzén, J. Spross, L. Moritz & P. Andersson

Development of in-class demonstration activities to create ‘aha moments’ in geotechnical engineering education 4765
H. Seo & M. Yi

Challenges to geotechnical engineering education in China 4771
J. Zhang & R. Wang

TC 307: Sustainability in Geotechnical Engineering

Reliability and resilience considerations in sustainability assessment of geotechnical structures 4777
D. Basu, M. Lee, J. Das & A. Puppala

Investigating the shear strength uniqueness and failure state behaviour of loess-waste straw mixture considering stress path effect 4783
W.-C. Cheng, L. Wang & Z.-F. Xue

1 Leadenhall advanced pile-enhanced raft sustainable design 4789
P. Caporaletti & Y. Fong

Innovative foundation alternative inspired from tree roots 4795
B. Chittoori, M. Larranaga, N. Hudyma & S. Olsen

Enhancing the uniformity and extent of bio-cementation soil improvement: physical experiments and reactive transport modelling 4801
M. Gomez, M. Lee, A. San Pablo, J. DeJong, C. Graddy, & D. Nelson

The role of biochar on the desiccation cracking behavior of a clayey soil 4807
K. Gu, Y. Zhang, Y. Lu, Z. Shen, C. Tang, B. Shi & Z. Shen

Beneficial use of geopolymers in geotechnical engineering applications 4811
P. Jayawickrama, S. Khadka & O. Okuyucu

Foundations for high-rise buildings in Dubai sedimentary rock 4817
S. Leppla, R. Katzenbach & M. Alzaylaie

Laboratory evaluation of the mechanical damage induced to geotextiles by incinerator bottom ash 4823
M. Lopes, F. Almeida, A. da Silva & J. Carneiro

Industrial solid wastes acting as barrier material for storing solid wastes (SW) and wastewaters – A critical review 4829
L. Marchiori, A. Albuquerque & V. Cavaleiro

Geothermal pavements: 3D numerical modelling for the long-term thermal performance 4835
X. Gu, G. Narsilio, Y. Motamedi, N. Makasis, A. Arulrajah & S. Horpibulsuk

Viability of using fine and coarse recycled aggregates from construction and demolition waste in embankment and capping layer of transport infrastructures 4841
P. Pereira, C. Vieira & M. Lopes

Instrumentation and numerical modelling of a plate load test carried out on rigid inclusion reinforcing an onshore wind turbine foundation <i>A. Sahyouni, P. Burtin, J. Racinais, B. Quandalle, L. Briançon & S. Grange</i>	4847
On the landslide hazard and resilience with the impact of climate change in Taiwan <i>K. Shou, W. Lin & K. Wang</i>	4853
Recycling of marginal materials to replace traditional capping in track substructure <i>M. Tawk, B. Indraratna, Y. Qi, F. Mehmood & A. Heitor</i>	4857
Minimally invasive soil treatment based on bio-grout <i>D. Terzis, M. Katterbach & L. Laloui</i>	4863
The influence of wildfires on soil and rock slope risk <i>T. Thompson</i>	4869
Investigating water holding barriers for climate adaptation <i>D. Toll, H. Kerr, P. Hughes, K. Johnson, A. Osman, A. Bengough, D. Boldrin, J. Knappett, J. Thangarajah, P. Pandey, V. Sivakumar, P. McKinnon, A. Petalas, A. Tsiampousi, L. Zdravkovic, D. Potts, R. Stirling, J. Holmes, S. Glendinning, C. Davie & A. Leung</i>	4875
Effect of wetting-drying cycles on physical and mechanical properties of a recycled construction and demolition material <i>C. Vieira, P. Pereira & M. Lopes</i>	4881
Experimental study on enzyme-induced calcium carbonate precipitation at high temperatures <i>H. Wang, L. Miao, X. Sun & L. Wu</i>	4887
The durability of EICP crusts subjected to ultraviolet (UV) radiation <i>M. Woolley, N. Hamdan, & E. Kavazanjian</i>	4891
Performance of recycled aggregates as unbound structural layers for airfield pavements <i>E. Yaghoubi & L. Wardle</i>	4897
 <i>TC 308: Energy Geotechnics</i> 	
Impact of microbially induced calcite precipitation (MICP) on hydraulic conductivity of coarse sands <i>S.-H Baek, T.-H Kwon & J. DeJong</i>	4905
A combined rate and ratcheting model for modelling monopile behaviour <i>W. Beuckelaers, H. Burd, G. Houlsby, R. McAdam & B. Byrne</i>	4911
Evaluating urban geothermal potential influenced by subsurface temperature increase <i>A. Bidarmaghz, R. Choudhary, G. Narsilio, K. Soga</i>	4917
Energy Quay Walls - theory and initial trial results <i>J. Haasnoot, K. de Jong, V. Leclercq, S. Bersan, J. de Vries, P. Vardon, I. Pantev, P. Stoelhorst, R. Janssen, B. Bloemers & D. Smeulders</i>	4923
Finite element back-analysis of the Lambeth College energy pile test <i>Z. Illés & J. Bourne-Webb</i>	4929
A simple procedure for the assessment of the thermally-induced axial load in energy piles <i>C. Iodice, R. Di Laora & A. Mandolini</i>	4935
1g physical modeling of a single heat-exchanger pile in silty sand <i>F. Jafarzadeh, S. Afzalsoltani, A. Arbab</i>	4941
Prediction of the hydraulic conductivity based on the multivariate regression within machine learning <i>H.-S. Kim & H.-K. Kim</i>	4947

Integrative consideration of sustainable heat management of urban quarters by thermal activation of infrastructure systems of residential water management <i>C. Moormann, T. Kugler & M. Liaghi</i>	4953
Spinnanker - technical development of a new foundation and anchor system <i>S. Leppla, R. Katzenbach, S. Dorn-Rochée, P. Okonek & L. Guerra</i>	4959
First Thermal Response Test (TRT) for energy geo-structure applications in Mexico <i>N. López-Acosta, A. Rivera-Martínez & D. Barba-Galdámez</i>	4965
Mechanical properties of cement under supercritical carbonation <i>D. Manzanal, J. Barría, S. Orlandi, R. Guerreiro, S. Ghabezloo & J.-M. Pereira</i>	4971
Impact of transient heat transfer and water flow on the long-term thermal response of energy piles in unsaturated soils <i>F. Behbehani & J. McCartney</i>	4977
Shear creep characteristics of methane hydrate-bearing sands and elasto-viscoplastic constitutive model <i>K. Nakashima, M. Hyodo, N. Yoshimoto & S. Kajiyama</i>	4983
Evaluation of analytical design methods for energy pile groups using a screw-pile case study in Australia <i>G. Narsillio, L. Neto, L. Hanson, B. Robertson, N. Makasis, Y. Carden</i>	4989
Hydropower geotechnical risk – a lenders' technical advisor's perspective <i>A. Noble</i>	4995
Study of thermally active piles for climatization of structures in tropical soil <i>J. Silva, R. Cunha & C. Chaves</i>	5001
Thermo-mechanical load transfer mechanism of energy piles <i>D. Perić & A. Olia</i>	5007
Monitoring of soils temperature in the Perm region (Russia) <i>A. Ponomaryov & A. Zekharov</i>	5013
Thermal effects on the hydraulic conductivity of a granular geomaterial <i>M. Bortolotto, D. Taborda & C. O'Sullivan</i>	5017
Experimental investigation of the thermo-mechanical behaviour of Norwegian quick clay <i>M. Syljuåsen, R. Ramstad & R. Singh</i>	5023
Conceptual physical modelling of a subsurface geomembrane energy storage system <i>K. Sørensen, H. Stutz, P. Brødsgaard-Raptis & M. Luxhøj</i>	5029
Influence of soil specific characteristics on thermal conductivity of fine and coarse-grained soils <i>K. Srinivas, M. Madhira & S. Sairam</i>	5035
Thermal performance of a double U-tube heat exchanger pile in the presence of coupled thermo-hydro flow <i>A. Tiwari & P. Basu</i>	5043
Development of localized low permeability in heavy slurry induced by water seepage <i>E. Yoshikawa, Y. Watanabe, H. Komine, S. Goto & M. Yoshimura</i>	5049
Impact of thermal cycles on the volume change and hydraulic conductivity behavior of sand- bentonite mixtures <i>Y. Yukselen-Aksoy, E. Guneri & S. Alpaydin</i>	5055

TC 309: Machine Learning and Big Data

Artificial neural network prediction of the water retention curve from physical soil parameters: comparing continuous and pointwise approaches <i>A. Abdallah</i>	5061
--	------

An evolutionary modelling approach to compressed air tunneling in non- homogeneous and layered geo-materials to predict air losses <i>A. Ahangar Asr & A. Javadi</i>	5067
Practical methodologies to apply machine learning algorithms to ground improvement data <i>S. Bunieski</i>	5073
Cooperation leads to a digital toolbox for future geotechnical engineers <i>J. Haasnoot, P. Madlener & L. Tiggeleman</i>	5079
A Bayesian approach to the prediction of strength parameters <i>S. Jong, D. Ong & E. Oh</i>	5085
Rock classification prediction in tunnel excavation using deep learning <i>H. Kim, K.-S. Kim & L. Cho</i>	5091
Deep learning based classification model of rock mass based on RMR of tunnel face <i>Y. Kim, J. Kim, J. Park & T. Yun</i>	5097
Classification of sand type using deep learning and shape parameter prediction <i>J. Ma, Y. Kim, S. Lim & T. Yun</i>	5101
An artificial neural network approach for three-dimensional slope stability prediction <i>J. Meng, H. Mattsson & J. Laue</i>	5107
Evaluation of residual strength of rocks based on acoustic emission data using AI <i>N. Yousefpour & M. Pouragha</i>	5113
A review of the applications of artificial intelligence techniques in geotechnical engineering disciplines <i>S. Congress, A. Gajurel, H. Chimauriya & A. Puppala</i>	5119
Data-driven subsurface stratigraphy from prior knowledge and sparse site-specific measurements using multiple point statistics <i>C. Shi & Y. Wang</i>	5127
Using neural network components to model soil constitutive behaviour <i>E. Smyrniou, J. Nuttall, B. Coelho & P. Vardon</i>	5133
When artificial neural networks and genetic algorithms work together on soil embankments stability condition identification <i>J. Tinoco, A. Correia, P. Cortez & D. Toll</i>	5137
Storm-based forecasting of man-made slope failures using machine learning <i>L.-M. Zhang & T. Xia</i>	5143
 <i>Corporate Associates Presidential Group Papers</i>	
Solar farm tracker pile movements in expansive clay <i>C. Bamunawita, P. Dissanayake & R. Kelly</i>	5151
A deep excavation case history in the KVMRT-SSP Line: design and construction challenges in geotechnical engineering practice <i>C. Boon, L. Ooi, J. Tan, D. Lim</i>	5157
Achievements of hard ground press-in piling in Australia <i>J. Creighton & K. Kajino</i>	5163
A new design tool for shallow foundations offering enhanced accuracy, reduced design time, and cost savings <i>R. Estephan, H. Skeini, C. Malek, M. Mounir, M. Rahim, G. Abou-Jaoude, T. Yacoub & D. Valiulin</i>	5169

Advances of distributed optical fibre technology in geotechnical and foundation engineering projects in Malaysia and beyond <i>H. Mohammad, K. Ang, B. Tee, S. Lee & M. Chong</i>	5175
Innovative design of soil nail wall with the consideration of soil suction <i>B. Poon & P. Mitchell</i>	5181
Efficiency examined of hands-free Cone Penetration Testing using the SingleTwist™ with COSON <i>O. Storteboom & J. Verhagen</i>	5187
About a model to increase competitiveness efficiency and profits of the geotechnical construction industry <i>D. Terceros, A. Sfriso, M. Terceros, P. Soliz, C. da Silva</i>	5193
Experiences and achievements using refurbished Variable Density and Earth Pressure Balance TBMs in mixed face formation on the KVMRT Line 2 <i>N. Wei, G. Klados, J.C. Jing Ho & M. Khairi</i>	5199
Digital transformation: a key to enhance project quality and improve efficiency of delivery <i>R. Yan, C. Chow, N. Kei, Y. Cheu, C. Ip, T. Lai, V. Wong, J. Cheuk</i>	5205
Design and installation of drilled and grouted anchor piles for a CALM Buoy in challenging ground conditions in the US Virgin Islands <i>S. Zehzouh, F. Ardoino, L. Tapper, M. Selby & P. Gaunt</i>	5209
Remediation proposals for damaged subgrade below railway line on soft soils <i>A. Zhussupbekov, A. Omarov, I. Zhumadilov, A. Buranbayeva & I. Drozdova</i>	5215
