2021 IEEE Real-Time Systems Symposium (RTSS)

RTSS 2021

Table of Contents

Message from the Program, Track, and General Chairs ..... **xii**
TCRTS Outstanding Achievement and Leadership Award ..... **xiv**
Outstanding Paper Awards ..... **xv**
Artifact Evaluation ..... **xvi**
Hot Topic Day ..... **xvii**
Organizers ..... **xviii**
Program Committee Members ..... **xx**
List of Secondary Reviewers ..... **xxiii**

Technical Papers

A Middleware Protocol for Time-Critical Wireless Communication of Large Data Samples 1
Jonas Peeck (TU Braunschweig, Germany), Mischa Möstl (TU Braunschweig, Germany), Tasuku Ishigooka (Hitachi Ltd., Japan), and Rolf Ernst (TU Braunschweig, Germany)

A Multi-Level DPM Approach for Real-Time DAG Tasks in Heterogeneous Processors 14
Federico Reghenzani (Politecnico di Milano, Italy), Ashikahmed Bhuiyan (University of Central Florida, USA; West Chester University of Pennsylvania, USA), William Fornaciari (Politecnico di Milano, Italy), and Zhishan Guo (University of Central Florida, USA)

A Real-Time Virtio-Based Framework for Predictable Inter-VM Communication 27
Gero Schwäricke (Technical University of Munich), Rohan Tabish (University of Illinois at Urbana-Champaign), Rodolfo Pellizzoni (University of Waterloo), Renato Mancuso (Boston University), Andrea Bastoni (Technical University of Munich), Alexander Zuepke (Technical University of Munich), and Marco Caccamo (Technical University of Munich)

A ROS 2 Response-Time Analysis Exploiting Starvation Freedom and Execution-Time Variance 41
Tobias Blaß (Robert Bosch GmbH and Saarland University, Germany), Daniel Casini (TeCIP Institute and Department of Excellence in Robotics & AI, Scuola Superiore Sant'Anna Pisa, Italy), Sergey Bozhko (Max Planck Institute for Software Systems (MPI-SWS), Saarland Informatics Campus (SIC), Germany), and Björn B. Brandenburg (Max Planck Institute for Software Systems (MPI-SWS), Saarland Informatics Campus (SIC), Germany)

Addressing Multi-core Timing Interference using Co-Runner Locking 54
Hyoseung Kim (University of California, Riverside), Dionisio de Niz (Carnegie Mellon University), Bjorn Andersson (Carnegie Mellon University), Mark Klein (Carnegie Mellon University), and John Lehoczky (Carnegie Mellon University)

AegisDNN: Dependable and Timely Execution of DNN Tasks with SGX 68
Yecheng Xiang (University of California, Riverside), Yidi Wang (University of California, Riverside), Hyunjong Choi (University of California, Riverside), Mohsen Karimi (University of California, Riverside), and Hyoseung Kim (University of California, Riverside)

AI Meets Real-Time: Addressing Real-World Complexities in Graph Response-Time Analysis 82
Sergey Voronov (University of North Carolina at Chapel Hill), Stephen Tang (University of North Carolina at Chapel Hill), Tanya Amert (University of North Carolina at Chapel Hill), and James H. Anderson (University of North Carolina at Chapel Hill)

Automatic Energy-Hotspot Detection and Elimination in Real-Time Deeply Embedded Systems 97
Mohsen Shekarisaz (University of Tehran, Iran), Lothar Thiele (ETH Zürich, Switzerland), and Mehdi Kargahi (University of Tehran, Iran)

Balancing Energy Efficiency and Real-Time Performance in GPU Scheduling 110
Yidi Wang (University of California, Riverside), Mohsen Karimi (University of California, Riverside), Yecheng Xiang (University of California, Riverside), and Hyoseung Kim (University of California, Riverside)

Calculating Worst-Case Response Time Bounds for OpenMP Programs with Loop Structures 123
Jinghao Sun (Dalian University of Technology, China), Nan Guan (City University of Hong Kong, Hong Kong), Zhishan Guo (University of Central Florida, U.S.), Yekai Xue (Northeastern University, China), Jing He (Dalian University of Techynology, China), and Guozhen Tan (Dalian University of Technology, China)

Catch Me If You Learn: Real-Time Attack Detection and Mitigation in Learning Enabled CPS 136
Ipsita Koley (Dept. of CSE IIT Kharagpur, India), Sunandan Adhikary (Dept. of CSE IIT Kharagpur, India), and Soumyajit Dey (Dept. of CSE IIT Kharagpur, India)

Cluster-Based Network Time Synchronization for Resilience with Energy Efficiency 149
Nitin Shivaraman (TUMCREATE, Singapore), Patrick Schuster (Technical University of Munich, Germany), Saravanan Ramanathan (TUMCREATE, Singapore), Arvind Easwaran (Nanyang Technological University, Singapore), and Sebastian Steinhorst (Technical University of Munich, Germany)

Composite Resource Scheduling for Networked Control Systems 162
Peng Wu (University of Connecticut), Chenchen Fu (Southeast University), Tianyu Wang (University of Connecticut), Minming Li (City University of Hong Kong, Hong Kong), Yingchao Zhao (Caritas Institute of Higher Education), Chun Jason Xue (City University of Hong Kong, Hong Kong), and Song Han (University of Connecticut)

Concurrent Order Dispatch for Instant Delivery with Time-Constrained Actor-Critic Reinforcement Learning 176
Baoshen Guo (Southeast University), Shuai Wang (Southeast University), Yi Ding (Alibaba Group; University of Minnesota), Guang Wang (Rutgers University), Suining He (University of Connecticut), Desheng Zhang (Rutgers University), and Tian He (Southeast University)

Conditionally Optimal Parallelization of Real-Time DAG Tasks for Global EDF 188
Youngeun Cho (Seoul National University, Korea), Dongmin Shin (Seoul National University, Korea), Jaeseung Park (Seoul National University, Korea), and Chang-Gun Lee (Seoul National University, Korea)

Data-Driven Structured Thermal Modeling for COTS Multi-core Processors 201
Seyedmehdi Hosseinimotlagh (University of California, Riverside), Daniel Enright (University of California, Riverside), Christian R. Shelton (University of California, Riverside), and Hyoseung Kim (University of California, Riverside)

Efficiently Approximating the Worst-Case Deadline Failure Probability Under EDF 214
Georg von der Brüggen (Max Planck Institute for Software Systems (MPI-SWS), Germany), Nico Piatkowski (Fraunhofer IAIS, Germany), Kuan-Hsun Chen (TU Dortmund University, Germany), Jian-Jia Chen (TU Dortmund University, Germany), Katharina Morik (TU Dortmund University, Germany), and Björn B. Brandenburg (Max Planck Institute for Software Systems (MPI-SWS), Germany)

Enumeration and Deduction Driven Co-Synthesis of CCSL Specifications using Reinforcement Learning 227
Ming Hu (East China Normal University, China), Jiepin Ding (East China Normal University, China), Min Zhang (East China Normal University, China), Frédéric Mallet (Université Cote d'Azur, France), and Mingsong Chen (East China Normal University, China)

Event-Triggered and Time-Triggered Duration Calculus for Model-Free Reinforcement Learning... 240
Kalyani Dole (Indian Institute of Technology Bombay, India), Ashutosh Gupta (Indian Institute of Technology Bombay, India), John Komp (University of Colorado Boulder, USA), Shankaranarayanan Krishna (Indian Institute of Technology Bombay, India), and Ashutosh Trivedi (University of Colorado Boulder, USA)

Extending EDF for Soft Real-Time Scheduling on Unrelated Multiprocessors 253
Stephen Tang (University of North Carolina - Chapel Hill), Sergey Voronov (University of North Carolina - Chapel Hill), and James H. Anderson (University of North Carolina - Chapel Hill)

Heterogeneous Quasi-Partitioned Scheduling 266
Ernesto Massa (State University of Bahia), George Lima (Federal University of Bahia), Bjorn Andersson (Carnegie Mellon University), and Vinicius Petrucci (Federal University of Bahia; University of Pittsburgh)

Joint Model and Data Adaptation for Cloud Inference Serving 279
Jingyan Jiang (Tsinghua University; Sangfor Technologies), Ziyue Luo (The University of Hong Kong, Hong Kong), Chenghao Hu (University of Toronto), Zhaoliang He (Tsinghua University), Zhi Wang (Tsinghua University; Peng Cheng Laboratory), Shutao Xia (Tsinghua University, China; Peng Cheng Laboratory), and Chuan Wu (The University of Hong Kong, Hong Kong)

HIART-MCS: High Resilience and Approximated Computing Architecture for Imprecise Mixed-Criticality Systems 290
Zhe Jiang (University of York, United Kingdom; ARM Ltd., United Kingdom), Xiaotian Dai (University of York, United Kingdom), and Neil Audsley (University of London, United Kingdom)

Keep Fresh: Real-Time Data Retrieval with Speed Adaptation in Mobile Cyber-Physical Systems 304
Chenchen Fu (Southeast University, China), Xiaoxing Qiu (Southeast University, China), Zelin Yun (University of connecticut, United States), Song Han (University of connecticut, United States), Weiwei Wu (Southeast University, China), and Chun Jason Xue (City University of Hongkong, Hongkong)

LAG-Based Analysis Techniques for Scheduling Multiprocessor Hard Real-Time Sporadic DAGs .. 316
Yaswanth Yadlapalli (The University of Texas at Dallas, USA) and Cong Liu (The University of Texas at Dallas, USA)

LaLaRAND: Flexible Layer-by-Layer CPU/GPU Scheduling for Real-Time DNN Tasks 329
Woosung Kang (DGIST, Republic of Korea), Kilho Lee (Soogsil University, Republic of Korea), Jinkyu Lee (Sungkyunkwan University, Republic of Korea), Insik Shin (School of Computing, KAIST, Republic of Korea), and Hoon Sung Chwa (DGIST, Republic of Korea)

Monte Carlo Response-Time Analysis 342
Sergey Bozhko (Max Planck Institute for Software Systems (MPI-SWS)), Georg von der Brüggen (Max Planck Institute for Software Systems (MPI-SWS)), and Björn B. Brandenburg (Max Planck Institute for Software Systems (MPI-SWS))

Partitioned Scheduling of Recurrent Real-Time Tasks 356
Pontus Ekberg (Uppsala University) and Sanjoy Baruah (Washington University in Saint Louis)

Resilient Mixed-Trust Scheduling 368
Dionisio de Niz (Carnegie Mellon University), Bjorn Andersson (Carnegie Mellon University), Hyoseung Kim (University of California, Riverside), Mark Klein (Carnegie Mellon University), and John Lehoczky (Carnegie Mellon University)

Response-Time Analysis and Optimization for Probabilistic Conditional Parallel DAG Tasks 380
Niklas Ueter (TU Dortmund University, Germany), Mario Günzel (TU Dortmund University, Germany), and Jian-Jia Chen (TU Dortmund University, Germany)

Speculative Execution and Timing Predictability in an Open Source RISC-V Core 393
Alban Gruin (IRIT - Univ. of Toulouse - CNRS, France), Thomas Carle (IRIT - Univ. of Toulouse - CNRS, France), Hugues Cassé (IRIT - Univ. of Toulouse - CNRS, France), and Christine Rochange (IRIT - Univ. of Toulouse - CNRS, France)

Sub-Linear Overhead in Static Schedules for Fault-Tolerant Transmission 405
Zhe Wang (Washington University in St. Louis), Kunal Agrawal (Washington University in St. Louis), and Jeremy T. Fineman (Georgetown University)

Suspension-Aware Fixed-Priority Schedulability Test with Arbitrary Deadlines and Arrival Curves 418
Mario Günzel (TU Dortmund University), Niklas Ueter (TU Dortmund University), and Jian-Jia Chen (TU Dortmund University)

Tighter Bounds of Speedup Factor of Partitioned EDF for Constrained-Deadline Sporadic Tasks 431
Xingwu Liu (Dalian University of Technology, China), Zizhao Chen (Technology and Systems, Chinaso Inc.), Xin Han (Dalian University of Technology, China), Zhenyu Sun (University of CAS, China), and Zhishan Guo (University of Central Florida, USA)

Time-Predictable Acceleration of Deep Neural Networks on FPGA SoC Platforms 441
Francesco Restuccia (TeCIP Institute, Scuola Superiore Sant'Anna, Italy; Department of Excellence in Robotics & AI, Scuola Superiore Sant'Anna, Italy) and Alessandro Biondi (TeCIP Institute, Scuola Superiore Sant'Anna, Italy; Department of Excellence in Robotics & AI, Scuola Superiore Sant'Anna, Italy)

TimeWall: Enabling Time Partitioning for Real-Time Multicore+Accelerator Platforms 455
Tanya Amert (University of North Carolina at Chapel Hill), Zelin Tong (University of North Carolina at Chapel Hill), Sergey Voronov (University of North Carolina at Chapel Hill), Joshua Bakita (University of North Carolina at Chapel Hill), F. Donelson Smith (University of North Carolina at Chapel Hill), and James H. Anderson (University of North Carolina at Chapel Hill)

TORTIS: Retry-Free Software Transactional Memory for Real-Time Systems 469
Claire Nord (MIT CSAIL), Shai Caspin (The University of North Carolina at Chapel Hill; Princeton University), Catherine E. Nemitz (The University of North Carolina at Chapel Hill; Davidson College), Howard Shrobe (MIT CSAIL), Hamed Okhravi (MIT Lincoln Laboratory), James H. Anderson (The University of North Carolina at Chapel Hill), Nathan Burow (MIT Lincoln Laboratory), and Bryan C. Ward (MIT Lincoln Laboratory)

Virtually-Federated Scheduling of Parallel Real-Time Tasks 482
Xu Jiang (Northeastern University, China), Nan Guan (City University of Hong Kong, Hong Kong SAR), Haochun Liang (Northeastern University, China), Yue Tang (Northeastern University, China), Lei Qiao (Beijing Institute of Control Engineering, China), and Yi Wang (Northeastern University, China; Uppsala University, Sweden)

Vulnerability of Controller Area Network to Schedule-Based Attacks 495
Sena Hounsinou (University of Colorado Colorado Springs, USA), Mark Stidd (University of Colorado Colorado Springs, USA), Uchenna Ezeobi (University of Colorado Colorado Springs, USA), Habeeb Olufowobi (University of Texas at Arlington, USA), Mitra Nasri (Eindhoven University of Technology, Netherlands), and Gedare Bloom (University of Colorado Colorado Springs, USA)

Work in Progress

Work-in-Progress: Analysis of TSN Time-Aware Shapers using Schedule Abstraction Graphs 508
Srinidhi Srinivasan (Eindhoven University of Technology, The Netherlands), Geoffrey Nelissen (Eindhoven University of Technology, The Netherlands), and Reinder J. Bril (Eindhoven University of Technology, The Netherlands)

Work-in-Progress: Automatically Generated Response-Time Proofs as Evidence of Timeliness 512
Marco Maida (Max Planck Institute for Software Systems), Sergey Bozhko (Max Planck Institute for Software Systems), and Björn Brandenburg (Max Planck Institute for Software Systems)

Work-in-Progress: Cloud Computing for Time-Triggered Safety-Critical Systems 516
Gautam Gala (Technische Universität Kaiserslautern, Germany), Javier Castillo Rivera (Technische Universität Kaiserslautern \ Germany), and Gerhard Fohler (Technische Universität Kaiserslautern, Germany)

Work-in-Progress: Cooling by Core-Idling: Thermal-Aware Thread Scheduling for Mobile Multicore Processors 520
Srijeeta Maity (IIT Kharagpur), Anirban Ghose (IIT Kharagpur), Soumyajit Dey (IIT Kharagpur), Sangyoung Park (TU Berlin), and Samarjit Chakraborty (UNC Chapel Hill)

Work-in-Progress: Enabling Secure Boot for Real-Time Restart-Based Cyber-Physical Systems 524
Sena Hounsinou (University of Colorado Colorado Springs, USA), Vijay Banerjee (University of Colorado Colorado Springs, USA), Chunhao Peng (University of Colorado Colorado Springs, USA), Monowar Hasan (Wichita State University, USA), and Gedare Bloom (University of Colorado Colorado Springs, USA)

Work-in-Progress: Evaluating Task Dropping Strategies for Overloaded Real-Time Systems 528
Yiqin Gao (ENS Lyon, France), Guillaume Pallez (Inria Bordeaux, France), Yves Robert (ENS Lyon, France), and Frédéric Vivien (Inria Lyon, France)

Work-in-Progress: Evaluation Framework for Self-Suspending Schedulability Tests 532
Mario Günzel (TU Dortmund University, Germany), Harun Teper (TU Dortmund University, Germany), Kuan-Hsun Chen (TU Dortmund University, Germany), Georg von der Brüggen (TU Dortmund University, Germany), and Jian-Jia Chen (TU Dortmund University, Germany)

Work-in-Progress: Improving Resilience of Distributed Real-Time Applications via Security and Fault Tolerance Co-Design 536
Wei Jiang (University of Electronic Science and Technology of China, China), Xinke Liao (University of Electronic Science and Technology of China, China), Jinyu Zhan (University of Electronic Science and Technology of China, China), and Ke Jiang (Aptiv, Sweden)

Work-in-Progress: Models and Tools to Detect Real-Time Scheduling Anomalies 540
Blandine Djika (University of Yaounde 1, Cameroon), Frank Singhoff (University of Brest, France), Alain Plantec (University of Brest, France), and Georges Edouard Kouamou (University of Yaounde 1, Cameroon)

Work-in-Progress: Partial-Order Reduction in Reachability-Based Response-Time Analyses 544
Sayra Ranjha (Eindhoven University of Technology, The Netherlands; Delft University of Technology, The Netherlands), Mitra Nasri (Eindhoven University of Technology, The Netherlands), and Geoffrey Nelissen (Eindhoven University of Technology, The Netherlands)

Work-in-Progress: Reinforcement Learning-Based DAG Scheduling Algorithm in Clustered Many-Core Platform 548
Atsushi Yano (Saitama University) and Takuya Azumi (Saitama University)

Work-in-Progress: Run-Time pWCET Estimation and Quality Monitoring 552
Federico Reghenzani (Politecnico di Milano, Italy), Filippo Sciamanna (Politecnico di Milano, Italy), and William Fornaciari (Politecnico di Milano, Italy)

Work-in-Progress: Worst-Case Response Time of Intersection Management Protocols 556
Radha Reddy (CISTER/ISEP, Portugal; CISTER FEUP, Portugal), Luis Almeida (CISTER FEUP, Portugal), Miguel Gaitan (CISTER/ISEP, Portugal; CISTER FEUP, Portugal; U. Andres Bello, Chile), Harrison Kurunathan (CISTER/ISEP, Portugal), Pedro Santos (CISTER/ISEP, Portugal), and Eduardo Tovar (CISTER/ISEP, Portugal)
