2022 IEEE Symposium on Visual Languages and Human-Centric Computing (VL/HCC 2022)

Roma, Italy
12 – 16 September 2022
Proceedings
VL/HCC 2022

Table of Contents

Foreword ................................................................................................................. ix
Conference Committees ....................................................................................... xi

Keynotes

Challenges in Creating Responsible and Human-Centered AI ............................. 3
Saleema Amershi

The Power of Diagrams: Observation, Inference and Overspecificity .................... 5
Gem Stapleton

Human-centric ML and Visualizations

The Role of Expertise on Insight Generation from Visualization Sequences ............ 9
Stephanie Rosenthal and Tingting Chung

A Crowdsourced Study of Visual Strategies for Mitigating Confirmation Bias .......... 19
Tee Chuanromanee and Ronald Metoyer

Predicting Data Scientist Stuckness During the Development of Machine Learning
Classifiers .............................................................................................................. 25
Moshe Mash, Shoshana Oryol, Reid Simmons and Stephanie Rosenthal

ML Blocks: A Block-Based, Graphical User Interface for Creating TinyML Models ..... 31
Randi Williams, Michal Moskal and Peli de Halleux

</table>
Barriers

Accessibility of UI Frameworks and Libraries for Programmers with Visual Impairments . . 123
  Maulishree Pandey, Sharvari Bondre, Sile O’Modhrain and Steve Oney

Barriers in Front-End Web Development ......................................................... 133
  David Ignacio Gonzalez Samudio and Thomas LaToza

End-user encounters with lambda abstraction in spreadsheets: Apollo’s bow or Achilles’
  heel? ..........................................................................................145
  Advait Sarkar, Sruti Srinivasa Ragavan, Jack Williams and Andrew D. Gordon

Code Comprehension and Help Seeking

Program-L: Online Help Seeking Behaviors by Blind and Low Vision Programmers ...... 159
  Jazette Johnson, Andrew Begel, Richard Ladner and Denae Ford

Pinpoint: A Record, Replay, and Extract System to Support Code Comprehension and
  Reuse.............................................................................................. 165
  Wengran Wang, Gordon Fraser, Mahesh Bobbadi, Benyamin T. Tabarsi, Tiffany
  Barnes, Chris Martens, Shuyin Jiao and Thomas Price

Understanding Similar Code through Comparative Comprehension ......................... 175
  Justin Middleton and Kathryn Stolee

Exploring Organization of Computational Notebook Cells in 2D Space ......................... 187
  Jesse Harden, Elizabeth Christman, Nurit Kirshenbaum, John Wenskovitch, Jason
  Leigh and Chris North

Programming Education

ParamMacros: Creating UI Automation Leveraging End-User Natural Language
  Parameterization...................................................................................... 195
  Rebecca Krosnick and Steve Oney

How Do Teaching Assistants Teach? Characterizing the Interactions Between Students
  and TAs in a Computer Science Course .................................................. 205
  Yana Malysheva, John Allen and Caitlin Kelleher

Is Assertion Roulette still a test smell? An experiment from the perspective of testing
  education.......................................................................................... 215
Poster and Showpieces

Dear Diary: On Documenting Novices’ Development Process ......................... 225
  Juan Pablo Sáenz and Luigi De Russis

High Resolution Explanation Maps for CNNs using Segmentation Networks .......... 229
  Alessio Mascolini, Francesco Ponzi, Enrico Macii, Elisa Ficarra and Santa Di Cataldo

Early Design of a Conversational AI Development Platform for Middle Schoolers .... 233
  Amit Kumar, Xiaoyi Tian, Mehmet Celepkolu, Maya Israel and Kristy E. Boyer

fableBlocks: Toward Mitigating Programming Anxiety with Storytelling-based Tangible
  Alexandre Gomes de Siqueira, Pedro Guillermo Feijóo García, Stephanie Carnell,
  Eduardo Gabriel Queiroz Palmeira and Andrew Maxim

Quintessence: An Intersectional Reflexivity Tool for Data-Centric Research &
  Development ................................................................. 241
  Alicia Boyd, Jibiana Jakpor and Brittany Johnson

Dockerlive: A live development environment for Dockerfiles ........................... 245
  David Reis and Filipe Correia

Enabling Cross-Domain Robot Programming By End-Users: The ROBxTASK Platform . 249
  Till Bieg, Mathias Schmoigl-Tonis, Nadine Sturm, Chloé Nativel and Andreas Sackl

CoopFinder: Finding Collaborators Based on Co-Changed Files .......................... 253
  Kattiana Constantino and Eduardo Figueiredo

Making the Invisible Visible in Computational Notebooks ................................ 257
  Mauricio Verano Merino, Thomas van Binsbergen and Mazyar Seraj

A technique to improve text editing on smartphones ........................................ 261
  Maria Giovanna Albanese, Gennaro Costagliola, Mattia De Rosa and Vittorio Fuccella

Chaldene: Towards Visual Programming Image Processing in Jupyter Notebooks .... 265
  Fei Chen, Philipp Slusallek, Martin Müller and Tim Dahmen

Feasibility of using YouTube Conversations for Pair Programming Intent Classification .. 269
  Jacob Hart, Jake AuBuchon and Sandeep Kaur Kuttal

Evaluating Gender Bias in Pair Programming Conversations with an Agent ............ 273
  Alexander McAuliffe, Jacob Hart and Sandeep Kaur Kuttal

Estimating Foraging Values and Costs in Stack Overflow ................................ 277
  Abim Sedhain, Sruti Srinivasa Ragavan, Brett McKinney and Sandeep Kaur Kuttal

Information Seeking Behavior for Bugs on GitHub: An Information Foraging Perspective . 281
  Abim Sedhain and Sandeep Kaur Kuttal
Developers’ Foraging Behavior on Stack Overflow ........................................ 285
Vaishvi Diwanji, Abim Sedhain, Grey Bodi and Sandeep Kaur Kuttal

Which Technologies are Most Frequently Used by Data Scientists? .................. 289
Paula Pereira, Joao Fernandes and Jacome Cunha

Graduate Consortium

Constructionism, Ethics, and Creativity: Developing Tools for the Future of Education
with AI ................................................................. 297
Randi Williams

Improving Real-time Collaborative Data Science Through Context-Aware Mechanisms... 301
April Wang

Time-Travel Debugging with Visualization of Data-Structures Based on Instrumentation. 305
Kim Mönch

The Role of Artificial Intelligence in Human-Computer Interaction: Using a Smart
Topic Extraction System .................................................. 309
Parinaz Tabari

Assurance of Machine Learning/TinyML in Safety-Critical Domains ................... 313
Zain Iqbal

Helping TAs Help Students .................................................... 315
Yana Malysheva

A Platform for the Reproducibility of Computational Experiments ..................... 319
Lázaro Costa

A model-driven approach for DevOps ........................................ 323
Hugo Gião

Tools for Creating UI Automation Macros ........................................... 327
Rebecca Krosnick

Author Index ............................................................................. 331
