## Keynote

<b>Foundation Challenges and Innovative Solutions: The Wharf Phase 2, Washington, DC</b> <i>Aaron L. Sacks, Joseph K. Cavey, David R. Good and Srinivas Yenamandra</i>	1
<b>Adapting Deep Foundation Techniques</b>	
<b>Anchored Hollow Bar Tangent Pile System for Underpinning</b> <i>Kenneth A. Pidgeon, Benjamin H. MacKinney, Kenneth R. Allard, Adriane G. Boscardin and Marco D. Boscardin</i>	11
<b>Using Pile Reinforcement to Mitigate Multimodal Slope Failures: A 3D Lem Case Study</b> <i>Ma, Cami, Javankhoshdel and Yacoub</i>	21
<b>Effects of Self-Weight on Thermomechanical Response of Energy Piles</b> <i>Arash Saeidi Rashk Olia and Dunja Perić</i>	31
<b>Solving Variable Bedrock Challenges With Ductile Iron Piles</b> <i>Bryan Plaskett, Kevin R. Johnson and Matt Caskey</i>	41
<b>Soil Improvement Through Rammed Aggregate Piers to Mitigate Liquefaction Risk in Storage Tanks</b> <i>Francisco A. Flores, Jorge Arroyo-Esqueda, Héctor A. de la Fuente, Erika Bernal and José L. Aguirre</i>	51
<b>Experiences Using a Leader System for Long CFA(ACIP) Piles in Hawaii</b> <i>Franz-Werner Gerressen and Damien Enright</i>	61
<b>Helical Piles Performance in Golestan Loess Deposits Via Full-Scale and Physical Modeling Testings</b> <i>Mohammad Arabameri, Abolfazl Eslami, Sara Heidarie Golafzani and Fatemeh Rostami</i>	68
<b>The Impact of End Bearing Plate on Micropile Capacity Casted in Cohesive Soil</b> <i>Soorkty and Elarabi</i>	80
<b>What it Takes (Geostructurally) to Extend the Plane Train Tunnel Under the World'S Busiest Airport</b> <i>Alexander J. Darnell, Ryan T. Smith and Anthony Sak</i>	88
<b>The Miniaturization of Diaphragm Wall Technique – the Cube System</b> <i>Franz-Werner Gerressen, Alexander Blatt and Leonhard Weixler</i>	96
<b>Performance of Open and Close-End Screw Piles in Bearing Layer</b> <i>Faisal Shahzad, Adnan Anwar Malik, Jiro Kuwano and Tadashi Maejima</i>	106

## **Designing for Complex and Local Geology**

### **Design, Installation and Performance of Earth Retention System to Limit Ground Movements Around Sensitive Structures in Washington, DC**

*Joanna Mason, Stanley L. Worst and Douglas R. Hardin* 115

### **State of the Practice in Florida on Deep Foundation Installation-Induced Ground Deformations and Vibrations**

*Berk Turkel, Jorge E. Orozco-Herrera, Luis G. Arboleda-Monsalve and Boo Hyun Nam* 124

### **Structural Aspects of the Stabilization of Ten Mile Slide**

*Adrian Gygax, Rod Kostaschuk and Sarah Gaib* 133

## **Groundbreaking, Mega, and Local Projects**

### **The Benefits of an Early Contractor Involvement for a Mega Project in San Francisco**

*Robert Small, Ihab Allam and Amshu Chappa* 144

## **High Value Subsurface Characterization**

### **Seismic Analysis of Drilled Shafts as Earth Retaining Structure Based on Site Characterization**

*Bernardo J. Jiménez Vega and Edy L. T. Montalvan* 161

### **Analytically modelling DST arrival time databases with high order polynomials for optimal high resolution imaging**

*Erick Baziw and Gerald Verbeek* 172

### **Advanced Continuous Surface Wave Testing (ACSW): Geologic and Geotechnical Site Characterization for the 21St Century**

*David Wilshaw* 185

### **The Advantage of Measurement While Drilling (MWD) for Geotechnical Site Characterization**

*Anahita Modiriasari and Benjamin S. Rivers* 195

## **Infrastructure, Policy, and Legislation**

### **Corrosion Protection of Micropiles**

*Racquel Nottingham and Marc Mastrantuono* 209

**A Discussion of Inconsistencies Between LRFD and ASD Methods for GeoStructural Design Applications of the AASHTO Bridge Design Specifications**

*Franklin M. Grynkewicz, Leili Javidannia, Dimitrios Palantzas and Collin E. Sweeney* 217

**Low Overhead Secant Piles Drilled From Within A Shaft**

*Stanley L. Worst, Michael Grimm, Parthiv Brahmhatt and Allen B. Stanton* 225

**Load testing, Smart Monitoring, and Data Management**

**Developments in Thermal Integrity Testing Practice and Interpretation**

*A. Fisher* 233

**High Capacity Drilled Displacement Piles as an Alternative to Conventional Driven Methods**

*Patrick Granitzki, Alicia Plinio, Janitha Batagoda and Pete Howell* 243

**Adjacent Top-Loaded Bi-Directional Test and Conventional Bi-Directional Load Test Results – Site II**

*Patrick J. Hannigan, Seth Robertson and Rozbeh B. Moghaddam* 253

**Assessment, Remediation and Acceptance of Drilled Shafts Through the Use of CSL Tests**

*Bernardo J. Jiménez Vega and Edy L. T. Montalvan* 265

**Dynamic Load Testing of Non-Uniform Piles**

*Thai Nguyen* 277

**Data Drives Herbert Hoover Dike (HHD) Rehabilitation Efforts**

*Yoav Rappaport, Jignyash Manyam and Michael Arnold* 286

**Evaluation of Existing P-Y Models for Caliche Based on Numerical Analysis of Raiders Stadium Lateral Load Tests**

*Fahim M. Bhuiyan, Raj V. Siddharthan and Ramin Motamed* 297

**New Insights on Detecting Flaws With CSL and TIP**

*Andrew Z. Boeckmann, David S. Graham and Paul J. Axtell* 310

**Local and National/International Case Histories**

**Harry Nice Bridge Geotechnical Instrumentation Case Study**

*Kevin Tehansky, Jeffrey Goodwin and Melih Demirkan* 321

<b>Active Soil Nail Wall Underpinning Solution for the Bruce Museum Project</b>	
<i>Jonathan L. Ernst, Les R. Chernauskas, Martin B. Hudson, Rolff B. Knobel and Andrew K. Cho</i>	332
<b>Interdisciplinary and Inventive Approaches to Drilled Shaft Remediation</b>	
<i>Seth H. Hamblin, Les R. Chernauskas, William D. Oder and Jonathan L. Ernst</i>	340
<b>Design and Field Comparison of Ground Improvement and Bored Piles for Large Diameter Steel Water Tanks</b>	
<i>Vijaya Bhushan Rao, Ali Semercioglu and Jason Redgers</i>	351
<b>Performance Requirements for Vibrocompaction on Crushable Calcareous Sands of the UAE and their Verification in Comparison to Silica/Quartz Sands</b>	
<i>Vijaya Bhushan Rao and Jason Redgers</i>	361
<b>Northeast Boundary Tunnel - Mount Olivet Road Drop Shaft</b>	
<i>Russell H. Lutch and Jeremiah M. Jezerski</i>	371
<b>Performance Based Excavation Support Design for Challenging Urban Site Geometry in Toronto, Canada</b>	
<i>Erika Acton, Shawna Munn and Carol Domitric</i>	382
<b>San Diego Courthouse Commons Shaft Shoring and Tunnel Canopy Tubes</b>	
<i>Ali Nasirian and Gabriel Carvajal</i>	392
<b>"Horseshoe" Secant Compression Shoring System for Tunnel Repair</b>	
<i>Rob Jameson, Noah Miner, Giuseppe Gaspari and Kaveh Talebi</i>	402
<b>Nicholson in the Neighborhood: Virginia'S North Hill Project</b>	
<i>Dominic Ammon, Mark Rothbauer and Paul Landers</i>	413
<b>Design of Ground Improvement by Inclined DSM Columns for Railway Embankment (TÜRKİYE)</b>	
<i>Candan Gokceoglu, Ahmet Sirin, Asli Can, Emre Turk and Suat Gullu</i>	423

## **The Kitchen Sink**

<b>A Study of Aspects of the Historical Development of Geotechnical Engineering</b>	
<i>Michael D. Bennett and Thomas J. Kennedy</i>	432
<b>Estimating Kinematic Demands From Lateral Ground Deformations on Pile-Supported Wharves</b>	
<i>Arash Khosravifar, Thomas Torkelson and Milad Sourì</i>	440

**Estimation of Wind Turbine Foundation Rotational Stiffness Based on Fully Non-Linear Dynamic Analysis**

*Spencer E. Ness, Yazen Khasawneh, Will Tjaden and Mohammed Nasim*

450

**Long-Term Performance of Wind Turbine Foundations Through Numerical Modeling**

*William Tjaden, Spencer Ness, Yazen Khasawneh and Mohammad Nassim*

462
