Table of Contents

Cascading Geothermal Resource Utilization: Towards Cleaner, Cheaper, and Community-Driven Energy Dev / District Heating & Direct Use: Feasibility to Implementation / Geothermal Hybrids	1
---	----------

Abbie Dean et al.

<i>Economic Comparisons and Scenarios for Producing Geothermal Hydrogen</i>	2
---	---

Haobo Fang et al. et al.

<i>Numerical Simulation of Heat Transfer in an Aquifer with Production and Reinjection in a Deep Single-well Geothermal System</i>	16
--	----

Nicholas Fry, Jessica Eagle-Bluestone, and Francesco Witte

<i>Computational Modeling of Organic Rankine Cycle Combined Heat and Power for Sedimentary Geothermal Exploitation</i>	23
--	----

Tailu Li et al.

<i>Thermodynamic Performance Feasibility Analysis of Cascade Utilization of Medium Grade Geothermal Energy for Combined Heating and Power Coupled with Organic Rankine Cycle and Vapor Compression Cycle</i>	48
--	----

Abdelmjeed Mohamed et al.

<i>Repurposing Abandoned Oil and Gas Wells for Geothermal Direct Use in Oklahoma: A Case Study</i>	72
--	----

Jaime Quinao et al.

<i>Increasing Opportunity for Geothermal Direct Use in New Zealand, Indonesia, and the Caribbean</i>	83
--	----

Conversation with the Oilfield Industry	96
Isaac Aviles et al. <i>Oilfield Origin; Geothermal Future – The Case Study of Ultra HPHT Frac Plugs</i>	97
Nicolas Saltel, Franck Ndjali Eteno, and Isaac Aviles <i>Casing Patches – Expanding from the Oilfield into Geothermal</i>	106
Country and Regional Updates	120
Hiroshi Asanuma <i>Status of Japanese Supercritical Geothermal Project in 2022</i>	121
Vanessa V. Espejel-Garcia et al. <i>Magmatic Processes and Timescales for the Quaternary Suswa Volcano and Central Kenya Peralkaline Province Based on U-series Isotopic Disequilibria</i>	127
Gunnar Gunnarsson et al. <i>The Iceland Deep Drilling Project (IDDP): Reaching into the Roots of Iceland’s Volcanic Geothermal Fields</i>	134
Critical Improvements in Closed-Loop Geothermal Technology - What's Next? / What Can Closed Loop Geothermal Learn From Other Power Technologies / Scaling Closed-Loop Geothermal for Market Impact	145
Arianna Bonzanini et al. <i>Joint Development Between Eavor and Turboden</i>	146
Sai Liu and Arash Dahi Taleghani <i>A Numerical Study of Factors Affecting the Efficiency of Closed-Loop Geothermal Wells</i>	160

Livio Santos and Arash Dahi Taleghani	
<i>Impact of Microannulus on the efficiency of Closed-Loop Geothermal Systems</i>	173
Joseph Scherer et al.	
<i>Progress for Closed-Loop Geothermal Projects in Steam and 2-Phase Dominated Reservoirs</i>	185
Decarbonizing Existing Oil and Gas Field via EGS and Direct Use	203
J.B. Garza and Byron Solarte	
<i>How Abandoned and Existing Oil and Gas Wells Can Help the Development of Geothermal Energy</i>	204
Emily J. Smejkal et al.	
<i>The Feasibility of Repurposing Oil and Gas Wells for Geothermal Applications</i>	214
Deeper and Hotter: Towards Production from Superhot Resources	220
Thráinn Fridriksson et al.	
<i>Indications of a Superhot, HCl Bearing Steam at Nesjavellir, SW Iceland: Observations from Well NJ-32</i>	221
Gaute Gruben et al.	
<i>Creep Behavior of Casing Materials</i>	235
Kristinn Ingason and Arnar Bjarki Árnason	
<i>Casing Failures in High Temperature Wells</i>	247
Gunnar Skúlason Kaldal and Ingolfur Thorbjornsson	
<i>Improved Integrity of the Production Casing in Moderate- to Ultra-High-Temperature Geothermal Wells using Flexible Couplings</i>	256

Sigrun N. Karlsdottir et al.	
<i>Material Challenges for Deep Superhot Geothermal Wells</i>	271
Amanda Kolker et al.	
<i>Exploring for Superhot Geothermal Targets in Magmatic Settings: Developing a Methodology</i>	285
Design Improvements to Geothermal Power Plants	308
Marco Frassinetti, Riccardo Pezzoni, and Giacomo Rufo Menghetti	
<i>Maximizing the Potential of Geothermal Resources in Steam Power Plants with Retrofitted Binary Technology: Exergy's Case Study in the Philippines, Mindanao 3 Power Plant</i>	309
Nadav Korn, Ben Cohen, and Alex Katz	
<i>Introducing Ormat Between Bearing Turbine</i>	322
Jordan Nielson and Nathan Weiss	
<i>Sage Geosystems Proprietary sCO₂ Turbine Flow Loop Testing</i>	329
Downhole Instrumentation	344
Daniel Hartzler, Chet Bhatt, and Dustin McIntyre	
<i>All Optical Subsurface Elemental Analysis Probe</i>	345
Joe Henfling et al.	
<i>Development of a High Temperature, High Pressure Logging Tool for Downhole pH Measurements</i>	354
Joe Henfling et al.	
<i>Development of the First Commercial 400°C TPS Logging Tool</i>	363

Craig L. Keast et al.	
<i>Fully Depleted Silicon-on-Insulator (FDSOI) CMOS Technology Optimized for Enhanced Geothermal System Temperature Operation</i>	373
Andrew A. Wright and Avery Cashion	
<i>Evaluation of High Temperature Microcontrollers and Memory Chips for Geothermal Applications</i>	380
Andrew A. Wright, Avery Cashion, and Francis Tiong	
<i>High Temperature High Speed Downhole Data Transfer (Data Link)</i>	393
Andrew A. Wright et al.	
<i>Downhole Smart Collar Technology for Wireless Real-Time Fluid Monitoring</i>	407
Economics of Closed Loop Geothermal	421
John R. Muir, Andrew J. Van Horn, and Joseph W. Hill	
<i>Geothermal Energy as a Premium Power Source</i>	422
Enhanced Geothermal Systems (EGS): Developments and Applications	436
Moones Alamooti et al.	
<i>Simulation and Optimization of Carbon Storage and Geothermal Extraction in a CO₂-Enhanced Geothermal System</i>	437
Yuan Fang, Zhi Ye, and Ahmad Ghassemi	
<i>Preliminary Wellbore In-situ Stress Models for Utah FORGE</i>	453
Hazel Farndale, Ryan Law and Steve Beynon	
<i>An Update on the United Downs Geothermal Power Project, Cornwall, UK</i>	460

Tim Kneafsey et al.	
<i>The EGS Collab –Experiment 2 Stimulations at 1.25 km Depth</i>	477
Sang H. Lee, Ruwantha Ratnayake and Ahmad Ghassemi	
<i>Numerical Analysis of Fluid Stimulation in Fractured Utah FORGE Wells</i>	494
Baohua Liu, Dharmendra Kumar, and Ahmad Ghassemi	
<i>Coupling of Rock Deformation, Fluid Flow, Proppant Transport, and Heat Transfer in Geothermal Reservoir Stimulation</i>	510
Christopher M. Smith et al.	
<i>Volatiles Analysis of Cuttings from the FORGE 58-32 Well-“Logging” High Temperature Wells, Evaluating Communication Pathways, and Implications for Completions in Enhanced Geothermal System Wells</i>	522
Qitao Zhang and Arash Dahi Taleghani	
<i>Variable Fracture Conductivity to Enhance Heat Extraction in EGS</i>	542
FORGE Activities, Progress & Plans	552
Patrick Bradshaw, Gesa Petersen and Kristine Pankow	
<i>Characterizing the Induced Microseismicity of the 2019 Utah FORGE Well Stimulation</i>	553
Yosafat Esquitin et al.	
<i>Development of an Ultra High-Temperature Multi Set Isolation Systems for Enhanced Geothermal Systems Stimulation</i>	562
Luthfan Hafizha Judawisastra, Sarah Sausan, and Roland N. Horne	
<i>Experimental and Numerical Development of Inflow Measurement in Fractured Enhanced Geothermal Systems (EGS) Wells</i>	571

Ruijie Liu et al.	
<i>Development of a Coupled Multi-Field Utah FORGE Native State Model: Phase 3 Update</i>	589
Lynn Munday et al.	
<i>Evaluation and Optimization of Well Completion Options for the Utah FORGE Site</i>	597
Phil Wannamaker et al.	
<i>Monitoring of Reservoir Scale Microseismicity Using Downhole Geophone Arrays at the Utah FORGE EGS Project During Stimulation of Injector Well 16A(78)-32</i>	606
Pengju Xing et al.	
<i>Numerical Simulation of Stimulations at the Utah FORGE Site Using the Designed Pumping Schedules</i>	618
Zhi Ye and Ahmad Ghassemi	
<i>Laboratory Insights into the Potential of Shear Stimulation at Utah FORGE</i>	629
Xuejun Zhou and Ahmad Ghassemi	
<i>Experimental Determination of Poroelastic Properties of Utah FORGE Rocks</i>	640
Geological, Geochemical, and Geophysical Investigations of Hot Springs, Travertine, and Sinter	651
John P. Hawuory	
<i>A Review of Subsidence in Geothermal Fields and Implications for Well Production</i>	652
Ngethe John and Saeid Jalilinasrabady	
<i>Community Usage of Low Enthalpy Geothermal Resources in Kenya: Case Study of Warm and Hot Springs</i>	663

Geomechanics of Geothermal	673

Michelle Robertson et al.	
<i>The Amplify Monitoring Team: Initial Design, Development, and Deployment of Seismic Monitoring Systems for In-Field and Near-Field EGS Well Stimulation</i>	755
Geothermal Co-Production: Real Cases, Technologies and Innovation	772
Don Jeter, Tom Brokaw, and Eric Leonhardt	
<i>Organic Rankine Cycle Combined with Thermal Tower to Make Power and Fresh Water</i>	773
Xavier Léveillé-Dallaire et al.	
<i>Sizing Horizontal Geothermal Heat Exchangers for Community Greenhouses in Montreal</i>	793

Geothermal Drilling Technologies **804**

Kohei Ajima and Shigemi Naganawa

Evaluating Wellbore Cooling Effect with Insulated Drill Pipes in Supercritical Geothermal Well Drilling 805

Rahmat Ashari et al.

Optimizing Rate of Penetration and Tripping Decision-Making using Real-Time Bit Wear Monitoring While Drilling Geothermal Wells 819

Aira Aspiras, Lawrence Weber, and Chong Woon Phin

Innovative Cementing Solutions for Curing Severe Lost Circulation in Geothermal Wells 838

Tony Pink et al.

The Success of World's First Hybrid PDC and Particle Drilling Bit for Geothermal Applications 853

Nana Shoji and Shigemi Naganawa

Simulation of Rock Cutting Behavior of a Single PDC Cutter for Medium-Hard to Hard Formations 865

John D. Tuttle, Renan Listi, and Ron Tate

Drilling Fluids Innovations Combining O&G and Geothermal Technologies for Optimum Performance 881

Yifan Zhang et al.

Optimizing Mud Hammer Percussion Drilling Operations in Hard Rock Geothermal Environments Using Downhole Vibration Data Analysis 893

Geothermal Education: Training the Workforce **904**

Gudni Axelsson et al.

The Contribution of the GRÓ Geothermal Training Programme in Iceland to Geothermal Capacity Building in Developing Countries 905

J. Newson et al.	
<i>Graduate Geothermal training at the Iceland School of Energy, Reykjavik University, Iceland</i>	913
Esuru Rita Okoroafor et al.	
<i>Diversity and Inclusion in the Geothermal Community: Beginning the Journey of a Thousand Miles</i>	922
Geothermal Energy from Sedimentary Basins, Reservoir Management and Risk Mitigation	937
Shuvajit Bhattacharya et al.	
<i>Updates on the Integrated Geologic and Geophysical Characterization of a Low-temperature Geothermal Test Site, Gulf Coast, Texas</i>	938
Yosafat Esquitin and Catalin Teodoriu	
<i>Multi-Zone Completion Systems for Geothermal Energy Production in Sedimentary Rocks</i>	944
Trey Meckel et al.	
<i>Investigating the Potential for Geothermal Energy Resources in a Proven Petroleum Province: Geological Study of the Kingia Sandstone, Onshore Northern Perth Basin, Western Australia</i>	953
Saeed Salehi et al.	
<i>Scalable Geothermal Energy Potential from Sedimentary Basins: Opportunities for Energy Transition and Skilled Workforce Development</i>	964
Paul Schwering et al.	
<i>Advancing Geophysical Techniques to Image a Stratigraphic Hydrothermal Resource</i>	976
Geothermal Fluid Management	992
Alvin K. Bett et al.	
<i>Exergy Classification of Geothermal Power Plants in Kenya</i>	993

Massimiliano Gaeta et al.
