

Geosynthetics Conference 2023

Kansas City, Missouri, USA
5 – 8 February 2023

Editors:

Melissa Beauregard
Stephan Gale

ISBN: 978-1-7138-7229-0

Table of Contents

Foreword	V
Applications of Fabricated Geosynthetics – Organized by FGI	
Carbon Footprint Calculator	1-8
Case Study: Lake Forest Reservoir Relining & Floating Cover	9-18
Payment Bases in Liner Projects	19-24
Performance Comparison of Evapotranspiration and Engineered Turf Covers	25-32
Protection of Geofoam using High Strength, Chemically Resistant Geomembranes	33-42
PVC Geomembranes in Agricultural Uses	43-50
Case Histories	
Five Geotextile Tube Projects Review for Survivability and Performance after Decades in Challenging Environments	51-62
Lessons Learned from Three Failures	63-69
Lining A Highly Irregular Vertical Wall with Polyurea/Conductive Geotextile Geomembrane	70-74
Mitigation of Cracks in Flexible Pavements with Expansive Subgrade Using Geosynthetics: A Case Study in Austin, Texas	75-83
Reinforced Soil Embankment for Rockfall Protection - Case History	84-89
The Use of Geotextile Tubes as The Containment Dyke for The Construction of Davao Coastal Highway, Philippines	90-99
Electric Leak Location	
Comparative Analysis of Electrical Leak Location Methods on Exposed Geomembranes	100-112
Development of a Conductive Textile and Its Uses in Electrical Leak Location (ELL) Survey of Geosynthetic Containment Systems	113-118
Increasing the Sensitivity of the Dipole Method: A Case Study	119-130
The Effect of Cover Material Conductivity on Dipole Method Testing	131-142
Exposed Geosynthetic Performance – Organized by GSI	
Engineered Turf Landfill Closure: How Long Will It Last?	143-151
Evaluation of the UV Exposure of Polymeric Geomembranes Using Geographic and Climate Data	152-161
Exposed Geomembrane Cover Performance at Polk County Landfill in Florida	162-167
Exposed NPNW GT Exposed Npnw GT Performance at a Large Surface Impoundment for Nearly One Year	168-174
Fabricated Geosynthetics for Water Retention Projects – Organized by FGI	
Best Practices for Design and Installation of Geosynthetic Floating Covers	175-187

<u>Chambers Dam Reservoir Remediation: Case Study</u>	188-192
<u>Netherlands Motorway Underpass Case Study</u>	193-198
<u>New Developments in PVC-EIAs for Potable Water Containment Applications</u>	199-206
<u>Operation and Maintenance Guideline for Water Reservoirs</u>	207-217
Geosynthetic Properties and Laboratory Testing	
<u>An Evaluation of Soil-Geogrid Interaction Models</u>	218-230
<u>Hydraulic Conductivity of Lighter Bentonite-Polymer Geosynthetic Clay Liners</u>	231-238
<u>Long-term Hydraulic Conductivity of Bentonite-Polymer Geosynthetic Clay Liner to Coal Combustion Product Leachates</u>	239-247
<u>Quantification of Suction-driven Flow of Enhanced Lateral Drainage Geotextiles</u>	248-258
<u>White Polyethylene Geomembrane: Forensic and Laboratory Evidence for Superior Durability</u>	259-269
Geosynthetic Wettability and Performance	
<u>Contact Angle Determination of a Wicking Geotextile Composed of Both Hydrophilic and Hydrophobic Materials</u>	270-276
<u>Efficacy of Nonwoven Based Geosynthetic Drainage Product for Pore Pressure Reduction in Moderately Fine Soils or Tailings</u>	277-287
<u>Experimental Investigation on the Effect of Fines Content on the Drainage Performance of Wicking and Non-wicking Geotextiles</u>	288-296
<u>Hydrophobizing Treatment in Saline Soil: Conditions and Mechanisms</u>	297-304
<u>Investigation of Moisture Reduction in Sandy Soil Using Geotextiles</u>	305-314
Geosynthetics in Roadways	
<u>Effect of Tensile Strength Development in Stabilization Geogrids on Bearing Capacity in Pavements and Railway Application</u>	315-323
<u>Evaluation of Geosynthetic-reinforced Asphalt Milling Characteristics and Suitability as Pavement Base Course</u>	324-335
<u>Local Stiffness Enhancement by Multi-Axial Geogrid Stabilization Evaluated Through Shear Wave Measurement</u>	336-347
<u>Role of Geosynthetics in Improving Freeze-Thaw Resistance of Bases - A Literature Survey</u>	348-359
<u>Role of High-Modulus Geogrids in Improving Base Layer Properties</u>	360-370
Hydraulic and Coastal Applications 1	
<u>25m3 Geotextile Bags and Geotextile Tubes Used to Protect a 42" Pipeline Against Scouring, 30M Deep on the Seabed, Covenas, Colombia, S.a</u>	371-377
<u>Dredging Works and Geotextile Tube Applications for The Construction of Deep C Industrial Zones, Vietnam</u>	378-387
<u>Investigation of Geotextile Integrity Subjected to Vertical Drains Installation</u>	388-397

<u>Use of Treated Soft Soil as Infill Material in Geotextile Tubes</u>	398-410
Hydraulic and Coastal Applications 2	
<u>Effectively Utilizing a Nature-Based HPTRM Solution for Municipal Drainage Channels</u>	411-420
<u>Hydraulic Roughness Testing of Geosynthetics</u>	421-432
<u>Installation of Geotextile Tubes as Perimeter Bund in Mega-Reclamation Project at Penang, Malaysia</u>	433-443
<u>Shoreline Protection in Kerala Coastline (India) And Use of Geosynthetics</u>	444-456
Innovative Solutions 1	
<u>Emerging Uses of Geosynthetic Floating Covers in the Energy Sector</u>	457-465
<u>Feasibility Evaluation of Lightweight Aggregate to Improve Performance of Load Transfer Platforms in Geosynthetic-reinforced Embankments</u>	466-478
<u>Geogrid-Reinforced Timber Pile Supported Modular Block Retaining Wall</u>	479-489
<u>Polymeric Alloy Geocell Reinforced Design for a Heavily Loaded Gravel Pad with Restricted Fill Thickness</u>	490-501
Innovative Solutions 2	
<u>Decentralized Stormwater Runoff Treatment with Active Geocomposites</u>	502-508
<u>Evolution in Geosynthetics Starts with Utilizing Data Technology</u>	509-515
<u>New Geotextile Quarry By-Product Geocomposite System for Permanent Road Foundation</u>	516-527
<u>Simplified Model for Analysis of Piled Embankment Considering Multi-Interaction Arching and Subsoil Consolidation</u>	528-538
Landfill Covers and Liner Systems	
<u>Environmental, Social, and Governance (ESG) Offerings of an Engineered Turf Final Cover System</u>	539-548
<u>Hydraulic Conductivity of Bentonite-Polymer Composite Geosynthetic Clay Liners Under Elevated Temperature and Extreme pH</u>	549-560
<u>Practical Aspects of Exposed Geomembrane Cap (EGC) Design and Construction</u>	561-571
<u>Remediation of a Former Quarry and Permanent Containment of Buried Toxic Materials</u>	572-582
Mining Applications	
<u>High Performance Geomembranes in Aggressive Mining Applications</u>	583-591
<u>Initial Stress Condition and the Hydraulic Conductivity of BPC Geosynthetic Clay Liners for Acidic Heap Leach Solutions</u>	592-603
<u>Sustainable Practices with Geosynthetics in Mining: Review of Select Case Studies</u>	604-613
Recent Advances in MSE Walls Analysis, Design and Performance	
<u>Effect of Spread Footing Loads on Stability of Geosynthetic-Reinforced Retaining Walls</u>	614-621

[Migrating From the Simplified Method to the Stiffness Method for Internal Stability Design of Mse Walls](#)..... 622-633

[New Closed-Form Analytical Solutions for Total Reinforcement Force in a GRS Retaining Wall at the Limit State](#)..... 634-643

Walls, Slopes, and Embankments

[Applications of Geosynthetics for Building Passive Protective Structures against Rockfall, Debris Flows and Snow Avalanches](#) 644-653

[Design of True Abutments of Mechanically Stabilized Soil Walls under high seismicity in Guatemala City](#) 654-662

[Embankment Reinforcement Using the World’s Strongest Geogrid – Florianopolis Ring Road, Brazil](#) 663-671

[Impact of Primary Geogrids Spacing and Secondary Geogrids on Geosynthetic Reinforced Soil-Integrated bridge Systems \(GRS-IBS\) and Lateral Earth Pressure](#)..... 672-683
