Volume 12383

Proceedings of SPIE, 1605-7422, V. 12383

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Imaging, Manipulation, and Analysis of Biomolecules, Cells, and Tissues XXI*, edited by Attila Tarnok, Jessica P. Houston, Xuantao Su, Proc. of SPIE 12383, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

IMAGE PROCESSING AND ANALYSIS TECHNIQUES

12383 02 **Oblique plane microscopy for 3D, multi-color, eight-day time-lapse imaging of genetically heterogeneous breast cancer spheroids in 384-well plates with quantitative 3D analysis (Invited Paper)** [12383-1]

FUNCTIONAL IMAGING I

12383 03 **Knowing your onions: using transparent soil and high throughput fluorescence microscopy to identify and characterize the infection of onion with the major phytopathogen *Aspergillus niger*** [12383-6]

12383 04 **Modular, multispectral infrared imaging system for reflection and transmission measurements** [12383-7]

12383 05 **Quantitative phase imaging for tracing the motion of waveguide trapped bead particle (Invited Paper)** [12383-13]

BIOMEDICAL IMAGING USING A DMD OR OTHER ADVANCED TECHNIQUES II: JOINT SESSION WITH CONFERENCES 12383 AND 12435

12383 06 **Learning wavefront shaping through reinforcement learning in a simulation environment** [12383-14]

CYTOMICS I

12383 07 **Correlating NAD(P)H lifetime shifts to treatment of breast cancer cells: a metabolic screening study with time-resolved flow cytometry (Invited Paper)** [12383-15]

12383 08 **Using a cell image classification workflow to identify cells based on fluorescence localization** [12383-16]

CYTOMICS II

12383 09 **High-throughput parallel 3D imaging flow cytometry (Invited Paper)** [12383-19]

12383 0A **Dynamic region of interest histometric analysis of endogenous calcium activity in intact lung tissue** [12383-22]

RAMAN SPECTROSCOPY AND SPECTRAL APPROACHES

12383 0B **Surface enhanced Raman spectroscopy-based analysis of SARS-CoV-2 spike protein binding to ACE2 receptor (Invited Paper)** [12383-23]

12383 0C **Raman-based analysis and structural differentiation of potentially harmful algae and cyanobacteria** [12383-24]

12383 0D **Combined hyperspectral imaging, monolayer stress microscopy, and S8 image analysis approaches for simultaneously interrogating cellular signals and biomechanics** [12383-27]

FUNCTIONAL IMAGING II

12383 0E **Tracking early tuberous sclerosis complex diseased organoid development with quantitative oblique back-illumination microscopy** [12383-28]

POSTER SESSION

12383 0F **Computational enhancement of lateral resolution using conventional fluorescent microscopes** [12383-2]

12383 0G **Cell analysis tools: an open-source library for single-cell analysis of multi-dimensional microscopy images** [12383-31]

12383 0H **White blood cells classification of peripheral blood smear based on machine learning** [12383-32]

12383 0I **Semantic knowledge distillation for conjunctival goblet cell segmentation** [12383-33]

12383 0J **Hundreds of label-free cells tracking method based on multi-scale region of interest** [12383-36]

12383 0K **Proof of concept for microfluidic spectral flow cytometry** [12383-39]

DIGITAL POSTER SESSION

12383 0L **Multi-spectral imaging in mammalian cells using a home-built LSFM system** [12383-10]
