SPIE

Volume 12403

Proceedings of SPIE 0277-786X, V. 12403

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Diode Laser Technology XXI*, edited by Mark S. Zediker, Erik P. Zucker, Proc. of SPIE 12403, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510659117

ISBN: 9781510659124 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 LASER DIODES FOR LIDAR I

- 12403 02 **2kW pulse power from internal wavelength stabilized diode laser bar for LiDAR applications (Invited Paper)** [12403-1]
- 12403 03 **Multi-junction lasers for LiDAR applications** [12403-3]
- 12403 05 **High-performance semiconductor optical amplifier and array for FMCW LiDAR in high-speed autonomous vehicles** [12403-5]

SESSION 2 LASER DIODES FOR LIDAR II

- 12403 06 **Advances in 9xx-nm edge-emitting high-power pulse laser diodes for LiDAR applications (Invited Paper)** [12403-6]
- 12403 07 **905nm 140W pulse laser diode with 4Stack epitaxy structure for autonomous Lidar** [12403-7]
- 12403 08 **High reliability of 1550nm triple junction laser diode for long-range automotive LiDAR** [12403-8]
- 12403 09 **High-power semiconductor laser chips for fiber-laser-based Lidar pump applications** [12403-9]

SESSION 3 LASER DIODE RELIABILITY AND QUALITY

- 12403 0A **Highly reliable diode laser pump sources for the space qualified MERLIN laser platform and future wind LiDAR missions (Invited Paper)** [12403-10]
- 12403 0B **Evaluation of design concepts for feedback-resistant 9xx-nm high-power laser diodes** [12403-11]
- 12403 0C **Degradation in high-power broad-area lasers with quantum well and quantum dot active regions: a comparative study** [12403-12]
- 12403 0D **COMD-free continuous-wave high-power laser diodes by using a multi-section waveguide method** [12403-13]
- 12403 0E **Deep-learning-based visual inspection of facets and p-sides for efficient quality control of diode lasers** [12403-14]

SESSION 4 PROGRESS IN HIGH POWER LASER DIODE DEVICES

- 12403 0F **760nm laser bars for aesthetic applications** [12403-15]
- 12403 0G **9W tapered laser diodes with high beam quality at 760nm** [12403-16]
- 12403 0H **48W continuous-wave output power with high efficiency from a single emitter laser diode at 915nm** [12403-17]
- 12403 0I **Tailored in-plane thermal profiles for narrower lateral far-field in kilowatt-class 9xx nm diode laser bars** [12403-18]
- 12403 0J **Buried-regrown-implant-structure diode lasers with ultra-thick epitaxy for resistance to mounting stress without loss in efficiency** [12403-19]

SESSION 5 PACKAGED LASER DIODES

- 12403 0L **High-power multi-emitter modules with fiber Bragg grating stabilization** [12403-24]
- 12403 0M **100W multi-emitter laser with integrated electronic controller for a high-brightness low-SWaP highly-manufacturable blue laser source** [12403-25]
- 12403 0N **Innovative fused end fiber bundle technology for high-brightness, irregular beam profiles** [12403-26]
- 12403 0O **Stamped reflective optics in high-power optical assemblies** [12403-27]

POSTER SESSION

- 12403 0Q **Experimental study on pure copper welding with the 1.5kW blue diode laser for realization of a carbon-neutral society** [12403-31]
- 12403 0S **Dynamics and phase-locking in large heterogeneous arrays of semiconductor diode lasers** [12403-33]

DIGITAL POSTER SESSION

- 12403 0T **905nm line-beam laser module with high reliability for automotive LiDAR applications** [12403-2]
- 12403 0U **Lateral brightness improvement of high-power semiconductor laser diode** [12403-20]
- 12403 0W **Blue diode laser development for industrial processing** [12403-30]
