

PROCEEDINGS OF SPIE

High-Power Laser Materials Processing: Applications, Diagnostics, and Systems XII

**Stefan Kaierle
Klaus R. Kleine**
Editors

**1–2 February 2023
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 12414

Proceedings of SPIE 0277-786X, V. 12414

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Laser Materials Processing: Applications, Diagnostics, and Systems XII*, edited by Stefan Kaieler, Klaus R. Kleine, Proc. of SPIE 12414, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 SURFACE TREATMENT

12414 02 **Integrated numerical-experimental design of laser shock processing treatments of metallic alloys for high-reliability applications (Invited Paper) [12414-1]**

SESSION 2 HIGH POWER ULTRA SHORT PULSE PROCESSING

12414 03 **Fast spectral measurement of soft x-ray emission from ultrafast laser processing [12414-6]**

12414 04 **Direct and low-loss connection between a hollow-core optical fiber and a dispersion compensating fiber for dispersion-free delivery of short optical pulses in hollow-core fiber [12414-9]**

12414 05 **Real-time holographic 3D beam manipulation for ultrashort pulse laser processing [12414-10]**

SESSION 3 PROCESS MONITORING AND CONTROL

12414 06 **Predicting algorithm for laser processing parameters using spectral-domain optical coherence tomography [12414-13]**

12414 07 **High-power fiber optic cable with pre-aligned integrated sensors for high-speed process monitoring [12414-14]**

12414 08 **Powder-based laser metal deposition of VDM Alloy 780: strategy development for efficient buildup of thin-walled components [12414-16]**

12414 09 **Quality and physical properties revealed: sensors for monitoring and controlling laser processes in combination with sophisticated data models [12414-17]**

SESSION 4 JOINING AND WELDING I

12414 0A **In situ synchrotron observation of the vapor capillary geometry in laser welding of copper with 1030 nm and 515 nm laser beam sources [12414-19]**

SESSION 5 JOINING AND WELDING II

- 12414 0B **Implementation of a multispot optic for temperature field-adapted welding of complex plastic components** [12414-23]
- 12414 0C **Influence of ring-shaped laser beam during welding of AW-5083 and AW-6082** [12414-24]
- 12414 0D **Seam geometry manipulation by oscillation amplitude adjustment in the LDNA process** [12414-25]

SESSION 6 SYSTEMS

- 12414 0E **Material efficient production of functionally graded materials using coaxial laser double-wire directed energy deposition** [12414-26]
- 12414 0F **Application of machine learning to overcome challenges of generating phase masks for dynamic beam shaping in complex optical systems (Artificial Intelligence and Machine Learning Best Paper Award in LASE)** [12414-28]
- 12414 0G **High-throughput spatial light modulator based multi-beam laser marking system** [12414-29]
- 12414 0H **Application-adapted beam shaping with cutting-edge optical elements in laser materials processing** [12414-32]
- 12414 0I **Fused silica step-index fibers tailored for applications from UV to IR wavelength range** [12414-34]
