

PROCEEDINGS OF SPIE

Gallium Nitride Materials and Devices XVIII

Hiroshi Fujioka
Hadis Morkoç
Ulrich T. Schwarz
Editors

30 January – 2 February 2023
San Francisco, California, United States

Sponsored and Published by
SPIE

Volume 12421

Proceedings of SPIE 0277-786X, V. 12421

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Gallium Nitride Materials and Devices XVIII*, edited by Hiroshi Fujioka, Hadis Morkoç, Ulrich T. Schwarz, Proc. of SPIE 12421, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

GROWTH I

12421 02 **ScAlMgO₄ as a promising substrate for InGaN-based long wavelength emitters: demonstration of far-red LEDs (Invited Paper)** [12421-4]

GROWTH II

12421 03 **Impact of AlN buffer layers on MBE grown cubic GaN layers** [12421-8]

CHARACTERIZATION I

12421 04 **Detecting buried silicon interlayers in GaN/diamond bonded structures** [12421-10]

12421 05 **Deep-UV photoemission electron microscopy for imaging nanoscale heterogeneity and defects in gallium nitride** [12421-12]

12421 06 **Degradation of GaN-based InGaN-GaN MQWs solar cells caused by thermally activated diffusion** [12421-14]

12421 07 **Degradation of AlGaN-based SQW UV-C LEDs investigated by capacitance deep level transient spectroscopy** [12421-16]

12421 08 **Physical nitriding reaction of organic metal with solvent-free gallium nitride (GaN)** [12421-86]

CHARACTERIZATION II

12421 09 **Photoluminescence from defects in GaN (Invited Paper)** [12421-17]

12421 0A **Gate leakage current and threshold voltage characteristics of β -Ga₂O₃ passivated AlGaN/GaN-based heterojunction field effect transistor** [12421-79]

CHARACTERIZATION III

12421 0B **Growth of cubic $\text{In}_x\text{Ga}_{1-x}\text{N}$ over whole composition by MBE** [12421-20]

CHARACTERIZATION IV

12421 0C **Annealing properties of vacancy-type defects in ion implanted GaN during ultra-high-pressure annealing studied by using a monoenergetic positron beam (Invited Paper)** [12421-25]

12421 0D **Experimental analysis of degradation of multi-quantum well GaN-based solar cells under current stress** [12421-28]

ELECTRON DEVICES

12421 0E **Electric field mapping of wide-bandgap semiconductor devices at a submicrometer resolution (Invited Paper)** [12421-31]

LASER DIODES I

12421 0F **Blue and green edge-emitting laser diodes and vertical-cavity surface emitting lasers on C-plane GaN substrates (Invited Paper)** [12421-35]

12421 0G **InGaN semiconductor laser diodes for the visible spectral range: design and process optimization of single emitters and bars for applications from mW to kW output power (Invited Paper)** [12421-36]

LASER DIODES III

12421 0H **Highly-efficient operation and mode control in GaN-based VCSELs with a curved mirror (Invited Paper)** [12421-44]

12421 0I **Continuous-wave operation of long-cavity m-plane GaN-based vertical-cavity surface-emitting lasers with a topside curved mirror and nanoporous GaN DBR** [12421-47]

LASER DIODES IV

12421 0J **Single-frequency DFB laser diodes at visible wavelengths grown with low temperature remote plasma chemical vapor deposition p-AlGaIn** [12421-54]

LEDS I

12421 OK **Advantages of concave quantum barriers in AlGaIn deep ultraviolet light-emitting diodes**
[12421-59]

LEDS III

12421 OL **Photoresist planarized trench isolation for monolithic GaN μ LED displays** [12421-68]

LEDS IV

12421 OM **UV emission from MOVPE nanowire LEDs (Invited Paper)** [12421-70]

12421 ON **Establishment of process to suppress (0001)-plane emission by introducing EBL in GaInN/GaN multi-quantum shells/nanowires for efficient 480 nm-LEDs** [12421-72]

POSTER SESSION

12421 OO **Metal-semiconductor-metal structured p-i-n GaN/AlGaIn ultrafast detectors for deep-UV photodetection** [12421-75]

DIGITAL POSTER SESSION

12421 OP **Investigating self-assembled strain-free growth of In droplets on GaN using droplet epitaxy**
[12421-73]
