

PROCEEDINGS OF SPIE

Advances in Display Technologies XIII

Jiun-Haw Lee
Qiong-Hua Wang
Tae-Hoon Yoon
Editors

30–31 January 2023
San Francisco, California, United States

Sponsored and Published by
SPIE

Volume 12443

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advances in Display Technologies XIII*, edited by Jiun-Haw Lee, Qiong-Hua Wang, Tae-Hoon Yoon, Proc. of SPIE 12443, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510659919

ISBN: 9781510659926 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 **AUTOMOTIVE DISPLAY**

12443 02 **RGB LED matrix display for augmented driving for higher traffic safety (Invited Paper)** [12443-1]

SESSION 2 **LCD I**

12443 03 **0.37-inch UHD, 11,800 PPI liquid crystal on silicon micro-display with embedded 4x up-scaler using micro-mirror space-interpolation pixel circuit for metaverse augmented reality glasses (Invited Paper)** [12443-4]

SESSION 3 **LCD II**

12443 04 **Challenges of 1.0 μm -pitch liquid crystal spatial light modulator for future high-quality electric holographic display (Invited Paper)** [12443-5]

12443 05 **Fast-switching speed image flipping technique using an SSD-LC drive mode for VR/AR/MR uses (Invited Paper)** [12443-6]

SESSION 4 **AR/VR/MR**

12443 06 **Intraocular augmented reality display with retinal prosthesis (Invited Paper)** [12443-9]

SESSION 6 **HOLOGRAPHIC AND LIGHT-FIELD DISPLAYS**

12443 07 **Vision transformer-based, high-fidelity, computer-generated holography** [12443-18]

12443 08 **Evaluation of a pixelated holographic display concept for a near-eye display: recent results and technological developments** [12443-19]

SESSION 7 **3D DISPLAYS**

12443 09 **Optical design of 3D seamless space viewer** [12443-22]

12443 0A **Advanced integral imaging display system based on high-resolution simplified light field image acquisition method** [12443-24]

SESSION 8 DISPLAY COMPONENTS AND NOVEL DISPLAYS

12443 0B **Development of high-refractive index materials including nanofiller with nanoimprint and gapfill property expected to be applied to AR** [12443-25]

12443 0C **Speckle mitigation techniques for laser point scanned displays in head-up display applications** [12443-26]

12443 0D **Effects of photophoretic trapping under varying wavelengths of light** [12443-29]

POSTER SESSION

12443 0E **Autostereoscopic 3D display with high-aperture-ratio parallax barrier for bright 3D images and 2D images with less image quality degradation** [12443-31]

12443 0F **Compact imaging system based on multi-variable focal lens system in AR display** [12443-33]

12443 0G **Implementation of varifocal occlusion using lens arrays and focus-tunable lenses** [12443-34]

12443 0H **Fast deep-trained transformation technique for computer-generated holograms** [12443-35]

12443 0I **Optimized design and manufacturing process of diffuse micro corner cubes for head up projection display applications** [12443-36]

12443 0J **Prevalence of oculomotor changes following the near work in stereoscopic augmented reality** [12443-40]

DIGITAL POSTER SESSION

12443 0K **Optimization of 3D light field display by neural network based image deconvolution algorithm** [12443-20]

12443 0L **Enlarged mid-air image display based on slim DOE waveguide** [12443-23]

12443 0M **Modeling and experiment on point spread function of refractive and metasurface microlens arrays used in 3D integral imaging light field displays** [12443-28]

12443 0N **Fast method for real-time holographic display with large size** [12443-37]
