2023 6th International Conference on Communication Engineering and Technology (ICCET) **ICCET 2023**

Table of Contents

Preface	xi
Conference Committee	xii

ICCET 2023

A Low-Overhead Frame Structure Design for Short Frame Burst OFDM	1
<i>Wenhua Dang (Beijing Institute of Technology, China), Liang Zhu (Beijing Institute of Technology, China), Yue Han (Beijing Institute of Technology, China), Haoran Hu (Beijing Institute of Technology, China), Yuanhui Cai (Beijing Institute of Technology, China), and Mei Yang (Beijing Institute Of Fashion Technology, China)</i>	
An Improved Interleaver Identification Algorithm Based on Conformity of Parity-Check Equation	7
<i>Meizhen Liu (Harbin Engineering University, China), Zengmao Chen (Harbin Engineering University, China), Zhiguo Sun (Harbin Engineering University, China), and Hongjing Yi (Harbin Engineering University, China)</i>	
Low Redundancy Two-Dimensional Matrix-Based HVDB Code for Double Error Correction	11
<i>Yuqi Hou (Xi'an Microelectronics Technology Institute, China), Xi Liu (Xi'an Microelectronics Technology Institute, China), Lei Tang (Xi'an Microelectronics Technology Institute, China), Sheng Zhong (Northwest University, China), and Hangzai Luo (Northwest University, China)</i>	
Distribution-Matching Stack Object Counting Based on Depth Information	17
<i>Yifan Zhao (Beijing University of Posts and Telecommunications, China), Xiangyang Gong (Beijing University of Posts and Telecommunications, China), Ying Wang (Beijing University of Posts and Telecommunications, China), and Tianlin Liang (Beijing University of Posts and Telecommunications, China)</i>	
UVM-Based Verification of OFDM Baseband Processing System	22
<i>Chengcheng Zhao (Beijing Institute of Technology, China), Jianning Yang (Beijing Institute of Technology, China), Jiansong Tian (Beijing Institute of Technology, China), Xin Deng (Beijing Institute of Technology, China), Yuanhui Cai (Beijing Institute of Technology, China), and Mei Yang (Beijing Institute of Fashion Technology, China)</i>	

Low-Power Heterogeneous Networking Method Based on NB-IoT and WSN	26
<i>Mo Guan (Shenyang University of Technology, China), Liangliang Qi (Shenyang University of Technology, China; Key Laboratory of Networked Control Systems, Chinese Academy of Sciences, China; Shenyang Institute of Automation, Chinese Academy of Sciences, China; Institutes for Robotics and Intelligent Manufacturing, Chinese Academy of Sciences, China), Xi Jin (Key Laboratory of Networked Control Systems, Chinese Academy of Sciences, China; Shenyang Institute of Automation, Chinese Academy of Sciences, China; Institutes for Robotics and Intelligent Manufacturing, Chinese Academy of Sciences, China), Suoling Guan (Shenyang University of Technology, China; Key Laboratory of Networked Control Systems, Chinese Academy of Sciences, China; Shenyang Institute of Automation, Chinese Academy of Sciences, China; Institutes for Robotics and Intelligent Manufacturing, Chinese Academy of Sciences, China), Changqing Xia (Key Laboratory of Networked Control Systems, Chinese Academy of Sciences, China; Shenyang Institute of Automation, Chinese Academy of Sciences, China; Institutes for Robotics and Intelligent Manufacturing, Chinese Academy of Sciences, China), and Chi Xu (Key Laboratory of Networked Control Systems, Chinese Academy of Sciences, China; Shenyang Institute of Automation, Chinese Academy of Sciences, China; Institutes for Robotics and Intelligent Manufacturing, Chinese Academy of Sciences, China)</i>	
Design of Multi-Sensor Cooperative Detection Architecture Based on Analytic Hierarchy Process	30
<i>Kaiyu Li (Naval University of Engineering, China), Xinxin Cai (Naval University of Engineering, China), Jialei Liu (Naval University of Engineering, China), Shuang Huang (Wuhan Second Ship Design and Research Institute, China), Yuanbao Chen (Wuhan Second Ship Design and Research Institute, China), Wenlin Wang (Shenzhen Technology University, China), Yang Yu (Nuclear Power Institute of China, China), Quanhua Zhu (China Ship Scientific Research Center, China), Zhihui Xu (State Key Laboratory of Nuclear Power Safety Monitoring Technology and Equipment, China), and Dagui Wang (Anhui Jianzhu University, China)</i>	
Intelligent Situation Sensing and Multi-Dimensional Presentation for Power Emergency Communications	38
<i>Ran Li (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Xiaoshuai Yang (State Grid Shandong Electric Power Company, China), Hongfei Yang (Shandong University, China), Yuchen Wang (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Sisi Che (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Fangzhou Liu (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Ziheng He (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Hongyan Liu (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), and Shuo Wang (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China)</i>	

Achievable Rate Performance Analysis for Massive MIMO Relay Transmission	44
<i>Lili Guo (Shenzhen Institute of Information Technology, China), Mingxiang Guan (Shenzhen Institute of Information Technology, China), Chongwu Sun (Shenzhen Institute of Information Technology, China), and Yang Wang (Shenzhen Institute of Information Technology, China)</i>	
Pe-OTN/OSU Based Multi-Service Bearing Scheme and Evolution Strategy for Electric Power Backbone Transmission Network	49
<i>Xing Zhao (China Academy of Information Communications Technology (CAICT), China), Yunbin Xu (China Academy of Information Communications Technology (CAICT), China), Rui Tang (China Academy of Information Communications Technology (CAICT), China), and Feng Pan (China Academy of Information Communications Technology (CAICT), China)</i>	
Optimization of Resource Allocation Algorithm for Visible Light and WiFi Heterogeneous Networks	55
<i>Liwei Yang (China Agricultural University, China), Xinyi Zheng (China Agricultural University, China), Xiaoying Ma (China Agricultural University, China), and Yu Tian (China Agricultural University, China)</i>	
Intelligent Spectrum Allocation Based on Deep Reinforcement Learning for Power Emergency Communications	62
<i>Ziheng He (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Hongyan Liu (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Rui Du (Shandong University, China), Lili Sun (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Fangzhou Liu (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Sisi Che (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Shuo Wang (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Yuchen Wang (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), and Ran Li (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China)</i>	
A Carrier Roll Angle Control Algorithm for Satellite Communication	67
<i>Wei Zhang (Space Star Technology Co., LTD, China), Na Meng (Space Star Technology Co., LTD, China), Shaofu Zhang (Space Star Technology Co., LTD, China), and Wei Wang (Space Star Technology Co., LTD, China)</i>	
Coverage and Capacity Measurements for 5G Voice Services	72
<i>Jia Hou (Mobile Communication Technology Institute, China Telecom Research Institute, China), Chunlei Hu (Mobile Communication Technology Institute, China Telecom Research Institute, China), Xiaoyin Zhao (Mobile Communication Technology Institute, China Telecom Research Institute, China), Han Guo (Mobile Communication Technology Institute, China Telecom Research Institute, China), Jinyang Yu (Mobile Communication Technology Institute, China Telecom Research Institute, China), and Xiaohang Xu (Mobile Communication Technology Institute, China Telecom Research Institute, China)</i>	

An Adaptive Method for Linearizing Wideband Power Amplifiers with Band-Limited Feedback Path	78
<i>Yuekai Zhang (Northwest University, China), Wei Gao (Broadcom Limited, USA), Baojian Gao (Northwest University, China), and Yuhui Ren (Northwest University, China)</i>	
A Broadband Dual-Polarized Filtering Dipole Antenna with High Selectivity	84
<i>Jiayi Peng (Xi'an Technological University, China) and Lei Chen (Xi'an Technological University, China)</i>	
Design of a Dual-Polarized Microstrip Antenna with Low Backward Radiation	89
<i>Jie Zhang (Beijing Institute of Spacecraft System Engineering, China), Hairan Shi (Beijing Institute of Spacecraft System Engineering, China), Zhanchun Fan (Beijing Institute of Spacecraft System Engineering, China), Tao Jiang (Beijing Institute of Spacecraft System Engineering, China), Chao Ma (Beijing Institute of Spacecraft System Engineering, China), and Shilin Dong (Beijing Institute of Spacecraft System Engineering, China)</i>	
Quasi-Coherent Demodulation of TCM-4CPM and FPGA Implementation	94
<i>Fang Wang (The 54th Research Institute of China, Electronics Technology Group Corporation, China), Zhenyu Liu (Xidian University, China), and Jinhua Sun (Xidian University, China)</i>	
An Efficient DOA Estimation Method for FH Signals Based on MSST	100
<i>Yang Liu (Harbin Engineering University, China), Rongchen Sun (Harbin Engineering University, China), Kaifeng Guo (CSSC System Engineering Research Institute, China), Xin Zhang (Harbin Engineering University, China), and Ming Diao (Harbin Engineering University, China)</i>	
Research on Radio Station Identification Method Based on Combination of Signal Decomposition Optimization and Fractal Processing	106
<i>Xiwen Ouyang (Northwest University, China), Lihua Zhang (Northwest University, China), and Baojian Gao (Northwest University, China)</i>	
Signal Detection and Parameter Estimation of Low SNR Direct Sequence Spread Spectrum Signal	110
<i>Zaichang Wang (Army Engineering University of PLA, China), Jian Cheng (Army Engineering University of PLA, China), Ronghui Su (Army Engineering University of PLA, China), Qingchi Luo (Army Engineering University of PLA, China), and Xidan Na (Army Engineering University of PLA, China)</i>	
Improved Coherent Accumulation Power Spectrum Detection Technology	119
<i>Zhibo Han (Hangzhou Applied Acoustics Research Institute, China), Yan Liu (Hangzhou Applied Acoustics Research Institute, China), and Yaqin Liu (Hangzhou Applied Acoustics Research Institute, China)</i>	
Lightweight Mask Detection Algorithm Based on Improved YOLOv4	125
<i>WenYi Hu (Chengdu University of Technology, China), Yujia Du (Chengdu University of Technology, China), Yuan Huang (Chengdu University of Technology, China), Hongkun Wang (Chengdu University of Technology, China), and Kun Zhao (Chengdu University of Technology, China)</i>	

Coprime Circular Array DOA Estimation Method	132
<i>Xin Zhang (Harbin Engineering University, China), Rongchen Sun (Harbin Engineering University, China), Kaifeng Guo (CSSC System Engineering Research Institute, China), Yang Liu (Harbin Engineering University, China), and Yaxiu Sun (Harbin Engineering University, China)</i>	
A Method of UQPSK-DSSS Timing Synchronization for Non Integer Sampling Rate	137
<i>Yuanhui Cai (Beijing Institute of Technology, China), Zhiru Ma (Beijing Institute of Technology, China), Shili Wang (Beijing Institute of Technology, China), Dongfang Hu (Beijing Galaxy Information & Communication Co.Ltd, China), Chengcheng Zhao (Beijing Institute of Technology, China), and Wenhua Dang (Beijing Institute of Technology, China)</i>	
Optimizing the Classroom Space Design for Intellectually Disabled Students Based on the Analysis of the Acoustic Environment	144
<i>Tawfiq Jebril (Xi'an Jiaotong University Xi'an, China), Yang Chen (Xi'an Jiaotong University Xi'an, China), Heena M Shirahatti (KLE Technological University Hubli, Karnataka), and Syed Far Abid Hossain (BRAC University, Dhaka, BD)</i>	
Application of Personalized Emotion Speech Synthesis Technology in Human-Computer Interaction	150
<i>Yuhao Liu (Nanchang Institute of Technology, China), Huan Wang (Nanchang Institute of Technology, China), Zhikai Huang (Nanchang Institute of Technology, China), Jialei Chen (Nanchang Institute of Technology, China), Chaofan Yu (Nanchang Institute of Technology, China), Jiasi Sun (Nanchang Institute of Technology, China), HaoXuan Yan (Nanchang Institute of Technology, China), and Bin Hu (Nanchang Branch of Shenzhen Quicktalk Technology Ltd., Shenzhen Quicktalk Technology Ltd., China)</i>	
Identification Method of Inner Knuckle Print Based on Geometric Features	154
<i>Yingmei Zhu (Chengdu University of Technology, China), Yu Wang (Chengdu University of Technology, China), Yanwen Zheng (Chengdu University of Technology, China), and Meijun Wu (Southwest University of Finance and Economics College of Business Administration, China)</i>	
Interference Management for Multi-Cell Indoor Visible Light Communication Systems	161
<i>Liwei Yang (China Agricultural University, China), Shu Lin (China Agricultural University, China), and Mofei Li (China Agricultural University, China)</i>	
Research on Combat Effectiveness Based on Internet of Things	167
<i>Liguo Wang (Unit 31621 of the Chinese People's Liberation Army, China), Yong Wu (Unit 31621 of the Chinese People's Liberation Army, China), Song Zhang (Unit 31621 of the Chinese People's Liberation Army, China), Yinghua Huang (Unit 31621 of the Chinese People's Liberation Army, China), and Xuanzi Zhang (Unit 31621 of the Chinese People's Liberation Army, China)</i>	
Multi-Scale Network and Ghost Attention Head for Semantic Segmentation	171
<i>Zetao Fei (Qufu Normal University, China), Qinghao Guo (Qufu Normal University, China), Yao Zhang (Qufu Normal University, China), Yunfeng Hu (Qufu Normal University, China), and Kui Tang (Qufu Normal University, China)</i>	

Manifold Learning Based Quantile Regression Method for Short-Term Power Load Probability Density Forecasting	177
<i>Fuxing Huang (NARI Group Co., Ltd., China), Chunyan Lu (NARI Group Co., Ltd., China), and Meng Sun (NARI Group Co., Ltd., China)</i>	
Adaptive Modulation and Coding Based on Multi-Agent Reinforcement Learning for Power Emergency Communications	183
<i>Shuo Wang (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Yantong Zhang (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Shuzhen Shi (Shandong University, China), Ran Li (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Fangzhou Liu (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Ziheng He (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Sisi Che (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), Hongyan Liu (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China), and Yuchen Wang (Information&Telecommunications Company, State Grid Shandong Electric Power Company, China)</i>
