## TABLE OF CONTENTS

**AISTech® 2023**

**Volume 1**

**HOWE MEMORIAL LECTURE**

**Howe Memorial Lecture**

Fiber Optic Sensing Technologies Supporting Advancements in Steel Production and the Shift to Industry 4.0

*Ronald O’malley*

**SAFETY & HEALTH**

**Analytics & Automation for Health & Safety**

Digital Computer Vision Technologies for Safety Management in Steel Manufacturing

*Roy Lan, Ibukun Awolusi, Jiannan Cai*

**Digital Transformation in Training & Safer Operations**

Point Clouds and Interactive 3D Models for Safety Training Realism

*John Moreland, Kyle Toth, Justin Heffron, Chenn Zhou*

Implementing Virtual Reality Technology for Safety Training to Reduce Hand Injuries in the Steel Manufacturing Industry

*Mohammad Nafe Assafi, Joshua Cotton, Grant Wood, Junfeng Ma, Yu Wang, Jun Wang*

Operational Safety and Digital Transformation: A Win-Win Integration

*Marco Ometto, Costanzo Pietrosanti*

**Planning & Implementing Safety Into the Working Area I**

System Safety or Safety System — What Is the Difference?

*Malcom Dunbar*

**Planning & Implementing Safety Into the Working Area II**

Hazard Recognition, Risk Perceptions and Safety Climate Among Steel Manufacturing Workers

*Luz S. Marin, Majed Zreiqat, Wanda Minnick, Gabriella Green, Chloe Croft, Sydney Sheredy, Brandon Wiggins*

Real-Time Legionella Monitoring of Contact and Non-Contact Cooling Systems

*James Gleason*
ENVIRONMENTAL

EAF Gas Flow Emission & Energy Optimization
Energy Consumption Forecast to Cash In on Profits From Short-Term Market Prices
Stefan Albers, Peter Bachmann, Rudolf Felix, Alexander Görtz, Heinz-Josef Ponten

NOx Reduction & Carbon Emission Optimization
SNCR Experience in an Iron Ore Pellet Plant
Fabio Ferrari, Niccolò Griffini
Reduction of Gaseous Emissions by Applying a Spray-Scrubber-Based Process for Cyanide Compound Reduction in Blast Furnace Gas
Alessandro Olcese, Lorenzo Micheletti, Luca Spadoni, Ismael Matino, Antonella Zaccara, Alice Petrucciani, Valentina Colla, Teresa Annunziata Branca

Regulation & Emission Reduction
The Need to Lower the Opacity Limit Following EPA Recommendations: The Experience of a Totally Enclosed Building That Operates Above an EAF with Ultralow Specific Electrical Consumption
Marco Peter Cudicio, Alberto Feruglio
Flue Gas Cleaning to Optimize CO2 Capture
Xavier D'Hubert

Waste Minimization & Energy Reduction
Synthesis of Fe-Al-C Intermetallic Alloy via Fe2O3-Al-C Interaction at 1, 550°C: Implication for Mill Scale Upcycling
Praphaphan Wongsawan, Weerayut Srichaisiriwech, Somyote Kongkara
Heat Storage and Centralization in a Steelmaking Plant — A Rational Use of Energy
Gabriele Guastaferro, Antonio Sgró, Marco Lapasin

Water Treatment & Minimizing Water Waste
Production of Aqueous Chlorine or Bromine Using Electrohalogenation Technology for Cooling Water Microbial Control
Andrew Boal

DECARBONIZATION

Biomass Solutions
Decarbonization Based on Sustainable Biomass in Ironmaking, Steelmaking and Ferrous Alloymaking: A Continuous Improvement of a Centenary Experience in Brazil
Ronaldo Sampaio, Thiago Oliveira
Biotechnologies: A Pathway to Net-Zero CO₂ Emissions Steel? ................................................................. 182
    Maëva Chrzaszcz, Mariam Sidawi, Ian Cameron, Richard Elliott, Mitren Sukhram

Photosynthesis: A Natural Process for Decarbonization of the Steel Industry .............................................. 211
    Dácio Calais, Ronaldo Sampaio

**Green Reducing Agent Technologies**

Nuclear Energy as a Pathway to Decarbonization for Modern Steelmaking Plants ........................................ 221
    Herbert Lam, James Wikston, Neil Tannyan

Clean Hydrogen From Steel Plant Waste Gases ............................................................................................ 232
    Matthew Dawson, Jamal Ferguson, Ken Grieshaber

**New Decarbonization Technologies**

Decarbonizing the Iron and Steel Industry Under the New Energy Order .................................................. 237
    Francesco Memoli, Claudio Galimberti

Applications of Advanced Smelting Furnace Technology for Sustainable Steelmaking ............................. 247
    Kyle Chomyn, Sa Ge, Terrence Koehler, Christopher Walker

**Novel Decarbonization Routes**

Carbon-Free Fully Electrical Soaking Furnace Designed by DCC Now Running at Fagersta Stainless ........... 256
    Andrea Biliotti, Alessandro Venanzini, Narayan Raut

**Pathway to Responsible CO₂ Standards**

Decarbonization Perspectives: Assessment of Different Scenarios in the Iron- and Steelmaking Industry ................................................................. 260
    Thiago Oliveira, Chris Pistorius, Ronaldo Sampaio

Path to Responsible Steel Certification ........................................................................................................ 272
    Ramon Contreras, Jimena Klaumer

Driving Demand for Green Steel Through Clean Energy Projects .............................................................. 277
    Caitlin Swalec

Methodology for Developing a Strategic Road Map for Reducing Energy Consumption and CO₂ Emissions for Iron and Steel Plants ................................................................. 281
    Sunil Kumar, Yakov Gordon

**COKEMAKING**

**Cokemaking**

Technical Support to Schwelgern Coke Plant Featured by Carbonization Retort ........................................ 287
    Marc Schulten, Viktor Stiskala
IRONMAKING

Blast Furnace Maintenance & Productivity

Strategic Hearth Campaign Extension Strategies Using Partial Repairs .................................................. 319
  Jesse Carreau, F. Van Laar, R. Chaykowski, M. Grguric, Angelo Petruccelli

Campaign Life Extension of Ironmaking Facilities ..................................................................................... 333
  Chad Van Der Woude, C. Long, Kyle Chomyn, Hamid Ghorbani

Digitalization, Control & Modeling

Blast Furnace Hot Metal Temperature Prediction with Multi-Wave Pyrometer Measurements ............... 350
  Alexander Schmitz, Juraj Micak, Lijia Wu, Markus Schulte

An Eulerian-Based Reduction Model for Iron Ore Particle Reduction ....................................................... 358
  Markus Bösenhofer, Franz Hauzenberger, Hugo Stocker, Christoph Feilmayr, Michael Harasek

Investigating the Use of Shaft-Level Tuyere Injection with Computational Fluid Dynamics .................... 366
  Samuel Nielson, Tyamo Okosun, Orlando Ugarte, Chenn Zhou

Evaluation and Improvement Methods of Preparation for a Blast Furnace Taphole Campaign ............... 375
  Eduardo Antônio Laia Da Silva, Alfredo Carlos Bitaraes Quintas, Johne Jesus Mol Peixoto,
  Carlos Antônio Da Silva

Investigation of the Thermally Thick Alternative Reducing Agent Behavior in the Raceway Zone .......... 381
  Matthias Kiss, Markus Bösenhofer, Franz Hauzenberger, Hugo Stocker, Christoph Feilmayr,
  Michael Harasek

Low-CO₂ Iron II

Fuel Flexible Ironmaking with Reduced CO₂ Emissions .............................................................................. 392
  Ian Cox, Enrico Di Cesare

A Novel Test Rig for the Evaluation of Auxiliary Reducing Agents (ARAs) ............................................. 397
  Thomas Nanz, Markus Bösenhofer, Johannes Rieger, Christoph Feilmayr, Franz
  Hauzenberger, Hugo Stocker, Michael Harasek

CO₂ Reduction by Combining Methanation with the Blast Furnace ....................................................... 404
  Yuki Kawashiri, Yusuke Kashihara, Kiyoshi Fukada

Sintering/Pelletizing/Briquettes

Effects of Recycling Sinter Dust as Calcium Ferrite in the Sintering Process on Sinter Quality and
  Emission of CO₂, NO and SO₂ .................................................................................................................. 424
  Leonardo Tomas Da Rocha, Seongkyu Cho, Sung-Wan Kim, Sung-mo Jung

Numerical and Experimental Approach to Heating Iron Ore with Mixed Coal ........................................ 442
  Prasenjit Singha, Soumya Ranjan Mohanty, Sunil Yadav, Ajay Kumar Shukla
DIRECT REDUCED IRON

DRI & HBI Handling

Effects of Making HBI with and Without Hot Fines Recycling ....................................................... 450
Matthew Miller

Ore Quality & Use in Blast Furnaces

Industrial Trial of Recycled Iron Briquettes Produced with Iron Ore Fines and Sludge From
Sedimentation Piles in a Direct Reduced Iron Reactor ................................................................. 459
Erick Bubniak, Joel Morales, Andres Villa, Jose Senra

Plant Design, Safety & Maintenance

Complete Refractory Solution for DRI Reactors with High Hydrogen Concentration in the
Reducing Gas .................................................................................................................................... 467
Sangram Mohapatra, Bertrand Hiot, Bruno Touzo

Jens Sperber, Franz-josef Duennes

Next Generation of Pelletizing Plants for the Transition to Green Steel ........................................... 480
Maximilian Köpf, Matthias Gabriel, Robert Schiemann, Olavo Nolasco

Reduction Mechanisms

Circored Fine Ore Direct Reduction and the Benefits of Microgranulation ....................................... 495
Sebastian Lang, Maximilian Köpf, Sebastian Richter, Jan-folker May

DIRECT REDUCED IRON/DECARBONIZATION

Direct Reduced Iron/Decarbonization

Briquette Strength: Effect of Hydrogen vs. Reformed Natural Gas ..................................................... 503
Vita A. Dean

A Low-Carbon Emission Flowsheet for BF-Grade Iron Ore Using Advanced Electric Smelting
Furnace .................................................................................................................................................. 508
Sa Ge, Ezra Widajat, Takshi Sachdeva, Kyle Chomyn, Christopher Walker, Ian Cameron

ELECTRIC STEELMAKING

Automation/Neural Networking Systems

Instrumented Trial-Based Models for Efficient Electric Arc Furnace Operation ............................... 519
Bikram Konar, Naveen Sundaresan Ramesh, Andrew Hamilton, Kendal Dunnett

Dynamic Process Control and Optimization of an Electric Arc Furnace ............................................ 531
Andreas Rohrhofer, Helmut Aflenzer, Thomas Reindl
EAF Efficiencies & Improvements

Electrode Cooling Optimization

*Chris Barnes, Rick Toste*

Large Electric Arc Furnace Equipped with Electro-Magnetic-Stirrer as a Model for the Efficient and Reliable Transition of the Steel Industry

*Silvio Reali, Andrea Grasselli, Zaeim Mehraban, Lidong Teng*

EAF Revamp at Gerdau Monroe: A Case Study of EAF Capacity Increase and Its Impact on the Overall Meltpshop Operation

*Rodrigo Costa, Hannes Betele*

Reduction of Electrode Breakage During Operation in a 130-Ton EAF from ArcelorMittal Resende – Case Study

*Paulo Hopperdizel, Thiago Wandekoken, Helio Espindula De Oliveira, Marsal Victorino, Iury Silva*

Media Transport

The Critical Role of Hydrogen in Linde’s Coherent Jet Technology

*William Mahoney, Adrian Deneys, Pravin Mathur, Sumant Warty*

Use of Different Lime-Based Products to Promote Agglomeration of Bio-Charcoal for EAF Injection Through Extrusion and Tableting Processes

*Joyce Aderhold, Mark Ford, Hugues Lambert, Helene Huynh, Jan Böhringer, Mac Steele, Bill Johnson*

Lime Particle Size Variation — Effects in Lime Injection Systems

*Eric Schons*

Refractory & Slag

Rapid Slag Analysis with Digital Sample Homogenization to Slag Analysis in Under One Minute and Efficient In-Situ Furnace Management

*M. Ounanian, B. Van Stuijvenberg, M. Ounanian, B. Van Stuijvenberg, Alexander Schlemminger*

Fiber Optic Raman Probe for On-Line EAF Slag Analysis

*Bohong Zhang, Hanok Tekle, Ronald O'Malley, Todd Sander, Jeffrey D. Smith, Laura Bartlett, Farhan Mumtaz, Rex E. Gerald II, Jie Huang*

EAF Lining and Hot Repair: New Technologies to Improve Repair Quality and Furnace Productivity

*Rubens Freire, Martin Kammerhofer, Gerhard Pusterhofer, Francisco Rangel*

Robotics Applications

Automatic Robotic Solution for Internal Furnace Inspection to Optimize Cooling Panel and Refractory Maintenance

*Simone Ambrosio, Manuel Martin, Marco Ometto*
"The Future Is Manless" Takes the Next Step ................................................................. 623
Tim Steurer, Danny Schreiber, Patrick Hansert, Henning Karbstein, Matthias Breithaupt, Ralf Schweikle

EAF Optimization: An Important Factor in Reducing Steelmaking Energy Intensity and GHG Emissions ................................................................. 635
Douglas Zuliani, B. Babaei

COLD SHEET ROLLING

Scrap

Real-Time On-Line Elemental Analysis of Scrap for Steelmaking ........................................ 647
Henry Kurth, M. Kalicinski

OXYGEN STEELMAKING

A CFD Study of the Melting Process of HBI/DRI Scrap in an AC Electric Arc Furnace ............... 655
Orlando Ugarte, Neel Busa, Pavan Vemula, Tyamo Okosun, Chenn Zhou

Classification of Scrap Types Using Computer Vision Algorithms ........................................ 665
Abhieshree Dhani, Chirag Vaghela, A. Asaro, Dehong Yuan, G. Pravisani, Jens Kempken, Christoph Kirmse

ELECTRIC STEELMAKING

Trials & Plant Start-Ups

Use of HBI in Cleveland-Cliffs EAF and AOD Operations ......................................................... 675
Jianghua Li, Mark Suer, Jeffrey Haeberle, Ryan Bowser, Jason Fehr, Brian Dehaut, Misty Erford

AURA Digital Feeders for Low-Impact Electric Arc Furnaces .................................................. 686
Luca Neri, Andrea Lanari

The Medium-Frequency Coreless Induction Furnace – A CO₂ and NOx-Friendly Solution for Scrap Melting ................................................................................. 692
Frank Donsbach, Sebastian Esser, Thomas Schanz

Start-Up of New Meltshop and Strip Production Plant at Nucor Steel Gallatin ......................... 705
Luca Faralli

EAF Restart at ArcelorMittal Sul-Fluminense: Problems and Solutions to Reach Process Performance Goals .................................................................................. 712
Paulo Hopperdizel, Thiago Wandekoken, Arthur Ramalho, Marco Antônio Almeida, Fábio Moreira, Gerson Moraes, Igor Rana
ELECTRIC STEELMAKING/DECARBONIZATION

Electric Steelmaking/Decarbonization

Digital Solution for Optimizing Scrap Yard Management .......................................................... 723
Josué Rodríguez Diez, Asier Vicente Rojo, A. Galletebeitia, R. Jaras, G. Sorrosal, J. A.
Arteche, A. Lago

Applications of Carbon Sources for Green Steel Using Power Carbon ..................................... 734
Breno Totti Maia, Bernardo Martins Braga, Lucas Moreira Duarte, Marcelo D. S. L. Guerra,
Paulo Hopperdizel, Thiago Wandekoken

Use of Green Pig Iron in the Electric Arc Furnace ................................................................. 744
Pedro Machado, Savia Pinheiro, Diego Santiago

OXYGEN STEELMAKING

Blowing Practice

Nitrogen Control in the Basic Oxygen Steelmaking Process ....................................................... 752
Saikat Chatterjee, Bapin K Rout

Modeling of the “K” Compensation Factor of the Momentum Balance Equation in a Metallic Bath
in the LD........................................................................................................................................ 775
William Dos Reis Lima, Bernardo Martins Braga, Breno Totti Maia, Mauricio Covecovich
Bagatini, Roberto Parreiras Tavares, Ana T. D. S. D. Moreira, Ana Luiza Vasconcelos E Silva,
Pedro Henrique Araújo, Gaëlle Laure Siemou Tchoupo

Novel Approach to Control Nitrogen in BOF Steelmaking ............................................................ 791
Akasmita Biswal, J. Hari Babu, Sujeet Kumar

Blow Ignition — Cause of Premature Failure in Lance Tip .......................................................... 798
Breno Totti Maia, William Dos Reis Lima, João Paulo Mafort Santos, Bruno Orlando De
Almeida Santos, Lucas Alves, João Domingos De Athayde Junior

Process Metallurgy

Skull Removal Device in Lances of BOF Process ......................................................................... 808
Emilio Acciarito Filho, Aristides A. Barbosa, Henrique A. Carneiro, Claudio Lapa, Vincent
Pimpinella

Effects of Slag Removal Method on the Process Parameters of Energy Optimizing Furnace ........... 813
Malaiyappan Vidhyasagar, Palvannathan Ramasubramanian, Durairaj Rajesh, Manjini
Sambandam

Process Modeling

Hybrid Process Models Are Setting New Standards for Advanced Process Optimization in
Converter Steelmaking ................................................................................................................. 832
Anna Mayrhofer, Helmut Kühlböck, Krzysztof Pastucha, Bernhard Voraberger, Gerald
Wimmer
Slag Splashing — Cold Model Comparisons and Equations for Industry Setup

Breno Totti Maia, Willian Dos Reis Lima, João Paulo Mafort Santos, Bernardo Martins Braga, Leandro Rocha, José Roberto De Oliveira, Viktor Sinelnikov

Volume 2

Predicting the Dissolved Oxygen in Steel by Using Quick Carbon Analyzer at Energy Optimizing Furnace

Malayappan Vidhyasagar, Palvannanathan Ramasubramanian, Durairaj Rajesh, Manjini Sambandam

Physical Modeling of Hot Metal Desulfurization Through Submerged Rotative Lance

Daniela Perasoli, Cecília Laia Da Silva, Carlos Berlinski Filho, Mylla C. D. S. E Silva, Johne Jesus Mol Peixoto, Carlos Antônio Da Silva

ELECTRIC STEELMAKING

Scrap

Heat Transfer in a BOF Converter

Nirmal Madhavan, Geoffrey Brooks, M Akbar Rhamdhani, Bapin K Rout, Aart Overbosch

SPECIALTY ALLOY & FOUNDRY/METALLURGY — STEELMAKING & CASTING

Specialty Alloy & Foundry/Metallurgy — Steelmaking & Casting

Investigation of Non-Metallic Inclusions During Primary Melting of Specialty Steels

Andrew Huck, Bryan Webler

New AOD Automation System at Cleveland-Cliffs Butler Works

Mark Suer, Jacob Brocklehurst, Kevin Allen, Dale Shandick, Ryan Bowser

Metal Degassing by Means of Vacuum Cap (VCAP) Technology for Enhanced Material Properties

Iñaki Vicario, Aaron Teske, Eike Schmilinsky, Martin Myška, Roman Ritzenhoff

Vision & Data Analytics/Machine Learning

Bubble Size Determination in a Half-Scale Curved Water Model Mold for Various Casting Conditions Using Imaging and Machine Learning

Soumitra Kumar Dinda, Donghui Li, Fernando Guerra, Chad Cathcart, Mansoor Barati

Bubble-Inclusion Interaction During Argon Bubbling in a Tundish: Assessment with Automated Inclusion Microanalysis and Data Analytics

Thiago Oliveira, Chris Pistorius, Mauro Ferreira, Dai Tang

Quality Improvements in the Vacuum Degasser by Steel Exposure Model Through Artificial Vision

Richard Marquez, Esnardo Morales, A. Alvarez, R. Lescas, D. Alvarado

Steel Works Energy-Saving Strategies Through Artificial Intelligence Techniques

Esnardo Morales, Richard Marquez, A. Alvarez
Physical and Mathematical Modeling of Residence Time Distribution and Grade Transition in a Twin-Strand Slab Caster Tundish ................................................................. 976
Soumitra Kumar Dinda, Donghui Li, Fernando Guerra, Chad Cathcart, Mansoor Barati

Modeling of the Mixing Phenomena in the RH Vacuum Refining Process ................................................................. 986
Franz Ramstorfer

SPECIALTY ALLOY & FOUNDRY/METALLURGY — PROCESSING, PRODUCTS & APPLICATIONS

Specialty Alloy & Foundry/Metallurgy — Processing, Products & Applications

Casting Configuration Development for Improved Performance Solutions of Walking Beam Furnace Components .......................................................................................................................... 998
Tanya Ros-Yanez, Elia Scotuzzi, John Martin, Barry Felton, Federico Prandi, Brian Shaw Shaw

Control of MnS Inclusion Aspect Ratio in Leaded Free-Cutting Steels ................................................................................. 1010
Soorya Prakash Jayaraj, Vettrivelmurugan R, Mohammed Rasul Iqbal, Manjini Sambandam

Ladle & Secondary Refining

Modeling & Machine Learning I

Modeling EAF Carryover Slag Volume and LMF Lime and Ca-Aluminate Addition .......................................................... 1021
Dai Tang, Collin Scott, Jose Lara, Chris Pistorius

A CFD Study of Alloy Dissolution and Homogenization in the Ladle Metallurgy Furnace ................................................. 1027
Ogochukwu Duruiheme, Xipeng Guo, Nicholas Walla, John Lowry, Chenn Zhou

Modeling & Machine Learning II

Machine Vision System to Optimize Stirring During Secondary Refining Processes .......................................................... 1042
Johnny Mantoani, Federico Bianco, Mauro Meneghin, Manuele Piazza

Usage of CaO-Al2O3 Synthetic Slag on EAF Tapping for Steel Desulfurization ................................................................. 1050
Lucas Da Silva Renato, Raphael Mariano De Souza, Victor Dos Santos Dagostini, Estéfano Vieira, Felipe Fardin Grillo, Jean Carlo Camasmie De Paola, José Roberto De Oliveira

Data-Driven Model for On-Line Steel Temperature Prediction to Optimize the Secondary Refining Processes .................................................................................................................. 1062
Manuele Piazza, Giulio Planu, Marco Ometto

Modeling Ladle Slags Using a Mass Balance Approach and Integration Into the Ladle Furnace Process Supervisory System .......................................................................................... 1070
Francisco Lopez, Dickson Souza, Sabrina Matos, Tatiane Alcântara, Nicholas Silva, Neivson Carvalho, Tito Coelho, Miguel Bock, Eric Almeida
IRONMAKING

Slag & Process Optimization

Improved Measurement System and Its Contribution to Enhanced Chemistry Control................................. 1079
Paul Wu, Gregory Newman, Kevin Allen

LADLE & SECONDARY REFINING

Safety and Operational Improvements After Installation of an Automatic Gas Coupling System ............... 1085
Christoph Schöggl, Martin Leber, Zachary Stroman

Increasing of LF Performance by Controlling the Slag and Steel Oxygen Activities................................. 1095
Fuat Erkan Tekin, Eyüp Tan, Serdar Erdemis, Rüstem Çagri Ünzal, M. A. Türker Yurt, Sezer Arabaci, Evren Arıkan, Isa Keskin, Baran Dogan

LADLE & SECONDARY REFINING/METALLURGY — STEELMAKING & CASTING

Kent D. Peaslee Memorial Session

A Possible Reason Why Ti-SULC Grades Are More Prone to CC Clogging Issues Than Other Al-Killed Grades.......................................................... 1106
Jean Lehmann, Didier Huin, Guillaume Stechmann, Amico Settefrati, Emmanuel Lucas, Jean-Francois Dongin, Francois Stouvenot

Different Approaches to Trace the Source of Non-Metallic Inclusions in Steel ......................................... 1115
Kathrin Thiele, Sergiu Ilie, Roman Roessler, Christoph Walkner, Thomas C. Meisel, Thomas Prohaska, Susanne K. Michelic

Steel Cleanliness

Steel Cleanliness Comparison Between Al-Killing and Al+CaC2-Killing for Low-Carbon Steel Grade .................. 1122
Savia Pinheiro, Pedro Machado, Diego Santiago, Ricardo Rodrigues, Laurent Chessret, Aurelien Fabas

LADLE & SECONDARY REFINING/REFRACTORY SYSTEMS

Secondary Refining & Flow Control Refractories

Ultralow-Carbon MgO-C Refractory Bricks for Special Steel Production Processes ...................................... 1130
Sérgio Luiz Cabral Silva, Sérgio Eustáquio Soares, Edmilson Dias Gonzaga, Laura Falco Paiva Carvalho, Sophia Vieira Macedo

Development of New Refractories Raw Material for Slide Gate Plate ......................................................... 1139
Keiichiro Akamine, Taro Makino, Kiyoshi Goto, Katsumi Morikawa, Kazuo Itoh

Use of 3D Laser Scan in RH Degasser to Enhance Refractory Performance Analysis in Critical Areas................................. 1150
Raphaela Araujo, Leandro Silvino Crivellari, Bruno Cesar Calazans De Andrade, Wellington Moraes, Gilvan Nascimento De Souza, Julia Macedo, Bruno Laidens, Giovanni Coimbra, Leandro Martins
Lightweight, Slim Submerged-Entry Nozzle for Medium- and Thin-Slab Continuous Casting ......................1157
Hiroyasu Niitsuma, Takayuki Matsunaga, Toshio Horiuchi, Xiaodong Li

CONTINUOUS CASTING

Bloom & Billet Casting

Initial Experience with New Round Caster Operation and Improvements at U. S. Steel - Fairfield Works............................................................1163
Rudolf Moravec, William Schlichting, John Ruf, Fred Mamtooth

Continuous Casting of Octagonal Section Revisited: Quality Steel Production Trials at Acciaierie Bertoli Safau S.p.A.........................................................1172
Pierluigi Armenante, Przemyslaw Remigiusz Pardela, Marco Truant

World’s Largest Casters are Danieli’s in China .....................................................................................1183
Pierluigi Armenante, Yueming Chen, Marco Mauro Motta, Przemyslaw Remigiusz Pardela,
Thierry Gautreau, Aymeric Chemin

OXYGEN STEELMAKING

Caster Modeling

Sensor Instrumentation and Advanced Imaging of the Full-Scale Physical Twin Mold for Digital Data Generation During Continuous Casting ........................................1194
Jackie Leung, Soumitra Kumar Dinda, Donghui Li, Joydeep Sengupta, Markus Bussmann

CONTINUOUS CASTING

Flow Simulation Approaches and Supplementary Measurements for SEN Design Characterization and Its Development ..............................................................1204
Gernot Hackl, Wolfgang Fellner, Yong Tang, Tianfei Ma, Pavan Shivaram

Thin-Slab Caster Mold Thermal Mapping: An Advanced Solution for High-Efficiency Sticking Detection ........................................................................1213
Riccardo Conte, Giovanna Busolin, Andrea Zamolo

Caster Mold Fluxes

Mold Powder Development for High-Al Medium-Carbon Steel Continuous Casting ........................................1221
Daishuke Katayama, Junya Ito, Erika Nakatani, Masanori Okada, Jim Gilmore

The Study of the Behavior of CaO-SiO$_2$-Al$_2$O$_3$-Na$_2$O-Based Mold Flux in 1, 400°C by a Fiber-Optic Raman Sensor .................................................................1227
Bohong Zhang, Hanok Tekle, Ronald O'Malley, Todd Sander, Jeffrey D. Smith, Laura Bartlett,
Farhan Mumtaz, Rex E. Gerald II, Jie Huang

Caster Process Improvement

Robotic System for Continuous Casting Operations .................................................................................1238
Ion Rusu, Anna Zoppitrolli
Celsa Group Green Steel: Every Degree Counts
Ben Hale, P. Hughes-Narborough, G. Humphrey, Isa Keskin, S. Simmons, Ana Hernández Rivera, S. Nacarino

Next-Level Self-Adaptive Unsteady Bulging and Clogging Compensation Using the Mold Influx
Veit Humcr, Ferencz Bordas, Markus Nolan, Peter Wimmer, Christian Froehlich, Michael Speher

Anomaly Detection Using the Isolation Forest Algorithm: Application to Continuous Slab Casting
Franz Ramstorfer

**Caster Secondary Cooling**

Improving Bearing Service Life in Continuous Casters
Robert Loughery

Is It Possible to Cast Bloom and Beam Blanks with the Same Secondary Cooling Setup?
Daniela Fatima Gomes, Bernardo Martins Braga, Roberto Parreiras Tavares, Mauricio Covcevich Bagatini, Carlos Berliri Filho, Gabriela Pereira Maciel

**Casting Quality**

Transverse Slab Crack Reduction in Low-Carbon, Low-Alloy Steels
Paul Wu, Mark Suer, Timothy Charatan

Slab Surface Cracking Characterization of Hyperperitectic Steels
Jing Su, Bikram Konar, Michael Gaudet, Andrew Hamilton, Muhammad Arafin

Investigation of Argon Bubble Injection in Continuous Casting
Mingqian Wang, Armin Silaen, Bikram Konar, Shaojie Chen, Chenn Zhou

**Tundish Technology**

Distributed Temperature Monitoring of Tundish Refractory Lining Using Optical Fiber Sensors
Hanok Tekle, Muhammad Roman, Rex E. Gerald Ii, Ronald O'Malley, Jie Huang, Todd Sander, Jeffrey D. Smith

Tundish-to-Mold Refractory Solutions for a MIDA Caster
Pavan Shivaram, Pedro Domingos, Gerard Mckillen, Alexandre Resende, Richard Komanecck, Jeremy Stickan, Preston Barrett

Inclusion Density in Tundish Zones Using Fluid Flow Simulations
Demetrius Ruy, Jose Eduordo Pereira, Lucas Meneghel, André Oliveira, L. P. Prandi, A. A. S. Beloti Beloti, Estéfano Vieira

Avoiding Asymmetric Flows Caused by Off-Center Pouring Into the Tundish: A Novel Impact Pot Design
Alexandre Resende, Rubens Freire, Gernot Lukesch, Gernot Hackl, Daniel Meurer
CONTINUOUS CASTING/HOT SHEET ROLLING

Continuous Casting/Hot Sheet Rolling

Modernizations and Upgrade Concepts of American Mini-Mills

Cosimo Cecere, Keith Watson, Björn Kintscher, Tristan Töpfer-bergner

Latest Achievements with Endless Casting and Rolling Technology at Shougang Jingtang

Alessandro Pigani

A New Era of Thin-Slab Casting and Rolling

Cosimo Cecere, Keith Watson, Björn Kintscher, Tristan Töpfer-bergner

Steel Producers Overcome the Gap Between Productivity and Quality Demands with Arvedi

Andreas Jungbauer, Simon Grosseiber, B. Linzer

HOT SHEET ROLLING

Digitalization

Turn-Up/Down Improvement During Roughing Mill Rolling Process at AM/NS Calvert Hot Strip Mill

Ayumu Wagatsuma, Betts Tania, Gleyson Barbosa, Alec Glenn

Benefits of Usage of Various Models in a Hot Strip Mill

Eugene Nikitenko

Development of Tandem Steering Control in Hot Strip Mill

Sanga Takagi, Satoshi Ueno, Tatsuya Tsukamoto

Energy Optimization, Green Steel, Environmental, Safety & Health

Advanced Operational Control of a Reheat Furnace with Laser-Based Combustion Feedback

Jonathon Richards, Eric Huelson, Guillaume Tiffon

Toward Lights-Out Factory: Improved Finishing Mill Operation by Centerline Control, Reduced Strip Steering

Klaus Pronold, Alexander Kofler, Christian Mengel, Guido Eichert

Maintenance & Reliability and Continuous Casting

Effect of Water Jet Nozzle Lead Angle on Descaling Efficiency

Tochukwu Princewill Ojiako, Viraj Athavale, Richard Osei, Taha Tayebali, Oldair Sasso, Mario Buchely, Laura Bartlett, S. Lekakh, Ronald O'Malley

Strip Steering Control in a Hot Strip Mill as a Key Feature for Safe and Stable Production

Klaus Loehe, Sebastian Kallabis, Niklas Petrasch, Andreas Maierhofer

Cladded Downcoiler Pinch Rolls: New Alloys and Improvements Achieved

Michal Zawadzki
DIGITALIZATION APPLICATIONS

Quality

Rectifying a Misinterpretation on Gaugemeter Automatic Gauge Control (AGC) Model ........................................ 1466
Yuli Liu

How the Virtualized Modernization of a Hot Strip Mill Control System Led to Improved Quality for thyssenkrupp Steel Europe ........................................................................................................ 1474
Karola Gurrath, Matthias Kurz, Andrea Schmidt, Klaus Loehe, Raphael Twardowski

COLD SHEET ROLLING

Latest Advancements in Steel Processing

Eco Pickled Surface (EPS) Technology Evolution: Next-Generation Cell Design, System Integration and Application to High-Strength and Silicon Steels ................................................................................ 1491
Christopher Liefer, Alan Mueth, Kevin Voges

Latest Developments in On-Line Monitoring of the Condition of Steel Cold Rolling Emulsions .......... 1506
Mike Cook

An Examination of the Underlying Physics and Mechanics of Herringbone and Diagonal/Cross-Buckle Flatness Distortions — Part 2: Analytic Analysis of Planar Shear-Induced Diagonal Wrinkles ......................................................................................................................... 1512
Mark E. Zipf

Defect Logging in Steel: The Speech-to-Text Way .......................................................................................... 1522
Anil Kumar Pujari, Anurag Kallakuri, Arghya Chatterjee, Samagra Kumar, Achinta Dalal, Nitish Kumar, Niladri Paul

DIGITALIZATION APPLICATIONS

Rolling Innovation

Coolant Demands for Silicon Steel Cold Rolling .......................................................................................... 1526
J. B. A. F. Smeulders

COLD SHEET ROLLING

Maximizing Yield Using Innovation in Automatic Gauge Control for Rolling Mills .................................. 1539
Navneet Singh, John Bartlett, Manish Kumar

Tatmetal Rolling Innovation .......................................................................................................................... 1548
Tommaso Settimo, Dmitriy Voitekhovskii

6-High Cold Rolling Mill (HYPER UC-MILL) with Smaller Work Roll Diameter for Thin-Gauge Rolling .............................................................................................................................. 1554
Akihiro Yamamoto, Shinichi Koga, Yu Kojima, Shin Ozeni, Takehiko Saito, Yuta Shiga, Keng Hoo Lam
**Technology & Silicon Steel Rolling**

Confocal Technology: The Next Generation in Optical Thickness Gauging ................................................. 1565
*Achim Sonntag, Nicolas Dreihäupl*

How to Make an Old 4-High Cold Rolling Mill Fit for AHSS or Electrical Steel Production ......................... 1571
*Konrad Kripnelpstaetter, Sebastian Angerer, Bernhard Schinagl*

Effective Cold Rolling Technologies for the Successful Production of Electrical Steel and AHSS .............. 1578
*Konrad Kripnelpstaetter, Roland Kellermayr, Helmut Dagn, Josef Hofbauer*

New Contactless Flatness Measurement for Improvement of Strip Quality and Production Yield .............. 1590
*Simon Hain, David Terry, Andreas Maierhofer, Claudio Blanco De Souza*

Effect of Dewpoint on the Evolving Spectral Emissivity of Advanced High-Strength Steel During Intercritical Annealing .................................................................................................................. 1598
*Fatima Suleiman, Nishant Narayanan, Kyle Daun*

**GALVANIZING**

**New Processing Technologies for Galvanizing**

Redundant Strip Temperature Measurements on a Continuous Galvanizing Line ........................................ 1608
*Robert Comstock, Kevin Ward, Joyce C. Niedringhaus*

Laser Ultrasonic Inspection of Mash Seam Welds in a Steel Mill .............................................................. 1616
*Morgan Hiraiwa, Hao Guo, Alexandre Nadeau, Andrew Grasley, Matthew Stautz*

Double-Shell-Type Oven Design for Coil Coating Line to Optimize On-Site Erection Activities, Fan Energy Consumption and Lifetime .................................................................................................. 1625
*Michele Chiappa*

**New Technologies in Galvanizing**

Approach to Successful Development of Low-Carbon, Lean-Alloyed Cold-Rolled Galvanized HSLA 550 Sheet Steels .............................................................................................................. 1628
*Shobhit Bhartiya, Siddhartha Biswas, Bilin Chen, Codrick Martis, Yash Injeti, Mat Bishop*
*Bishop, Ana Araujo, Amar De*

Effect of Zn-Bath Temperature on the Corrosion Behavior of Martensitic Steels 1.4095, 1.4096 and 1.4097 in Comparison to the Ferrite-Free Austenitic Steel 316L ........................................................................ 1636
*Tobias Simon, Frank Wischnowski*

**Volume 3**

Arvedi Servola (Italy) and the Production of Sustainable and Green Steel .................................................. 1645
*Massimiliano Svetina, Walter Donato*

Color-Coated Purlins Used for Pre-Engineered Buildings ............................................................................. 1650
*Navneet Singh, Deepak Khanna*
PLATE ROLLING

Plate Equipment Upgrades & Optimized API Skelp Production

Application of API 5L X65M Skelp with Accelerated Cooling to Small-Diameter Spiral Pipes............. 1656
Qiulin Yu, Matt Montgomery, Phil Baker, Pepper Vance, Gowtham Ganesan

Optimum Metallurgical Processing of Cost-Effective API Grade Structural Steel for Standard, Sour and Gaseous Hydrogen Service Transmission Line Pipe Applications ............................................. 1666
David Jarreta, Doug Stalheim

Phase 1 of Plate Mill Upgrades at JSW Steel Texas Are Completed.................................................... 1678
Enrico Zambon, Matteo Remy Bulfone

Influences for the Quality of Heavy Plates After Heat Treatment ......................................................... 1683
Holger Kehler, Mike Allan

Plate Processing & Toughness Properties Enhancements

Hot Rolling Roughing and Finishing Reduction Balance for Heavy-Gauge X80 ........................................... 1689
Michael Gaudet, Jing Su, Muhammad Rashid, Muhammad Arafin

Surface Quality Management and Condition Monitoring to Ensure Reliable Quality Decisions............... 1700
Gregory Gutmann, M. Hoenen

Low-Carbon High-Toughness Steel for Tank Car Applications ................................................................. 1706
Tanya Ros-Yanez, Susan Glinski, Michael Kapustin, Venkata Challa

Development of a Digital Twin for the MULPIC at SSAB Mobile Plate-Steckel Rolling Mill ............... 1715
Ian Robinson, Dengqi Bai, Yufeng Wang, John Hinton

LONG PRODUCTS

Digitalization & Project Technologies

Process Control with a Focus on Surface Quality in Wire Rod Rolling..................................................... 1725
Zhiguo Han, Enrique R. Frixione, Tzyy-shuh Chang

Methods for Model-Aided In-Line Measurement and Control of Cross-Sections in Wire Rod and Bar Mills................................................................. 1735
Christian Overhagen, Rolf Braun

Computer Vision Improves Safety and Productivity in Long Product Rolling Mills ............................ 1748
Miguel Vilariño, Evangelos Papadimitriou

Roller Hearth Heat Treatment at the Cutting Edge of Technology ......................................................... 1757
Erik Koenig, Mike Allan

Metallurgy & Profile Measurement

Profile Measurement of Reinforcing Bar and Rolling Defect Detection During Production .................... 1762
Johann Peters
Intelligent Sensor for Rib Profile Detection in High-Speed Rebar Mill ................................................................. 1765
Vinit Shah, Parthasarathy Satish Kumar Bangalore, Pankaj Kumar, Abhishek Raj, Vasanth Subramanyam

Prediction of Austenite Grain Size Evolution in Wire Rod Rolling ................................................................. 1768
Mohammed Rasul Iqbal, Soorya Prakash Jayaraj, Manjini Sambandam

Technology Overview & Mill Upgrades

Intelligent Guides Implementation at Nucor Steel Sedalia ......................................................................................... 1774
Jon Ball, Christopher Hines, Eric Svensson

Equipment Technologies for Processing of Long Rolled Products ........................................................................ 1778
Norbert Asamer

Billet Welding Machine – Latest Development Description and Real Application Results ...................................... 1787
Virginio Pometto, Giuseppe Tobanelli

AI-Supported Material Simulation of Forming Processes ......................................................................................... 1798
Michael Kruse, Doris Wehage

PIPE & TUBE

Product & Quality Development in Pipe & Tube

Production of X70 Helical Line Pipe with Increased Gauge ....................................................................................... 1806
Michael Gaudet, Jing Su, Muhammad Rashid, Kendal Dunnett, Muhammad Arafin

ROLS

Roll Manufacturing/Performance

On the Performance and Surface Quality of Graphitic HSS Roll Grades at Tata Steel's Direct Sheet Plant ................................................................. 1818
Michael Aigner, Danny Beentjes, Henk Bolt, Armin Paar, Leonel Elizondo

Investigation and Analysis of Mill Roll Surface After Operation to Develop High-Performance HSS Work Rolls for Hot Strip Mills ......................................................................................... 1828
Akira Noda, Nozomu Oda, Yasunori Nozaki, Paul Fleiner

Roll Shop Equipment/Processes

Tungsten Carbide: An Alternative to Chrome Plating on Work Rolls ......................................................................... 1837
Michael Brennan, Adam Smith

New Developments in Electrical Discharge Texturing .............................................................................................. 1847
Chris Childs, Grant McBain

Electrical Discharge Texturing — How the Use of Linear Motors Will Increase the Quality of Cold-Rolled Steel Strip ......................................................................................................................... 1857
Mike Nitschke
METALLURGY — STEELMAKING & CASTING

Inclusion Study & Control

Improvement of CpK of High-Strength Rebar Grade at New Bar Mill, Tata Steel ......................................................... 1866
Vinit Shah, Parthasarathy Satish Kumar Bangalore, Pankaj Kumar, Abhishek Raj

Mechanism of Initial Nozzle Clog Deposit Growth and Its Countermeasure During Continuous Casting of Ti-Added Ultralow-C Steel ................................................................. 1873
Youn-Bae Kang, Joo-hyeok Lee

Inclusion Control in High-Carbon Wire Rod Coils ........................................................................................................ 1880
Sethu Prasanth Shanmugam, Eswarakrishnan Ramamurthy, Sakkiah Dharmar, Durairaj Rajesh

Thin-Slab Casting

Nitrogen Composition and Its Effect on Magnetic Properties of Simulated Twin-Roll Cast Non-Grain Oriented Si Steel ................................................................. 1885
Hunter Parrish, Mario Buchely, Ronald O'Malley, Viraj Athavale, P. Kelly

The Future of Endless Strip Casting and Rolling: Green and Designed for Automotive Exposed .............. 1893
Riccardo Conte, Andrea Carboni

State of the Art in Electromagnetic Devices for Mold Fluid Dynamics Control Presently Installed on Thin-Slab Casters ........................................................................ 1900
Gabriele Paulon, Thierry Gautreau, Aymeric Chemin, Marco Petronio, Andrea Codutti

Root-Cause Analysis and Control for Transverse Edge Cracks in Niobium Bearing Steel Grades Produced Through Thin-Slab Caster ............................................................................ 1906
Ayushi Bhandari, Shainu Suresh, Alok Kumar, Uttam Kumar, Avtar S. Saini, Ravindra V. Sangwai, Vinay Mahashabde

METALLURGY — PROCESSING, PRODUCTS & APPLICATIONS

Electric Steels & Corrosion

In-Situ Observation of the Solidification of X70 Steel Using High-Temperature Confocal Scanning Laser Microscope ........................................................................................................ 1914
Katelyn Kiser, Viraj Athavale, Laura Bartlett, Ronald O'Malley, Mario Buchely

Development of Non-Linear Equations for Predicting Electrical Conductivity in Silicates ......................... 1930
Patrick Dos Anjos, Lucas De Almeida Quaresma, Marcelo Lucas Pereira Machado

Ensuring Highest Quality Standards in Electrical Steel Production Combining 2D and 3D Inspection Technology for Surface Defects and Waviness Recognition ......................................................... 1938
Gregory Gutmann, S. K. Weigelt

Microalloy & Characterization

MicroNiobium-Low-Manganese Steelmaking Approach at Gerdau Ouro Branco ................................................................. 1942
Ana Araujo, Steven Jansto, Jorge Adam Cleto Cohn, Ricardo José De Faria, Altair Lúcio De Souza, Antonio Gorni, Marcelo Rebellato
Dynamic Recrystallization Behavior of a Ni-Containing Austenite-Based Fe-Mn-Al Steel.................................................................................. 1950
Rogerio Antao Cordoso, Michael Piston, Mario Buchely, Laura Bartlett

Charaterization of Steel Plates for Sour Service Pipelines for the Improvement of DWTT Results ........... 1962
Daniel Matsubara, Cynthia Castro, Clelia Oliveira, Ricardo Carvalho, Paulo Haddad

**Thermomechanical Processing & Heat Treatment**

Effects of Atmosphere on Bright Annealed Stainless Steel .............................................................................................. 1975
Jerry Arnold, Kenneth Peter

Effect of Cr and Cooling Rates in Hypoeutectoid Steels Under Forced-Convection Conditions............... 1986
Monserrat López-Cornejo, Hector Javier Vergara-hernandez, Jose Roberto Hernández Trejo,
Julio Augusto Cortes-javier, Paulina Gutiérrez -gonzalez

Slipper-Type Spindles — Latest Developments and Installations for Heavy-Duty Applications............... 1994
Stefano Puzzo, Gianni Tiussi

Investigation of Thermomechanical Process Routes, From Rolling Mill to Final Heat Treatment, for the Production of Steel for Fasteners and Bolts.............................................................. 2008
Andrea Spadaccini, Sara Marzio

**ENERGY & UTILITIES**

**Process Optimization & Innovation to Meet Decarbonization**

How Modern Combustion Systems Address Top-Tier Issues for Processing Lines................................. 2017
Dennis Quinn

Optimization of Steelmaking Gas Distribution Using an Artificial Intelligence Tool ............................. 2021
Arthur Farah, Fernanda Drumond, Kássio Cançado, Lis Soares, Ricardo Giacomin,
Thiago Maia

**Reheating Technologies for Decarbonization & Panel Discussion**

Decarbonization and Increased Productivity in the Reheating Furnace Using Hydrogen Fuel................. 2033
Anurag Karambelkar, Chukwunedum Uzor, Nicholas Walla, Armin Silaen, Lawrence Fabina,
Kurt Johnson, Chenn Zhou

Tenova Ultralow-NOx Regenerative Burners Working with Hydrogen and Oxygen Enrichment ..... 2044
Davide Astesiano, Alessandro Della Rocca, Claudio Leoncini

**ELECTRICAL APPLICATIONS**

**Electrical Applications**

Application of a Less Flammable Ester Liquid in Electrical Arc Furnace Rectifier Transformers ........ 2054
Michael Sauer, Jinesh Malde, Anthony Coker, Gary Urso

Grid-Forming Control Functionality for STATCOMs in Steelmaking Applications .............................. 2061
Jon Rasmussen, Carl-Johan Elm
DIGITALIZATION APPLICATIONS

AI & Machine Learning I

Model-Assisted Labeling Deployment — Enablers for AI and IOT Paving Modern Iron- and Steelmaking
Adnan Husakovic, Ali Abbas, Andreas Melcher, Anton Tushev, Thazhath Jhonce Swathish

Adopting Machine-Learning-Based Workflows for Reducing Production Risk and Cost
Pamir Ozbay, Carter Almquist

Business Continuity and Cybersecurity: Using ISO 62443 Industrial Cybersecurity Standard Compliance on the Operational Technology at Çolakoğlu Metalurji
Michael Pillwax, Ugur Dalbeler, Özgür Özsoy, Özcen Söke, Evrim Ergölu, Serkan Cerman, Merim Cato

“Hands-Free” Fully Autonomous, Plant-Scale, Anomaly Detection AI
Joe Porter, Keval Bhanushali, Dan Kearns, Nikunj Mehta

Fast or Low-Speed Measurements: What Is the Best Choice for Industrial Processes?
Didier Morice, Geraldo Ferreira, Roelf Van Rensburg, Cesar Melendez

AI & Machine Learning II

Dancing with the Cloud
Pedro Ruiz, Gustavo La Cruz

AI & Machine Learning III

AI/ML Modeling Using Metals Industry Domain Knowledge
Franck Adjogble, Hardik Chinoy

Digital Transformation: System and Data Architecture as the Backbone for AI/ML in the Metals Industry
Franck Adjogble, Sai Parvathaneni, Jason Lenox

Industrial AI: From Myth to Commodity
Luc Van Nerom, Robert Jäger

Melting & Casting

Application of Tailored Scheduling Algorithms for Automized Slab Yard Management
Mansur Ahmed, Hermann Schnitzler, C. Andreas Klein, Jochen Neuer, Franck Adjogble

Customer Portal — All Information on Contract Performance in One Place
Mateus Assis, Ramon Fraga, Carlos Lamare, Carla Saliby, Paulo Vinicius Conceição

Digital Twin of a Torpedo Ladle: The Simulated Future
Bruno Luchini, Maria Gabriela Garcia Campos, Paul Van Beurden, Sido Sinemma
Digital Twin Software for a Continuous Caster

Kyle Toth, Aleeha Zafar, Xibin Zhou, Rayhan Zaman, Nicholas Gregurich, Lidia Yakovleva, Chenn Zhou

Quality

Expert System Process Monitoring and Real-Time Event Forensics

Franck Adjogble, Hardik Chinoy

Configurability in Service-Oriented and Collaborative Production Management

Akriti Malla, Jörg Hackmann

HOT SHEET ROLLING

Real-Time Defect Prevention in Continuous Casting

Phillip Oliver Hänisch, Baibhab Dutta, Rashmi Murthy, Christoph Kirmse

DIGITALIZATION APPLICATIONS

Rolling & Finished Goods

Improving Automatic Surface Inspection Performance by Multiple Synchronized Views and Enhanced Classification Algorithms

Gregory Gutmann, D. Recker

Digital Solutions for the Hot Strip Mill: Leveraging Industry 4.0

Gary Gepitulan, John Mcmillen, Paul Jackson, Justin Hollingsworth

SENSORS

Laser Sensors for Steel Production

Increasing Sustainability Through Process Optimization with the Aid of Laser Surface Velocimeters

Robert Bodamer, Peter Nawfel

Facilitating the Operator’s Life: How Computer Vision-Based Digital Assistants Can Improve Plant Production

Jens Frenzel, Christian Horn, Martin Kerschensteiner, Karsten Knothe, Alexander Thekale, Dominik Wassermann

Sensors for Safety & Process Improvements

Energy-Saving Virtual Sensor for Electric Heating Applications

Peter Sherwin

PROJECT & CONSTRUCTION MANAGEMENT

Project & Construction Management

Pre-Outage and Off-Line Testing — Mitigating Risk in Outages

Nicole Altman, Zach Bloede, Katherine Brosky, Thomas Ruffner, Neil Tannyan
U. S. Steel – Gary Works Pig Iron Caster: Executing a Fast-Track Project in a VUCA Environment .......... 2286
Sean Mccann, Corey Moreau, David Ploskina, Shane Smith, Rehan Arif, Neil Tannyan, Brian Black, Emerson Evangelista, Mark Winter, Alec Davis, Matthew Preuss

MAINTENANCE & RELIABILITY

Innovation in Plant Monitoring & Reliability

New, Reliable Plant Supervising System Reduces Unplanned Downtime and Eases the Plant Service ............................................................................................................................................................ 2306
Arno Haschke, Andreas Maierhofer

An Innovative Approach to Plant and Process Supervision in Steelmaking Plants ........................................... 2314
Marco Ometto

Lubrication Solutions for a Proactive Maintenance Program

How to Escape From the Lithium Grease Price Trap ............................................................................................. 2319
Tim-Oliver Mattern, Dustin Greiner

Reducing Operational Costs by Specialized Grease and Testing ........................................................................ 2322
Dustin Greiner, Tim-oliver Mattern

Managing Risk Applications with Analytic Information

Digital Twin in Continuous Casting Machine — Ternium Use Case ................................................................. 2329
Leandro Passos, Rodrigo Pereira, Fabio Lourenco

REFRACTORY SYSTEMS

New Development of Steel/Iron Ladle Refractories

Energy-Efficiency Refractory Bricks for Steel Ladle Linings .............................................................................. 2336
Carlos Pagliosa, Jose Alvaro Sardelli, Bárbara Borges De Melo, Marcelo Borges, Celio Cavalcante, Enrique Mejia Mejia

Operation of Steel Mill Ladle Pre-Heater with 100% Green Hydrogen and Zero CO₂ Emissions ................... 2344
Itsaso Auzmendi, Juan Blanco-requesens

Zero-Carbon Tempered MgO – ZnO Brick as Alternative of Fired Magnesia Chrome for Safety Lining of Stainless Steel Ladle ......................................................................................................................... 2353
Bárbara Borges De Melo, Carlos Pagliosa, Arilton Junior, Carlos Lares

Development of a Methodology for Life Cycle Assessment of Refractories and Fluxes Used in Iron and Steel Processes ................................................................................................................................. 2361
Bruno Touzo, Laurence Canton, Emmanuelle Henry-lannier

Novel Environmental Refractory Lining for Hot Metal Ladle: Carbon-Free Al₂O₃-SiC Brick .................... 2364
José Alvaro Sardelli, Carlos Pagliosa, Tiago Moreira, Julia Macedo, Vanderlucio Madalena
New Technology for Blast Furnace & Converter Refractory Maintenance

An Overview of Blast Furnace Refractory Lining Management by Acousto Ultrasonic-Echo Method .......................................................... 2370

Afshin Sadri, Wai Lai Ying, Maria Tibbo, Harris Cornett, Liam Kelly

Improving Higher Magnesia-Containing Doloma-Based Bricks to Reduce Greenhouse Gas Emissions .......................................................... 2382

Robert O'Brien, Carlos Lares, Herman Moggee

Challenges for the Refractory Industry to Support the Foreseen Large-Scale Transition to DRI Shaft Kilns .......................................................... 2388

Erick Estrada, Gerald Hebenstreit, Stefan Postrach, Daniela Gavagnin, Taco Janssen

MATERIAL HANDLING/TRANSPORTATION & LOGISTICS

Advanced Automation Solutions

Billet Traceability with Innovative Automatic Tag Application .................................................. 2396

Ion Rusu, Anna Zoppirolli

Dynamic Simulation of a Port Terminal Shipment Operation for Iron Ore Exportation ............. 2401

Edenilson Silva Filho, Gustavo Gilberti, Luiz Montenegro

Bundle Bars Tagging and Counting Robotic Cell for Traceability ........................................ 2411

Ion Rusu, Valentino Bazzoli, Anna Zoppirolli

Author Index
