**Volume 12481**

Proceedings of SPIE 0277-786X, V. 12481

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Bioinspiration, Biomimetics, and Bioreplication XIII*, edited by Mato Knez, Proc. of SPIE 12481, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## WEDNESDAY PLENARY

---

12481 02 **Biologically inspired design (Plenary Paper)** [12481-501]

---

## SESSION 1 MATERIALS

---

12481 03 **Coding soft matter with bionetworks-inspired emergent principles (Invited Paper)** [12481-2]

12481 04 **Bio-inspired light radiating, air circulating, and expanding mechanisms  
(Craig F. Bohren Best Student Presentation Award 1st Place)** [12481-3]

12481 05 **Smart transparent protein biomaterial with tunable water-responsiveness properties** [12481-4]

12481 06 **On the structural and optical properties of the Hungarian Meadow Viper  
(*Vipera ursinii rakosiensis*)** [12481-6]

---

## SESSION 2 ACTUATION/LOCOMOTION

---

12481 07 **Experimental investigation of the non-smooth actuation in twisted and coiled string artificial  
muscles** [12481-8]

12481 08 **Analysis of an anchoring muscle for pipe crawling robot  
(Craig F. Bohren Best Student Presentation Award 2nd Place (Tied))** [12481-9]

12481 09 **Whiffing-inspired gapped wings alter trim and mitigate gusts  
(Craig F. Bohren Best Student Presentation Award 2nd Place (Tied))** [12481-10]

12481 0A **Experimental study of the hydrodynamic interaction between a fish and an actively pitching  
airfoil** [12481-11]

---

## SESSION 3 OPTICS I

---

12481 0B **Printing structurally colored photonic materials (Invited Paper)** [12481-16]

12481 0C **Fabrication of optical hydrophobic metasurfaces resembling the surface structure of Peruvian  
lily flower petals** [12481-13]

**SESSION 4    OPTICS II: BIOINSPIRED MANUFACTURING**

---

12481 0D    **Incorporation of avian neurophysiology offers new methods to enhance object tracking models** [12481-19]

12481 0E    **An environmentally friendly copper-based superhydrophobic coating on steel substrate via electrodeposition to reduce corrosion** [12481-18]

**POSTER SESSION**

---

12481 0F    **Development of an underwater robot with undulation propulsion** [12481-20]

12481 0G    **The poor man's trough: a bench top, motor-free method to 3D Langmuir-Blodgett films** [12481-24]
