SPIE

Volume 12482

Proceedings of SPIE 0277-786X, V. 12482

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Electroactive Polymer Actuators and Devices (EAPAD) XXV*, edited by Herbert R. Shea, Proc. of SPIE 12482, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

EAP APPLICATIONS FOR MICROROBOTS AND ON THE BODY

- 12482 02 **TouchBand: a modular low-power elastomer-based watchband for touch input and hand gesture recognition** [12482-6]
- 12482 03 **Dynamic data physicalization by unimorph dielectric elastomer actuators** [12482-7]
- 12482 04 **A self-sensing approach for multi-mode dielectric elastomer actuator-loudspeaker devices** [12482-8]

EAP APPLICATIONS IN NON-PLANAR SHAPES

- 12482 05 **Transparent PDMS fiber actuator with ionic liquid-based electrodes (Invited Paper)** [12482-9]
- 12482 06 **A method of testing pear fruit firmness with dielectric elastomer actuator excitation** [12482-10]
- 12482 07 **Low profile dielectric elastomer actuator system with unibody compliant joint transmission** [12482-11]

SOFT STRAIN AND FORCE SENSORS I

- 12482 08 **Leveraging machine learning for arrays of soft sensors (Invited Paper)** [12482-13]
- 12482 09 **Sensitive robust tactile fingertips and shape-morphing actuation for robotic grippers** [12482-14]
- 12482 0A **For dielectric elastomers, fringe-sensing is not as quirky as it sounds** [12482-15]
- 12482 0B **Investigating open and closed dielectric elastomer structures for the development of a soft flexible and stretchable pressure sensor array for pressure injury prevention** [12482-16]
- 12482 0C **Efficient swimming through electroactive polymer hydrodynamic sensing** [12482-17]

FABRICATION AND MATERIALS FOR EAPS

- 12482 0D **Electrode filling using capillary action of 3D printed elastomer microchannels** [12482-18]

- 12482 OE **Self-healable, high-permittivity elastomers for dielectric elastomer actuators** [12482-20]
- 12482 OF **Effects of the soft matrices in dielectric elastomer actuator electrodes on their actuation performance** [12482-22]
- 12482 OG **Towards an understanding of piezoresistivity in filled polymer composites** [12482-23]

SOFT STRAIN AND FORCE SENSORS II

- 12482 OH **Improving diver-robot empathy with a haptic feedback smart glove** [12482-26]
- 12482 OI **An embedded self-sensing motion control system for a strip-shaped dielectric elastomer actuators** [12482-27]
- 12482 OJ **Dielectric elastomer sensors adapted for monitoring compression load of clamped battery cells** [12482-28]

IONIC ACTUATORS

- 12482 OK **Experimental characterization of actuation of anion-exchange membranes in salt solution** [12482-30]

EAP ACTUATORS

- 12482 OL **Modeling of the actuation performance of dielectric elastomer unimorph bending actuators consisting of different materials (Invited Paper)** [12482-35]
- 12482 OM **A bio-inspired multi-directional HASEL actuator-driven soft robotic tail: design and characterization** [12482-36]
- 12482 ON **Free-standing tubular DEAs for multi-directional bending** [12482-37]
- 12482 OO **Investigation of the pre-stretch-dependent stability and force output of carbon-fiber-reinforced dielectric elastomer actuators** [12482-38]
- 12482 OP **Printing electrodes for P(VDF-TrFE-CTFE) actuators using a consumer-grade inkjet printer** [12482-39]

POSTER SESSION

- 12482 OQ **An energy-based model for both rate-dependent and rate-independent hysteretic effects in uniaxially-loaded dielectric elastomer actuators** [12482-40]

- 12482 OR **Multilayering VHB films for dielectric elastomer generators with improved lifetime** [12482-41]
- 12482 OS **Influence of the active-to-passive area ratio on the electrically induced strain of a fiber-reinforced dielectric elastomer actuator** [12482-43]
- 12482 OT **Peristaltic pumps based on polyvinyl chloride gel actuator** [12482-45]
- 12482 OU **Modeling and control of conducting polymer based tri-layer transducer** [12482-46]
- 12482 OV **What are steric effects? A purely continuum model** [12482-47]
- 12482 OW **High-performance dielectric elastomer unimorph bending actuators without pre-stretch** [12482-49]
- 12482 OX **Nylon-11 nanowires embedded in flexible substrates for piezoelectric transducers** [12482-50]
- 12482 OY **Morphologically intelligent dielectric elastomer sensors based on micro-structured electrodes as resistive strain elements** [12482-52]
- 12482 OZ **Digitalized data access of DE material models and their parameters using an OBD(M)A approach** [12482-53]
