**Volume 12491**

Proceedings of SPIE 0277-786X, V. 12491

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *8th International Workshop on Reliability of NDT/NDE*, edited by Daniel Kanzler, Norbert G. Meyendorf, Proc. of SPIE 12491, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## STANDARDIZATION

---

12491 02 **NormPOD: a generalized POD approach: from ferritic welding to reinforced concrete structures** [12491-2]

12491 03 **Simple and multiple linear regression for probability of detection** [12491-3]

---

## HUMAN FACTORS

---

12491 04 **Inclusion of human factors in POD assessments: a theoretical approach** [12491-6]

12491 05 **An automatic system for categorizing and quantifying human factors** [12491-7]

---

## APPLICATION IN INDUSTRY

---

12491 06 **New approach for reliability assessment of guided wave-based structure health monitoring system on a pipe application** [12491-11]

12491 07 **Ways to unlock the potential of non-destructive concrete testing for the reliability assessment of our built environment** [12491-12]

12491 08 **Investigation of manufacturing techniques to develop controlled flaws for x-ray computed tomography reliability assessment** [12491-13]

---

## JOINT SESSION WITH 12491 AND 12489

---

12491 09 **Reliability evaluation of testing systems and their connection to NDE 4.0** [12491-17]

12491 0A **A simulation of probability of rejection as an aid to understanding the significance of sizing accuracy** [12491-18]
