**Volume 12533**

Proceedings of SPIE 0277-786X, V. 12533

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Infrared Imaging Systems: Design, Analysis, Modeling, and Testing XXXIV*, edited by Gerald C. Holst, David P. Haefner, Proc. of SPIE 12533, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

## INFRARED IMAGING SYSTEMS I

---

- 12533 02 **Comparing pixels on target with NV-IPM range predictions** [12533-1]
- 12533 03 **Novel machine learning-based EOIR sensor performance modeling for naval applications** [12533-2]
- 12533 04 **Scenario analysis using machine learning to inform sensor design** [12533-3]
- 12533 05 **Modelling performance of AI/ML-based tower localization in thermal imagery** [12533-4]

---

## INFRARED IMAGING SYSTEMS II

---

- 12533 07 **Microbolometer bad pixel and cluster definitions through defect observations** [12533-6]
- 12533 09 **NVIPM for modeling laboratory measurements** [12533-8]
- 12533 0A **Comparison of reflective band (Vis, NIR, SWIR, eSWIR) performance in daytime reduced illumination conditions (Best Presentation Award)** [12533-9]

---

## INFRARED IMAGING SYSTEMS III

---

- 12533 0B **Signal and performance model for imaging systems with SPAD detectors** [12533-10]
- 12533 0E **Validation of ShipIR (v4.2)** [12533-13]
- 12533 0F **Sensitivity of infrared ship signature analysis to climatic data sampling methods** [12533-14]

---

## INFRARED IMAGING SYSTEMS IV

---

- 12533 0G **Automated image-based range performance measurement using TOD** [12533-15]

- 12533 OH **Motion blur modeling for multi-rotor and fixed wing UAVs** [12533-16]
- 12533 OJ **Silux: a unit of silicon detector-weighted irradiance** [12533-18]
- 12533 OK **Comparison of analytical parametric models and measured data dependent models for EO system performance prediction** [12533-19]

---

#### INFRARED IMAGING SYSTEMS V

---

- 12533 OL **Calculating the 2D optics point spread function (PSF) using Zernike math model (ZMM) for sensor system performance analysis** [12533-20]
- 12533 OM **Visible, SWIR, and LWIR drone wide area coverage sensor systems** [12533-21]
- 12533 ON **Decomposing measured noise cubes: SiTF, 3D noise, uniformity, and drift** [12533-22]
- 12533 OO **Lens requirements for sub-10- $\mu\text{m}$  pixel pitch uncooled microbolometers** [12533-23]
- 12533 OP **Imager performance assessment with TRM4: recent developments** [12533-24]

---

#### INFRARED IMAGING SYSTEMS VI

---

- 12533 OQ **Creating a calibrated scene for objective measurements of multi-band camera systems (Innovation Award)** [12533-25]
- 12533 OR **A comparative study of methods to estimate conversion gain in sub-electron and multi-electron read noise regimes** [12533-26]
- 12533 OS **Overview of novel testing capabilities to characterize EO military systems** [12533-27]
- 12533 OT **Measurements and metrics of fixed pattern noise: a new procedure for thermal camera noise measurement** [12533-28]
- 12533 OU **Development of a test bench for the assessment of digital processing efficiency in thermal imaging systems** [12533-29]

---

#### INFRARED IMAGING SYSTEMS VII

---

- 12533 OV **Camera measurement techniques using virtual prototyping** [12533-30]
- 12533 OW **Modeling of response, noise, photon transfer curve, MTF, PSF, and atmospheric effects for SWIR, MWIR, and LWIR cameras** [12533-31]

- 12533 0X **Importance of frame rate during longwave infrared focal plane array evaluation** [12533-32]
- 12533 0Y **A spectro-radiometric calibration station for blackbody sources** [12533-33]
- 12533 0Z **Imaging infrared seeker design and tests for FOK guided missile** [12533-34]

---

**POSTER SESSION**

- 12533 10 **Inverse spectral analysis of diffuse reflectance measured with a field spectrometer for NIR-SWIR absorbing dyes** [12533-35]
- 12533 11 **The optical system design with using microlens array and Powell lens and examination of the experimental results** [12533-36]
- 12533 13 **Detection range performance analysis and verification of the long-wavelength infrared optical system for drones** [12533-38]
