
Shanghai, China
26-28 July 2023
## TABLE OF CONTENTS

Optimal Design of DC Capacitance of Photovoltaic Self-Synchronizing Voltage Source ........................................ 1
  Wei Chen, Shaoze Zhou, Xinze Song, Zheng Wei, Dongmei Yang, Wei Wang

Power Control Strategy for Cascaded 3L-NPC Converters Considering Thermal Conditions ................................ 6
  Jinlei Chen, Wenlong Ming, Sheng Wang, Jun Liang, Ingo Lüdtke

Study of Canceling Onboard Braking Resistance in Urban Rail ................................................................. 12
  Zhang Jian, Liu Wei, Yang Zhiling, Li Yuhang, Li Shuqian, Wu Bo

Research on the Coordinated Operation and Energy Saving of Reversible Converter and Rectifier Unit ..................... 16
  Xu Qian, Zeng Jiaxin, Liu Wei, Xiong Peng, Yang Qianfeng

Virtual Verification and Validation for Sustainable Manufacturing ............................................................ 22
  Z. M. Bi, Aki Mikkola, Raul Mula, Chaomin Luo

Optimization of Frequency Jittering Parameters for Conducted EMI Suppression in Switching Mode Power Supplies .................................................. 28
  Zhanghao Chen, Junning Zhang, Shuai Shao

Torque Distribution Control of Trains Equipped with Driven Independently Rotating Wheels for Guidance Control and Adhesion Control ................................................. 34
  Shuai Lin, Xiaochun Fang, Zhengwu Li, Fei Lin, Zhongping Yang

Accelerated Aging Test Method of Lithium-Ion Batteries Featured with Aging Feature Reconstruction .............. 40
  Yinyao Zhang, Lei Dong, Geng Yang, Jiao Jiao Li, Baoji Wang

Plasma Absorption Techniques in Direct Current Circuit Breakers ............................................................ 46
  Chamara Dassanayake, Nihal Kularatna, Alistair Steyn-Ross, Kosala Gunawardane, Nicoloy Gurusinghe

Two-Port Measurement of Packaging Parasitic Inductance in SiC Half-Bridge Power Modules Considering Mutual Inductance* .................................................. 52
  Chen Li, Jianzhong Wu, Ying Liu, Ingo Lüdtke, Wenlong Ming

A Novel Three-Port Converter for Wireless Power Transfer ........................................................................... 58
  Siyi Yao, Xinlin Wang, Zhongchang Li, Minfan Fu

Performance Assessment of Capacitive Power Transfer in Water with Varied Conductivity .......................... 64
  Zhichao Sun, Yijie Wang, Tao Li, Jianwei Mai, Ming Zeng, Dianguo Xu

A Multi-Layer Long Short-Term Memory Neural Network on Battery State-of-Health Estimation with Transfer Learning ........................................................................... 68
  Jilun Tian, Jiusi Zhang, Yuchen Jiang, Hao Luo, Congsheng Huang, Mo-Yuen Chow

SAGPCN: Self-Attention Graph Pooling Convolutional Network for Battery State of Health Estimation .......... 74
  Jiusi Zhang, Jilun Tian, Yuchen Jiang, Hao Luo, Cong-Sheng Huang, Mo-Yuen Chow, Shen Yin
Research on Optimal Scheduling Considering the Integration of Source-Network-Load-Storage Coordination in Extreme Conditions.................................................................................. 80
  Wudi Bao, Fei Wang, Yue Chen, Yidan Hu, Hangping Yang, Junfang Zhang

Analysis of Power Grid Operation Characteristics with Distributed Generation Access Based on Data Mining................................................................. 86
  Yue Chen, Xiang Ma, Yantao Li, Fei Wang, Yidan Hu, Wudi Bao, Jianfao Liu, Junfang Zhang

Study of a Aggregated Baseline Load Forecasting Method Based on Decoupling of Distributed PV-Containing Customers ................................................................. 92
  Yidan Hu, Yue Chen, Fei Wang, Hangping Yang, Wudi Bao, Junfang Zhang

An Improved Stacked Multicell Converter with Fault Tolerant Capability Using Finite-Control-Set Model Predictive Control ........................................................................... 98
  Zhige Yuan, Faramarz Faraji, Amer M. Y. M. Ghias, Honnyong Cha

Transmitting Coil Array Optimization for Wireless Power Transfer ................................ 104
  Kunxiao Zhou, Guangdong Ning, Minfan Fu

Evaluation Method of Residential Air Conditioning Load Time Series Adjustment Potential Based on Data Mining ................................................................. 109
  Fei Wang, Yiyan Chen, Jianfao Liu, Yue Chen, Wudi Bao, Hangping Yang, Wei Liu, Junfang Zhang

Supercapacitors with Polymer Electrolyte and Shochu Waste as Carbon Electrode .................. 115
  Daisuke Tashima, Tomi Ryu

Optimization of Differential Class E Inverter for Lower EMI .......................................................... 121
  Xiang Gaol, Yifan Jiang, Heyuan Li, Minfan Fu

Model Predictive Control of Five-Level Current Source Converter with Optimized Weighting Factors .................................................................................. 127
  Muyu Chen, Zhige Yuan, Faramarz Faraji, Amer M. Y. M. Ghias, Honnyong Cha, Van Chan Hua Nicholas

Deep Analysis and Comparison Study of Solid-State Circuit Breakers for DC Microgrid Protection ........ 133
  Jingjie Wang, Weidong Xiao, Xiaochao Li

Sustainable World with SCAP, DWPT and IWM: ~ Paradigm Shift to Motor / Capacitor / Wireless~ ........ 138
  Yoichi Hori

A Self-Powered Sensing System with Embedded TinyML for Anomaly Detection .................. 144
  Zijie Chen, Yiming Gao, Junrui Liang

An Energy Control Strategy in Hybrid Electric Ships Considering the Battery Life .................. 150
  Yucheng Yan, Diju Gao, Haoyang Jiang

Analysis and Design of Rectifier Impedance Characteristics of IPT System with S/SP Compensation Topology .................................................................................. 156
  Ao Yang, Yijie Wang, Jianwei Mai, Dianugo Xu

Graphene Composite for Supercapacitor and Battery Applications ........................................ 162
  Runsheng Gao, Jie Tang, Lu-Chang Qin

Overload Evaluation of MV Distribution Lines Based on Thermal Inertia Characteristics Under High Penetration of DERs ................................................................. 167
  Hideharu Sugihara
Explainable Transformer Model for Short-Term Wind Forecast ................................................................. 173
  Junyong You, Henning Heiberg-Andersen, Yngve Heggelund, Annette F. Stephansen, Jinhua Zhang

Construction and Application of Comprehensive Evaluation System for Layout Optimization of
Super High-Rise Buildings Under Health Orientation .................................................................................. 179
  Mengren Deng, Tianxiang Xia, Haoxu Guo

Effect of Rebar Array on IPT System for Structural Health Monitoring Sensor Supply ............................ 185
  Yuner Peng, Endian Ma, Qi Wang, Yang Chen, Ruikun Mai

Energy Trading Platform Research of Wire/wireless Vehicle-To-vehicle Energy Transfer
Technology .................................................................................................................................................. 190
  Xiaolin Mou, Heyan Li, Zhile Yang, Liqun Chen, Yu Liu, Jiezhong Luo, Franz Raps

Capacity Configuration Method of Urban Rail Energy Storage System Based on NSGA-II and
Simplified Energy Storage Model .................................................................................................................. 196
  Pang Tao, Zhao Ronghua, Jiang Luqing, Yang Zhongping, Lin Fei, Sun Kaiqi

Energy Management Strategy of Multiple Energy Storage Systems in Urban Railway Based on
Train Operating Status ................................................................................................................................. 202
  Kaiqi Sun, Zhongping Yang, Fei Lin, Jiayu Mi, Xing Ma, Ang Fu

Fuzzy Logic Control Strategy of Substation Voltage in Urban Rail Flexible Traction Power Supply
System ......................................................................................................................................................... 208
  Kuo Wang, Fei Lin, Zhongping Yang, Tingting Wang, Xiong Wei, Ping Fu

Real-Time Energy Storage System Control Strategies for Urban Rail Transit with Renewable
Energy .......................................................................................................................................................... 214
  Hongzhi Dong, Zhongbei Tian, David Fletcher, Nutthaka Chinomi, Joseph W. Spencer

A P-Value Approach for Real-Time Identifying the Capacity Regeneration Phenomenon of
Lithium-ion Batteries .................................................................................................................................... 220
  Jeff Dunn, Cong-Sheng Huang

A Fault Diagnosis Method for Multilevel Inverters Based on Parallel Computing Architecture .......... 226
  Yue Yu, Tianzhen Wang, Fan Zhang

Sliding Mode-Based Active Disturbance Rejection Control of Doubly Salient PM Generator-Based
Tidal Stream Turbine ................................................................................................................................... 232
  Hao Chen, Luming Liu, Tianzhen Wang

Adaptive Inertia Based on Secondary Control Strategy for VSGs with the SOC Constraint of
DC-Side Energy Storage ............................................................................................................................... 238
  Xiaofeng Ren, Wei Hao, Bo Liu, Yingle Fan, Kaiwen Yao

A Machine Learning Based Energy Management System for Renewable Energy Communities .......... 244
  Miguel Matos, João Almeida, Pedro Gonçalves, Fabiano Baldo, Fernando José Braz, Paulo
  Bartolomeu

Leveraging Deep Learning and Digital Twins to Improve Energy Performance of Buildings ..................... 250
  Zhongjun Ni, Chi Zhang, Magnus Karlsson, Shaofang Gong

Collaborative Control Strategy Design of Photovoltaic Energy Storage and DC Microgrid for
Electric Vehicles Using Wireless Power Transfer ......................................................................................... 256
  Huaguo Chen, Yuyu Geng, Qiping Shen, Jifeng Li, Qingyang Lu
