2023 2nd International Conference on Artificial Intelligence and Autonomous Robot Systems (AIARS)

AIARS 2023

Table of Contents

Message from the Program Chair ..... **xviii**

AIARS 2023

Research on Intelligent Processing Algorithm of Motion Capture Data Based on Deep Learning..... 1
Bihua Zhuo (Officers College of PAP Department of Information and Communication, China)

Research on Food System Based on EPSE Optimization Model 6
Xu Xu (Anhui University, China), Wei Wang (Anhui University, China), Jiahao Kang (Anhui University, China), Xiaohui Guo (Anhui University, China), Jinling Zhao (Anhui University, China), Linsheng Huang (Anhui University, China), and Lei Qu (Anhui University, China)

Optimization of Distribution Network Data Management Mode Based on BP Neural Network Algorithm and Atlas Technology 11
Cuiling Liu (State Grid Anhui Electric Power Co., Ltd. Information and Communication Branch, China), Jiakai Xiao (State Grid Anhui Electric Power Co., Ltd. Information and Communication Branch, China), Zhen Yao (State Grid Anhui Electric Power Co., Ltd. Information and Communication Branch, China), and Qinyi Lei (State Grid Anhui Electric Power Co., Ltd. Information and Communication Branch, China)

News Data Analysis System Based on UML and Computer Aided Technology 16
Tianyu Kang (Qilu University of Technology, China) and Tianchi Kang (Qingdao City University, China)

Simulation Research on Artificial Intelligence Design Decision Model Based on Deep Convolution Neural Network 21
Jiale Guo (China University of Geosciences, China) and Xiaodong Liu (Chengdu College of University of Electronic Science and Technology of China, China)

Research on the Intelligent Retrieval System of Massive Academic Literature Resources Based on the Ontology 26
Kong Degang (Library of Baotou Normal University, China)

Design of Brake Pump Information Management System Based on Feature Extraction Algorithm 29
Zhifu Pan (Lianyungang Urban Water Engineering Management office, China), Erjun Liu (Lianyungang Urban Water Engineering Management office, China), Zhongwei Xia (Tongyu River North-extended Water Supply Project Management Division of Lianyungang, China), and Junhua Yang (Donghai County Anfeng Mountain Reservoir Management Office, China)

The Evolution Study of Municipal Waste Classification Behavior Based on Multi-Agent Interaction 34
Feng Dai (Hubei Polytechnic University, China)

Simulation of Cloud Computing Network Security Intrusion Detection Model Based on Neural Network Algorithm Driven by Big Data 37
Yuanyuan Wang (Weifang Engineering Vocational College, China) and Shuai Zhang (Weifang Engineering Vocational College, China)

Smart Library Construction and Service Mode Driven by Big Data 41
Yanni Sheng (Sun Yat-sen University, China)

Research on Data Information Security Anti-Attack Technology to Improve ASON Network Architecture 46
Yingzhao Xie (Information &Telecommunication Branch of State Grid Chongqing Power Company, China), Cheng Dai (Information &Telecommunication Branch of State Grid Chongqing Power Company, China), Yuanbing Zheng (Information &Telecommunication Branch of State Grid Chongqing Power Company, China), and Jian Wang (Information &Telecommunication Branch of State Grid Chongqing Power Company, China)

Discussion on the Application of Artificial Intelligence in Computer Network Technology 51
Liu Zhixin (Harbin Medical University, China), Huang Yubo (Southwest Jiaotong University, China), Zhou Tianding (Huazhong Agricultural University, China), Wang Yueming (Jilin University, China), Yan Haoyuan (Civil Aviation University of China, China), Zhang Wei (Chongqing Three Gorges University, China), and Wang Yang (Huazhong Agricultural University, China)

Simulation of Blockchain Information Protection Prediction Model Based on Machine Learning..... 56
Chengchen Yang (Chengdu University of Technology, China), Pengfei Yuan (Chengdu University of Technology, China), and Zicheng Feng (Chengdu University of Technology, China)

Study on Water Resources Allocation Based on Multi-Objective Linear Programming and Grey Relational Analysis Model 61
Yitong Zhang (Lanzhou University, China), Boyan Li (Beijing University of Posts and Telecommunications, China), Haoning Shang (Beijing University of Posts and Telecommunications, China), and Haonan Zhao (Beijing University of Posts and Telecommunications, China)

Design of Power Transmission Line Condition Monitoring and Analysis System Based on Improved Particle Swarm Optimization 67
Shuai Yuan (State Grid Danyang County Electric Power Supply Company, China), Hanqing Wu (State Grid Zhenjiang Power Supply Company, China), Ziming An (State Grid Danyang County Electric Power Supply Company, China), Yang Chen (State Grid Danyang County Electric Power Supply Company, China), and An Sun (State Grid Danyang County Electric Power Supply Company, China)

Quantitative Analysis Based on Forest Value Maximization Decision Model 72
Shuhan Zhou (Beijing Language and Culture University, China), Yunshu Bai (Beijing Language and Culture University, China), and Yutong Wang (Beijing Language and Culture University, China)

Active Defense Model of Network Attack on Cloud Platform Based on K-Means Algorithm 77
Li Di (State Grid Henan Electric Power Company, China), Weijian Zhang (State Grid Henan Electric Power Company, China), Shuai Li (State Grid Henan Electric Power Company, China), Dingding Li (State Grid Henan Electric Power Company, China), and Lei Wang (State Grid Henan Electric Power Company, China)

Short-Term PM2.5 Concentration Prediction Based on CEEMD and LSTM Model 82
Haijie Hu (South-Central Minzu University, China), Yuanhao Ma (South-Central Minzu University, China), and Ziyu Zhou (Beijing University of Chemical Technology, China)

Research on Internet Security Assessment Function Based on Neural Network Algorithm 87
Zhibo Fu (Digital Grid Research Institute, China Southern Power Grid, China), Jiahao Liu (Digital Grid Research Institute, China Southern Power Grid, China), and Jian Gao (Digital Grid Research Institute, China Southern Power Grid, China)

Research of Data Mining C4.5 Algorithm in Construction Engineering Costing 92
Yujia Wang (Tianjin University of Technology, China)

Simulation Research on Network News Information Dissemination Model Based on Data Mining Algorithm 96
Lei Hu (Wuhan Donghu University, China)

Contact Force Model of Pantograph Catenary System with Improved Coupled Simulated Annealing Least Squares Support Vector Machine 101
Yuping Huang (Guangdong Communication Polytechnic, China), Ling Yin (Guangdong Communication Polytechnic, China), Chen Zhao (Guangdong Communication Polytechnic, China), and Wenjin He (Guangdong Communication Polytechnic, China)

Simulation of Logistics Route Optimization Model Based on Genetic Algorithm Optimization Neural Network 105
Hao Ma (Tianjin Transportation Technical College, China)

Research on Chinese Coal Forecast Analysis Based on RF-GINI Algorithm 110
Chenghao Fan (Jilin University, China), Xiteng Deng (Shandong University, China), and Yanghai Gu (Jiangsu University, China)

Simulation of Machine-Aided Translation Model Based on Artificial Neural Network Algorithm... 116
Caiyuan Sun (Shandong Agriculture and Engineering University, China)

Multi-Objective Scheduling of College Living Water Based on Improved Salp Swarm Algorithm ... 121
Peilong Guan (University of Technology, China)

Simulation Research on Optimal Location of Congested Nodes in Mobile Network Based on Improved ant Colony Algorithm 125
Cui Wang (Weifang Engineering Vocational Colllege, China), Lili Duan (Weifang Engineering Vocational Colllege, China), and Qing Yang (Weifang Engineering Vocational Colllege, China)

Research on One-Dimensional Wave Energy Output Power Based on Differential Control and Particle Swarm Optimization 130
Haotian Lv (Shanghai Jiaotong University, China), Yujie Mou (Shanghai Jiaotong University, China), Zhuohang Li (Shanghai Jiaotong University, China), and Sihang Zhao (Shanghai Jiaotong University, China)

Information Network Security Situation Prediction Method Based on Particle Swarm Optimization 135
Jian Wang (Digital Grid Research Institute, China Southern Power Grid, China), Zhibo Fu (Digital Grid Research Institute, China Southern Power Grid, China), and Ya'nan Wu (Digital Grid Research Institute, China Southern Power Grid, China)

Prediction of Compressive Strength of Recycled Concrete (RC) Based on BP and ELman Neural Networks 140
Mingqi Zhang (Shandong University of Science and Technology, China), Jiaxin Qu (Shandong University of Science and Technology, China), and Qingya Qiu (Shandong University of Science and Technology, China)

Design of Tourism Information Management System Based on Fuzzy Clustering Algorithm 145
Liling Wen (Nanning University, China)

Application of Machine Learning and Artificial Intelligence in Credit Risk Assessment 150
Yuxuan Wei (Tongji University, China)

Design of Adaptive Learning Quantitative Training Algorithm Based on Deep Neural Network Algorithm 157
Shu Xu (Guangzhou Huashang College, China), Chenxiao Li (Guangzhou Huashang College, China), Xinyue Cao (Guangzhou Huashang College, China), and Huilin Huang (Guangzhou Huashang College, China)

Research and Design of Traffic Information Processing Based on Hadoop Big Data Architecture 162
Ruiyuan Niu (Tianjin University of Technology, China)

Design and Optimization of AGV Scheduling Algorithm in Logistics System Based on Convolutional Neural Network 167
Liang Zhang (Taishan University, China), Xiukun Hu (Taishan University, China), and Tao Song (Taishan University, China)

Research on the Application of Artificial Intelligence in Computer Network Technology Based on the Era of Big Data 172
Xiangge Chen (Tianjin University of Technology, China)

Simulation of Task Scheduling Optimization Model for Internet of Things Based on Improved Genetic Algorithm 177
Weijian Zhang (State Grid Henan Electric Power Company, China), Li Di (State Grid Henan Electric Power Company, China), Lijing Yan (State Grid Henan Electric Power Company, China), Han Liu (State Grid Henan Electric Power Company, China), and Yifan Song (State Grid Henan Electric Power Company, China)

Application of Artificial Intelligence in Computer Network Technology 182
Xiaohua Ma (Tianjin University of Technology, China)

Design of Emergency Material Scheduling Algorithm Based on Stochastic Woods Algorithm 187
Tao Zhou (Pass College of Chongqing Technology and Business University, China)

Research on the Application of Big Data Technology in Smart City Construction and Development 191
Guang Yang (Tianjin University of Technology, China), Hongxiong Yang (Tianjin University of Technology, China), and Liping Chen (Tianjin University of Technology, China)

Optimal Design of UUV Autonomous Navigation and Positioning Algorithm Based on TDOA Positioning Model 196
Kaixuan Cong (Harbin Engineering University, China), Genjia Xu (Harbin Engineering University, China), and Lezhong Wang (Harbin Engineering University, China)

Research on the Credibility of Supply Chain Big Data Based on Blockchain 201
Jiagui Xie (Industrial Internet and IOT Research Institute, China Academy of Information and Communications Technology, China), Jian Guo (Industrial Internet and IOT Research Institute, China Academy of Information and Communications Technology, China), Jin Li (Industrial Internet and IOT Research Institute, China Academy of Information and Communications Technology, China), Bo Zhang (Industrial Internet and IOT Research Institute, China Academy of Information and Communications Technology, China), and Fanjie Nie (Industrial Internet and IOT Research Institute, China Academy of Information and Communications Technology, China)

Analysis of Intelligent User Chat Interaction Behavior Based on Hadoop and Clustering Algorithm 205
Wendong He (Southern Power Grid Digital Grid Group Co., Ltd, China) and Zitong Xu (Southern Power Grid Digital Grid Group Co., Ltd, China)

Research on Software Development Based on Low-Code Technology 210
Cui Chuanjian (State Grid Info-Telecom Great Power Science and Technology Co., Ltd., China), Gao Shuze (State Grid Info-Telecom Great Power Science and Technology Co., Ltd., China), and Wei Hua (State Grid Info-Telecom Great Power Science and Technology Co., Ltd., China)

Design of Decision Model of Intelligent Distribution System of Telecom Logistics Based on Neural Network Optimization Genetic Algorithm 214
Long Ma (Telecom Fufu Information Technology Co., China), Zhifang Ou (Telecom Fufu Information Technology Co., China), Yunfu Zhang (Telecom Fufu Information Technology Co., China), Jia Luo (Telecom Fufu Information Technology Co., China), and Rong Tian (Telecom Fufu Information Technology Co., China)

Review on Traffic Flow Prediction Method Based on Neural Network 219
Xuzhi Zhang (Zhejiang University of Technology, China)

Design of Network Information Security Optimal Defense System Based on SM2 Algorithm and Blockchain Technology 223
Ripeng Ren (Qingdao Institute of Technology, China), Mingrui Ma (Qingdao Institute of Technology, China), and Wei Liu (Qingdao Institute of Technology, China)

Research on Wireless Communication Network Security Risk Prediction Based on Computer Technology 228
Jiayi Zhang (Tianjin University of Technology, China)

Simulation of Econometric Dynamic Simulation And Prediction Model Based on Particle Swarm Optimization Neural Network Algorithm 233
Xueqing Wang (Nanjing University of Finance & Economics Hongshan College, China)

Research on Digital Agile Information System Based on Microservice Architecture 238
Zhang Xiuli (Beijing Guodiantong Network Technology Co. LTD, China), Feng Dong (Beijing Guodiantong Network Technology Co. LTD, China), Wang Chengzhang (Beijing Guodiantong Network Technology Co. LTD, China), and Wang Zhanwei (Beijing Guodiantong Network Technology Co. LTD, China)

Design of Knowledge Map Representation Learning Algorithm Based on Artificial Neural Network 243
Min Yu (University of Chinese Academy of Sciences, China)

Research on Threat Identification and Protection Methods for Information Security of Intelligent Connected Vehicles 248
Yue Qin (CATARC (Tianjin) Automotive Engineering Research Institute, China), Hongpeng Li (CATARC (Tianjin) Automotive Engineering Research Institute, China), and Hui Rong (China Automotive Technology and Research Center Co., Ltd, China)

Design of AIS Data Processing System Based on Improved Ant Colony Algorithm 252
Pengyang Zhang (Wuhan University of Technology, China)

A Novel Personalized Business Recommendation Analysis Method Based on Big Data Intelligence 257
Shuqi Zhao (Capital University of Economics and Business, China)

Research on Application of Bird Target Extraction Algorithm Based on Grey Clustering in Laser Bird Repetition of Distribution Lines 264
Yanbiao Wang (State Grid Lanzhou Power Supply Company, China), Ziqiang Guo (State Grid Lanzhou Power Supply Company, China), Chengjia Bao (State Grid Gansu Electric Power Company, China), Meng Li (State Grid Lanzhou Power Supply Company, China), and Junwu Ma (State Grid Lanzhou Power Supply Company, China)

An Optimization Model of an Intelligent Monitoring Network Security System 269
Yuanyuan Liu (University for Science & Technology Sichuan, China) and Jingtao Lan (Southwestern Institute of Physics, China)

Design and Implementation of Intelligent Sampling Inspection System for Production Equipment Based on Collaborative Filtering Algorithm 273
Ming Su (State Grid Hebei Electric Power Co., Ltd. Materials Branch, China), Feng Hao (State Grid Hebei Electric Power Co., Ltd. Materials Branch, China), Dongliang Wang (Guodian Nanrui Nanjing Control System Co., Ltd, China), Zihan Li (State Grid Hebei Electric Power Co., Ltd. Materials Branch, China), Yuqi Zhao (State Grid Hebei Electric Power Co., Ltd. Materials Branch, China), and Jun Zhang (Guodian Nanrui Nanjing Control System Co., Ltd, China)

Forecast and Analysis of Cargo Flow of Airport Comprehensive Transportation Hub Using Machine Learning Method 278
Fei Peng (Beijing Polytechnic, China), Puxin Wang (Beijing Polytechnic, China), Siying Dong (Beijing Polytechnic, China), and Zixuan Zhang (Capital Medical University, China)

Research on Heat Dissipation Technology of High Voltage Switchgear Based on RBF 282
Bing Han (State Grid Liaoning Electric Power Co., Ltd, Shenyang Power Supply Company, China), Yang Zheng (State Grid Liaoning Electric Power Co., Ltd, Shenyang Power Supply Company, China), Su Hong (State Grid Liaoning Electric Power Co., Ltd, Shenyang Power Supply Company, China), Yanchao Jia (Shenyang Huade Haitai Electric Appliance Co., Ltd, China), Dianfei Liu (Shenyang Huade Haitai Electric Appliance Co., Ltd, China), and Qiang Cai (Shenyang Huade Haitai Electric Appliance Co., Ltd, China)

Prediction of Air Quality Based on Artificial Intelligence Regression Model 288
Zixin An (Sierra Canyon High School, USA), Haokai Gui (HD Ningbo School, China), Yuqi Song (Poly Prep Country Day School, USA), and Jiaqi Liu (Hong Kong International School, China)

Modeling and Control Research of High Temperature Fuel Cell Based on Fuzzy Clustering Algorithm 293
Yan Yao (Ningbo Electric Power Design Institute Co, Ltd., China), Jianyue Shen (Shanghai Palcan New Energy Technology Co., Ltd, China), Yanbo Huang (State Grid (Ningbo) Integrated Energy Service Co., Ltd, China), Jinsong Yang (Yongyao Technology Branch of Ningbo Power Transmission and Transformation Construction Co., Ltd, China), and Lei Wang (Suzhou QingJie Technology Co., Ltd, China)

Application of Computer Artificial Intelligence Technology in Slope Stability Analysis and Slope Numerical Simulation 298
Qin Fengyan (West Anhui University, China), Zhang Guangsheng (West Anhui University, China), and Yang Fulian (West Anhui University, China)

Research on Optimization of Library Book Network Management Platform Based on Improved Genetic Algorithm 303
Xia Yang (Library of Yunnan Normal University, China)

Application of Big Data Fusion Model in the Architecture Design of Smart Departure Service Platform 308
Li Dong (State Grid Zhejiang Electric Power Co., Ltd., China), Xiao Huang (State Grid Zhejiang Electric Power Co., Ltd., China), Yi Zhuang (State Grid Zhejiang Electric Power Co., Ltd., China), Gang Yu (State Grid Zhejiang Electric Power Co., Ltd., China), and Guowei Cai (Zhejiang Huayun Information Technology Co., Ltd., China)

Remote Oral Implant Teaching System Based on VR Virtual Simulation Technology 314
Jianan Wu (Hubei College of Chinese Traditional Medicine, China)

A Prediction Model Combining Convolutional Neural Network and LSTM Neural Network 318
Ao Liu (China Three Gorges University, China), Jing Li (Tianjin University of Technology, China), and Han Ye (China Three Gorges University, China)

Research on Distributed Control of Energy Storage Based on Big Data Algorithm 322
Guanghua Lu (State Grid Information & Telecommunication Co., Ltd., China), Zenghai Wang (State Grid Information & Telecommunication Co., Ltd., China), Yingxue Sun (State Grid Information & Telecommunication Co., Ltd., China), Lijun Ma (State Grid Information & Telecommunication Co., Ltd., China), and Jie Yang (State Grid Information & Telecommunication Co., Ltd., China)

Implementation of Smart Pet Wearable Device Based on ARM and Big Data Analysis Technology . 327
Xinyue Feng (Foshan Polytechnic, China), Tianquan Wen (Foshan Polytechnic, China), and Jialu Yao (Foshan Polytechnic, China)

Research on WSN Malicious Node Removal Algorithm Based on Secure Data Fusion 333
Bo Liu (State Grid Henan Electric Power Company, China), Lijing Yan (State Grid Henan Electric Power Company Information and Communication Branch (Data Center), China), Shuai Li (State Grid Henan Electric Power Company Information and Communication Branch (Data Center), China), Han Liu (State Grid Henan Electric Power Company Information and Communication Branch (Data Center), China), and Hao Wang (State Grid Henan Electric Power Company Information and Communication Branch (Data Center), China)

Application of Genetic Algorithm in Transmission Mechanism of Special Intelligent Safety Climbing Aids for Tower Crane 338
Junming Huang (Guangxi Vocational College of Water Resources and Electric Power, China), Shufang Huang (Guangxi Vocational College of Water Resources and Electric Power, China), and Xuechang Xie (Guangxi Construction Engineering Group Construction Machinery Manufacturing Co., Ltd, China)

Design of Robot Path Planning Control Algorithm Based on Wavelet Neural Network 344
Fanju Zeng (Harbin Huade University, China), Juan Ding (Harbin Huade University, China), Yuejuan Huang (Harbin Huade University, China), Chunyan Huo (Harbin Huade University, China), and Tianshu Li (Harbin Huade University, China)

Neural Network Method for Solving Partial Differential Equation 348
Yaping Zhang (Shanghai Maritime University, China)

Design of Remote Control Algorithm for Robot Arm Based on RBF Neural Network 354
Juan Ding (Harbin Huade University, China), Yuejuan Huang (Harbin Huade University, China), Chunyan Huo (Harbin Huade University, China), Tianshu Li (Harbin Huade University, China), and Fanju Zeng (Harbin Huade University, China)

An Evolutionary Algorithm-Based Method for Estimating the Expected Construction Volume of Building Works 359
Ning Wu (China Construction Third Engineering Group Co., Ltd, China; The Third Construction Engineering Co., Ltd. of China Construction Third Engineering Bureau, China), Weixiang Ding (China Construction Third Engineering Group Co., Ltd, China; The Third Construction Engineering Co., Ltd. of China Construction Third Engineering Bureau, China), Jun Le (China Construction Third Engineering Group Co., Ltd, China), Lijun Yuan (The Third Construction Engineering Co., Ltd. of China Construction Third Engineering Bureau, China; The Third Construction Development (Guangdong) Co., Ltd. of China Construction Third Engineering Bureau, China), Yewen Wu (China Construction Third Engineering Group Co., Ltd, China; The Third Construction Engineering Co., Ltd. of China Construction Third Engineering Bureau, China), Guanghui Wang (The Third Construction Engineering Co., Ltd. of China Construction Third Engineering Bureau, China), and Chongxiao Wang (The Third Construction Engineering Co., Ltd. of China Construction Third Engineering Bureau, China; The Third Construction Development (Guangdong) Co., Ltd. of China Construction Third Engineering Bureau, China)

Research on Optimization of Computer Network Routing Based on Ant Colony Algorithm 365
Haiming Du (Weifang Engineering Vocational College, China), Zhendong Zhu (Weifang Engineering Vocational College, China), and Shuo Gu (Qingzhou Yunmen Mountain Road Muslim Primary School, China)

A Probabilistic Prediction Method of Carbon Financial Default Risk Based on Python and Machine Learning 369
Guibin Ju (State Grid Baicheng Power Supply Company, China), Zheyong Piao (State Grid Baicheng Power Supply Company, China), Xiaolin Wang (State Grid Baishan Power Supply Company, China), Yongli Si (State Grid Baicheng Power Supply Company, China), Jinchang Zhang (Trading center of State Grid Jilin Electric Power Co., LTD, China), Tianhao Guo (State Grid Baicheng Power Supply Company, China), Mengnan Wang (State Grid Baicheng Power Supply Company, China), Xin Pan (Northeast Electric Power University, China), Jing Yan (Northeast Electric Power University, China), Xin Wang (Northeast Electric Power University, China), Jieping Han (Northeast Electric Power University, China), and Xiaolong Yang (Northeast Electric Power University, China)

Design of Intelligent Control System for Cantilever Roadheader Based on BP Neural Network Algorithm 375
Yuejuan Huang (Harbin Huade University, China), Chunyan Huo (Harbin Huade University, China), Tianshu Li (Harbin Huade University, China), Fanju Zeng (Harbin Huade University, China), and Juan Ding (Harbin Huade University, China)

Design and Application Analysis of Communication Power Supply Monitoring System Based on Improved PID Algorithm 380
Yonghong Zhan (State Grid Anqing Power Supply Company, China), Yaping Cheng (State Grid Anqing Power Supply Company, China), and Xia Xu (State Grid Anqing Power Supply Company, China)

Design of Manipulator Trajectory Tracking Control System Based on Artificial Intelligence Algorithm 385
Chunyan Huo (Harbin Huade University, China), Fanju Zeng (Harbin Huade University, China), Juan Ding (Harbin Huade University, China), Yuejuan Huang (Harbin Huade University, China), and Tianshu Li (Harbin Huade University, China)

Application of Probabilistic Damage Based Algorithm in Nondestructive Testing of Special Equipment 390
Xiaolong Zhang (Ningbo Labor Safety and Technology Services Co., Ltd., China), Zijian Zhang (Ningbo Labor Safety and Technology Services Co., Ltd., China), Jianping Lu (Ningbo Labor Safety and Technology Services Co., Ltd., China), Xiaodong Dong (Ningbo Labor Safety and Technology Services Co., Ltd., China), Junhui Chai (Ningbo Labor Safety and Technology Services Co., Ltd., China), and Bo Xu (Ningbo Special Equipment Inspection and Research Institute, China)

Construction of Urban Rail Transit Dispatching System Based on Shortest Path Algorithm 395
Xiaowei Jia (Shandong Vocational College of Information Technology, China) and Qian Li (Shandong Vocational College of Information Technology, China)

Research on Applications of Digital Virtual Technology in Environment Design 400
Haiyong Shen (Shenyang Jianzhu University, China) and Jiale Lang (Shenyang Jianzhu University, China)

Design of PID Control Algorithm for Mechanical Arm Based on BP Neural Network Model 406
Tianshu Li (Harbin Huade University, China), Chunyan Huo (Harbin Huade University, China), Fanju Zeng (Harbin Huade University, China), Juan Ding (Harbin Huade University, China), and Yuejuan Huang (Harbin Huade University, China)

Research on Design Methods of Light Environment in Housing Based on Virtual Reality Technology 410
Tao Yang (Shenyang Jianzhu University, China) and Wanting Wang (Shenyang Jianzhu University, China)

Optimization Design of Hydraulic Press Servo Control Algorithm Based on Fuzzy PID 416
Hongmei Liu (Anhui Sanlian University, China)

Agricultural Product Quality and Safety Traceability System Based on Blockchain Technology..... 421
Zongchao Cai (Guangzhou Nanyang Polytechnic College, China)

Simulation of Computer Network Information Security Assessment Model Based on Data Mining 427
Yanjia Liu (Institute of Computing technology Chinese academy of sciences, China), Xi Yong (Ministry of Water Resources, China), Baojian Hua (University of Science and Technology of China, China), and Jianhua Yang (Beijing Sinohonour Computing Technology, China)

Functional Noun Phrase Recognition in English Machine Translation Based on Machine Learning 431
Ni Shi (Shaanxi Fashion Engineering University, China)

Multi-key Homomorphic Encryption Algorithm Based on Fuzzy Clustering 436
Wenmin Wang (China Mobile Online Service Co., Ltd., China), Peng Li (Songshan Laboratory, China), Chunya Li (China Mobile Group Design Institute Co., Ltd, China), and Shenghui Li (China Mobile Online Service Co., Ltd., China)

Scheme Design of Dredging Ship Management Information Construction Based on Spring MVC Framework 441
Yu Wang (Dalian University of Science and Technology, China), Jingjing Jiang (Dalian University of Science and Technology, China), and Xiaoyong Zhao (Dalian Junfun Technology Co., LTD., China)

Research on Remote Computer Fault Detection Based on Big Data Algorithm Model 447
Yishan Xia (Southwest University, China)

Research of Gearbox Failure Diagnosis Based On Nerve Network 452
Guoming Li (Weifang Engineering Vocational College, China), Dong Cui (Weifang Engineering Vocational College, China), Jun Li (Weifang Engineering Vocational College, China), Zhiyin Han (Weifang Engineering Vocational College, China), Qinglei Jiang (Weifang Engineering Vocational College, China), and Wenqiang Wang (Weifang Engineering Vocational College, China)

Distributed Optical Fiber Intrusion Identification Algorithm Based on Deep Learning 458
Nachuan Yang (PLA Strategic Support Force Information Engineering University, China) and Yongjun Zhao (PLA Strategic Support Force Information Engineering University, China)

Intelligent Recommendation Method for Product Information of E-Commerce Platform Based on Machine Learning Algorithm 463
Qiyu Chen (Guangdong Xin'an Vocational Technical College, China)

Research and Development of Product Design Software Based on Improved Genetic Algorithm and CAE Simulation Software 469
Chuncheng Yu (Hubei University of Technology School of Art and Design, China) and Zhilai Song (Hubei University of Technology School of Art and Design, China)

Simulation Model of Temperature Multi Field Coupling in Electrochemical Machining Using Computer VR Technology 475
Jianmei Zhang (Siyuan Experimental School, Huanxian County, China), Xing Wei (Operation Office of Production Capacity Construction Project team of No. 10 Oil Production Plant Changqing Oilfield Company, China), Jianxiao Bian (Longdong University, China), and Xiaonan Pan (Longdong University, China)

Simulation of Intelligent Control Model of Electric Power System Based on Improved Genetic Algorithm 481
Tianyi Zhao (Northeast Forestry University, China), Lezhi Huang (Northeast Forestry University, China), Minyi Lin (Northeast Forestry University, China), Runbo Tian (Northeast Forestry University, China), and Erya Fu (Northeast Forestry University, China)

Construction of Digital Multimedia Visualization Model Based on Artificial Intelligence Technology 486
Lingyan Zhou (Mianyang Teachers College, China)

Trainable English Speech Synthesis Algorithm Based on Artificial Neural Network 492
Yinan Zeng (Jilin International Studies University, China) and Yanyan Sun (UCSI, Malaysia)

Human Motion Abnormal Posture Monitoring Method Based on Intelligent Bracelet 497
Yizhong He (Nanchang Institute of Technology, China)

Security Encryption Algorithm of Computer Terminal Information Based on Blockchain 502
Min Cai (Guangzhou College of Technology and Business, China)

Research on Tackle Recognition of Football Players Based on Deep Reinforcement Learning 507
Xiaodong Pang (Tianjin University of Technology and Education, China)

Design of Remote Inspection System for High-Level Canal of Hydropower Station Based on Cluster Centralized Control of Quadrotor UAV 512
Xin Wan (Guoneng Daduhe Big Data Service Co., Ltd, China) and Min Liu (Guoneng Daduhe Big Data Service Co., Ltd, China)

Research on Computer Image Intelligent Recognition Algorithm Based on Deep Learning 517
Zhong Yang (Zibo Vocational Institute, China)

Analysis of Data Encryption Algorithm for Computer Network Communication Security Based on Support Vector Machine 522
Hui Yan (Teaching Affairs Office Shandong Women's University, China) and Lihua Sun (Publicity Department Shandong Women's University, China)

Construction and Optimization of Bilingual Translation Corpus Based on GLR Algorithm 526
Xia Yu (Chengdu College of Arts and Sciences, China)

Intelligent Internal Audit Platform Architecture Based on Machine Learning 531
Ling Zhang (Chengdu College of University of Electronic Science and Technology of China, China)

Simulation of Robot Automatic Control Model Based on Artificial Intelligence Algorithm 535
Zheng Lin (Hunan University, China) and Feng Xu (Huazhong University of Science and Technology, China)

Urban Planning Management Information Integration Platform System Based on Big Data Analysis 540
Haonan Mao (Shanghai University, China)

Research on Conversion Between Analog Signal and Digital Signal of Single Chip Microcomputer Based on Improved Genetic Algorithm 545
Wenbing Wu (Weifang Engineering Vocational College, China) and Hongjie Ji (Weifang Engineering Vocational College, China)

Construction of Intelligent Transportation Information Management System Based on Artificial Intelligence Technology 550
Jiawei Li (Monash University, Malaysia), Dong Xie (Monash University, Malaysia), Qiyi Zhu (Institute of Intelligent Transportation Engineering, Guangxi Transportation Science and Technology Group CO., LTD., China), and Zhishang Wu (Monash University, Malaysia)

Research on Electromagnetic Wave Propagation Characteristics in GIS Based on UHF Method 555
Mo Chen (High Voltage Research Department China Electric Power Research Institute, China), Jiangang Bi (High Voltage Research Department China Electric Power Research Institute, China), Wentong Shang (High Voltage Research Department China Electric Power Research Institute, China), Yang Yang (High Voltage Research Department China Electric Power Research Institute, China), Ning Yang (High Voltage Research Department China Electric Power Research Institute, China), and Lihua Li (High Voltage Research Department China Electric Power Research Institute, China)

Fuzzy Control Algorithm of Intelligent Cantilever Based on Neural Network 561
Xin Li (Harbin Huade University, China), Juan Ding (Harbin Huade University, China), Yuding Liu (Harbin Huade University, China), Fanju Zeng (Harbin Huade University, China), and Yuejuan Huang (Harbin Huade University, China)

Research on Hydraulic ABS Control Algorithm Based on Support Vector Machine Model 566
Fengjuan Wang (Automotive Institute Sanmenxia Polytechnic, China)

Author Index **571**
