Table of Contents

| | |
|--|--------|
| Message from the General Chair | xvii |
| Message from the Program Co-Chairs | xix |
| Organizing Committee | xxi |
| Program Committee | xxiii |
| Steering Committee | xxvi |
| Reviewers | xxvii |
| Sponsors and Supporters | xxxiii |

Research Track Sessions

Best Research Paper Candidates

| | |
|---|----|
| On the Vulnerabilities of Text-to-SQL Models | 1 |
| <i>Xutan Peng (The University of Sheffield, UK), Yipeng Zhang (North China University of Technology, China), Jingfeng Yang (Amazon, USA), and Mark Stevenson (The University of Sheffield, UK)</i> | |
| AutoKAD: Empowering KPI Anomaly Detection with Label-Free Deployment | 13 |
| <i>Zhaoyang Yu (Tsinghua University; Beijing National Research Center for Information Science and Technology), Changhua Pei (Computer Network Information Center, Chinese Academy of Sciences), Shenglin Zhang (Nankai University; Haihe Laboratory of Information Technology Application Innovation), Wen Xidao (BizSeer Technology, China), Jianhui Li (Computer Network Information Center, Chinese Academy of Sciences), Gaogang Xie (Computer Network Information Center, Chinese Academy of Sciences), and Dan Pei (Tsinghua University; Beijing National Research Center for Information Science and Technology)</i> | |
| Mind Your Enclave Pointers! Detecting Privacy Leaks for SGX Apps via Sparse Taint Analysis..... | 24 |
| <i>Yang Chen (Fudan University; Ant Group), Jianfeng Jiang (Ant Group), Shoumeng Yan (Ant Group), and Hui Xu (Fudan University)</i> | |

Research Session 1: Anomaly Detection I

| | |
|---|----|
| Practical Anomaly Detection over Multivariate Monitoring Metrics for Online Services | 36 |
| <i>Jinyang Liu (The Chinese University of Hong Kong, China), Tianyi Yang (The Chinese University of Hong Kong, China), Zhuangbin Chen (Sun Yat-sen University, China), Yuxin Su (Sun Yat-sen University, China), Cong Feng (Computing and Networking Innovation Lab, Huawei Cloud Computing Technology Co., Ltd, China), Zengyin Yang (Computing and Networking Innovation Lab, Huawei Cloud Computing Technology Co., Ltd, China), and Michael R. Lyu (The Chinese University of Hong Kong, China)</i> | |
| AFALog: A General Augmentation Framework for Log-Based Anomaly Detection with Active Learning | 46 |
| <i>Chiming Duan (Peking University, China), Tong Jia (Peking University, China), Huaqian Cai (Peking University, China), Ying Li (Peking University, China), and Gang Huang (Peking University, China)</i> | |
| An Empirical Analysis of Anomaly Detection Methods for Multivariate Time Series | 57 |
| <i>Dongwen Li (Nankai University), Shenglin Zhang (Nankai University; Haihe Laboratory of Information Technology Application Innovation), Yongqian Sun (Nankai University), Yang Guo (Nankai University), Zeyu Che (Nankai University), Shiqi Chen (Nankai University), Zhenyu Zhong (Nankai University), Minghan Liang (Nankai University), Minyi Shao (Nankai University), Mingjie Li (Nankai University), Shuyang Liu (Nankai University), Yuzhi Zhang (Nankai University; Haihe Laboratory of Information Technology Application Innovation), and Dan Pei (Tsinghua University)</i> | |
| Efficient and Robust Trace Anomaly Detection for Large-Scale Microservice Systems | 69 |
| <i>Shenglin Zhang (Nankai University; Haihe Laboratory of Information Technology Application Innovation), Zhongjie Pan (Nankai University), Heng Liu (Nankai University), Pengxiang Jin (Nankai University), Yongqian Sun (Nankai University), Qianyu Ouyang (Tsinghua University), Jiaju Wang (Nankai University), Xueying Jia (Nankai University), Yuzhi Zhang (Nankai University), Hui Yang (Accumulus Technologies (Tianjin) Co., Ltd), Yongqiang Zou (Accumulus Technologies (Tianjin) Co., Ltd), and Dan Pei (Tsinghua University)</i> | |

Research Session 2: Software Testing I

| | |
|--|----|
| A Survey on What Developers Think About Testing | 80 |
| <i>Philipp Straubinger (University of Passau, Germany) and Gordon Fraser (University of Passau, Germany)</i> | |
| Towards the Implementation of a Mobile Application Testing Infrastructure at Von Braun Labs | 91 |
| <i>Pedro Henrique Kuroishi (Federal University of São Carlos, Brazil), José Carlos Maldonado (University of São Paulo, Brazil), and Auri Marcelo Rizzo Vincenzi (Federal University of São Carlos, Brazil)</i> | |

| | |
|---|-----|
| Mind the Gap: The Difference Between Coverage and Mutation Score Can Guide Testing Efforts... | 102 |
| <i>Kush Jain (Carnegie Mellon University, Pennsylvania), Goutamkumar Tulajappa Kalburgi (Northern Arizona University, Arizona), Claire Le Goues (Carnegie Mellon University, Pennsylvania), and Alex Groce (Northern Arizona University, Arizona)</i> | |
| Do Mutations of Strongly Subsuming Second-Order Mutants Really Mask Each Other? | 114 |
| <i>João Paulo Diniz (Federal University of Minas Gerais, Brazil), Fischer Ferreira (Federal University of Ceará, Brazil), Fabiano Ferrari (Federal University of São Carlos, Brazil), and Eduardo Figueiredo (Federal University of Minas Gerais, Brazil)</i> | |

Research Session 3: Security

| | |
|---|-----|
| Intrusion Detection Without Attack Knowledge: Generating Out-of-Distribution Tabular Data | 125 |
| <i>Andrea Ceccarelli (University of Florence, Italy) and Tommaso Zoppi (University of Florence, Italy)</i> | |
| An Approach to Characterize the Security of Open-Source Functions Using LSP | 137 |
| <i>José D'Abruzzo Pereira (University of Coimbra, Portugal) and Marco Vieira (University of Coimbra, Portugal)</i> | |
| SAPPX: Securing COTS Binaries with Automatic Program Partitioning for Intel SGX | 148 |
| <i>Jiawei Huang (College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics, China), Hao Han (College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics, China), Fengyuan Xu (State Key Laboratory of Novel Software Technology, Nanjing University, China), and Bing Chen (College of Computer Science and Technology, Nanjing University of Aeronautics and Astronautics, China)</i> | |
| Lark: Verified Cross-Domain Access Control for Trusted Execution Environments | 160 |
| <i>Fanlang Zeng (Zhejiang University, China), Zhuoruo Zhang (Zhejiang University, China), Rui Chang (Zhejiang University, China), Chenyang Yu (Zhejiang University, China), Zijun Zhang (Zhejiang University, China), and Yongwang Zhao (Zhejiang University, China)</i> | |

Research Session 4: Anomaly Detection II

| | |
|---|-----|
| DeepUserLog: Deep Anomaly Detection on User Log Using Semantic Analysis and Key-Value Data.... | 172 |
| <i>Wenjing Wang (Fudan University, China), Shida Lu (State Grid Shanghai Information & Telecommunication Company, China), Jianhui Luo (Fudan University, China), and Chengrong Wu (Fudan University, China)</i> | |

| | |
|---|-----|
| fkPISelect: Fault-Injection Based Automated KPI Selection for Practical Multivariate Anomaly Detection | 183 |
| <i>Xingjian Zhang (Tsinghua University; China Telecom Cloud Technology Co., Ltd.), Yinqin Zhao (Tsinghua University; China Telecom Cloud Technology Co., Ltd.), Chang Liu (Tsinghua University), Long Wang (Tsinghua University; Zhongguancun Laboratory), Xin Yang (China Telecom Cloud Technology Co., Ltd.), Yefei Hou (China Telecom Cloud Technology Co., Ltd.), Zhongwen Lan (China Telecom Cloud Technology Co., Ltd.), Xining Hu (China Telecom Cloud Technology Co., Ltd.), Beibei Miao (China Telecom Cloud Technology Co., Ltd.), Ming Yang (China Telecom Cloud Technology Co., Ltd.), Xiangyi Jing (China Telecom Cloud Technology Co., Ltd.), and Sijie Li (China Telecom Cloud Technology Co., Ltd.)</i> | |
| LogRep: Log-Based Anomaly Detection by Representing Both Semantic and Numeric Information in Raw Messages | 195 |
| <i>Xiaoda Xie (National University of Defence Technology, China), Songlei Jian (National University of Defence Technology, China), Chenlin Huang (National University of Defence Technology, China), Fengyuan Yu (National University of Defence Technology, China), and Yunjia Deng (China United Network Communications Co., Ltd. Hunan Branch, China)</i> | |
| Parameter-Efficient Log Anomaly Detection Based on Pre-Training Model and LORA | 207 |
| <i>Shiming He (Changsha University of Science and Technology, China), Ying Lei (Changsha University of Science and Technology, China), Ying Zhang (Changsha University of Science and Technology, China), Kun Xie (Hunan University, China), and Pradip Kumar Sharma (University of Aberdeen, UK)</i> | |

Research Session 5: Software Testing II

| | |
|---|-----|
| Crucible: Graphical Test Cases for Alloy Models | 218 |
| <i>Adam G. Emerson (University of Texas at Arlington, USA) and Allison Sullivan (University of Texas at Arlington, USA)</i> | |
| Search-Based Test Case Selection for PLC Systems Using Functional Block Diagram Programs | 228 |
| <i>Miriam Ugarte Querejeta (Mondragon Unibertsitatea, Spain), Eunkyoung Jee (KAIST, South Korea), Lingjun Liu (KAIST, South Korea), Pablo Valle (Mondragon Unibertsitatea, Spain), Aitor Arrieta (Mondragon Unibertsitatea, Spain), and Miren Illarramendi Rezabal (Mondragon Unibertsitatea, Spain)</i> | |
| Can Code Representation Boost IR-Based Test Case Prioritization? | 240 |
| <i>Lin Yang (Tianjin University, China), Junjie Chen (Tianjin University, China), Hanmo You (Tianjin University, China), Jiachen Han (Tianjin University, China), Jiajun Jiang (Tianjin University, China), Zhe Sun (Tianjin University, China), Xinqi Lin (Tianjin University, China), Fang Liang (Tianjin University, China), and Yuning Kang (Tianjin University, China)</i> | |

| | |
|--|-----|
| Contrastive Coincidental Correctness Representation Learning | 252 |
| <i>Maojin Li (Chongqing University, China), Yan Lei (Chongqing University, China; Peng Cheng Laboratory, China), Huan Xie (Chongqing University, China), Jiaguo Wang (Chongqing University, China), Chunyan Liu (Chongqing University, China), and Zhengxiong Deng (Chongqing University, China)</i> | |

Research Session 6: Software Engineering for Reliability

| | |
|--|-----|
| How to Manage Change-Induced Incidents? Lessons from the Study of Incident Life Cycle | 264 |
| <i>Yujin Zhao (Peking University, China), Ling Jiang (Alibaba Group, China), Ye Tao (Peking University, China), Songlin Zhang (Alibaba Group, China), Changlong Wu (Alibaba Group, China), Yifan Wu (Peking University, China), Tong Jia (Peking University, China), Ying Li (Peking University, China), and Zhonghai Wu (Peking University, China)</i> | |
| A Two-Stage Framework for Ambiguous Classification in Software Engineering | 275 |
| <i>Jiaying Li (National University of Defense Technology, China), Yan Lei (Chongqing University, China), Shanshan Li (National University of Defense Technology, China), Haifang Zhou (National University of Defense Technology, China), Yue Yu (National University of Defense Technology, China), Zhouyang Jia (National University of Defense Technology, China), Yingwei Ma (National University of Defense Technology, China), and Teng Wang (National University of Defense Technology, China)</i> | |
| Identifying Root-Cause Changes for User-Reported Incidents in Online Service Systems | 287 |
| <i>Yujin Zhao (Peking University, China), Ling Jiang (Alibaba Group, China), Ye Tao (Peking University, China), Songlin Zhang (Alibaba Group, China), Changlong Wu (Alibaba Group, China), Tong Jia (Peking University, China), Xiaosong Huang (Peking University, China), Ying Li (Peking University, China), and Zhonghai Wu (Peking University, China)</i> | |
| CODEC: Cost-Effective Duration Prediction System for Deadline Scheduling in the Cloud | 298 |
| <i>Haozhe Li (Peking University, Beijing, China), Minghua Ma (Microsoft, Beijing, China), Yudong Liu (Microsoft, Beijing, China), Si Qin (Microsoft, Beijing, China), Bo Qiao (Microsoft, Beijing, China), Randolph Yao (Microsoft, Redmond, United States), Harshwardhan Chaturvedi (Microsoft, Redmond, United States), Tri Tran (Microsoft, Redmond, United States), Murali Chinatalapati (Microsoft, Redmond, United States), Saravan Rajmohan (Microsoft, Redmond, United States), Qingwei Lin (Microsoft, Beijing, China), and Dongmei Zhang (Microsoft, Beijing, China)</i> | |

Research Session 7: Autonomous Systems

| | |
|---|-----|
| EvoScenario: Integrating Road Structures into Critical Scenario Generation for Autonomous Driving System Testing | 309 |
| <i>Shuncheng Tang (University of Science and Technology of China, China), Zhenya Zhang (Kyushu University, Japan), Jixiang Zhou (University of Science and Technology of China, China), Yuan Zhou (Nanyang Technological University, Singapore), Yan-Fu Li (Tsinghua University, China), and Yinxing Xue (University of Science and Technology of China, China)</i> | |
| From Collision to Verdict: Responsibility Attribution for Autonomous Driving Systems Testing | 321 |
| <i>Jixiang Zhou (University of Science and Technology of China, China), Shuncheng Tang (University of Science and Technology of China, China), Yan Guo (University of Science and Technology of China, China), Yan-fu Li (Tsinghua University, China), and Yinxing Xue (University of Science and Technology of China, China)</i> | |
| Characterizing Reliability of Three-Version Traffic Sign Classifier System Through Diversity Metrics | 333 |
| <i>Qiang Wen (University of Tsukuba, Japan) and Fumio Machida (University of Tsukuba, Japan)</i> | |
| Risk-Driven Online Testing and Test Case Diversity Analysis for ML-Enabled Critical Systems | 344 |
| <i>Jubril Gbolahan Adigun (University of Innsbruck, Austria; Ainno8 Technologies Ltd, Nigeria; Center for Artificial Intelligence (AI) Research Nepal, Nepal), Tom Philip Huck (Karlsruhe Institute of Technology (KIT), Germany), Matteo Camilli (Politecnico di Milano, Italy), and Michael Felderer (University of Innsbruck, Austria; German Aerospace Center (DLR), Germany; University of Cologne, Germany)</i> | |

Research Session 8: Log Analysis

| | |
|---|-----|
| Loghub: A Large Collection of System Log Datasets for AI-Driven Log Analytics | 355 |
| <i>Jieming Zhu (The Chinese University of Hong Kong, China), Shilin He (The Chinese University of Hong Kong, China), Pinjia He (The Chinese University of Hong Kong Shenzhen, China), Jinyang Liu (The Chinese University of Hong Kong, China), and Michael R. Lyu (The Chinese University of Hong Kong, China)</i> | |
| Using Transformer Models and Textual Analysis for Log Parsing | 367 |
| <i>Vithor Bertalan (Polytechnique Montreal, Canada) and Daniel Aloise (Polytechnique Montreal, Canada)</i> | |
| Log Parsing Evaluation in the Era of Modern Software Systems | 379 |
| <i>Stefan Petrescu (Leibniz University Hannover), Floris den Hengst (ING Analytics), Alexandru Uta (DFINITY, Switzerland), and Jan S. Rellermeyer (Lebniz University Hannover)</i> | |

| | |
|--|-----|
| EvLog: Identifying Anomalous Logs over Software Evolution | 391 |
| <i>Yintong Huo (The Chinese University of Hong Kong, China), Cheryl Lee (The Chinese University of Hong Kong, China), Yuxin Su (Sun Yat-sen University, China), Shiwen Shan (Sun Yat-sen University, China), Jinyang Liu (The Chinese University of Hong Kong, China), and Michael R. Lyu (The Chinese University of Hong Kong, China)</i> | |

Research Session 9: Reliability of Mobile Software Systems

| | |
|---|-----|
| Effectively Finding ICC-Related Bugs in Android Apps via Reinforcement Learning | 403 |
| <i>Hui Guo (East China Normal University, China), Ting Su (East China Normal University, China), Xiaoqiang Liu (Donghua University, China), Siyi Gu (Donghua University, China), and Jingling Sun (East China Normal University, China)</i> | |
| Demand-Driven Information Flow Analysis of WebView in Android Hybrid Apps | 415 |
| <i>Abhishek Tiwari (University of Passau, Germany), Jyoti Prakash (University of Passau, Germany), and Christian Hammer (University of Passau, Germany)</i> | |
| APIMind: API-Driven Assessment of Runtime Description-to-Permission Fidelity in Android Apps | 427 |
| <i>Shaokun Zhang (Peking University, China), Hanwen Lei (Peking University, China), Yuanpeng Wang (Peking University, China), Ding Li (Peking University, China), Yao Guo (Peking University, China), and Xiangqun Chen (Peking University, China)</i> | |
| ReSPlay: Improving Cross-Platform Record-and-Replay with GUI Sequence Matching | 439 |
| <i>Shaokun Zhang (Peking University, China), Linna Wu (Key Laboratory of Mobile Application Innovation and Governance Technology, China; China Academy of Information and Communications Technology, China), Yuanchun Li (Tsinghua University, China), Ziqi Zhang (Peking University, China), Hanwen Lei (Peking University, China), Ding Li (Peking University, China), Yao Guo (Peking University, China), and Xiangqun Chen (Peking University, China)</i> | |

Research Session 10: Fault Injection and Root Cause Analysis

| | |
|--|-----|
| Online Failure Prediction Through Fault Injection and Machine Learning: Methodology and Case Study | 451 |
| <i>João R. Campos (University of Coimbra), Ernesto Costa (University of Coimbra), and Marco Vieira (University of Coimbra)</i> | |
| Evaluating and Enhancing the Robustness of Federated Learning System Against Realistic Data Corruption | 462 |
| <i>Chen Yang (Beijing University of Posts and Telecommunications, China), Yuanchun Li (Tsinghua University, China), Hao Lu (Beijing University of Posts and Telecommunications, China), Jinliang Yuan (Beijing University of Posts and Telecommunications, China), Qibo Sun (Beijing University of Posts and Telecommunications, China), Shangguang Wang (Beijing University of Posts and Telecommunications, China), and Mengwei Xu (Beijing University of Posts and Telecommunications, China)</i> | |

| | |
|---|-----|
| Evaluating the Effect of Common Annotation Faults on Object Detection Techniques | 474 |
| <i>Abraham Chan (The University of British Columbia, Canada), Arpan Gujarati (The University of British Columbia, Canada), Karthik Pattabiraman (The University of British Columbia, Canada), and Sathish Gopalakrishnan (The University of British Columbia, Canada)</i> | |
| ServerRCA: Root Cause Analysis for Server Failure Using Operating System Logs | 486 |
| <i>Jiahao Shi (Fudan University, China), Sihang Jiang (Fudan University, China), Bo Xu (Donghua University, China), and Yanghua Xiao (Fudan University, China)</i> | |

Research Session 11: Deep Learning and Deep Neural Networks

| | |
|---|-----|
| Assessing and Improving Dataset and Evaluation Methodology in Deep Learning for Code Clone Detection | 497 |
| <i>Haiyang Li (Peking University, China), Qing Gao (Peking University, China), and Shikun Zhang (Peking University, China)</i> | |
| Why Do Deep Learning Projects Differ in Compatible Framework Versions? An Exploratory Study | 509 |
| <i>Huashan Lei (Nanjing University of Aeronautics and Astronautics, China), Shuai Zhang (Nanjing University of Aeronautics and Astronautics, China), Jun Wang (Nanjing University of Aeronautics and Astronautics, China), Guanping Xiao (Nanjing University of Aeronautics and Astronautics, China), Yepang Liu (Southern University of Science and Technology, China), and Yulei Sui (University of New South Wales, Australia)</i> | |
| Multi-Objective White-Box Test Input Selection for Deep Neural Network Model Enhancement | 521 |
| <i>Hongjing Guo (Nanjing University of Aeronautics and Astronautics, China), Chuanqi Tao (Nanjing University of Aeronautics and Astronautics, China), and Zhiqiu Huang (Nanjing University of Aeronautics and Astronautics, China)</i> | |

| | |
|--|-----|
| Fixing Robust Out-of-Distribution Detection for Deep Neural Networks | 533 |
| <i>Zhiyang Zhou (State Key Lab of Computer Sciences, Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, Beijing, China), Jie Liu (State Key Lab of Computer Sciences, Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, Beijing, China; University of Chinese Academy of Sciences, Nanjing, China), Wensheng Dou (State Key Lab of Computer Sciences, Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, Beijing, China; University of Chinese Academy of Sciences, China), Shuo Li (State Key Lab of Computer Sciences, Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, Beijing, China), Liangyi Kang (State Key Lab of Computer Sciences, Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, Beijing, China), Muzi Qu (State Key Lab of Computer Sciences, Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, Beijing, China), and Dan Ye (State Key Lab of Computer Sciences, Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, Beijing, China)</i> | |

Research Session 12: Smart Contract Vulnerability Detection

| | |
|--|-----|
| Evaluating Ethereum Reentrancy Detection Tools via Mutation Testing | 545 |
| <i>Kaitai Zhu (Nanjing Tech University, China), Xingya Wang (Nanjing Tech University, China), Zhenyu Chen (Nanjing University, China), Song Huang (Army Engineering University of PLA, China), and Junhua Wu (Nanjing Tech University, China)</i> | |
| PSCVFinder: A Prompt-Tuning Based Framework for Smart Contract Vulnerability Detection | 556 |
| <i>Lei Yu (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Junyi Lu (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Xianglong Liu (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Li Yang (Institute of Software, Chinese Academy of Sciences, China), Fengjun Zhang (Institute of Software, Chinese Academy of Sciences, China; State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, China), and Jiajia Ma (Institute of Software, Chinese Academy of Sciences, China)</i> | |
| GraBit: A Sequential Model-Based Framework for Smart Contract Vulnerability Detection | 568 |
| <i>Huijuan Zhu (Jiangsu University, China), Kaixuan Yang (Jiangsu University, China), Liangmin Wang (Southeast University, China), Zhicheng Xu (Jiangsu University, China), and Victor S. Sheng (Texas Tech University, USA)</i> | |
| ConvMHSA-SCVD: Enhancing Smart Contract Vulnerability Detection Through a Knowledge-Driven and Data-Driven Framework | 578 |
| <i>Mengliang Li (Zhejiang University), Xiaoxue Ren (Zhejiang University), Han Fu (Zhejiang University), Zhuo Li (State Street Technology(Zhejiang) Ltd), and Jianling Sun (Zhejiang University)</i> | |

Research Session 13: Fault Detection, Localization, and Prediction

| | |
|--|-----|
| IFCM: An Improved Fuzzy C-Means Clustering Method to Handle Class Overlap on Aging-Related Software Bug Prediction | 590 |
| <i>Chen Zhang (Wuhan University of Technology, China; Wuhan University of Technology Chongqing Research Institute, China), Shuo Feng (Zhengzhou University, China), Wenzhi Xie (Wuhan University of Technology, China; Wuhan University of Technology Chongqing Research Institute, China), Dongdong Zhao (Wuhan University of Technology, China; Wuhan University of Technology Chongqing Research Institute, China), Jianwen Xiang (Wuhan University of Technology, China; Wuhan University of Technology Chongqing Research Institute, China), Roberto Pietrantuono (University of Naples Federico II, Italy), Roberto Natella (University of Naples Federico II, Italy), and Domenico Cotroneo (University of Naples Federico II, Italy)</i> | |
| TraceStream: Anomalous Service Localization Based on Trace Stream Clustering with Online Feedback | 601 |
| <i>Tong Zhou (Fudan University, China; Shanghai Collaborative Innovation Center of Intelligent Visual Computing, China), Chenxi Zhang (Fudan University, China; Shanghai Collaborative Innovation Center of Intelligent Visual Computing, China), Xin Peng (Fudan University, China; Shanghai Collaborative Innovation Center of Intelligent Visual Computing, China), Zhenghui Yan (Fudan University, China; Shanghai Collaborative Innovation Center of Intelligent Visual Computing, China), Pairui Li (Tencent Inc., China), Jianming Liang (Tencent Inc., China), Haibing Zheng (Tencent Inc., China), Wujie Zheng (Tencent Inc., China), and Yuetang Deng (Tencent Inc., China)</i> | |
| Detecting Interpreter Bugs via Filling Function Calls in Skeletal Program Enumeration | 612 |
| <i>Xinmeng Xia (Nanjing University, China) and Yang Feng (Nanjing University, China)</i> | |
| Enabling Efficient Assertion Inference | 623 |
| <i>Aayush Garg (University of Luxembourg, Luxembourg), Renzo Degiovanni (University of Luxembourg, Luxembourg), Facundo Molina (IMDEA Software Institute, Spain), Maxime Cordy (University of Luxembourg, Luxembourg), Nazareno Aguirre (University of Río Cuarto and CONICET, Argentina), Mike Papadakis (University of Luxembourg, Luxembourg), and Yves Le Traon (University of Luxembourg, Luxembourg)</i> | |

Research Session 14: Large Language Models and Reliability

| | |
|---|-----|
| Method-Level Bug Severity Prediction Using Source Code Metrics and LLMs | 635 |
| <i>Ehsan Mashhadi (University of Calgary Calgary, Canada), Hossein Ahmadvand (University of Calgary Calgary, Canada), and Hadi Hemmati (York University and University of Calgary, Toronto, Canada)</i> | |

| | |
|--|-----|
| LLaMA-Reviewer: Advancing Code Review Automation with Large Language Models Through Parameter-Efficient Fine-Tuning | 647 |
| <i>Junyi Lu (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Lei Yu (Institute of Software, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Xiaojia Li (Tsinghua University, China), Li Yang (Institute of Software, Chinese Academy of Sciences, China), and Chun Zuo (Sinsoft Company Limited, China)</i> | |
| Resilience Assessment of Large Language Models Under Transient Hardware Faults | 659 |
| <i>Udit Kumar Agarwal (The University of British Columbia, Canada), Abraham Chan (The University of British Columbia, Canada), and Karthik Pattabiraman (The University of British Columbia, Canada)</i> | |
| ShellGPT: Generative Pre-Trained Transformer Model for Shell Language Understanding | 671 |
| <i>Jie Shi (Fudan University, China), Sihang Jiang (Fudan University, China), Bo Xu (Donghua University, China), Jiaqing Liang (Fudan University, China), Yanghua Xiao (Fudan University, China), and Wei Wang (Fudan University, China)</i> | |

Research Session 15: Vulnerability Analysis and Fuzzing

| | |
|--|-----|
| Efficient Avoidance of Vulnerabilities in Auto-Completed Smart Contract Code Using Vulnerability-Constrained Decoding | 683 |
| <i>André Storhaug (Norwegian University of Science and Technology, Norway), Jingyue Li (Norwegian University of Science and Technology, Norway), and Tianyuan Hu (Southeast University, China)</i> | |
| foREST: A Tree-Based Black-box Fuzzing Approach for RESTful APIs | 695 |
| <i>Jiaxian Lin (Fudan University), Tianyu Li (Fudan University), Yang Chen (Fudan University), Guangsheng Wei (Huawei Cloud BU), Jiadong Lin (Huawei Cloud BU), Sen Zhang (Huawei Cloud BU), and Hui Xu (Fudan University; Huawei Cloud BU)</i> | |
| Fuzzing with Sequence Diversity Inference for Sequential Decision-Making Model Testing | 706 |
| <i>Kairui Wang (State Key Laboratory of Intelligent Game, China; Science and Technology on Integrated Information System Laboratory, Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Yawen Wang (State Key Laboratory of Intelligent Game, China; Science and Technology on Integrated Information System Laboratory, Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Junjie Wang (State Key Laboratory of Intelligent Game, China; Science and Technology on Integrated Information System Laboratory, Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Qing Wang (State Key Laboratory of Intelligent Game, China; Science and Technology on Integrated Information System Laboratory, Institute of Software Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)</i> | |
| Value Peripheral Register Values for Fuzzing MCU Firmware | 718 |
| <i>Chunlin Wang (Beijing University of Posts and Telecommunications, China) and Hongliang Liang (Beijing University of Posts and Telecommunications, China)</i> | |

Research Session 16: Program Analysis

| | |
|--|-----|
| Characterizing Runtime Performance Variation in Error Detection by Duplicating Instructions | 730 |
| <i>Yafan Huang (University of Iowa, USA), Zhengyang He (University of Iowa, USA), Lingda Li (Brookhaven National Laboratory, USA), and Guanpeng Li (University of Iowa, USA)</i> | |
| Dynamic Program Analysis with Flexible Instrumentation and Complex Event Processing | 742 |
| <i>Chukri Soueidi (Univ. Grenoble Alpes, CNRS, Inria, Grenoble INP, LIG, France), Yliès Falcone (Univ. Grenoble Alpes, CNRS, Inria, Grenoble INP, LIG, France), and Sylvain Hallé (Université du Québec à Chicoutimi, Canada)</i> | |
| Precise Lazy Initialization for Programs with Complex Heap Inputs | 752 |
| <i>Juan Manuel Copia (Universidad Politécnica de Madrid, Spain), Facundo Molina (IMDEA Software Institute, Spain), Nazareno Aguirre (Universidad Nacional de Río Cuarto and CONICET, Argentina), Marcelo F. Frias (Instituto Tecnológico de Buenos Aires and CONICET, Argentina), Alessandra Gorla (IMDEA Software Institute, Spain), and Pablo Ponzio (Universidad Nacional de Río Cuarto and CONICET, Argentina)</i> | |
| A Probabilistic Delta Debugging Approach for Abstract Syntax Trees | 763 |
| <i>Guancheng Wang (Peking University, China), Yiqian Wu (Peking University, China), Qihao Zhu (Peking University, China), Yingfei Xiong (Peking University, China), Xin Zhang (Peking University, China), and Lu Zhang (Peking University, China)</i> | |

Research Session 17: AI and Reliability

| | |
|--|-----|
| OPTango: Multi-Central Representation Learning Against Innumerable Compiler Optimization for Binary Diffing | 774 |
| <i>Hongna Geng (SKLP, ICT, CAS, UCAS, China), Ming Zhong (SKLP, ICT, CAS, UCAS, China), Peihua Zhang (SKLP, ICT, CAS, UCAS, China), Fang Lv (SKLP, ICT, CAS, China), and Xiaobing Feng (SKLP, ICT, CAS, UCAS, China)</i> | |
| Hidden-in-Wave: A Novel Idea to Camouflage AI-Synthesized Voices Based on Speaker-Irrelative Features | 786 |
| <i>Xin Liu (Lanzhou University, China), Yuan Tan (Lanzhou University, China), Xuan Hai (Lanzhou University, China), Qingchen Yu (Zhejiang University, China), and Qingguo Zhou (Lanzhou University, China)</i> | |
| Automatic Static Vulnerability Detection for Machine Learning Libraries: Are We There Yet?..... | 795 |
| <i>Nima Shiri Harzevili (York University), Jiho Shin (York University), Junjie Wang (Institute of Software, Chinese Academy of Sciences), Song Wang (York University), and Nachiappan Nagappan (Meta)</i> | |
| Author Index | 807 |
