# TABLE OF CONTENTS

|                                                                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Peer-Review Statements .....                                                                                                                                    | 1   |
| <i>Izzanil Hidayati, Rizal Kurniawan, Rahmadiani Aulia</i>                                                                                                      |     |
| The Analysis of Airport Passengers Flow by using Spatial Temporal Graph Neural Networks and Resolving Efficient Dominating Set .....                            | 3   |
| <i>A. Muklisin, I. M. Tirta, Dafik, R. I. Baihaki, A. I. Kristiana</i>                                                                                          |     |
| Comparison of the Normalization Method of Data in Classifying Brain Tumors with the k-NN Algorithm .....                                                        | 21  |
| <i>Rinci K. Hapsari, Abdullah H. Salim, Budanis D. Meilani, Tutuk Indriyani, Aery Rachman</i>                                                                   |     |
| Classification of Tobacco Leaf Quality using Feature Extraction of Gray Level Co-Occurrence Matrix (GLCM) and K-Nearest Neighbor (K-NN) .....                   | 30  |
| <i>Aeri Rachmad, Rinci K. Hapsari, Wahyudi Setiawan, Tutuk Indriyani, Eka M. S. Rochman, Budi D. Satoto</i>                                                     |     |
| Steganography on Color Images using Least Significant Bit (LSB) Method .....                                                                                    | 39  |
| <i>Tutuk Indriyani, S. Nurmuslimah, Audita Taufiqurrahman, Rinci K. Hapsari, Citra N. Prabiantissa, Aeri Rachmad</i>                                            |     |
| Haploid Diploid Maize Seeds Classification using Residual Network.....                                                                                          | 49  |
| <i>Wahyudi Setiawan, Yoga D. Pramudita</i>                                                                                                                      |     |
| Tourism Destination Recommendation System using Collaborative Filtering and Modified Neural Network.....                                                        | 60  |
| <i>Kurniawan E. Permana, Sri Herawati, Wahyudi Setiawan</i>                                                                                                     |     |
| Implementation of the Fuzzy Analytical Network Process Method in Decision Making on the Granting of Non-Occupied Building Permits .....                         | 71  |
| <i>Muhammad A. Syakur, Eka M. S. Rochman, Aeri Rachmad, Wahyudi Setiawan, Sigit S. Putro</i>                                                                    |     |
| Comparing the Architecture of Convolutional Neural Network for Corn Leaves Diseases Image Classification .....                                                  | 81  |
| <i>Aeri Rachmad, Wahyudi Setiawan, Eka M. S. Rochman</i>                                                                                                        |     |
| The Classification of Tea Leaf Disease using CNN Image Classifier .....                                                                                         | 89  |
| <i>Eliana A. Rosyidah, Alfian F. Hadi, Yuliani S. Dewi</i>                                                                                                      |     |
| Weight of Evidence and Information Value on Support Vector Machine Classifier.....                                                                              | 113 |
| <i>M. Dika Saputra, Zahroatul Fitria, Bagus Sartono, Evi Ramadhani, Alfian F. Hadi</i>                                                                          |     |
| The Comparison of Convolutional Neural Networks Architectures on Classification Potato Leaf Diseases .....                                                      | 125 |
| <i>Rifki I. Baihaki, Dafik, Ika H. Agustin, Zainur R. Ridlo, Elsa Y. Kurniawati</i>                                                                             |     |
| Detection Model for URL Phishing with Comparison Between Shallow Machine Learning and Deep Learning Models .....                                                | 146 |
| <i>Nizam A. Zuhayr, Girinoto, Nurul Qomariasih, Hermawan Setiawan</i>                                                                                           |     |
| RBL-STEM Model Learning Activity Framework: VCO (Virgin Coconut Oil) Development Analysis using Artificial Neural Network to Improve Student Metacognition..... | 157 |
| <i>Rina S. D. Gita, Waris, H. B. A. Jayawardana</i>                                                                                                             |     |

|                                                                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| The Modification of the Building Structural Design using Steel-Concrete Composite and Eccentrically Braced Frames (EBF) System Structure.....                                               | 174 |
| <i>Mahdan K. Sanie, Budi Suswanto, Triwulan</i>                                                                                                                                             |     |
| Classification of Disease in Rice Plant Leaves using the Method Convolutional Neural Networks.....                                                                                          | 195 |
| <i>Laila B. Zahro, Dafik, Ika H. Agustin, Zainur R. Ridlo</i>                                                                                                                               |     |
| RBL-STEM Learning Activities: Analysis of Transgenic Sugarcane Development using Artificial Neural Networks in Improving Students' Combinatorial Thinking Skills.....                       | 217 |
| <i>Ahdatu U. K. Maulidiya, Bambang Sugiharto, Joko Waluyo, Dafik, Indrawati</i>                                                                                                             |     |
| On Time Series Forecasting Analysis of Soil Moisture by using Artificial Neural Networks Based - on Rainbow Antimagic Coloring for Autonomous Irrigation System on Horizontal Farming ..... | 234 |
| <i>Dini Mufidati, Zainur R. Ridlo, Slamain, Ika N. Maylisa, Dafik</i>                                                                                                                       |     |
| Application of Spatial Temporal Graph Neural Networks for Forecasting Data Time Series River Pollution Waste Content in Probolinggo .....                                                   | 257 |
| <i>Nur Mauliska, Wahyu Lestari, Endah T. Wisudaningsih, Muhammad H. Islam</i>                                                                                                               |     |
| Text Processing using Support Vector Machine for Scientific Research Paper Content Classification.....                                                                                      | 273 |
| <i>Hasanuddin Al-Habib, Elly M. Imah, Riskyana D. I. Puspitasari, Binar K. Prahani</i>                                                                                                      |     |
| Application of Convolutional Neural Network for Identifying Cocoa Leaf Disease .....                                                                                                        | 283 |
| <i>Annisa F. M. Harvyanti, Rifki I. Baihaki, Dafik, Zainur R. Ridlo, Ika H. Agustin</i>                                                                                                     |     |
| On the Spatial Temporal Graph Neural Network Analysis Together with Local Vertex Irregular Reflexive Coloring for Time Series Forecasting on Passenger Density at Bus Station.....          | 305 |
| <i>Adiditiya D. Harliyuni, Dafik, Slamain, Zainur R. Ridlo, Ridho Alfarisi</i>                                                                                                              |     |
| The Development of Precision Agriculture Design by using a Smart Sensor for Time Series Forecasting Analysis on Relative Humidity .....                                                     | 324 |
| <i>Zainur R. Ridlo, Sudarti, Joko Waluyo, Dafik</i>                                                                                                                                         |     |
