Table of Contents

| | |
|---|----------|
| Case Studies Technology Improvements for Geothermal Utilization | 1 |
| Amin Atashnezhad et al. <i>Advancing Enhanced Geothermal Reservoirs with Ionic Liquids as Potential Geothermal Fluid</i> | 2 |
| Harish Chandrasekar et al. <i>Coupled Thermal Hydraulic Mechanical and Chemical (THMC) Modeling of the GreenLoop system in the Southeast Geysers, California</i> | 16 |
| Kerry Daly <i>Case Study: Oilfield Completion Technology and Reservoir Analysis Optimizes Injectivity for Geothermal Water Production In the Netherlands</i> | 35 |
| Andrey Fastovets et al. <i>Boosting Production From High-Enthalpy Geothermal Wells With New Electric Submersible Pump Technology</i> | 52 |
| Adam Johnson et al. <i>Injection Well Chemical Cleanouts at Zunil, Guatemala: A Low-Cost Caustic Treatment to Remove Silica Scale from Injection Wells R3 and R5</i> | 70 |
| Dana Jurick et al. <i>Case Study - Fiber Optic Strain Sensing Results from Cross Well Geothermal Interference Testing</i> | 86 |
| Thomas Kerr et al. <i>Innovations in Geothermal Power based on the Commissioning and Testing Results of Sage Geosystems' sCO₂ Prototype Turbine</i> | 92 |

| | |
|--|------------|
| Sang H. Lee and Ahmad Ghassemi | |
| <i>Stimulation Modeling and Circulation Forecasting in the Utah FORGE Doublet</i> | 107 |
| Leslie D. Miller and Anthony J. Gerbino | |
| <i>Modeling Direct Lithium Extraction From Geothermal Brines Using Rigorous Electrolyte Thermodynamics</i> | 117 |
| Esteban Rodríguez | |
| <i>Online Cleaning of Direct Contact Condenser to Remove Sulfur Deposition</i> | 132 |
| Dhani Sanjaya | |
| <i>Roles of Borehole Image Logs for Fracture Evaluation and Well Planning in Geothermal Field. A Case Study of Sorik Marapi Field, North Sumatera, Indonesia</i> | 143 |
| Johanna Waldheim et al. | |
| <i>Geothermal Well Abandonment Preparation Aided By Real Time Video Technology</i> | 153 |
| Vlad Zatonski and Colin Brown | |
| <i>Eavor-Lite Update After Four Years of Operation</i> | 168 |
| Yuhao Zhu et al. | |
| <i>Field Tests of Thermoelectric Generators for Power Generation at Low Temperatures</i> | 177 |
| Challenges and Successes in the Lithium Extraction from Geothermal Brine | 191 |
| Margaret M. Busse et al. | |
| <i>Environmental Impact Assessment of Lithium Recovery from Geothermal Brines in the SS-KGRA: An Overview</i> | 192 |

| | |
|--|------------|
| Shaghayegh Danehkar and Saeid Jalilinasrabady | |
| <i>Comparative Assessment of Geothermal-Based Hydrogen and Lithium Production in Kyushu, Japan</i> | 201 |
| J. Humphreys et al. | |
| <i>Distribution and Isotopic Composition of Li in the Salton Sea Geothermal Field</i> | 225 |
| John O’Sullivan et al. | |
| <i>A Natural State and Production Forecast Model of the Salton Sea Geothermal Field for Lithium Extraction</i> | 241 |
| Country and Regional Updates | 261 |
| Volkan Ş. Ediger and Sertaç Akar | |
| <i>Historical Pattern Analysis of Global Geothermal Power Capacity Development</i> | 262 |
| Djama Ali Guelleh et al. | |
| <i>Preliminary Results of the Geothermal Exploration Project of EDD in Fialé, Asal Rift, Djibouti</i> | 290 |
| Matthew Minnick et al. | |
| <i>Tu Deh-Kah Geothermal Development Project: Resource Characterization, Well Testing, and Reservoir Modeling Results and Challenges</i> | 305 |
| Ann Robertson-Tait et al. | |
| <i>United States Geothermal Power Update</i> | 321 |

**Economic and Durable Materials and Completion Solutions for
Geothermal Well Constructions and Operations** **339**

Khizar Abid et al.

Evaluation of the Thermal Properties of Different Well Cement Mixtures with Applications to Geothermal Well Construction 340

Fatemeh Hamidi et al.

A New Polymer Nanocomposite for Improving Geothermal Sweep Efficiency 354

William Kibikas et al.

Thermal Expansion of Simulated Wellbores Subjected to Thermal Shock Conditions 363

Sai Liu et al.

Graphite Filled Ethylene Propylene Diene Monomer Rubber for Geothermal Applications 381

Habib Ouadi et al.

Numerical Investigation of Fishbone Well Design Impact on Geothermal System Enhancement in North Dakota 394

Tatiana Pyatina et al.

Hydrophobic Lightweight Cements for Reservoir Thermal Energy Storage Geothermal Well Systems 416

Tatiana Pyatina and Toshifumi Sugama

Cements for Supercritical Geothermal Wells at 400oC 447

Tatiana Pyatina et al.

Results of High-Temperature Cement Blends Exposure in Newberry Well, Oregon 468

Ting Roy et al.

Nano-Composite Production Tubing with Near-Zero Thermal Conductivity and Elastomer-Energized Insulated Packer for Enhanced Geothermal Systems, Rated to 750 °F 489

Alberto Toledo Velazco et al.

High Temperature Testing of Downhole Non-Metallic Materials Used for Sealing Annular Space 500

Emerging Technologies in EGS 523

Chun Chang et al.

Development of Chemical-Encapsulating Microparticles for Delayed Flow Diverter Formation in EGS Reservoirs Away from Wells 524

George Danko and Matyas Krisztian Baracza

Analysis of Blasthole Fracture System for REGS 534

Robert Egert et al.

Numerical Study of Proppant Transport and Settling Processes in Fractures 545

Ram Kumar et al.

Reactive-Transport Model for Thermally Induced Calcium Carbonate Precipitation (TICP) In EGS: Geochemical and Fracture Permeability Evolution in Batch and Fractured-Core Experiments 559

Ahmed Merzoug et al.

Investigating the Feasibility of a Geothermal Huff-n-Puff: Implications for Enhanced Geothermal Systems 572

Israel Momoh et al.

Fracture Conductivity Tuning in Granite under Triaxial Loading using Ionic Liquids: Implications for Enhanced Geothermal Systems 581

Established and Emerging Technologies for In-Situ Stress Estimation for Geothermal Reservoirs 597

Guanyi Lu et al.

Interpretation of Mini-frac Test Data Accounting for Wellbore Cooldown in an EGS Well at the Utah FORGE Site: A Numerical Study 598

Yunxing Lu et al.

Understanding In Situ Stress Complexities in EGS Reservoirs through True-Triaxial Block Fracturing Experiments on High Temperature Analogue Utah FORGE Granites 609

Ayyaz Mustafa et al.

A Machine Learning Approach for Stress Prediction in Granitoid Formation at FORGE Geothermal Site Using Compressional and Shear-wave Slowness 624

Daniela Pinilla et al.

In-situ Stress Analysis in CUBO (Cornell University Borehole Observatory) 635

Anna Rogers et al.

A Comparison of Pre-Drill and Post-Drill In-situ Stress Estimates for the Eavor-Deep™ 18,000 ft-TVD Closed-Loop Geothermal Demonstration Well 645

Financing and Economics for Geothermal Energy 665

Dayo Akindipe et al.

Variability in Diurnal and Seasonal Ambient Conditions on Geothermal Plant Performance and Cost 666
