Volume 12514

Proceedings of SPIE 0277-786X, V. 12514

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Image Sensing Technologies: Materials, Devices, Systems, and Applications X*, edited by Nibir K. Dhar, Achyut K. Dutta, Sachidananda R. Babu, Proc. of SPIE 12514, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

METASTRUCTURES AND METASURFACES FOR IMAGING APPLICATIONS I

12514 02 **High efficiency metastructure-based emitter and photodetector for imaging (Invited Paper)**
[12514-2]

METASTRUCTURES AND METASURFACES FOR IMAGING APPLICATIONS III

12514 03 **Silicon meta-APD integrated with InGaAsP meta-emitter for near-infrared (NIR) for active imaging and LIDAR (Invited Paper)** [12514-9]

ADVANCED PHOTODETECTORS AND IMAGING DEVICES I

12514 04 **Dual and multi-spectral band SLS infrared camera systems (Keynote Paper)** [12514-10]

12514 05 **Quantum modeling of next generation photon detectors (Invited Paper)** [12514-11]

ADVANCED PHOTODETECTORS AND IMAGING DEVICES II

12514 06 **Optical crosstalk and ancillary measurements of free space coupled: InGaAs quad photoreceivers exposed to protons and alpha particles (Invited Paper)** [12514-13]

12514 07 **Polarization de-multiplexing metasurface-based polarimetric imaging with time of flight multi-pixel imager** [12514-15]

ADVANCED IMAGING DEVICES AND APPLICATIONS

12514 09 **Event-based sensing for the detection of modulated signals in degraded visual environments**
[12514-21]

12514 0A **Diamond plasmonic terahertz detectors** [12514-22]

POSTER SESSION

- 12514 0B **Scalability of DFT-calculated IR spectra for estimating dielectric functions** [12514-26]
- 12514 0C **Analytical model of diffuse reflectance for NIR-SWIR absorbing-dye formulations using reduced absorbance functions** [12514-27]
- 12514 0E **Efficient infrared super-resolution** [12514-33]
- 12514 0F **Advanced nanostructured antireflection coatings for high performances IR detector and imaging applications** [12514-35]
- 12514 0G **III-N material based deep UV APDs for emergent defense, space, and commercial imaging and spectroscopy applications** [12514-38]
- 12514 0H **A review of different multispectral indices for monitoring plant health in mid-mountain sites** [12514-39]
- 12514 0J **3D polarization imaging by use of digital holography and transport of intensity** [12514-41]
- 12514 0K **High-strength, vibration-dampening, silicone adhesive to enable optical and sensor assembly** [12514-42]

DIGITAL POSTER SESSION

- 12514 0L **Space monitoring to control the dynamics of changes in the resource potential of the tourist business under conditions of increased risk of emergencies** [12514-36]
