

PROCEEDINGS OF SPIE

Enhanced Spectroscopies and Nanoimaging 2023

**Prabhat Verma
Yung Doug Suh**
Editors

**20–23 August 2023
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 12654

Proceedings of SPIE 0277-786X, V. 12654

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Enhanced Spectroscopies and Nanoimaging 2023*, edited by Prabhat Verma, Yung Doug Suh, Proc. of SPIE 12654, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ENHANCED SPECTROSCOPY FOR BIOSENSING I

12654 02 **Point of use SERS-based lateral flow test for pathogenic infections (Invited Paper)** [12654-8]

TERS & NANOIMAGING

12654 03 **Sub-tip-radius near-field interactions in nano-FTIR vibrational spectroscopy on single protein particles** [12654-16]

ENHANCEMENT AT METASURFACES

12654 04 **Plasmonic metasurfaces for enhanced spectrochemical tissue imaging** [12654-23]

SURFACE ENHANCED SPECTROSCOPY

12654 05 **A unified framework for the description of plasmonically enhanced ultrafast and cw Raman spectroscopies (Invited Paper)** [12654-31]

OTHER PHENOMENA AT NANOSCALE I

12654 06 **Influences of nanoparticle loading in paper-SERS sensors (Invited Paper)** [12654-38]

OTHER NANOIMAGING TECHNIQUES

12654 07 **Nano-optical imaging of van der Waals crystals: from ultrafast exciton dynamics to anisotropic waveguide modes (Invited Paper)** [12654-41]

MONDAY POSTER SESSION

- 12654 08 **Fundamental characteristics of remote plasmonic-enhanced Raman spectroscopy without close contact between analyte and metallic nanostructure** [12654-52]
- 12654 09 **SERS biosensing of sickle cell hemoglobin from normal hemoglobin** [12654-53]
- 12654 0A **Phase identification on infiltrated thermal barrier materials by 2D Raman spectroscopy** [12654-57]

DIGITAL POSTER SESSION

- 12654 0B **Plasmonic metallic nanoparticle-based biosensors (Invited Paper)** [12654-9]
