SPIE

Volume 12670

Proceedings of SPIE 0277-786X, V. 12670

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *3D Printing for Lighting*, edited by Nadarajah Narendran, Govi Rao, Proc. of SPIE 12670, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510665545
ISBN: 9781510665552 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

OVERVIEW AND OPPORTUNITIES FOR 3D PRINTING FOR LIGHTING

12670 01 **Recent advancements in 3D printing of lighting components and systems** [12670-2]

3D-PRINTED LIGHTING SYSTEMS I

12670 02 **Future of lighting: generative design and advanced configurability enabled by additive manufacturing** [12670-31]

3D-PRINTED OPTICS AND CHARACTERIZATION

12670 03 **3D-printed refractive secondary optics for LED lighting** [12670-10]

12670 04 **Kinematic multi-axis two-photon polymerization printer concept for the manufacturing of micro-optics** [12670-13]

LIGHTING LAYOUT, OPTICS DESIGN, PRINT OPTIMIZATION, AND CHARACTERIZATION

12670 05 **Designing freeform luminaire optics for additive manufacturing: lessons learned (Invited Paper)** [12670-16]

12670 06 **Long-term performance of 3D-printed optics when exposed to thermal and optical radiation** [12670-17]

12670 07 **Toward a fully-automated luminaire design and manufacturing solution utilizing freeform optics and additive manufacturing** [12670-18]

3D-PRINTED THERMOMECHANICAL COMPONENTS

12670 08 **Insulation properties of 3D-printed components for use in interior building panels** [12670-21]

12670 09 **3D-printed heat sinks for thermal management of LED lighting** [12670-22]

3D-PRINTED ELECTRONICS

- 12670 0A **Advanced luminaire using 3D-printed electronics** [12670-23]
- 12670 0B **Carbon-nanotube ink and laser engraved lignin on fabrics for wearable electronics** [12670-25]
- 12670 0C **Manufacturing wearable electronics by direct copper electrodeposition** [12670-24]
- 12670 0D **Impact of ink deposition and trace path variations on 3D-printed antenna performance**
[12670-26]
- 12670 0E **Current status on additively manufactured luminaires** [12670-27]

3D-PRINTED LIGHTING SYSTEMS II

- 12670 0F **The benefits and challenges of additive manufacturing as it applies to custom lighting manufacturing today** [12670-28]
- 12670 0G **Luminaire design using additive manufacturing methods (Keynote Paper)** [12670-32]
