**Volume 12672**

Proceedings of SPIE 0277-786X, V. 12672

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Applied Optical Metrology V*, edited by Erik Novak, Christopher C. Wilcox, Proc. of SPIE 12672, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510665583

ISBN: 9781510665590 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## SURFACE METROLOGY I

---

- 12672 02 **Before the laser: an optical metrology retrospective (Keynote Paper)** [12672-1]
- 12672 03 **Why you should pay attention to international standards in optical metrology (Invited Paper)** [12672-2]
- 12672 05 **Absolute determination of a large mirror surface from spatial gradients using a coordinate measuring machine** [12672-4]
- 12672 06 **Deflectometry for ophthalmic optics testing and the impact of test surface orientation** [12672-5]

---

## SURFACE METROLOGY II

---

- 12672 07 **Fizeau interferometry-based, motion-free characterization of surface radius of curvature using actively-controlled varifocal optics** [12672-6]
- 12672 08 **On-machine metrology for diamond turning applications** [12672-7]
- 12672 09 **Exploring dynamic light scattering microscopy (MicroDLS): a study of key parameters** [12672-8]

---

## INTERFEROMETRIC TESTING AND ANALYSIS I

---

- 12672 0B **Light source options for optical metrology (Invited Paper)** [12672-11]
- 12672 0C **Digital holographic microscopy for bacterial species classification and motility characterization** [12672-12]
- 12672 0D **Photothermal gas sensing with a custom-made, fiber-coupled Fabry-Pérot etalon** [12672-13]

---

## INTERFEROMETRIC TESTING AND ANALYSIS II

---

- 12672 0E **Full-aperture wavefront reconstruction method in quadri-wave lateral shearing interferometry (QWLSI)** [12672-14]

- 12672 OF **Experimental results of an innovative dynamic low-coherent interferometer for characterizing a gravitational wave detector** [12672-15]
- 12672 OG **Polarization phase shifting for thickness measurement of NiO material transport layer using Sagnac interferometer** [12672-16]

---

#### IMAGE PROCESSING ANALYSIS AND ACQUISITION

---

- 12672 OH **Multimodal 3D sensor for object recognition in hospital settings** [12672-18]
- 12672 OK **Practical considerations in using a binary pseudorandom array for instrument transfer function calibration** [12672-22]
- 12672 OL **A new approach to wavefront sensing: AI software with an autostigmatic microscope** [12672-24]

---

#### FIBER-OPTICAL METROLOGY AND MULTI-WAVELENGTH SENSING

---

- 12672 OM **The novel detection equipment of residual stress of PMMA** [12672-26]
- 12672 ON **Simultaneous tomographic multi-component reconstructions using multispectral plenoptic cameras** [12672-27]
- 12672 OO **Lossy mode resonance generation by using uncoated double cladding fiber** [12672-28]
- 12672 OP **Calibration method for high-resolution single mode fiber optic spectrometers for optical coherence tomography** [12672-29]

---

#### POSTER SESSION

---

- 12672 OS **Holographic shearing interferometry and its implications for freeform characterization** [12672-32]
- 12672 OT **Lens center surface air gaps and thickness measurement in catadioptric telescope corrector lens using non-contact in situ low-coherence interferometry** [12672-34]
- 12672 OU **Development of a table-top surface inspection system based on phase-measuring deflectometry** [12672-36]
- 12672 OV **Non-contact surface roughness measurement of round bars considering the effect of machining striations** [12672-37]
