Volume 12736

Proceedings of SPIE 0277-786X, V. 12736

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Target and Background Signatures IX*, edited by Karin Stein, Ric Schleijsen, Proc. of SPIE 12736, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SCENE GENERATION

- 12736 05 **Modeling EO/IR systems with ASSET: spectral super-resolution for synthetic WFOV background signature generation (Invited Paper, Best Student Paper Award) [12736-4]**
- 12736 06 **Hybrid simulation ray-tracing improvements for creating realistic scenes for signature assessment [12736-6]**
- 12736 07 **Signature analysis in synthetic aperture radar imagery with a radar target simulator [12736-7]**

SURFACE MATERIALS

- 12736 08 **Nanocellulose-based films for camouflage applications (Invited Paper) [12736-8]**
- 12736 09 **Spectral reflectance properties of sand layers covering an underlying target: experimental measurements and mathematical modelling [12736-9]**
- 12736 0A **Optical properties of water absorbing textiles for camouflage [12736-10]**
- 12736 0B **Camouflage performance of winter uniforms: photosimulations in the visual spectrum [12736-11]**
- 12736 0C **Low-emissive paint with silver nanowires [12736-12]**

MONITORING SIGNATURE AND ENVIRONMENT

- 12736 0D **Simple modelling of CUBI surface temperatures: an operational perspective (Invited Paper) [12736-13]**
- 12736 0E **Infrared atmospheric radiative transfer: a fast computational approach with agile MODTRAN atmosphere reconstruction [12736-14]**
- 12736 0F **Design and implementation of a micrometeorological weather station for ground-based swarm environments [12736-15]**

DETECTION AND PERFORMANCE OF HUMANS AND SENSORS

- 12736 0G **Machine learning approach for extracting radiometric data from RGB images: a preliminary study (Invited Paper)** [12736-16]
- 12736 0H **Multi-image deconvolution of thermal images with a boundary condition weighting scheme** [12736-17]
- 12736 0I **Histogram-probabilistic multi-hypothesis tracking with a Poisson mixture measurement process** [12736-18]
- 12736 0J **Adaptive, gamified tool for target signature training** [12736-19]
- 12736 0K **Optimized integrative system design in satellite with MWIR/LWIR hyperspectral imaging based on multidimensional SCR and random forest learning** [12736-20]
