Volume 12739

Proceedings of SPIE 0277-786X, V. 12739

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High Power Lasers: Technology and Systems, Platforms, Effects VI*, edited by Harro Ackermann, Willy L. Bohn, Proc. of SPIE 12739, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 ARCHITECTURES FOR POWER SCALING

12739 02 **Beam combination system for coherent combination of high power fiber arrays (Invited Paper)** [12739-1]

12739 03 **Recent advances in high-power 2 μ m fiber lasers systems (Invited Paper)** [12739-2]

SESSION 2 FIBER LASERS AND BEAM COMBINATION

12739 04 **Filament-mediated disruption of laser propagation (Invited Paper)** [12739-6]

12739 05 **HEL atmospheric propagation: extreme stray light events** [12739-8]

SESSION 3 LASER EFFECTS AND SAFETY ISSUES

12739 06 **Laser penetration of metal targets with high powers of up to 120 kW** [12739-10]

12739 07 **Testing the vulnerability of lightweight drone propellers to high-energy laser irradiations** [12739-11]

12739 08 **The effect of laser irradiation on contrast and image quality of infrared window materials** [12739-12]

12739 09 **Investigation of the polymer material perforation time: comparison between two fiber laser wavelengths** [12739-13]

12739 0A **Duality safety/efficiency for laser directed energy weapon applications** [12739-17]
