Volume 12742

Proceedings of SPIE 0277-786X, V. 12742

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Artificial Intelligence for Security and Defence Applications*, edited by Henri Bouma, Judith Dijk, Radhakrishna Prabhu, Robert J. Stokes, Yitzhak Yitzhaky, Proc. of SPIE 12742, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PRIVACY, IDENTIFICATION, AND RECOGNITION

- 12742 03 **Efficient storage and retrieval of high-quality face images for effective face recognition** [12742-1]
- 12742 04 **To what extent are color and texture effective in person re-identification** [12742-2]
- 12742 05 **Privacy-preserving federated learning with various computer-vision tasks for security applications** [12742-3]
- 12742 06 **Vehicle color recognition using instance segmentation** [12742-4]

SURVEILLANCE

- 12742 07 **Efficient visual information indexation for supporting actionable intelligence and knowledge generation** [12742-5]
- 12742 08 **Efficient depth localization of objects in a 3D space using computational integral imaging** [12742-6]
- 12742 09 **Explosive and precursor identification using a portable spatially offset Raman spectroscopy (SORS) device** [12742-7]
- 12742 0A **Fuzzy logic, edge enabled underwater video surveillance through partially wireless optical communication** [12742-8]

DETECTION AND TRACKING

- 12742 0B **Infrared maritime moving target detection via spatial-multiscale DMD** [12742-9]
- 12742 0C **Detecting and tracking the position of suspicious objects using vision system** [12742-11]
- 12742 0D **Center point-based feature representation for tracking** [12742-12]
- 12742 0E **One-shot logo detection for large video datasets and live camera surveillance in criminal investigations** [12742-13]

OBJECT DETECTION AND TRACKING

- 12742 OF **Bio-inspired enhancement for optical detection of drones using convolutional neural networks (Invited Paper)** [12742-14]
- 12742 OH **Leveraging temporal context in deep learning methodology for small object detection** [12742-17]

EXPLAINABILITY

- 12742 OI **Swiss Army VAE: comprehensive sensor data analysis via explainable AI** [12742-18]
- 12742 OJ **New methods for explainable variational autoencoders** [12742-19]

ACTIVE LEARNING

- 12742 OK **Ship detection in thermal infrared using paired visible light images and domain adaptation via knowledge distillation** [12742-20]
- 12742 OM **Aerial image segmentation with minimal annotation effort using clustering of pretrained embeddings** [12742-22]

SIMULATION AND SYNTHETIC DATA

- 12742 OO **The effect of simulation variety on a deep learning-based military vehicle detector** [12742-26]
- 12742 OP **Synthetic thermal imagery for UAV-based reconnaissance by change detection** [12742-27]
- 12742 OQ **Impact study on MuSES-generated EO/IR synthetic imagery for machine learning algorithm development** [12742-28]
- 12742 OS **Predicting DNN classification performance on degraded imagery** [12742-30]

POSTER SESSION

- 12742 OX **Sequentially trained, shallow neural networks for real-time 3D odometry** [12742-36]
- 12742 OY **Evaluation of performance of an active terahertz imaging system for concealed face recognition** [12742-37]
