PROCEEDINGS OF SPIE

5th International Conference on Information Science, Electrical, and Automation Engineering (ISEAE 2023)

Tao Lei
Editor

24–26 March 2023
Wuhan, China

Organized by
Huazhong University of Science and Technology (China)
Institute of New Energy, Wuhan (China)
Global Scientific Research Association (China)

Co-organized by
Wuhan University (China)

Published by
SPIE

Volume 12748

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 12748

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *5th International Conference on Information Science, Electrical, and Automation Engineering (ISEAE 2023)*, edited by Tao Lei, Proc. of SPIE 12748, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xiii *Conference Committee*
xv *Preface*

Part One

INFORMATION RECOGNITION AND DIGITAL SIGNAL PROCESSING

12748 02 **Research on a processing scheme of weak photoelectric signal based on FPGA** [12748-15]

12748 03 **Tracking moving targets of interest-based deep learning** [12748-167]

12748 04 **TFF-CNN: time-frequency fusion-based CNN for DOA estimation of underwater acoustic array signal** [12748-168]

12748 05 **Research on image recognition system based on artificial intelligence** [12748-190]

12748 06 **Design of image recognition system based on deep learning hybrid model** [12748-181]

12748 07 **Research on power text information system based on image detection and recognition under MVC framework** [12748-191]

12748 08 **Behavior recognition algorithm based on motion capture and enhancement** [12748-122]

12748 09 **Track association based on the empirical mode decomposition in passive localization** [12748-95]

12748 0A **Based on reverse mirror research on lossless transmission technology of modulated signal in wireless spread spectrum communication** [12748-92]

12748 0B **Edge processing mechanism for high-frequency information acquisition in low-voltage distribution grid** [12748-31]

12748 0C **Communication resource allocation optimization method for high-frequency information acquisition in low-voltage transparent substation area** [12748-42]

12748 0D **Electrical insulator identification method in multiple images based on two stage CNN network** [12748-25]

12748 0E **A simulation study on photon-counting denoising based on subspace decomposition** [12748-59]

12748 0F **A study on low-dose CT image denoising method based on similar block learning** [12748-70]

12748 0G **Denoising method of explosion vibration signal by deep learning** [12748-96]

12748 0H **Blurred image recognition based on GLCM** [12748-57]

12748 0I **Hybrid positioning solution combining 5G, bluetooth, and terminal motion sensor** [12748-9]

12748 0J **Wind turbine bearing defect identification method based on improved SOLOv2** [12748-149]

12748 0K **Research on image feature point extraction and matching algorithm based on Key.Net** [12748-120]

12748 0L **Direct position determination of non-circular signals based on off-grid sparse reconstruction** [12748-146]

12748 0M **Image deblurring based on double blur kernel** [12748-173]

12748 0N **A method of broadband signal power spectrum analysis and its FPGA implementation** [12748-150]

12748 0O **Three-dimensional space phantom target generation using cross-eye jamming** [12748-33]

12748 0P **A sea cucumber recognition network based on improved YOLOv5** [12748-43]

12748 0Q **Two-sided fairness-aware recommendation method under many-to-many relation schema** [12748-64]

12748 0R **Application of two-dimensional linear piecewise full mapping function in chaotic image encryption** [12748-106]

12748 0S **A swin transformer-based asymmetrical network for light field salient object detection** [12748-147]

12748 0T **Research on algorithm of finger vein recognition technology for scene demand application** [12748-116]

12748 0U **Sequential pre-filter assisted cooperative scheme for localization in wireless sensor networks** [12748-81]

12748 0V **A radar data compression method based on autoencoder neural network and range encoding** [12748-145]

12748 0W **Fast assessment method of power grid risk based on Huffman code and state identification** [12748-126]

12748 0X **Speaker recognition based on improved ECAPA-TDNN network** [12748-80]

12748 0Y **Enhanced radar for object recognition based on GANs** [12748-160]

12748 0Z **Characteristics analysis of positive DC corona audible noise of copper wire with different diameter in high altitude** [12748-83]

SCIENTIFIC ALGORITHM AND DATABASE MANAGEMENT

12748 10 **Research on DEMATEL method based on three-parameter interval grey number and its application** [12748-11]

12748 11 **Induced continuous ordered weighted averaging aggregation operator to interval numbers based on set pair potentials** [12748-22]

12748 12 **Evaluation model based on periphery theory and interval-valued vague set** [12748-34]

12748 13 **Research and application of algorithm for stitching panoramic images of external pipeline welds** [12748-143]

12748 14 **Integrated profile of EV user behavior and value based on charging data mining** [12748-72]

12748 15 **Research on the improved bat algorithms** [12748-17]

12748 16 **Forecasting method for photovoltaic power based on data preprocessing and temporal convolutional network** [12748-163]

12748 17 **ViBe algorithm based on background fusion and channel calculation** [12748-84]

12748 18 **5G network security and data encryption for hybrid power service scenarios** [12748-68]

12748 19 **Air quality index prediction model integrating multi-head self-attention mechanism** [12748-18]

12748 1A **Optimal scheduling method of virtual power plant based on improved particle swarm algorithm** [12748-74]

12748 1B **Research on stray parameter extraction method of inverter based on least square data fitting** [12748-138]

12748 1C **PM2.5 concentration prediction based on CNN-GRU model fused with Luong attention** [12748-13]

12748 1D **A heterogeneous ultra-dense 5G network selection algorithm based on fuzzy-gray ideal solution** [12748-93]

12748 1E **Research on data processing module of electro-hydraulic control system based on motion control card** [12748-198]

12748 1F **Multidimensional Manhattan distance-based elimination fireworks algorithm for optimal multicore multitask scheduling** [12748-108]

12748 1G **Data generation strategy of power flow calculation for AC/DC hybrid system** [12748-158]

12748 1H **A constrained-time-based algorithm for vehicle maintain prediction** [12748-166]

12748 1I **Research on fire prediction model based on improved Harris hawk optimization algorithm** [12748-76]

12748 1J **Application experiment and partial improvement of traditional muon scattering imaging algorithm** [12748-127]

12748 1K **Research on filtering method of telemetry data based on whale optimization and wavelet transform** [12748-101]

12748 1L **Extraction of maize planting area based on transformer and remote sensing data** [12748-51]

12748 1M **Research on redundant transmission method of distribution network protection data based on device direct connection** [12748-137]

12748 1N **Composite PV MPPT algorithm based on improved grey wolf optimization algorithm with perturbation observation algorithm** [12748-40]

12748 1O **Multi-controller deployment strategy for LEO satellite based on affinity propagation algorithm** [12748-159]

12748 1P **A low-complexity algorithm for maximizing the weighted sum-rate of intelligent reflecting surface aided wireless communication** [12748-177]

12748 1Q **Unmanned cart path planning based on improved A* algorithm** [12748-97]

12748 1R **NPB-DTDMA: a node priority-based dynamic TDMA algorithm based on the usage proportion of sending queue** [12748-161]

12748 1S **Research on the equalization algorithm of indoor visible light communication** [12748-61]

12748 1T **Deep spatial-constraints networks for unsupervised anomaly detection in multivariate time series data** [12748-35]

12748 1U **Image dehazing algorithm based on improved dark channel prior and heterogeneous optimization** [12748-154]

12748 1V **FPGA-based gigabit ethernet multi-channel data acquisition system** [12748-199]

12748 1W **Mine-using research of PWM rectifier control algorithm based on L filter** [12748-60]

12748 1X **A wind vector prediction method based on LSTM algorithm** [12748-77]

12748 1Y **Adaptive harmonic prediction algorithm for power system based on LSSVM** [12748-195]

12748 1Z **Design of cloud-based conversion of MODBUS RTU to IEC61850** [12748-16]

12748 20 **A design method of ship radiated noise simulation software** [12748-29]

12748 21 **Risk prediction for 10-kV electric power distribution grid with neural network based on low-code platform** [12748-176]

12748 22 **Remote sensing image scene classification based on a dual attention dense network** [12748-41]

12748 23 **Study on influence of ambient temperature on passive intermodulation performance of communication connectors** [12748-24]

12748 24 **The leveraging of a VGGNet-19 and a K-means cluster in visual loop closure detection tasks** [12748-75]

12748 25 **Multi-view consistency for multi-hop knowledge base question answering** [12748-136]

12748 26 **Multi-feature short-term load forecasting based on stacking ensemble learning** [12748-30]

12748 27 **Design of portable EEG signal acquisition hardware system based on ADS1299** [12748-52]

12748 28 **Intervention effect of physical activity on mental fatigue: from the view of autonomic nervous pattern analysis** [12748-26]

12748 29 **Multi-objective quintuple polynomial trajectory optimization for unmanned underwater vehicles based on waypoint navigation** [12748-78]

12748 2A **Design and implementation of push up action evaluation system based on Kinect** [12748-100]

12748 2B **Characteristics prediction on SiC MOSFET implemented with BP neural network** [12748-132]

12748 2C **Synchronous phasor phase correction method based on particle swarm optimization and extend Kalman filter frequency tracking** [12748-8]

12748 2D **Broadband multifunctional metasurface based on voltage-tunable VO2** [12748-141]

Part Two

12748 2E **Sequence-to-subsequence learning with 1D-CNN for behind-the-meter solar generation disaggregation** [12748-91]

12748 2F **Design of low-power acceleration processor for convolutional neural networks based on RISC-V** [12748-3]

12748 2G **Deep learning-based detection of insulator defects in power grids** [12748-10]

12748 2H **Design of civil aircraft ground function test system based on DDS communication** [12748-148]

12748 2I **A new spaceborne/airborne bistatic synthetic aperture radar time synchronization method based on fractional Fourier transform** [12748-130]

12748 2J **Research on the optimization construction of communication backbone network** [12748-185]

12748 2K **Estimation about service time of flight ground support based on deep neural network** [12748-21]

12748 2L **GOGCN: using deep learning to support insertion of new concepts into gene ontology** [12748-82]

12748 2M **Research and development of distribution monitoring configuration software based on network** [12748-178]

12748 2N **Design of high-speed optical protection switch mechanism in optical fiber communication system** [12748-73]

12748 2O **Research on path tracking control of mobile storage robot based on model predictive control and linear quadratic regulator** [12748-32]

12748 2P **News recommendation model based on user implicit feedback noise processing** [12748-165]

12748 2Q **Supervised reinforcement learning for recommending treatment strategies in sepsis** [12748-144]

12748 2R **Machine-learning-based network sparsification modeling for IoTs security analysis** [12748-188]

12748 2S **Online evaluation of power system inertia based on LSTM deep-learning network** [12748-87]

12748 2T **Deep neural network for MIMO-SCMA detection** [12748-157]

12748 2U **Application of robot in handling electric field short-circuit fault of electrostatic precipitator without stopping** [12748-109]

12748 2V **Research on the early-warning model of power OPGW cable operating status based on joint judgment** [12748-162]

12748 2W **Multi-target points path planning for fixed-wing unmanned aerial vehicle performing reconnaissance missions** [12748-27]

12748 2X **A combination of XGBoost and FocalLoss-based cable aging state assessment method** [12748-142]

12748 2Y **EV aggregation modeling based on improved K-means** [12748-45]

12748 2Z **Fault recovery strategy of active distribution network based on source-network-charge-storage coordination optimization** [12748-62]

12748 30 **Parameter monitoring of electric energy metering system based on Internet of Things technology** [12748-184]

12748 31 **5G interface and access control technology for massive device connection in electric hybrid service scenario** [12748-56]

12748 32 **SDN and NFV-based multi-scenario electric 5G network slice management** [12748-63]

12748 33 **A new power system power planning method based on demand response and energy storage capacity** [12748-194]

12748 34 **Design of distributed feedback fiber laser sensing system for power transformers vibration monitoring** [12748-105]

12748 35 **Optimal power system dispatch model considering carbon emission accounting and source-load uncertainty** [12748-125]

12748 36 **Design of YOLOv2-tiny accelerator based on PYNQ-Z2 platform** [12748-98]

12748 37 **Dynamic reconfiguration of active distribution network considering electric vehicle charging demand under real-time electricity price** [12748-7]

12748 38 **Topography optimization of battery upper box based on OptiStruct** [12748-192]

12748 39 **Impedance characteristics of loop closing device based on improved phase shifting transformer** [12748-172]

12748 3A **Optimal configuration of cooling heating and power integrated energy storage for commercial buildings** [12748-5]

12748 3B **SOC estimation of lithium battery based on fractional order model** [12748-53]

12748 3C **Transient voltage stability assessment of grid-connected wind power systems based on the grcforest model** [12748-164]

12748 3D **Study on negative corona characteristics at different altitudes** [12748-66]

12748 3E **Rolling bearing fault feature extraction based on maximum correlated kurtosis deconvolution and improved autocorrelation spectral kurtograph** [12748-115]

12748 3F **Multi-direction prediction based on SALSTM model for ship motion** [12748-201]

12748 3G **Research on load aggregator optimal scheduling based on demand response potential evaluation** [12748-135]

12748 3H **Simulation on electrical resistance of sliding electrical contact in pantograph-catenary system** [12748-200]

12748 3I **Weather radar emulator based on DDS technology** [12748-123]

12748 3J **Ultra-short term wind power prediction based on an error correction stacking method** [12748-37]

12748 3K **Research on intelligent monitoring of roof distributed photovoltaics based on high-reliable power line and wireless communication** [12748-47]

12748 3L **A new three voltage level space vector modulation for high-frequency link matrix converter** [12748-129]

12748 3M **Distribution network reliability evaluation** [12748-124]

12748 3N **Reasoning simulation of substation power grid fault events based on knowledge map technology** [12748-186]

12748 3O **Study on the electromagnetic ring network in bilateral power supply mode of electrified railway** [12748-99]

12748 3P **Improved Mersenne Twister random number generator based on FPGA** [12748-180]

12748 3Q **Power flow management in multi-receiver wireless power transfer systems for electric vehicles free from real-time communication** [12748-54]

12748 3R **Optimization of ferrites structure based on integrated coil design for wireless EV charger** [12748-48]

12748 3S **Robust optimization of double-sided LCC compensation topology based on NSGA Ⅱ algorithm** [12748-131]

12748 3T **Analysis of the current research status of electrochemical energy storage technologies participating in auxiliary services for new power systems** [12748-189]

12748 3U **Design of fault line selection for small current grounding system in distribution network** [12748-65]

12748 3V **Fault diagnosis of nuclear power plant based on phase-mode transformation approach** [12748-175]

INTELLIGENT SENSING AND FUZZY SYSTEM CONTROL

12748 3W **Application of half-boundary method in the study of thermal characteristics of lighting arrester** [12748-118]

12748 3X **Occluded pedestrian detection based on improved YOLOv5n** [12748-20]

12748 3Y **Reliability improvement method of wind turbine gearbox** [12748-171]

12748 3Z **Research on failure and prevention of wind turbine gearbox** [12748-170]

12748 40 **Finite-time control for the lateral dynamics of intelligent car: a sliding mode event triggering approach** [12748-104]

12748 41 **Study on heart disease prediction based on SVM-GBDT hybrid model** [12748-151]

12748 42 **A smart brain controlled wheelchair based on TGAM** [12748-55]

12748 43 **Access planning method for industrial large users based on access risk** [12748-19]

12748 44 **Test and precision analysis of projectile motion attitude in the semi-constrained period** [12748-85]

12748 45 **Research on photovoltaic power prediction method based on improved extreme learning machine** [12748-28]

12748 46 **Study on the detection of viscose filament defects based on improved YOLOv5** [12748-44]

12748 47 **Drone path planning for 500KV transmission tower inspection** [12748-153]

12748 48 **Microservice-based manufacturing execution system for space optical remote sensor in electrical assembly workshop** [12748-119]

12748 49 **Research on stamped character detection system based on TextBoxes** [12748-182]

12748 4A **Design of intelligent wheelchair control system based on speed planning** [12748-187]

12748 4B **Cubic variance negative feedback chaos control for the buck-boost converter** [12748-86]

12748 4C **Research on pitch control system based on dual-motor synchronous control** [12748-174]

12748 4D **Vibration simulation analysis and structural optimization of used power battery transmission system** [12748-107]

12748 4E **Comparative analysis of two overmodulation methods based on simulation** [12748-71]

12748 4F **Research on the adjustable potential of flexible loads based on storage electric heating** [12748-117]

12748 4G **Multi-electric springs coordinated control method for grid voltage optimization** [12748-156]

12748 4H **Research on time-invariant virtual inertia control strategy for controllable rectifier load** [12748-67]

12748 4I **Cluster partition method of high-penetration distributed photovoltaics for autonomous operation and control of distribution network** [12748-139]

12748 4J **Control optimization strategy of DAB converter** [12748-14]

12748 4K **Research on preview control based on unknown input observer** [12748-94]

12748 4L **Design and implementation of ergonomic evaluation system based on fuzzy theory** [12748-2]

12748 4M **Research on trajectory planning method of the collaborative manipulator** [12748-39]

12748 4N **High-precision detection of laser spot based on Gaussian spot model** [12748-183]

12748 4O **Model-free super-twisting sliding mode control of permanent magnet synchronous linear motor based on super-twisting sliding mode observer** [12748-69]

12748 4P **A probabilistic amplitude shaping scheme on amplitude and phase shift keying modulation** [12748-155]

12748 4Q **Validation of FCS-MPC control strategy based on CHIL** [12748-193]

12748 4R **Inverter current control strategy under three-phase voltage unbalance condition** [12748-196]

12748 4S **Research on single-phase grounding fault detection method based on vision transformer** [12748-112]

12748 4T **A control method for a larger speed range of permanent magnet synchronous motor controlled without speed sensor** [12748-121]
