PROCEEDINGS OF SPIE

29th International Symposium on Atmospheric and Ocean Optics: Atmospheric Physics

Oleg A. Romanovskii
Editor

26–30 June 2023
Moscow, Russian Federation

Organized by
V.E. Zuev Institute of Atmospheric Optics SB RAS (Russian Federation)
Shirshov Institute of Oceanology RAS (Russian Federation)
Institute of Solar-Terrestrial Physics SB RAS (Russian Federation)
A.M. Obukhov Institute of Atmospheric Physics RAS (Russian Federation)
M.A. Sadovsky Institute of Geosphere Dynamics RAS (Russian Federation)

Sponsored by
V.E. Zuev Institute of Atmospheric Optics SB RAS (Russian Federation)
Photonics Journal (Russian Federation)

SPIE

Volume 12780

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 12780

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *29th International Symposium on Atmospheric and Ocean Optics: Atmospheric Physics*, edited by Oleg A. Romanovskii, Proc. of SPIE 12780, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

Part One

MOLECULAR SPECTROSCOPY AND RADIATION PROPAGATION IN THE ATMOSPHERE AND OCEAN

12780 02 **Angular distribution of fluorescence from aerosol with Rhodamin 6G dye under excitation by nanosecond laser pulses** [12780-8]

12780 03 **Propagation of partially coherent vortex Bessel-Gaussian beams in a turbulent atmosphere** [12780-18]

12780 04 **Inhomogeneity of the coherence distribution in the cross-section of a partially coherent Bessel beam** [12780-19]

12780 05 **Experimental studies of phase adaptive correction of optical wave distortions** [12780-20]

12780 06 **Calculation of cross-correlation of image jitter of a laser reference star and a plane wave** [12780-21]

12780 07 **Analysis of the radiative impact of Siberian biomass burning aerosol on cloudiness characteristics in the eastern Arctic** [12780-22]

12780 08 **Optical and acoustic measurements of atmospheric turbulence on horizontal paths in the atmosphere** [12780-23]

12780 09 **Research and development of a photonic-crystal waveguide with a 60° bend based on thin-film LiNbO3 on an insulator** [12780-30]

12780 0A **Lines broadening in the 3-0 vibrational band of the $^{15}N^{18}O$ molecule induced by air pressure** [12780-38]

12780 0B **Method for determining the wavefront distortions from the Shack-Hartmann sensor measurements** [12780-39]

12780 0C **Correction of wavefront distortions in wide-field adaptive optics systems** [12780-40]

12780 0D **Electromagnetic features of structures made of Ih ice covered with ice 0** [12780-55]

12780 0E **Image processing methods to increase the distinguishability of objects** [12780-56]

12780 0F **Estimation of conjugated height for adaptive optical system Large Solar Vacuum Telescope of Baikal Astrophysical Observatory** [12780-57]

12780 0G **Features of formation of sodium laser guide star in Russian observatories** [12780-58]

12780 0H **Scales of spatial correlation of longitudinal wind speed in a stratified atmosphere** [12780-59]

12780 0I **Experimental probability densities of temperature and wind velocity in a stratified atmosphere** [12780-61]

12780 0J **Determination of the type of atmospheric turbulence based on the meteorological measurements data receiving in real time mode** [12780-62]

12780 0K **Phase correction of a vortex laser beam in the sensor-less adaptive optical system** [12780-71]

12780 0L **Characteristic features of an optical vortex distribution in a beam passed a thin layer of turbulent medium and the central limit theorem** [12780-72]

12780 0M **Some features of backscattering in a reflective layer with multiscale random irregularities** [12780-73]

12780 0N **Development of dual-band infrared lenses** [12780-80]

12780 0O **Effect of parameters of refractive index fluctuation spectra with non-Kolmogorov power law on the characteristics of optical radiation propagated through a high-speed turbulent flow: analytical estimates and simulation results** [12780-84]

12780 0P **Overcoming challenges in laser beam focusing through a moderately scattering medium: stacked-actuator vs. bimorph deformable mirror** [12780-93]

12780 0Q **Precipitatable water vapor at some sites suitable for ground-based astronomical observations: Lake Karakul** [12780-99]

12780 0R **Features of global distributions of precipitable water vapor using Era-5 re-analysis data** [12780-100]

12780 0S **Stroke simulation of control elements in cartridge-type deformable mirror for correction of aberrations of laser radiation passed through turbulent medium** [12780-107]

12780 0T **Applied ellipsometry of the surface microrelief various materials** [12780-118]

12780 0U **Field experiments on non-line-of-sight atmospheric optical communication between UAV and a ground-based receiver** [12780-126]

12780 0V **Registration and analysis of laser beam wavefront using a Shack-Hartmann sensor under conditions of artificial pavilion turbulence** [12780-137]

12780 0W **Parameters of $HD^{16}O$ absorption lines in 5100–5400 cm^{-1} spectral region broadened by carbon dioxide pressure** [12780-139]

12780 0X **Radiative effects of low and high-level clouds over Western Siberia according to satellite observations and numerical simulation** [12780-143]

12780 0Y **H_2O absorption spectra in the IR region** [12780-146]

12780 0Z **Field experiments on ground-based non-line-of-sight optical communication in the NIR range** [12780-154]

12780 10 **Modern spectroscopic databases in the longwave radiative transfer problems in the Earth's atmosphere** [12780-158]

12780 11 **Monte Carlo simulation of laser pulse scattering in crystal clouds** [12780-159]

12780 12 **Optical non-line-of-sight communication: field, laboratory, and numerical experiments in Russia in 2012–2022** [12780-165]

12780 13 **Estimation of capabilities of an atmospheric non-line-of-sight optical communication channel between UAV and the ground surface** [12780-167]

12780 14 **Backscatter amplification in a turbulent atmosphere and the law of conservation of energy** [12780-189]

12780 15 **Simulation of multilayer thin-film piezoceramic actuators in COMSOL Multiphysics 6.0** [12780-196]

12780 16 **The influence of a turbulent area on the transverse energy structure of femtosecond laser pulses on a 100-meter path** [12780-198]

12780 17 **Investigation of nonlinear propagation of powerful femtosecond laser radiation through aerosol** [12780-199]

12780 18 **Phase characteristics of radio waves during oblique propagation in weakly anisotropic parabolic ionospheric layer** [12780-202]

12780 19 **The influence of acoustic waves on the methane combustion process** [12780-208]

12780 1A **Monte Carlo study of lidar returns depending on the cloud optical depth** [12780-217]

12780 1B **Simulation of correction of phase aberrations of laser radiation with the help of two adaptive mirrors under SPG algorithm control** [12780-239]

12780 1C **Monitoring of high-temperature objects at the territory of the Baikal region from MODIS data** [12780-241]

12780 1D **Analysis of the waveform of the back pulse of a scanning lidar** [12780-242]

12780 1E **Assessment of the cloud adjacency effect on retrieval of ground surface reflectance from MODIS satellite data for a surface area near Lake Baikal** [12780-260]

12780 1F **Estimation of laser intensity at the remote receiver under conditions of imperfect phase conjugation** [12780-264]

12780 1G **Numerical simulation of unsteady turbulent river flow** [12780-274]

12780 1H **Adaptive control of the polarization structure of synthesized beams in a turbulent atmosphere** [12780-276]

12780 1I **Investigation of ZnGeP2 crystals by Raman spectroscopy and machine learning** [12780-297]

OPTICAL INVESTIGATION OF ATMOSPHERE

12780 1J **Determination of the groups of sources affecting the chemical composition of atmospheric fallout on the northeastern coast of Lake Baikal** [12780-1]

12780 1K **Petroleum products in the snow cover of the Baikal natural area** [12780-2]

12780 1L **Numerical simulation of greenhouse gas measurements in the atmosphere by using a two-channel near-IR lidar system** [12780-10]

12780 1M **Mobile laser absorption complex for methane monitoring at sites with agricultural effluents** [12780-12]

12780 1N **Spatio-temporal variability of small gas impurities in the surface layer of the atmosphere of the southern Baikal region** [12780-13]

12780 1O **Analysis of prospects for the use of certain wavelengths and broadband sources in a lidar balloon experiment to study stratospheric aerosol for climatic observations** [12780-16]

12780 1P **Pre-designment of a highly sensitive nanophotonic pressure sensor** [12780-24]

12780 1Q **Problems of retrieval of vertical atmospheric temperature distribution from Rayleigh scattering LIDAR signal in a high spectral resolution LIDAR** [12780-25]

12780 1R **Estimation of the dynamic range linearity of the SLS lidar photodetection system** [12780-27]

12780 1S **Generalization of the aerosol chemical composition in the Kara Sea atmosphere based on the results of expeditions in 2022** [12780-28]

12780 1T **Soot in the surface atmosphere on the southwest coast and water area of Lake Baikal** [12780-29]

12780 1U **Application of active and passive satellite sensing data for analysis of embedded convection over Western Siberia** [12780-33]

12780 1V **Stratospheric aerosol layer for period of 2018-2023 using measurements at Siberian Lidar Station in Tomsk** [12780-34]

12780 1W **Concept of a mobile three-channel IR lidar system for sounding greenhouse gases in the atmosphere** [12780-35]

12780 1X **Calibration of a parametric light generator for remote gas analysis of the atmosphere** [12780-36]

12780 1Y **Aspects of a technique for investigation of the volatility parameters of species in the composition of atmospheric aerosol in the size range 0.3–5 μm** [12780-37]

12780 1Z **Catadioptric lens made of plastic for the visible and infrared ranges of the spectrum** [12780-41]

12780 20 **Assessment of the snow cover pollution load in Ulan-Ude in 2022** [12780-42]

12780 21 **Average annual flux of organic carbon to the bottom in the arctic seas of Russia: a comparison of calculated and research instrument data from sediment traps** [12780-43]

12780 22 **Effect of diffraction on mirror reflection by crystalline particles** [12780-45]

12780 23 **Experimental studies of aerosol fields in the atmosphere of Lake Baikal (ship expedition, July 2022)** [12780-48]

12780 24 **Electromagnetic effects on the functional state of individual organs and systems of the human body** [12780-75]

12780 25 **Assessment of the correction of the functional state of an organism by the method of spectral analysis of pulsograms under the exposure to light of different wave lengths** [12780-76]

12780 26 **Comparison of high-level cloud observations by EARLINET ground-based lidar network and MODIS data** [12780-77]

12780 27 **Analysis of sensitivity of the optical characteristics reconstructed by the model of tropospheric aerosol of Western Siberia to uncertainties in the initial data** [12780-78]

12780 28 **Estimation of the parameters of the power model of the turbulence spectrum from the data of the sonic weather station** [12780-79]

12780 29 **Estimation of the average density of air in a model fire tornado based on laser transmission data** [12780-81]

12780 2A **Study of optical properties of atmospheric ice crystals of arbitrary polyhedral shape** [12780-95]

12780 2B **Matrix polarizing lidar for the study of Asian dust on main laser emission lines** [12780-96]

12780 2C **Variability of monthly average characteristics of the aerosol condensation activity in annual behavior** [12780-98]

12780 2D **Flame burning plant combustible materials interruption as a result of external short-term exposure** [12780-101]

12780 2E **Solution of the problem of light scattering by ice non-spherical particles obtained in the approximations of geometric and physical optics for problems of laser radiation transfer** [12780-103]

12780 2F **Peculiarities of variations of residual gases in discs of deciduous trees** [12780-105]

12780 2G **Numerical study of the possibilities of wind sounding in the atmospheric layer of 10-20 km by a coherent Doppler lidar from an aircraft** [12780-106]

12780 2H **A simple way to increase the efficiency of a laser emitter using frequency summation** [12780-108]

12780 2I **Forecasting the anthropogenic fire hazard of vegetation according to satellite images** [12780-113]

12780 2J **Seasonal variability of near-surface aerosol composition in Moscow and one of its suburbs over three years of observations** [12780-117]

12780 2K **Variations in the total ozone content on the territory of Russia** [12780-119]

12780 2L **Comparison of 2011 and 2020 ozone anomalies in the stratosphere of the Arctic and northern Eurasia using Aura MLS Data** [12780-120]

12780 2M **Seasonal variations in black carbon content in Eurasian sector of the Arctic Ocean using MERRA-2 reanalysis data** [12780-121]

12780 2N **Aerosol studies in Kara Sea basin: 89th-90th cruises of RV Akademik Mstislav Keldysh and multiyear data** [12780-122]

12780 2O **Spatial distribution of black carbon concentrations in the atmosphere of Eurasian sector of the Arctic using Merra-2 reanalysis data** [12780-123]

12780 2P **Investigation of the woody vegetation spectra dependence on the measurement conditions** [12780-124]

12780 2Q **Evaluation of the hyperspectral monitoring method capabilities for forests areas** [12780-128]

12780 2R **Elemental composition of near-surface aerosol in Moscow under different winter conditions in 2020 and 2021** [12780-131]

12780 2S **Study of the influence of thermal impact from a ground fire on the ignition of a model forest canopy** [12780-135]

12780 2T **Influence of an internal gravity wave on the shape of the spectrum of the vertical component of the wind speed in the atmospheric boundary layer** [12780-141]

12780 2U **Operation of the turbulent lidar in urban conditions** [12780-150]

12780 2V **Features of aerosol optical depth variations over the Baikal region according to the expedition measurements data from 2018 to 2022** [12780-152]

12780 2W **Temporal variations of CO_2 and CH_4 concentrations in the surface atmospheric layer according to measurements in the Middle Urals** [12780-155]

12780 2X **Determination of Cu amount using global horizontal irradiance** [12780-156]

12780 2Y **Prototype of multisensor oriented pyranometer** [12780-157]

12780 2Z **Estimates of how different types (sources) of continental pollutants influence the Arctic atmosphere** [12780-164]

12780 30 **Temperature correction of ozone profiles using data from satellite and lidar sensing of the atmosphere** [12780-176]

12780 31 **Neural network retrieval of optical thickness of horizontally inhomogeneous cloudiness from nadir multispectral radiance data** [12780-177]

12780 32 **Laser pulse propagation in a two-layered cirrostratus cloudiness accounting for multiple scattering** [12780-178]

12780 33 **Multiyear lidar and satellite sensing of the atmosphere: stratospheric and tropospheric ozone profiles** [12780-179]

12780 34 **Verification of the physical optics approximation for the calculation of the light scattering matrixes on polyhedral Platonic bodies** [12780-181]

12780 35 **Mobile lidar for tropospheric ozone sensing: first measurements** [12780-182]

12780 36 **Negative polarization for the light scattering by irregular shaped particles** [12780-183]

12780 37 **Comparative analysis of aerosol characteristics from polar station Cape Baranov and neighboring marine region** [12780-184]

12780 38 **Dependence of the nitrogen luminescence intensity in the filamentation region on the initial parameters of femtosecond laser emission** [12780-185]

12780 39 **Separate retrieval of microphysical parameters in aerosol fraction from the lidar data** [12780-187]

12780 3A **Relationship of the parameters characterizing wind and temperature turbulence intensity** [12780-191]

12780 3B **Reconstruction of the integral distribution function of the aerosol particle number concentration from the light scattering characteristics** [12780-195]

12780 3C **Net primary production for the south of Altai Krai according to ECOSTRESS radiometer data** [12780-206]

12780 3D **Review of characteristics of digital holographic camera for aerosol studies** [12780-209]

12780 3E **Impact of the atmosphere and spectral resolution on the optimal wavelengths selection for satellite methane monitoring** [12780-214]

12780 3F **Comparison of the results of human pulse signal analysis using the wavelet transform and the Hilbert-Huang transform** [12780-215]

12780 3G **Laser ceilometer design and testing** [12780-216]

12780 3H **Experiment on synchronous measurements of wind speed and aerosol scattering coefficient** [12780-231]

12780 3I **Light scattering by ice hexagonal tubes calculated within the geometrical optics approximation** [12780-232]

12780 3J **Light scattering matrix for bullet-rosette aggregates of atmospheric ice particles within the geometrical optics approximation** [12780-233]

12780 3K **Data bank of the optical properties of ice particles of cirrus clouds for interpretation of lidar data of Russian Orbital Station** [12780-236]

12780 3L **Fiber optical meter of methane in atmosphere** [12780-240]

12780 3M **Application of the discrete dipole method and the approximation of physical optics to the problem of light scattering by atmospheric ice crystals of cirrous clouds for remote sensing problems** [12780-251]

12780 3N **Development of software for creating an archive of images of fogging processes over the Yenisei River** [12780-269]

12780 3O **Concentration of $PM_{2.5}$ in the surface atmosphere of the Yenisei riverbed section (within the city of Krasnoyarsk) in the winter period of 2022-2023** [12780-270]

12780 3P **Vertical distribution of aerosol particle concentration in the atmosphere at temperature inversion** [12780-271]

12780 3Q **Optical properties of quasi-horizontally oriented particles of cirrus clouds with normal and exponential distribution function over spatial orientation** [12780-293]

12780 3R **Testing of receiving channels of the integrated path carbon dioxide meter in the atmosphere** [12780-294]

12780 3S **Rayleigh lidar investigation of stratospheric gravity waves in high latitudes of Eastern Siberia** [12780-296]

12780 3T **Machine learning methods for LIDAR measurements: review** [12780-298]

12780 3U **Titanium and silicon oxides for infrared AR coating design** [12780-301]

Part Two

OPTICAL INVESTIGATION OF OCEAN

12780 3V **Main directions of hydrooptical research at the Shirshov Institute of Oceanology** [12780-291]

12780 3W **Characterization of suspended particulate matter in the South Kara Sea (Arctic Ocean) in September 2022 as part of the climate experiment** [12780-299]

12780 3X **Analysis of seasonal anomalies of recovered salinity in the Sea of Azov in 2000–2018 by climatology** [12780-3]

12780 3Y **Creation of the experimental station for monitoring wind waves and breaking waves in the coastal zone of Lake Baikal** [12780-4]

12780 3Z **Features of the optical properties of the upper layer of Lake Teletskoye according to the OLCI Level-2 data** [12780-6]

12780 40 **Light backscattering by suspended particles at 700nm in the Black Sea water layer of 0-1000m: bio-argo floats data** [12780-7]

12780 41 **The spectrum of the absorption coefficient of *Chaetoceros curvisetus* Cleve and its features: a laboratory experiment** [12780-9]

12780 42 **Mock-up sample of a dispersive element for submersible spectral instruments** [12780-44]

12780 43 **Development of a mathematical model for measuring optical characteristics of seawater** [12780-82]

12780 44 **Testing methods for laboratory measurements of fluorescence excitation spectra of phytoplankton** [12780-129]

12780 45 **The total suspended matter concentration field structure at the site of waste waters outlet of the Heraclean Peninsula region (Crimea) on the basis of optical observation methods** [12780-168]

12780 46 **Regional algorithm for retrieval of bio-optical properties of the Southern Ocean** [12780-218]

12780 47 **Water transparency and spectral downwelling irradiance in the Black and Azov seas and in Lake Teletskoye** [12780-220]

12780 48 **Submersible dual-frequency fluorimeter for environmental monitoring of marine ecosystems** [12780-248]

12780 49 **Spectral bio-optical properties of Lake Teletskoye in summer** [12780-249]

12780 4A **Analysis of the monthly average salinity of the surface layer of the Sea of Azov, obtained by remote sensing and in situ measurement methods** [12780-265]

12780 4B **Vertical particle fluxes in the Kara Sea in September 2022** [12780-275]

12780 4C **The variability of the suspended sediment concentration in the surface layer in the Mezen Bay and the Mezen and Kuloy estuaries** [12780-281]

12780 4D **Using of ultrasonic spark spectroscopy for in situ elemental analysis of seawater** [12780-282]

12780 4E **Contrast characteristics of sub-mesoscale eddies in satellite ocean color data in the region of Tumen River inflow into Peter the Great Bay** [12780-283]

12780 4F **Seasonal changes in the spectral index of light attenuation by water in the water area of the Novosibirsk reservoir** [12780-285]

12780 4G **Dispersed sedimentary matter in the atmospheric boundary layer over the World Ocean** [12780-286]

12780 4H **Modeling the remote sensing reflectance spectra taking into account the absorption of phycoerythrin** [12780-287]

12780 4I **Bio-optical model for conditions of intense coccolithophore bloom in the Black Sea** [12780-289]

12780 4J **Calculation of the remote sensing reflectance based on the total upwelling radiance measured from the Optik Tu-134 aircraft laboratory** [12780-290]

12780 4K **Aerosol contribution to the radiance of the atmosphere-ocean system: validation of the linear-in-aerosol-optical-thickness model** [12780-292]

12780 4L **Diffusion approximation for the integrated cavity absorption meter** [12780-295]

12780 4M **Bio-optical and hydrological characteristics of the waters of Blagopoluchiya Bay in the late autumn season** [12780-300]

12780 4N **Signatures of atmospheric waves revealed with the satellite ocean color scanner SeaWiFS** [12780-302]

PHYSICS OF THE TROPOSPHERE

12780 4O **Seasonal variability of precipitations over the territory of Russia for 1966-2021** [12780-5]

12780 4P **Radiometric research of the winter atmosphere in the city of Chita in the infrared and microwave ranges** [12780-17]

12780 4Q **Characteristics of the dynamics and relationships of the troposphere and stratosphere in the winter period 2022-2023** [12780-31]

12780 4R **Evaluation of recent tendencies in air humidity change in the atmospheric boundary layer over Siberia** [12780-49]

12780 4S **Current climate changes in the atmospheric boundary layer over the Siberian region** [12780-50]

12780 4T **Average seasonal humidity trends in the atmospheric boundary layer over Siberia** [12780-51]

12780 4U **Modeling of the Arctic subsea permafrost thawing under possible climate warming** [12780-52]

12780 4V **Influence of short-term fluctuations in ambient air temperature on the increase of hospitalization cases related to the COVID-19 pandemic wave in Tomsk in 2022** [12780-54]

12780 4W **Base height estimation for multi-layer clouds from passive remote sensing data** [12780-60]

12780 4X **Comparison of satellite and ground-based measurements of tropospheric ozone** [12780-65]

12780 4Y **Turbulent flows of temperature variance in the atmospheric surface layer** [12780-66]

12780 4Z **Comparison of experimental and model estimates of vertical turbulent heat fluxes in the atmospheric surface layer** [12780-67]

12780 50 **Variance of air temperature in the atmospheric surface layer with temperature inversion** [12780-68]

12780 51 **Correlation of vertical wind and air temperature variances with the vertical turbulent heat flux in the atmospheric surface layer** [12780-69]

12780 52 **Evolution of interannual sea surface temperature variability in the tropical Pacific** [12780-70]

12780 53 **On the question of climate continentality in Eastern Siberia** [12780-74]

12780 54 **Study of formation of the Crimean bora on background of general atmospheric circulation** [12780-86]

12780 55 **Influence of cosmic radiation and solar activity on the change of dry and wet periods in the Crimea** [12780-87]

12780 56 **Changes in the total moisture content of the troposphere according to the data of GPS measurements and radiosondes** [12780-97]

12780 57 **Numerical modeling of nitrogen dioxide for the Fonovaya Observatory and TOR-station** [12780-109]

12780 58 **Measurements of nitrogen dioxide fluxes in the surface layer for the territory of the Fonovaya Observatory** [12780-110]

12780 59 **Numerical study of the stability and destruction of atmospheric temperature inversions under various meteorological conditions** [12780-111]

12780 5A **On location studies of the vertical gradient in the lower 10-meter layer of the surface atmosphere** [12780-112]

12780 5B **Estimations of smoke plumes parameters from remote sensing data** [12780-116]

12780 5C **Electric field variations in the surface layer of the atmosphere during the magnetic storm on 15 February 2023** [12780-125]

12780 5D **Variability in base height of cumulonimbus clouds over Western Siberia based on ground remote sensing data** [12780-127]

12780 5E **Hypothetical scenarios of microplastics propagation in Lake Baikal** [12780-138]

12780 5F **Statistical analysis of eight-day variations of the Umov vector in the lower 200-meter layer of the atmosphere** [12780-142]

12780 5G **Influence of inversion on the diffusion of a passive impurity over a heat island with large-scale roughness** [12780-144]

12780 5H **Evaluation of the atmospheric integral water vapor variability during strong convection** [12780-145]

12780 5I **Prediction of atmospheric air pollution by $PM_{2.5}$ particles based on artificial neural networks** [12780-147]

12780 5J **Variability of atmospheric electrical quantities in the mountain-steppe landscapes of Southern Siberia** [12780-148]

12780 5K **Variability of the surface electric field during a sandstorm in an arid region of Southern Siberia** [12780-149]

12780 5L **Application of satellite measurements for the atmospheric aerosol field assessment by the method of fluid-location of the atmosphere** [12780-151]

12780 5M **Estimation of the atmospheric aerosol concentration over the territory of the Ural Federal District based on CALIPSO satellite data** [12780-153]

12780 5N **Effect of summer air temperature on the concentration of microparticles according to the data from the Mikhnevo observatory** [12780-160]

12780 5O **Thin structure of diurnal variations of the vertical wind veer from minisodar data** [12780-161]

12780 5P **Microphysical extrapolation method in studying optical characteristics of smoke** [12780-162]

12780 5Q **Identification of dynamic variables capturing interannual behavior of ENSO based on ocean heat content data** [12780-169]

12780 5R **Magnetic, electric, and ionospheric effects of catastrophic earthquakes in Turkey on 6 February 2023** [12780-170]

12780 5S **Environmental problems of urban territories** [12780-171]

12780 5T **Multifunctional software of the OIAP RAS for processing and analysis of orbital data on the atmospheric composition: tasks, possibilities, application results, and ways of development** [12780-175]

12780 5U **Natural potentials concurrent to geomagnetic variations in the cryolithozone** [12780-180]

12780 5V **Spatial and temporal distribution of aerosol and gas impurities in the water area of Lake Baikal according to the results of route measurements in 2022** [12780-188]

12780 5W **Results of measurements of the aerosol and gaseous composition of the atmosphere at the monitoring station of the Baikal natural territory Boyarsky** [12780-190]

12780 5X **Variability of aerosol concentrations of fractions PM_{10} and $PM_{2.5}$ in the atmosphere surface layer at the reference monitoring station Boyarsky** [12780-193]

12780 5Y **Impact of the uncertainty of reconstruction of climate changes in the last glacial cycle on modelling of ice sheets dynamics** [12780-194]

12780 5Z **Regional features of thunderstorm activity based on observations by the Nizhny Novgorod lightning detection network** [12780-197]

12780 60 **Analysis of the response of precipitation in Russia to El Niño** [12780-201]

12780 61 **Evaluation of the model of weighted mean temperature in the troposphere over Irkutsk and Yakutsk cities** [12780-204]

12780 62 **Regression model for reconstruction of the total methane content according to the data from AIRS hyperspectrometer and chemical transport model MOZART-4** [12780-205]

12780 63 **Influence of cyclonic and anticyclonic circulation patterns in lower troposphere on changes in the mass balance of glaciers in the South of Eastern Siberia** [12780-207]

12780 64 **Study of track ionization in the atmospheric radioactive plumes to detect artificial increased radioactivity** [12780-210]

12780 65 **Analysis of a swirling gas flow combustion in a channel with a porous insert** [12780-211]

12780 66 **Studying the possibilities of a microwave radiometer for monitoring increased radioactivity in the plume of gas-aerosol emissions from nuclear power plants with fast neutrons reactors** [12780-212]

12780 67 **Forms of signals observed as a result of electrokinetic phenomena on the coastline of Lake Baikal** [12780-213]

12780 68 **Emission sources identification scenario for a three-dimensional atmospheric transport and transformation model** [12780-219]

12780 69 **Clustering methods usage for the temperature stratification typing of the atmosphere surface layer** [12780-221]

12780 6A **Numerical study of a sensitivity operator-based emission sources identification algorithm with nonlinear measurement operator** [12780-223]

12780 6B **Spatial diversity of variations of lightning activity in North-East Asia in 2009–2022** [12780-228]

12780 6C **Application the complex WRF/CAMx models to study the influence of adverse weather conditions on air quality in Tomsk city** [12780-229]

12780 6D **Formation of induced atmospheric turbulence by a forest fire seat** [12780-230]

12780 6E **Technologies and measurement features applied at Eastern Siberia infrasound station** [12780-234]

12780 6F **Modernization of the station for monitoring the Earth's natural electromagnetic field in the VLF range at the Verhnyaya Berezovka Station near Ulan-Ude** [12780-235]

12780 6G **Assessment of the relationship between adverse weather conditions, Black Sky regime, and COVID-19 morbidity in Tomsk in 2022** [12780-237]

12780 6H **Monitoring of post-fire reforestation based on vegetation indices of optical and radio bands** [12780-238]

12780 6I **Applied digital data monitoring platform for ULAZ (Ulan-Ude) and BADG (Badary) continuous high-precision GPS measurements** [12780-261]

12780 6J **Numerical simulation of meteorological effects of deforestation using an atmospheric finite element model** [12780-262]

12780 6K **The influence of the street canyon geometry on the distribution of the impurity concentration** [12780-268]

12780 6L **Application of the Lagrangian stochastic dispersion model for urban air pollution simulation** [12780-272]

12780 6M **Numerical modeling of heat transfer of an equilibrium dissociating gas in a swirling flow** [12780-280]

12780 6N **Investigation of atmospheric and lithospheric anomalies consistency in the Tomsk region in winter** [12780-284]

PHYSICS OF THE MIDDLE AND UPPER ATMOSPHERE

12780 6O **Influence of atmospheric parameters variations on the accuracy of calculation of the electron concentration in the D-region** [12780-15]

12780 6P **Arctic polar vortex dynamics according to the vortex delineation method** [12780-32]

12780 6Q **Technique of ionospheric parameters automatic determination from data of vertical sounding with a continuous chirp signal** [12780-46]

12780 6R **Automatic interpretation of ionograms of oblique sounding with a continuous chirp signal based on hybrid algorithms** [12780-47]

12780 6S **Disturbance of geophysical fields during explosion Tomsk bolide 16 October 2022** [12780-63]

12780 6T **Atmospheric effects of a strong fire in Moscow on 9 December 2022** [12780-64]

12780 6U **Images of plasma irregularities obtained from spatial field processing under phase noise conditions** [12780-83]

12780 6V **Geomagnetic variations associated with the blowing stage or Plinian type volcanic eruptions** [12780-85]

12780 6W **Dynamics of background stratospheric aerosol over Tomsk in 2022 from the lidar monitoring data** [12780-88]

12780 6X **Comparison of the results of lidar temperature measurements in the middle stratosphere over Tomsk with the ERA5 reanalysis data** [12780-89]

12780 6Y **Lidar complex of the small station of high-altitude atmospheric sensing of the IAO SB RAS: software-hardware control system** [12780-90]

12780 6Z **Thermal regime of the middle atmosphere over Tomsk in 2022 from the lidar monitoring data** [12780-91]

12780 70 **Possibility to apply ionospheric electric potential in the problem of solar-troposphere relations** [12780-92]

12780 71 **Solar eclipse effects on 10 June 2021 in amplitude variations of VLF signals registering in Yakutsk** [12780-94]

12780 72 **Time series forecasting with multilayer perceptrons** [12780-114]

12780 73 **Meteorological data analysis using extreme learning machines** [12780-115]

12780 74 **Correlation relations of long-wave disturbances in the upper atmosphere** [12780-130]

12780 75 **Information retrieval from long term mesospheric data series: an improvement of excited hydroxyl airglow model** [12780-132]

12780 76 **Comparative analysis of the effect of geomagnetic storms on characteristics of hydroxyl (6-2) emission and NmF2 peak electron density** [12780-133]

12780 77 **Retrieval of nighttime distributions of the mesosphere: lower thermosphere characteristics from SABER/TIMED data** [12780-134]

12780 78 **Diagnostics of the integral parameters of the upper atmosphere's thin structure from radio-beacons' data** [12780-136]

12780 79 **Investigation of stationary planetary waves interactions at different stages of SSW using reanalysis data** [12780-163]

12780 7A **Monitoring of geophysical fields when carrying out mass explosions at Lebedinsky and Stoilensky quarries** [12780-166]

12780 7B **Determination of sudden stratospheric warming dates and their classification according to the JRA-55 reanalysis data** [12780-172]

12780 7C **Numerical simulation of the spectrum of secondary acoustic-gravity waves in the middle and upper atmosphere** [12780-174]

12780 7D **Automatic processing of lowest observed frequencies using oblique incidence sounding data during solar x-ray flares** [12780-186]

12780 7E **Climatology of atmospheric parameters in mesosphere-lower thermosphere region of the Southern of Eastern Siberia.** [12780-200]

12780 7F **Differential correction of ionospheric delay of GNSS signals in single-frequency measurements** [12780-203]

12780 7G **Topological properties of satellite monitoring time series for the interplanetary magnetic field** [12780-222]

12780 7H **Simulation of VHF signal generated by avalanche of relativistic runaway electrons** [12780-224]

12780 7I **Analysis of sprite activity over the territory of Russia based on WWLLN data for 2015-2021** [12780-226]

12780 7J **Complex approach to the detection of ionospheric anomalies based on ionospheric foF2 critical frequency data** [12780-227]

12780 7K **Possibilities of laser sensing of gas leaks from orbital vehicles** [12780-255]

12780 7L **Study of the spectral composition of waves in the lower ionospheric layers according to the data of the SuperDARN and SEKIRA radars using the ARIMA model** [12780-263]

12780 7M **Study of the semiconductor materials influence in measuring technology on the measure efficiency in upper layers of the atmosphere** [12780-266]

12780 7N **Photochemical equilibrium of odd oxygen and hydrogen families at mesospheric altitudes using a three-dimensional chemistry-transport model** [12780-273]
