

PROCEEDINGS OF SPIE

Asia-Pacific Optical Sensors Conference (APOS 2023)

**Tiegen Liu
Yuwen Qin
Yunjiang Rao
Zuyuan He**
Editors

**12–16 June 2023
Tianjin, China**

Sponsored by
Tianjin University

Technical Sponsor
SPIE

Organized by
School of Precision Instrument and Opto-Electronics, Tianjin University (China)
Key Laboratory of Optoelectronics Information Technology, Ministry of Education,
Tianjin University (China)
Tianjin optical Fiber Sensing Engineering Center (China)

SPIE

Volume 12813

Proceedings of SPIE 0277-786X, V. 12813

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Asia-Pacific Optical Sensors Conference (APOS 2023)*, edited by Tiegeng Liu, Yuwen Qin, Yunjiang Rao, Zuyuan He, Proc. of SPIE 12813, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ASIA-PACIFIC OPTICAL SENSORS CONFERENCE (APOS 2023)

- 12813 02 **Batch-renormalization denoising network for SNR enhancement of BOTDA** [12813-2]
- 12813 03 **A Φ -OTDR event identification based on data augmentation with TSG** [12813-3]
- 12813 04 **A novel method for distributed magnetic field measurement based on polarization-sensitive OFDR** [12813-4]
- 12813 05 **Noise suppression of Rayleigh scattering enhanced Φ -OTDR sensing system** [12813-5]
- 12813 06 **Electrochemical behavior investigation of ITO coated optical fiber** [12813-6]
- 12813 07 **A high-speed demodulation scheme for Φ -OTDR system based on dual-sideband modulation** [12813-8]
- 12813 08 **Simultaneous low- and high-wavenumber optical fiber CARS probe using vector adjustment and pulse-to-pulse alignment** [12813-10]
- 12813 09 **Rapid phase interrogation method for dynamic pressure measurement based on Fabry-Perot sensor** [12813-12]
- 12813 0A **Ultra-long-range modulated asymmetric vibration sensor based on high-frequency carrier** [12813-18]
- 12813 0B **Optical fiber distributed acoustic sensing based on difference-frequency COTDR** [12813-19]
- 12813 0C **Method of NH₃ gas detection based on fuzzy neural network** [12813-20]
- 12813 0D **Acoustic-optomechanical oscillator for low noise equivalent pressure and large broadband response acoustic sensing applications** [12813-21]
- 12813 0E **Vibration detection system based on directly modulated chirped pulses and grating pair** [12813-24]
- 12813 0F **Temperature-insensitive strain measurement using a microwave photonic filter based on chirped fiber Bragg gratings** [12813-26]
- 12813 0G **Retrieval of carbon dioxide concentrations using Tm-doped laser with deep learning algorithm** [12813-27]

- 12813 0H **High-robustness polarization-based optical fiber Fabry-Perot microphone** [12813-28]
- 12813 0I **Visual robotic arm aided laser standoff methane leak detection** [12813-29]
