Solid State Batteries

Volume 1: Emerging Materials and Applications
Library of Congress Cataloging-in-Publication Data

Names: Gupta, Ram K., editor.
Title: Solid state batteries / Ram K. Gupta, editor, Pittsburg State University, Pittsburg, Kansas, United States.
Other titles: Solid state batteries (American Chemical Society)
Subjects: LCSH: Solid state batteries.
Classification: LCC TK2942 .S55 2022 (print) | LCC TK2942 (ebook) | DDC 621.31/242--dc23/eng/20221017
LC record available at https://lccn.loc.gov/2022024895
LC ebook record available at https://lccn.loc.gov/2022024896

The citation of trade names and/or names of manufacturers in this publication is not to be construed as an endorsement or as approval by ACS of the commercial products or services referenced herein; nor should the mere reference herein to any drawing, specification, chemical process, or other data be regarded as a license or as a conveyance of any right or permission to the holder, reader, or any other person or corporation, to manufacture, reproduce, use, or sell any patented invention or copyrighted work that may in any way be related thereto. Registered names, trademarks, etc., used in this publication, even without specific indication thereof, are not to be considered unprotected by law.

PRINTED IN THE UNITED STATES OF AMERICA
## Contents

Preface .................................................................................................................................................. ix

1. **Solid-State Batteries: An Introduction** .................................................................................... 1
   Yonglin Huang, Bowen Shao, and Fudong Han

2. **Solid-State Rechargeable Lithium-Ion Batteries: Component Chemistries and Battery Architectures** ......................................................................................................................... 21
   Tenzin Insel and Ram K. Gupta

3. **Methods and Techniques of Solid-State Batteries** ................................................................... 39
   Siddharth Sradhasagar, Soobhankar Pati, and Amritendu Roy

4. **Mathematical Modeling for Enhanced Properties** .................................................................... 91
   Shunli Wang and Wenhua Xu

5. **Mathematical Modeling of Aging Mechanisms in Lithium-Ion Batteries** ............................... 111
   M. S. S. Malik and Mubashir Gulzar

6. **Polymer-Based Solid-State Batteries** ....................................................................................... 135
   Mingyang Xin, Yanan Li, Lina Cong, Siru Chen, Xinming Zhang, Haoming Xie, and Yulong Liu

7. **Recent Developments in Polymeric Composites for Solid-State Batteries** ............................. 167
   Gabrielle Foran, David Lepage, Steeve Rousselot, and Mickael Dolle

8. **Polymer-Based Solid-State Electrolytes** .................................................................................. 201
   Muhammad Irfan, Zeheng Yang, Jianhui Su, and Weixin Zhang

9. **Anionic Polyelectrolytes for Batteries** ..................................................................................... 233
   Gongyue Huang and Haijin Zhu

10. **Cationic Solid-State Electrolytes** ............................................................................................. 255
    Zhengkun Xie, Jiajia Wang, Xiyan Yue, Abuliti Abudula, and Guoqing Guan

11. **Sodium-Ion Solid-State Electrolyte** ......................................................................................... 275
    Yuyu Li and Ming Xie

12. **Ceramic-Based Solid-State Electrolytes** .................................................................................. 295
    Jianhang Wang, Huiling Zhao, and Ying Bai

13. **Sulfide-Based Solid-State Electrolytes** ..................................................................................... 319
    N. C. Rosero-Navarro, M. Calpa, A. Miura, and K. Tadanaga

14. **Hydrotorate-Based Solid Electrolytes for All-Solid-State Batteries** ........................................ 353
    Ryo Asakura, Arndt Remhof, and Corsin Battaglia

vii
15. Solid Composite Electrolytes for Solid-State Alkali Metal Batteries........................................ 395
   Yang Li, Xiaolin Guo, and Hui Wang

16. Designing Solid-State Composite Electrolytes........................................................................ 425
   Chenglin Yan

Editor’s Biography ................................................................................................................................. 441
