### Monday, June 6, 2022

07:00 - 08:00	Breakfast
	Session: Processing & Properties Chairs: Bill Fahrenholtz, Jon Binner
08:00 – 08:10	<b>Conference Welcome and Expectations</b> Carmen Carney, Air Force Research Laboratory, USA Ram Darolia
8:10 – 8:15	<b>Session Introduction</b> Bill Fahrenholtz, Jon Binner
08:15 – 08:35	Investigation of the oxidation resistance of ZrB <sub>2</sub> -based monoliths using polymer-derived Si(Zr,B)CN as sintering aid Nils-Christian Petry, DECHEMA-Forschungsinstitut, Germany
08:35 – 08:55	The zeta phase in the transition metal carbides and nitrides: Structure, microstructure and properties Christopher Weinberger, Colorado State University, USA
08:55 – 09:15	Textured UHTC borides using extremely low magnetic fields: influence of colloidal processing parameters and material selection 3 Juan Diego Shiraishi, Virginia Tech, USA
09:15 – 09:35	Plasticity of ZrB <sub>2</sub> grains during micropillar compression: The effect of anisotropy, temperature and dislocations 4 Tamás Csanádi, Institute of Materials Research, Slovakia
09:35 – 10:15	Coffee Break
10:15 – 10:35	Highly Stable Nanolamellar MXene-derived Carbides by Phase5Transformation of Ti <sub>3</sub> C2Tx and Mo2TiC2Tx MXenes5Babak Anasori, Indiana University-Purdue University Indianapolis, USA
10:35 – 10:55	<b>Oxidation of high entropy ultra-high temperature ceramics</b> Elizabeth Opila, University of Virginia, USA
10:55 – 11:15	Tungsten diboride for high energy nuclear applications7James Davidson, Imperial College London, United Kingdom7
11:15 – 11:35	Carbon influence on the fracture toughness of transition metal carbides Xingyuan Zhao, Colorado School of Mines, USA
11:35 – 11:55	Discussion
11:55 – 13:30	Lunch
	Session: Fundamental Properties Chairs: Chris Weinberger, Kris Behler
13:30 – 13:35	Session Introduction Chris Weinberger, Kris Behler
13:35 – 13:55	Experimental techniques to study structure and thermodynamics at ultra- high temperatures 9 Sergey V. Ushakov, Arizona State University, USA

### Monday, June 6, 2022 (continued)

13:55 – 14:15	<i>In-situ</i> high temperature spatially resolved X-ray diffraction of TiB <sub>2</sub> up to ~3250 °C	10
	Scott McCormack, University of California, Davis, USA	
14:15 – 14:35	<b>Design of Ultra-High Temperature Ceramics for Oxidation Resistance</b> Niquana Smith, University of Virginia, USA	
14:35 – 14:55	Short-range chemical environment versus long-range chemical homogeneity analyses in high-entropy transition metal AIB <sub>2</sub> -type diboride solid solutions Frederic Monteverde, CNR-ISTEC, Italy	11
14:55 – 15:25	Coffee Break	
15:25 – 15:45	First-principles prediction of thermal conductivity of zirconium carbide and hafnium carbide at ultra-high temperatures Tianli Feng, University of Utah, USA	12
15:45 – 16:05	From the atomic scale to the bulk: Ultra high temperature evaluation of metal diborides MB <sub>2</sub> (M = Ta, Ti, Hf, Zr, Nb) Elizabeth Sobalvarro Converse, Lawrence Livermore National Laboratory, USA	13
16:05 – 16:25	Modeling environmental effects in MeB <sub>2</sub> /SiC UHTCs: Oxidation by oxygen and water vapor Pavel Mogilevsky, UES Inc., USA	14
16:25 – 16:45	Stress distribution analysis in zirconium diboride and silica carbide (ZrB <sub>2</sub> - SiC) based thermal protection system under hypersonic flight conditions using a machine learning driven approach Carmine Zuccarini, Kingston University London, United Kingdom	15
16:45 – 17:00	Break	
17:00 – 20:00	Poster Session with heavy hors d'oeuvres and wine/beer/soft drinks	

### Tuesday, June 7, 2022

07:00 - 08:00	Breakfast	
	Session: UHTC-CMCs & Coatings Chairs: Mike Cinibulk, Lisa Rueschhoff	
08:00 - 08:05	Session Introduction Mike Cinibulk, Lisa Rueschhoff	
08:05 – 08:25	Advances and challenges in the development of UHTCMCs - A review of the C3harme project Diletta Sciti, ISTEC-CNR, Italy	
08:25 – 08:45	The AM3aC2A Project: Multiscale approach for modeling CMC and UHTCMC materials for reusable components for aerospace17Mario De Stefano Fumo, Italian Aerospace Research Centre, Italy17	
08:45 - 09:05	Influence of Nb coating on the oxidation behavior of ZrB₂ Jan Erik Förster, German Aerospace Center, Germany 18	
09:05 – 09:25	Novel polymer-derived carbide and boride refractory ceramics Brad Pindzola, Triton Systems Inc, USA 19	
09:25 - 09:45	Laser additive manufacturing of ultra high temperature ceramics Steven Storck, Johns Hopkins University-Applied Physics Laboratory, USA 20	
09:45 – 10:15	Coffee Break	
10:15 – 10:35	Thermal ablation behaviour of ultra-high temperature ceramic matrixcomposites made by RF enhanced chemical vapour infiltration21Jon Binner, University of Birmingham, United Kingdom	
10:35 – 10:55	Thermodynamic and experimental SiC-ZrC CVD process developmentBenjamin Lam, Oak Ridge National Laboratory, USA22	
10:55 – 11:15	<b>Oxidation behavior of Cf / MC – SiC (with M = Hf, Zr) composites in</b> <b>an oxyacetylene torch environment under over oxygen concentration</b> Thomas Bourdeau, Laboratory for thermo-structural composites LCTS, France	
11:15 – 11:35	<b>Zirconium Carbide Oxidation and Passivation for Nuclear Fuel Applications</b> Allison Rzepka. UIUC Department of Mechanical Science and Engineering, USA	24
11:35 – 11:55	UHTC coatings obtained by plasma spraying: Characterization and 25 oxidation behavior Arthur Charrue, CEA-DAM Le Ripault, France	
11:55 – 15:30	Lunch / Free time	
	<u>Session: Near Net Shape Processing</u> Chairs: Greg Hilmas, Carolina Tallon	
15:30 – 15:35	<b>Session Introduction</b> Greg Hilmas, Carolina Tallon	
15:35 – 15:55	Additive manufacturing of chopped fiber ultra-high ceramic composites 2 Lisa Rueschhoff, Air Force Research Laboratory, USA	6

### Tuesday, June 7, 2022 (continued)

15:55 – 16:15	Low-toxity gelcasting to 3D shaping of UHTCs Carolina Tallon, Virginia Tech, USA 27	
16:15 – 16:35	<b>Direct ink writing of ultra-high temperature ceramics</b> 28 Swetha Chandrasekaran, Lawrence Livermore National Laboratory, USA	
16:35 – 16:55	Additive manufacturing enabling W-SiC and W-ZrB2-SiC heterogeneous materials David Mitchell, Oak Ridge National Laboratory, USA	29
16:55 – 17:15	Discussion	
17:15 – 18:00	Break	
18:00 – 20:00	Conference Dinner	

## Wednesday, June 8, 2022

07:00 – 08:00	Breakfast	
	Session: Engineered Structures Chairs: Diletta Sciti, Daniel Butts	
08:00 - 08:05	<b>Session Introduction</b> Diletta Sciti, Daniel Butts	
08:05 – 08:25	Ultra-high temperature ceramics for transpiration cooling applications in 3 hypersonic vehicles Matthew McGilvray, University of Oxford, United Kingdom	0
08:25 – 08:45	<b>Porous UHTCs for transpiration cooling of hypersonic flight</b> Rowan Hedgecock, Imperial College London, United Kingdom	
08:45 – 09:05	Ultra-high temperature ceramics with exceptional strength at elevated temperature 32 Laura Silvestroni, CNR-ISTEC, Italy	2
09:05 – 09:25	Characterization of ultra-high temperature materials produced by rapid- laser chemical vapor deposition (R-LCVD) 33 Jeff Vervlied, Free Form Fibers, USA	
09:25 – 09:45	Integrated self-healing thermal protection for high-speed vehicles 34 Steven Storck, Johns Hopkins University, Applied Physics Laboratory, USA	
09:45 – 10:15	Coffee Break Session: Extreme Environment Testing	
10:15 – 10:20	Chairs: Frederick Monteverde, Scott McCormack Session Introduction Frederick Monteverde, Scott McCormack	
10:20 – 10:40	Diagnostics for improved understanding of test environment and material interactions to advance oxidation-degradation models of UHTCs Michael K. Cinibulk, Air Force Research Laboratory, USA	35
10:40 – 11:00	Plasma wind tunnel testing of UHTC coated components for hypersonic applications36Mario De Stefano Fumo, Italian Aerospace Research Centre, Italy	
11:00 – 11:20	Characterization & testing in extreme, applicable environments37Bhavesh V. Patel, Southern Research Institute, USA37	
	Session: High Entropy Materials I Chairs: Greg Thompson, Lavina Backman	
11:20 – 10:25	<b>Session Introduction</b> Greg Thompson, Lavina Backman	
11:25 – 11:45	Synthesis, densification, and properties of high entropy ultra-high temperature ceramics William Fahrenholtz, Missouri University of Science and Technology, USA	

### Wednesday, June 8, 2022 (continued)

11:45 – 12:05	Synthesis and crystallography of high entropy metal carbides: A new class of ultrahigh temperature and irradiation resistant ceramics Olivia A. Graeve, University of California, San Diego, USA	
12:05 – 12:25	<b>Processing of high entropy carbide based ceramics</b> Lavina Backman, US Naval Research Laboratory, USA 40	
12:25 – 13:30	Lunch	
13:30 – 13:50	Towards complex component manufacture via 3D printing and joining parts Luc J. Vandeperre, Imperial College London, United Kingdom	<b>of</b> 41
13:50 – 14:10	<b>High Entropy Rare Earth A</b> 2 <b>b</b> 2 <b>o</b> 7 <b>Type Zirconates</b> Daniel R. Lowry, Sandia National Laboratories, USA	
14:10 – 14:30	Protective complex oxide film formation in multi-component ultra-high temperature carbides during plasma jet exposure Ambreen Nisar, Florida International University, USA	43
14:30	Announcement of the 2024 Conference and presentation of awards	

## **Poster Presentations**

1.	Multiscale porous high-temperature heat exchanger using ceramic co-extrusion Xiangyu Li, MIT, USA	44
2.	Strategies for printing fibers and post-processing for ceramic matrix composites (CMCs) Corson Cramer, Oak Ridge National Laboratory, USA	45
3.	Mechanical andthermal properties of Zeta phase tantalum carbide atelevated temperatures Evan Schwind, Missouri University of Science and Technology, USA	
4.	<b>Design of ultra-high temperature ceramics for oxidation resistance</b> Niquana Smith, University of Virginia, USA	
5.	<b>Environmental conical nozzle levitator equipped with dual lasers</b> 48 Fox Thorpe, University of California, Davis, USA	
6.	Investigation of anomalous hardness in sub-stoichiometric transition metal carbides using ab-initio simulations Brennan Watkins, Colorado State University, USA	49
7.	Oxidation behavior of Cf / MC – MB2 – SiC (with M = Hf, Zr) composites in an oxyacetylene torch environment Thomas Bourdeau, Laboratory for thermo-structural composites LCTS (CNRS-CEA-Safran- UB), France	50
8.	Finite difference simulation ofphasetransformation kinetics in transition metal carbide composites John Carter Stotts, Colorado State University, USA	51
9.	Mixing the transition metals in transition metal carbides52Christopher Weinberger, Colorado State University, USA52	
10.	Oxidation kinetics of sub-stoichiometric ZrCX via furnace testing to 2500°C / 1 atm air Mark Opeka, Southern Research Institute, USA	53
11.	<b>Oxidation of TaC-HfC blends densified by spark plasma sintering</b> Maritza Sanchez, University of California, San Diego, USA 54	
12.	Computational study of temperature in a millimeter wave heat exchanger with an AIN:Mo Susceptor on an isothermal metal plate Vadim Yakovlev, Worcester Polytechnic Institute, USA	55
13.	Cold spray deposition of metallic-UHTC compositesMichael Large, University of Alabama, USA56	
14.	Phase evolution in thermally annealed metallic-UHTC composites57Michael Large, University of Alabama, USA57	
15.	Materials processing and property-structure characterization capabilities at The University of Alabama Gregory Thompson, The University of Alabama, USA	58

16.	Novel polymer-derived carbide and boride refractory ceramics Brad Pindzola, Triton Systems Inc., USA	59		
17.	The development of polymer-derived Si(AI)CN CMC for high temperature Muhammed Younas, University of Birmingham, United Kingdom	applications		60
18.	Diffusional and microstructural profiles in metallic-to-UHTC conversion to carbonization Haas Blacksher, The University of Alabama, USA	у	61	
19.	CuAAC for inorganic preceramic polymer synthesis Matthew B. Dickerson, US Air Force (AFRL), USA
