Advances in Powder Metallurgy & Particulate Materials—2023

CONTENTS

State of the North American PM Industry—2023	7
Rodney Brennen, President, Metal Powder Industries Federation	
Part 1— Modeling of Metal AM Materials, Components & Processes	15
Part 2— Design of Metal AM Components	45
Part 3— Particulate Production for Metal AM	66
Part 4— Metal AM Build Processes)	142
Part 5— Metal AM Sintering	296
Part 6— Metal AM Post-Build Operations	342
Part 7— Metal AM Materials	375
Part 8— Metal AM Material Properties	819
Part 9— Metal AM Testing & Evaluation	983
Part 10— Metal AM Applications	1080
Subject Index	
Author Index	

Category 1 — Modeling of Metal AM Materials, Components & Processes

Control of AISI 4340 As-Printed Hardness via LPBF Parameter Selection

Ilan David Rogalsky, Mohsen K. Keshavarz, Amin Molavi-Kakhki, and Mihaela Vlasea.....16

Finite Element Modeling of Mechanical Properties of 3D Printed 718 Nickel-Based Superalloy With CrN Coating

Amir Abbas Yahyaieian, Tejesh Dube, Hassan Fatahbeygi, Mahdi Ghanati,
Zhe Lu, and Jing Zhang.....33

Category 2 — Design of Metal AM Components

Copper Heat Sinks: Design and Fabrication via Sinter Based Material Extrusion (MEX) 3D Printing

Kameswara Pavan Kumar Ajarap, Saleh Khanjar, Julio Izquierdo,
Sundar V. Atre, and Kunal H. Kate.....46

Leveraging Design for Additive Manufacturing to Remedy Low Internal Porosity in Metal Powder Binder Jetting

Daniel R. Juhasz, Mingzhang Yang, Allan D. Rogalsky, Mohsen K. Keshavarz,
Mihaela Vlasea, Martin Laher, and Amin Molavi-Kakhki.....52

Category 3 — Particulate Production for Metal AM

Plasma Gas Atomizer for Refractory Metal Alloys in High-Temperature Applications and Harsh Environments Aamir Abid, Matt Stone, Geof Dusky, and Bryce D’Alba.....	67
Cost-effective Manufacturing of Metal Powders Through Continuous Process by SMS Group T. Brune, Y. Wilkens, and P. Weiland.....	76
Solutions for Increasing AM Grade Powder Yield and Reverting Over-Sized Powder, for Titanium Powder Production James W. Sears.....	83
High-Purity Spherical Tantalum for Additive A. Calvin, and M. Osborne.....	92
Recycling of Oversize Additive Manufacturing Powders Aamir Abid, Matt Stone, Geof Dusky, and Bryce D’Alba.....	103
The Conventional Route of Making Spherical Titanium Alloy Powder MD Emran Hossain, Pei Sun, Changshang Zhou, and Z. Zak Fang.....	110
The Recycling of Water Atomized Tool Steel Powders Used in the Laser Powder Bed Fusion Process Denis Mutel, Simon Gélinas, and Carl Blais.....	120
Influence of Residual Carbon Content on Microstructure and Properties of Copper Produced by Binder Jet John P. Reidy, and Animesh Bose.....	131

Category 4 — Metal AM Build Processes

Effects of Up-skin and Down-skin Parameters on Surface Roughness of Selective Laser Melting Steven Hoover and Xuan Wang.....	144
Design of a Tool for Evaluating the Suitability of Powder Feedstocks and Process Parameters for Powder Bed Fusion Recoating Operations Amalia Thomas, Jamie Clayton, and Candice Majewski.....	151
Method for Evaluating the Effect of Elevated Temperatures on the Flow Properties of AM Feedstock Powders Amalia Thomas, Jamie Clayton, and Candice Majewski.....	167
Additive Manufacture and Material Property Analysis of Crack-Free Electron Beam Melted Pure Tungsten Kurtis I. Watanabe, Alex De La Cruz, and Francisco Medina.....	177
Effect of Particle Size Distribution on the Physical Properties of Binder Jetted 17-4PH Stainless Steel as a Function of Print Axis Nanna L. Bush, Nathan Higgins, and Stephen L. Feldbauer.....	191
A Customized Inkjet 3D Printer for Ceramic Fabrication Using Sugar Andrew Gillespie, Ben Louie Yap, Aliana Binti Shahimi, and Jing Zhang.....	197
Metal Binder Jetting and Metal Material Jetting as Complementary Technologies: A User Perspective Mattia Forgiarini and Cody Cochran.....	203
Additive Manufacturing Process Development DOE for NASA HR-1 Using Laser Blown Powder Directed Energy Deposition Parker Shake, William Evans, and Colton Katsarelis.....	220
Detection of Defects in Parts Produced by Material Extrusion 3D Printing Using In-Line Pressure Measurement Raphaël Côté, Dorian Delbergue, and Vincent Demers.....	231
Material Extrusion 3D Printing Using Low-Viscosity MIM-Like Feedstocks V. Demers.....	243

Development of an Aluminum-based Feedstock for Material Extrusion 3D Printing Dorian Delbergue, Loïc Boudeau, Raphaël Côté, Vincent Demers, Yannig Thomas, and Roger Pelletier.....	258
Beyond Binder Jetting – An Alternate Sinter Based Additive Manufacturing Technology Ben Arnold.....	268
Cold Metal Fusion—Reliable Serial Production in Metal AM Julian Reeh, Christian Staudigel, and Christian Fischer.....	278
Green Body Photopolymerization and Sintering: Shining a Light on Multi-Step Additive Manufacturing of MIM-Quality Metal Parts Brian Adzima, Sarah Dischinger, and Hany Eitouni.....	285

Category 5 — Metal AM Sintering

Physical, Mechanical, and Electrical Properties of Copper Fabricated via Sinter-Based Material Extrusion (MEX) 3D Printing

Kameswara Pavan Kumar Ajarapu, Tom Pelletiers, James Taylor, Carrie Barber, Matteo Zanon, Muktesh Paliwal, Sundar V. Atre, and Kunal H. Kate.....297

Additive Manufacturing of Aluminum Alloy by Metal Fused Filament Fabrication (MF3)

Sihan Zhang, Kameswara Pavan Kumar Ajarapu, Luke Malone, Carrie Barber, Matteo Zanon, James Taylor, Tom Pelletiers, Sundar V. Atre, and Kunal H. Kate.....303

Optimization of the De-Bind Cycle of Sinter-Base Additive Manufactured 17-4 Components

Jeremiah Kahle, Glenn Rishel, Nathan Higgins, Dustin B. Gilmer, Peeyush Nandwana, Brian Smith, and Stephen L. Feldbauer.....321

X-Ray Computed Tomographic Study of Density Gradients Within Binder Jetting and the Influence of Printer Design and Printing Parameters on Ballistic Ejection

Jacob P. Feldbauer, Nathan Higgins, Dustin B. Gilmer, Peeyush Nandwana, and Stephen L. Feldbauer.....332

Category 6 — Metal AM Post-Build Operations

Wear Resistant AM Components Enabled With In-HIP Heat Treatment

Chad Beamer, Pär Arumskog, James Shipley, Anders Magnusson, Ulrik Beste, Julia Sjöström, and Magnus Bergman.....343

Improving the Properties of Titanium Alloy AM Parts via HIP

Jane LaGoy, Thomas Bell, and Oscar Martinez.....355

Varestraint Weldability Testing of Nickel-Based Alloys Built With Laser Blown Powder Directed Energy Deposition Additive Manufacturing

William Evans, Eric Brizes, Jhoan Guzman, and Antonio Ramirez.....366

Category 7 — Metal AM Materials

Additive Manufacturing of Embedded Thermocouples in WC-Co Cutting Tools for Cutting Temperature Measurement Bruno Guimarães, Filipe S. Silva, Cristina M. Fernandes, Daniel Figueiredo, and Georgina Miranda.....	379
Multi-Material Laser Powder Bed Fusion of 420 Stainless Steel-Cu Parts for Plastic Injection Mold Inserts Ângela Cunha, Ana Marques, Filipe Silva, Óscar Carvalho, Flávio Bartolomeu, Michael Gasik, Bruno Trindade, Sónia Pereira, and Paulo Alexandrino	390
Assessing the Impact of Moisture on AM Powder Flowability Louis-Philippe Lefebvre, and Anatolie Timercan.....	407
A Novel, Low-Cost, Highly Alloyed Cast Iron Powder for High Performance Binder Jet Components Olivier Sioui-Latulippe, Jean-Philippe Masse, Vincent Wuelfrath-Poirier, Mathieu Boisvert, Philippe Beaulieu, Todd Jensen, Denis Christopherson, and Gilles L'Espérance.....	421
Effect of Boron on the Sintering and Mechanical Properties of Parts Made from a Similar Steel Powder of AISI 4340 Composition Developed for Binder Jetting William Bouchard, Simon Gélinas, and Carl Blais.....	443
Fabrication of Nearly Fully-Dense Low-Alloy Steels using Water-Atomized Powder and Binder Jetting Mingzhang Yang, Mohsen K. Keshavarz, Mihaela Vlasea, and Amin Molavi-Kakhki.....	455
Development of a Dual Phase - Low Alloy Steel for Laser Powder Bed Fusion (LPBF) Chris Schade, Tom Murphy, and Kerri Horvay	472
Low Temperature Synthesis of Nano-ZrB₂ and LaB₆ and Their Effects on Mechanical, Optical and Magnetic Properties of 17-4PH and 316L Arun K. Chattopadhyay, Tuncay Simsek, and Baris Avar.....	489
Consequences of Powder Reuse on Microstructure Evolution During Laser Powder Bed Fusion of 316L Stainless Steel Madelyn Madrigal-Camacho, Joy Gockel, Mitchell Keeler, and Suveen N. Mathaudhu.....	500

Exploring Water Atomized powder as Feedstock for Metal Binder Jetting Process Mats Persson.....	514
Exploring the Potential of a Novel Multimodal 17-4 PH Stainless Steel Powder for Binder Jetting Arulsevan Arumugham Akilan, Sam Imanieh, Joseph Schramm, Melody Delpazir, and Dylan Tepper.....	523
Multimodal Powder: A Key to Achieving Superior Properties in Binder Jetting of 17-4 PH Alloy Sam Imanieh, Arulsevan Arumugham Akilan, Joseph Schramm, and Dylan Tepper	542
AM Using Novel A8 Tool Steel Powders Produced by Water Atomization William Chaine and Carl Blais.....	554
On the Use of Boron to Promote the Densification of Water-Atomized AISI D2 Tool Steel Designed for Binder Jetting Applications Simon Gelinas, William Bouchard, and Carl Blais.....	578
Development of a Cobalt and Titanium Free Ultra-High Strength Maraging Steel for Laser Powder Bed Fusion Faraz Deirmina, Eleonora Bettini, Mary Kate Johnston, Riccardo Casati, Giorgia Lupi, Andrea Scanavini, and Francesca Lazzarini.....	591
Microstructural Analysis of Functionally Graded Tool Steel-Copper Composite Produced by Laser Powder Bed Fusion and Pressureless Infiltration Mahmoud Osman, Mathieu Brochu, Priti Wanjara, Javad Gholipour, Fabrice Bernier, and Marjan Molavi-Zarandi.....	602
Cost Effective In-Situ Alloying of Ti-Fe by Laser Powder Bed Fusion Jeff Huang, Ammarueda Issariyapat, Shota Kariya, Junko Umeda, and Katsuyoshi Kondoh.....	613
Investigation of the Influence of Powder Oxygen Homogeneity on the Processability and Properties of the L-PBF Processed Ti-6Al-4V J. Arreguin-Zavala, F. Marion, M. Habibnejad, F. Peyrouzet, A. Sahfie, P. Bocher, H. Ghasemi, J. Milanese, and A. Hadadzadeh.....	628

Offsize Particle Size Utilization for Laser Powder Bed Fusion Processing of Plasma Atomized Ti-6Al-4V Powders: Effect of Powder Properties on The Tensile Properties and Surface Roughness of Produced Parts Mahdi Habibnejad-korayem, Manvinder Lalh, Christopher Schunk, Frederic Larouche, and Yu Zou.....	641
Preparation and Characterization of Aluminium Powder-Filled Modified-Polylactic Acid for Fused Filament Fabrication E. Galindo, M. Maric, A. Avalos Postigo, A. Walker, M. Conlon, K. Azari, and M. Brochu.....	679
Processing High-strength Aluminum Alloys Using Direct Metal Deposition (DMD®) Rachel Mancuso, Farhad Ghadamli, Robert Fortuna, and Bhaskar Dutta.....	688
Directed Energy Deposition of 6061 Reactive Additive Manufacturing (RAM) Alloy Designed for Additive Manufacturing (AM) Chloe Johnson, Adam Polizzi, Jeremy Iten, Bhaskar Dutta, and David Waller.....	697
Recent Results on a High Strength Al-Mn-Sc (Zr) Alloy Fabricated by Laser Powder Bed Fusion (LPBF) James Sears, Ken Davis, Sandy Awad, and Dacian Tomas.....	712
Properties of Binder Jetted Al 6061 Miranda Moschel, Nicholas Murphy, Joe Croteau, James Taylor, and Tom Pelletiers.....	722
How the Production of High Quality Pre-Alloyed Powder (e. g., Titanium Alloys) Changed Over the Years from HIP to Additive Manufacturing James W. Sears.....	731
Inconel 718–Copper Bimetallic Joints Fabricated by 3D Multi-Material Laser Powder Bed Fusion for Aerospace Components Ana Marques, Óscar Carvalho, Filipe Samuel Silva, Flávio Bartolomeu, Sónia Pereira, and Paulo Alexandrino.....	741
Role of Al Mixing to Prepare Feedstocks for PBF-LB/M to Develop New HEAs via In-Situ Alloying S Venkatesh Kumaran, Sri Bala Aditya Malladi, Eduard Hryha, and Jose M Torralba.....	756
Metal Binder Jetting of Cobalt Chrome Molybdenum ASTM F75 Lorenzo Marchetti, Fredrik Berg-Lissel, and Mats Persson.....	767

Progress Towards a Titanium-Zirconium-Molybdenum Alloy (TZM) Coreblock Prototype Using Powder Bed Fusion

Michael J. Brand, Robin Montoya Pacheco, William P. Winter,
Eric L. Tegtmeier, and John S. Carpenter.....784

Additive Manufacturing of Tungsten-Copper Bi-Material Structures for Plasma-Facing Component Applications in Fusion Devices

Robert Lürbke, Alexander von Müller, Alexander Feichtmayer,
Thomas Bareth, Armin Rieser, Georg Schlick, and Rudolf Neu.....804

Category 8 — Metal AM Material Properties

Powder Bed Fusion of Strut-based Conformal Metal Metamaterials: Design Considerations to Ensure a Uniform Cross-Sectional Profile for Inclined Struts Haozhang Zhong, Jianfeng Gu, Xuezhe Zhang, Huiping Tang, and Ma Qian.....	821
Hollow-Strut Metal Lattice Materials: A Viable Alternative to Solid-Strut Lattice Materials Jordan Noronha, Haozhang Zhong, Martin Leary, Milan Brandt, and Ma Qian.....	832
Binder Jet Additive Manufacturing of Copper C18150 John P. Reidy, Joseph Hayes, and Kyle Myers.....	843
Microstructure and Mechanical Properties of 316L Stainless Steel Micro Additive Manufactured Components Michael Pires, Masashi Watanabe, Wojciech Z. Misiolek, Gregory T. Pawlikowski, Bradley Schultz, Abe Shocket, and Martin W Bayes.....	858
Powder Feedstock Characterization for DEM Simulation of Laser Powder Bed Fusion Guohong Xie, Kristian Waters, Mathieu Brochu, Martin J. Conlon, and J.A. Muñiz Lerma.....	866
Microstructure and Mechanical Properties of Wear-Resistant Alloys Produced by the Laser Powder Bed Fusion Process Kerri Horvay, Christopher Schade, Thomas Murphy, and Corina Junghetu.....	879
Conductivity in 3D Printed Copper Parts Nicholas Murphy, Miranda Moschel, Joe Croteau, Tom Pelletiers, Derek Kossakowski, Matteo Zanon, and Aljoscha Roch.....	892
Mechanical Properties of Additively Manufactured DuAlumin-3D Alloy Pistons Qigui Wang, Andy Wang, Rich Ricchi, Ronald Petrus, Daniel Wilson, Alex Plotkowski, Amit Shyam, and Allen Haynes.....	899
Predicting Powder Spreadability For Metal AM Aurelien Neveu, Filip Francqui, Paul Lohmuller, Laurent Weiss, Pascal Laheurte, and Geoffroy Lumay.....	910
Microstructure and Mechanical Properties of Free-Sintering Low Alloy Steel Produced by Three Additive Manufacturing Methods Thomas Murphy, Christopher Schade, and Kerri Horvay.....	918

**A Computer Vision Approach to Predict Powder Flowability
for Metal Additive Manufacturing**

Jiahui Zhang, Mahdi Habibnejad-korayem, Zhiying Liu, Tianyi Lyu,
Qiang Sunc, and Yu Zou.....938

Advances in Metal Binder Jetting of Pure Cu

L. Marchetti, M. Forgianini, C. Beamer, F. Berg-Lissel, and M. Persson.....959

**An Investigation on the Impact of Density on Electrical
and Mechanical Properties of Pure Copper in
Binder-Assisted, Sinter-Based Additive Manufacturing**

Jyrrl Figueroa and Mahmood Shirooyeh.....974

Category 9 — Metal AM Testing & Evaluation

Current Challenges of Precision Manufacturing Through Powder Bed Fusion—Laser Beam

Anok Babu Nagaram, Bala Malladi, Lars Nyborg, Lars Manholm, Oskar Talcoth, Ingmar Andersson, Antti Mutanen, and Olli Nyrhilae.....984

Comparing the Spreadability of Powders on a Powder Bed and a Solid Surface to Study the Physics of Powder Layer Formation Over Parts Being Printed and Unbound Powder Areas in AM Printers

Greg Martiska.....996

Detecting Contaminants in Metal Powders using X-ray Fluorescence

Violeta Uricanu, Timothy Glose, Stephen Williams, and John Duffy.....1015

Automated, Reliable, and Comprehensive Universal Powder Testing to Improve Processing Efficiency and Aid Quality Control

Nicholas Monroe.....1029

Investigation of Powder Electrostatics in a Laser Metal Deposition (LMD) Process

Aurelien Neveu, Filip Francqui, and Geoffroy Lumay.....1039

A Review of Rotating Drum Rheometer Measurements Used to Characterize Powders for AM Applications

Greg Martiska.....1045

Analytical Methods for Reducing Binder Saturation Variation in a Sinter-Based Additive Manufacturing Technology

Midhun Gopakumar, Farzin Khorasani, and Payman Torabi.....1061

Stress-Strain Curves Using a Profilometry-based Indentation Plastometry (PIP): Studies on Binder Jet (BJ) and Laser Powder Bed Fusion (PBF-L)

Jimmy Campbell, Tom Southern, Bill Clyne, John Reidy, Aadithya Chitrapur, and Animesh Bose.....1068

Category 10 — Metal AM Applications

Applications of Additively Manufactured Porous Media in Filtration, Flow Control, and Thermal Management

Vincent Palumbo, Nathan Donahue, and James Steele.....1081

An Aluminum Powder Feedstock Designed for High-Throughput Additive Manufacturing Processes

Martin J. Conlon, José A. Muniz-Lerma, Evan Butler-Jones, Kamran Azari, Guohong Xie, Mathieu Brochu, Simon Pun, Taiki Shirai, Eric Quang, and Jeremy Valdecanas.....1100

Application of Additive Manufacturing to Deliver Incremental Production of Conventional Powder Metal Components Without Compaction Tooling

Hope Spuck, Matthew J. Holcomb, and Stephen Feldbauer.....1111

Opening the Door to PM

Robert Swenson.....1118

L-PBF F357 Aluminum Alloy: Heat Treatments and Thermal Aging

Brian Adzima, Sarah Dischinger, and Hany Eitouni.....1128

University-Industry-NIST MEP Partnership for Design and 3D Printing of Legacy Parts: a Case Study

Sihan Zhang, Saleh Khanjar, Kameswara Pavan Kumar Ajjarapu, Jerry Morgan, Andrew Pierce, Sheila Martin, Scott Broughton, William Metcalf, and Kunal Kate.....1139

The Importance of Powder Consistency for AM Aerospace Applications

Eric Bono and Jamie Perozzi.....1149

Metal Binder Jetting of Automotive Components

Mattia Forgiarini and Cody Cochran.....1156

High Pressure Cold Spray Additive Manufacture of GRCop Waveguides for Fusion

J. Scott O'Dell, Michael Renfro, and Dr. Stephen J. Wukitch.....1167

Metal 3D Printing is Transforming Industries Ranging From Aerospace and Automotive to Medical

Ross Adams.....1181
