**Volume 12767**

Proceedings of SPIE 0277-786X, V. 12767

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optoelectronic Imaging and Multimedia Technology X*, edited by Qionghai Dai, Tsutomu Shimura, Zhenrong Zheng, Proc. of SPIE 12767, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510667839

ISBN: 9781510667846 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Symposium Committees*  
xi *Conference Committee*

---

## LIGHT-FIELD IMAGING

---

- 12767 02 **End-to-end metasurface inverse design for NIR computational imaging (Invited Paper)**  
[12767-1]
- 12767 03 **Multi-cost loss-based disparity estimation network from light field** [12767-2]
- 12767 04 **A learning-based method using data augmentation for light field salient object detection**  
[12767-3]
- 12767 05 **Theoretical study on the regulation of transmission properties of two-dimensional optical lattices** [12767-4]

---

## SPECTRAL IMAGING

---

- 12767 06 **Principle of multi-focus infrared image fusion and definition quality parameter evaluation algorithm (Invited Paper)** [12767-5]
- 12767 07 **Grade classification of Alzheimer's disease using hyperspectral ophthalmoscope images**  
[12767-7]
- 12767 08 **Research on visual SLAM system based on near-infrared perception** [12767-8]
- 12767 09 **Spectral-spatial adaptive transformer model for hyperspectral image classification** [12767-9]
- 12767 0A **Spectral detection adversary for confronting against spectral-based object detection**  
[12767-10]
- 12767 0B **Full-Stokes image reconstruction without polarimetric calibration using a FIRNet** [12767-27]

---

## 3D IMAGING

---

- 12767 0C **High-speed all-in-focus 3D imaging technology based on the liquid lens focus scanning (Invited Paper)** [12767-11]
- 12767 0D **Dynamic projection mapping for non-planar objects with a variable focus lens** [12767-12]

- 12767 OE **A binocular vision cooperative measurement method with line structured light** [12767-13]
- 12767 OF **Research on 3D temperature field reconstruction method based on fusion of structured light imaging and infrared thermography** [12767-15]
- 12767 OG **Confidence interval guided single photon LiDAR depth imaging** [12767-16]

---

#### ADAPTIVE OPTICS

---

- 12767 OH **Microlens array wavefront measurement based on transport of intensity equation and hybrid Gerchberg and Saxton iteration (Invited Paper)** [12767-17]
- 12767 OI **Atmospheric turbulence profiling in Korea with SLODAR** [12767-18]
- 12767 OJ **Reconstruction error analysis in LGS tomography for adaptive optics applications** [12767-19]

---

#### MICROSCOPY AND INTELLIGENT IMAGING

---

- 12767 OM **Point spread function engineering based on wavefront phase modulation** [12767-22]
- 12767 OO **Effective caustics simulation for real-time rendering applications** [12767-24]

---

#### INTELLIGENT IMAGING

---

- 12767 OQ **Federative rendering model** [12767-26]

---

#### POSTER SESSION

---

- 12767 OT **Exploration of neural network approaches in tasks of the face liveness detection in biometrical video monitoring systems** [12767-14]
- 12767 OU **Pixel super-resolved holography with complementary patterns** [12767-31]
- 12767 OV **Research on fruit picking recognition based on deep learning** [12767-32]
- 12767 OW **3D LiDAR localization and mapping method incorporating inertial measurement unit** [12767-33]
- 12767 OX **Image-free classification via few-shot learning** [12767-35]

- 12767 0Y **Research on unsupervised learning-based image stitching** [12767-36]
- 12767 0Z **Small object detection for mobile behavior recognition based on Wasserstein distance and partial convolution** [12767-37]
- 12767 10 **Camera calibration method based on improved DLT algorithm** [12767-38]
- 12767 11 **Deep-learning-based CASSI reconstruction with optical aberration correction** [12767-39]
- 12767 15 **A hierarchical image matching method for incremental SFM** [12767-43]
- 12767 18 **Snapshot compressive hyperspectral imaging via polarization conversion metasurface** [12767-46]
- 12767 19 **Fusion-based infrared single-pixel imaging** [12767-47]
- 12767 1A **Variable waist of angular Gaussian distribution laser beam shaping system with intensity and wavefront control** [12767-48]
- 12767 1B **Spectral-attention transformer for single-pixel multispectral reconstruction** [12767-49]
- 12767 1D **Research on sub-pixel shift-based super-resolution imaging by introducing wave-front coding technique** [12767-51]
- 12767 1E **Diagnosis and survival prediction of colorectal cancer using deep learning from the histopathological HE images** [12767-52]
- 12767 1F **Joint layout, object pose, and mesh reconstruction method from scanned point clouds with restoration of missing points** [12767-53]
- 12767 1G **Neural processor architecture design for CNN processing acceleration** [12767-54]
- 12767 1H **3D-scanning system based on monocular vision** [12767-55]
- 12767 1I **Parametric scene model for geometry restoration using differential rendering method** [12767-56]
- 12767 1J **Photon maps acceleration with octree of hash tables** [12767-57]
- 12767 1K **Automatic building of annotated image datasets for training neural networks** [12767-58]
- 12767 1L **Optical properties reconstruction with differentiable rendering** [12767-59]
- 12767 1M **The vehicle color recognition based on enhanced Yolov5 neural network** [12767-60]
- 12767 1N **Two-phase single-image deraining method via sparse blind detection and image inpainting** [12767-61]

12767 1O **Image denoising via multi-scale spatial frequency domain convolutional neural network Noise-Net** [12767-62]

12767 1P **Airborne hyperspectral camera control and data storage system design** [12767-63]

---

**DIGITAL POSTER SESSION**

---

12767 1R **An approach to data fusion with the possibility of combined analysis in the time and frequency domain** [12767-6]

12767 1S **Development of an embedded system for recognizing the position of objects during automatic mounting of semiconductor crystals on a substrate** [12767-30]

12767 1T **An approach for recognizing surface defects in products with a complex helical shape** [12767-65]

12767 1U **Visible watermarks inpainting using deep learning for multimedia application** [12767-66]

12767 1V **Image inpainting with deep adaptive generative models for multimedia computing** [12767-67]
