**Volume 12776**

Proceedings of SPIE 0277-786X, V. 12776

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Infrared, Millimeter-Wave, and Terahertz Technologies X*, edited by Cunlin Zhang, Yiwen E, Masahiko Tani, Proc. of SPIE 12776, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510668010

ISBN: 9781510668027 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Symposium Committees*  
xi *Conference Committee*

---

## TERAHERTZ PHYSICS

---

- 12776 03 **Why do terahertz waves generated from long two-color filament always peak at around 1THz? (Invited Paper)** [12776-2]
- 12776 04 **Soliton-like mode of terahertz radiation generation by few-cycle optical pulses in a gradient waveguide (Invited Paper)** [12776-3]
- 12776 05 **Double-ring coupled structure for efficient sum-frequency generation of longwave mid-infrared signal** [12776-4]
- 12776 07 **Approaches to the study of the evanescent field of terahertz surface plasmon polaritons at the Novosibirsk free electron laser** [12776-6]

---

## TERAHERTZ DEVICES AND DETECTORS

---

- 12776 09 **Design, fabrication, and characterization of a 5-THz MKIDs array (Invited Paper)** [12776-8]
- 12776 0A **Spin-decoupled bifunctional metasurface for THz wavefront manipulation** [12776-9]
- 12776 0B **Broadband anti-reflection coating with diamond and PTFE for terahertz detectors** [12776-10]
- 12776 0C **Terahertz planar surface plasmon interferometry** [12776-11]

---

## TERAHERTZ SYSTEM APPLICATIONS

---

- 12776 0D **Terahertz super-resolution high-speed imaging system and its applications (Invited Paper)** [12776-12]
- 12776 0E **Strong photothermoelectric response of the semimetal ZrTe<sub>3</sub>** [12776-13]
- 12776 0F **Design and application of skin disease biosensor based on terahertz metasurface** [12776-14]

12776 OG **Improving the technique of terahertz time-domain spectroscopy by means of anti-aliasing filtration and undersampling** [12776-15]

12776 OH **Analysis of LDPC coded FSO communication system over correlated gamma-gamma turbulence channel for space shift keying modulation** [12776-16]

---

#### TRANSMISSION AND COMMUNICATION TECHNOLOGIES

---

12776 OJ **Combined high-power terahertz vortex Bessel beams: formation and identification** [12776-19]

12776 OK **PAPR reduction using SLM technique combined with ABO-OFDM for optical wireless communication** [12776-20]

---

#### POSTER SESSION

---

12776 OM **PXIe-based 230 to 300GHz terahertz MSK modulated communication system** [12776-17]

12776 ON **Absorption of terahertz wave by interaction between crossed air-plasmas** [12776-22]

12776 OO **Refractive index sensing based on bound states in the continuum in all-dielectric metasurface** [12776-23]

12776 OP **The impact of atmospheric content changes on space-based infrared detection for aerial targets** [12776-24]

12776 OR **One-dimensional linear integration technique for THz-band SIS** [12776-26]

12776 OS **Performance analysis of baseband signal processing technology for 300GHz terahertz communication** [12776-27]

12776 OT **250GHz metasurfaces directional reflection device based on a cross structure** [12776-28]

12776 OU **Path loss and multipath channel characteristics models in a street canyon for outdoor 220 to 330GHz communication based on ray tracing** [12776-29]

12776 OV **Curing analysis of room temperature silicone rubber based on terahertz time-domain spectroscopy system** [12776-30]

12776 OX **Ultra-long THz Bessel beams based on an axicon system** [12776-32]

12776 OY **Thermographic analysis of a Warring States sword** [12776-33]

12776 OZ **Nonlinear coefficients at telecom wavelengths responsible for the optical and terahertz wave interactions in GaSe:S crystals** [12776-34]

- 12776 10 **Design of 345/650 GHz SIS mixers: backup for the LCT dual-color heterodyne receiver**  
[12776-35]
- 12776 11 **Spectroscopic analysis of molecular motion modes revealed by the terahertz Kerr effect**  
[12776-36]
- 12776 12 **Terahertz sensing of sub-nm dielectric film via electron tunnelling** [12776-37]
- 12776 13 **Removing resonant noise in terahertz permittivity spectra of material based on CWT-ex-VMD method** [12776-38]
- 12776 14 **Graphene-based terahertz bias-driven negative-conductivity metasurface** [12776-39]
- 12776 15 **Characterization of the new semiorganic nonlinear crystal of guanlyurea hydrogen phosphite in the terahertz range** [12776-40]
- 12776 16 **Microwave SQUID multiplexer for readout of transition-edge sensor array** [12776-41]
- 12776 17 **Design and simulation of a dual-polarized twin slot antenna for transition edge sensor detectors**  
[12776-42]
- 12776 18 **All-silicon metasurface-enabled non-coaxial superposition of vector vortex beams** [12776-43]
- 12776 19 **Terahertz time-domain spectral signal noise reduction analysis based on DG-SSA-VMD algorithm** [12776-44]
- 12776 1A **Research of optically beamforming network based on cascaded micro-ring resonator in phased array radar** [12776-45]
- 12776 1B **Algorithm for stitching data from a pair of sensors in the thermal and visible range with free location cameras** [12776-46]
- 12776 1C **Optimizing terahertz generation via axial-length controllable filaments with spatial light modulator** [12776-47]
