

PROCEEDINGS OF SPIE

Fifth International Symposium on High Power Laser Science and Engineering (HPLSE 2023)

Jianqiang Zhu

Editor

16–19 October 2023

Suzhou, China

Organized by

Chinese Laser Press (China)

Soochow University (China)

Co-organized by

General Department of National Major Project, Chinese Academy of Sciences (China)

Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences (China)

China Academy of Engineering Physics (China)

Collaborative Innovation Center of IFSA (China)

Technical Cosponsor and Publisher

SPIE

Volume 12974

Proceedings of SPIE 0277-786X, V. 12974

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fifth International Symposium on High Power Laser Science and Engineering (HPLSE 2023)*, edited by Jianqiang Zhu, Proc. of SPIE 12974, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

FIFTH INTERNATIONAL SYMPOSIUM ON HIGH POWER LASER SCIENCE AND ENGINEERING (HPLSE 2023)

- 12974 02 **Analysis of grating surface organic contamination in chirped pulse amplification system**
[12974-2]
- 12974 03 **Optical computing enhanced wavefront sensing based on cascaded phase modulation layers**
[12974-3]
- 12974 04 **High-power high-repetition-rate Nd:YAG nanosecond slab laser amplifier** [12974-4]
- 12974 05 **Application of acetone planar laser-induced fluorescence technology in density distribution measurement of gas puff load** [12974-5]
- 12974 06 **Numerical investigations of the second-harmonic generation for a 100 J, 1 Hz Nd glass laser in a large-aperture DKDP crystal** [12974-6]
- 12974 07 **LD pumped SESAM mode-locked Tm: CaGdAlO₄ laser** [12974-7]
- 12974 08 **Design and fabrication of dichroic filter with reduced absorption for spectral beam combining**
[12974-8]
- 12974 09 **Study on polarization temperature dependence of large mode field reverse polarization maintaining fiber coupler** [12974-9]
- 12974 0A **Interactions of optical laser below moderate intensity with high energy density plasma in the whistler mode** [12974-11]
- 12974 0B **Deep-learning-based high-resolution recognition of rotating interference images in vortex beam interferometry** [12974-12]
- 12974 0C **Correction method of diffraction effect caused by high power laser transmission in optical system** [12974-13]
- 12974 0D **Wavefront aberrations measurement of freeform surface based on computer-generated hologram technology** [12974-14]
- 12974 0E **Active spectrum tailoring of in-amplifier mid-infrared supercontinuum generation** [12974-15]
- 12974 0F **26.2-W mid-infrared supercontinuum generation in InF₃ fiber** [12974-17]
- 12974 0G **CO-filled hollow-core fiber lasers operating at 4.64-4.82 μm** [12974-18]

- 12974 OH **Model and application of close-range coupling propagation of large aperture laser amplifiers** [12974-19]
- 12974 OI **Feedforward compensation for target drift caused by shroud removal based on Kalman filter** [12974-21]
- 12974 OJ **Research on small-size laser damage repairing process for fused silica optics** [12974-22]
- 12974 OK **Development of thin disk gain medium based on photoadhesion technology** [12974-23]
- 12974 OL **A co-simulation method for flowing diode pumped alkali lasers** [12974-26]
- 12974 OM **Analysis of the load capacity of optically addressed spatial light modulators based on different laser irradiation spot sizes** [12974-27]
- 12974 ON **2.3- μm single-frequency Tm: ZBLAN fiber amplifier** [12974-28]
- 12974 OO **Second-harmonic generation of high-intensity light waves under the influence of cubic nonlinearity** [12974-29]
- 12974 OP **Research on characteristics of multidimensional polarization smoothing** [12974-30]
- 12974 OQ **Investigation of a flowing-gas Cs laser with a disc-type vapor cell** [12974-31]
- 12974 OR **High power multiple mirrors optical path design and simulation of photo-neutralization** [12974-32]
- 12974 OS **A thermal control system for CCD in vacuum environment** [12974-33]
- 12974 OT **High power and high beam quality quasi-continuous-wave pumped slab laser** [12974-36]
- 12974 OU **Impact of weak end-facet reflections on the SRS threshold of high-power fiber oscillators and amplifiers** [12974-39]
