# TABLE OF CONTENTS

Preface

Peer Review Statement

|                                                                                                                                              |    |
|----------------------------------------------------------------------------------------------------------------------------------------------|----|
| Study on schottky barrier of Cu/Graphene/4H-SiC interface based on first principles .....                                                    | 1  |
| <i>Congcong Wang, Siyu Wu, Zhenyu Jiang, Yingjie Huang</i>                                                                                   |    |
| Study on road performance of asphalt mixture based on POE/PA6 modifier .....                                                                 | 6  |
| <i>Liujie Guo, Zongjun Pan, Changxiaoxi Liu, Yongcai Yang, Yanhe Sui</i>                                                                     |    |
| Synthesis of g-C <sub>3</sub> N <sub>4</sub> /HC composite and its visible light catalytic performance .....                                 | 12 |
| <i>Jinshan Liu, Yuwei Zhu, Yulan Ren, Heruo Li, Shuang Gao, Jianfei Wu</i>                                                                   |    |
| High-temperature stability, water stability, and ice melting properties of salt-storage bituminous mixture AC-13 .....                       | 17 |
| <i>Huani Liu, Zhaoming Chen, Lidong Wu, Qingliang Wang, Yanmin Wang</i>                                                                      |    |
| Design of superhydrophobic coatings fabricated by spraying for anti-icing .....                                                              | 23 |
| <i>Lei Fan, Jinhang He, Bo Li, Jie Bai, Tao Zhu, Linbo Song, Xujiang Hua, Yuan Yuan</i>                                                      |    |
| Anti-icing application of superhydrophobic coating on glass insulator .....                                                                  | 30 |
| <i>Lei Fan, Jinhang He, Bo Li, Mingyong Xia, Jian Liu, Tao Zhu, Yingying Zhao, Xujiang Hua, Yuan Yuan</i>                                    |    |
| Investigating the serve life of common earthed materials based on evaluations of the soil corrosion in offshore areas of East China .....    | 37 |
| <i>Zhaomin Guo, Qi Shi, Yejiao Wang</i>                                                                                                      |    |
| Study on the influence of thermal aging on the mechanical and magnetic properties of ferritic steel .....                                    | 47 |
| <i>Wenqing Jia, Minyu Fan, Jing Wan, Shuang Qi, Xiangbing Liu, Chaoliang Xu, Yuanfei Li, Wangjie Qian, Qiwei Quan, Jian Yin</i>              |    |
| Study on thermal conductivity of micron BN-nano SiO <sub>2</sub> combined modified epoxy resin composites .....                              | 55 |
| <i>Yiyi Zhang, Danquan Lan, Peng Liu, Bo Feng, Danyang Xu, Min Wu</i>                                                                        |    |
| Comparative study on microstructure and hardness of P92 steel before and after long service .....                                            | 64 |
| <i>Yangyang Fu, Gaocan Luan, Pengfei Zhao, Qinzhen Ma, Baoyin Zhu, Xianxi Xia, Xiao Jin</i>                                                  |    |
| The effect of dispersion degree of calcium carbonate particles in polyvinyl chloride matrix on the mechanical properties of composites ..... | 73 |
| <i>Shijun Luo, Sining Pan, Hongbin Chang, Xiaolin Zhou</i>                                                                                   |    |
| Fluidization characteristics of iron ore powder in fluidized bed .....                                                                       | 79 |
| <i>Jianming Pang, Yaoxin Song, Shiwen Li, Chongfeng Yue, Zhimin Zhao, Lingen Luo</i>                                                         |    |
| Effect of crosslinking agent types on the tensile properties of polyisoprene rubber .....                                                    | 86 |
| <i>Junjie Zuo, Zhigang Wei, Zelin Zhang</i>                                                                                                  |    |
| Preparation and application research of transition metal phosphides .....                                                                    | 92 |
| <i>Deming Li, Xing Fang, Bo Zhang, Songlin Chen, Guojun Yuan</i>                                                                             |    |

|                                                                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Preparation and application of superhydrophobic polytetrafluoroethylene materials and micro/nanoindentation .....                                                           | 99  |
| <i>Jianfeng Zhou, Xiangru Zhou, Jianjun Zhou, Zengzhen Mi</i>                                                                                                               |     |
| Influences of temperature on the property of ITO/Teflon/Ag in atomic oxygen environment .....                                                                               | 105 |
| <i>Liang Guo, Tiecheng Qiu, Qian Zhang, Zhanping Guo, Ming Shan</i>                                                                                                         |     |
| Research on the performance of pavement crack repair materials based on foaming polyurethane .....                                                                          | 110 |
| <i>You Zhou, Fei Chen, Zhoucong Xu</i>                                                                                                                                      |     |
| Study on the effect of double mineral admixtures on the properties of high water materials.....                                                                             | 117 |
| <i>Yuying Zheng, Qiufeng Wang, Yuanyuan Zhao</i>                                                                                                                            |     |
| Crystallization, thermal properties, rheological properties, mechanical properties, and morphology of thermoplastic polyurethanes/calcium sulfate whiskers composites ..... | 126 |
| <i>Daohai Zhang, Xiao Zhan, Guilan Liu, Yanyan Tan, Lianjun Shi, Qianlin Chen, Tian Xie</i>                                                                                 |     |
| Influence of modified phosphogypsum content on the properties of HDPE/phosphogypsum composites .....                                                                        | 133 |
| <i>Daohai Zhang, Jingyu Du, Guilan Liu, Meng Pei, Lianjun Shi, Qianlin Chen, Tian Xie</i>                                                                                   |     |
| Synthesis of Nano-aluminum Nitride powder at low temperature by Sol-gel method .....                                                                                        | 140 |
| <i>Shuwei Zhang, Weiwei Men, Xiao Wu, Siyu Zhu, Hui Xu</i>                                                                                                                  |     |
| Structural safety of compressed air energy storage sealing materials.....                                                                                                   | 146 |
| <i>Jing Liu, Shengjie Di, Xi Lu, Yang Ji</i>                                                                                                                                |     |
| Research and application of key technology of energy saving and capacity increasing for overhead conductors with carbon fiber composite core reinforced.....                | 152 |
| <i>Wei Zeng, Peng Dang</i>                                                                                                                                                  |     |
| Study on sinusoidal lapping micro-structured surface by abrasive stone with staggered abrasive particles .....                                                              | 160 |
| <i>Qi Liu, Xingshan Li, Yushan Lyu, Shenrong Hu, Zhaotong Shang</i>                                                                                                         |     |
| Additive manufacturing and performance research of aluminum-based ceramic cores .....                                                                                       | 165 |
| <i>Haifeng Song, Jinqiu Tang, Hongchang Zhang</i>                                                                                                                           |     |
| Precision cutting mechanics and mechanical performance testing on the spindle of machine tool.....                                                                          | 173 |
| <i>Hongping Yang, Zhongwen Guo, Yingjie Xia</i>                                                                                                                             |     |
| Research on maintenance-free design and low friction characteristics of industrial robot sliding components.....                                                            | 179 |
| <i>Zhuomiao Zhu, Junde Guo</i>                                                                                                                                              |     |
| Experimental and numerical study on flexural properties of glass fiber reinforced plastic sandwich plates.....                                                              | 187 |
| <i>Huijie Wang, Bei Zhang, Zehao Qi, Hong Wang, Yongsheng Chai</i>                                                                                                          |     |
| Effect of ultrasonic surface rolling on the friction and wear properties of 8620H carburized steel at elevated temperatures .....                                           | 193 |
| <i>Hao Zhong, Shengguan Qu, Wang Long, Rixin Deng, Wenxue Zhou</i>                                                                                                          |     |
| Effect of cooling temperature on microstructure and mechanical properties of Ti microalloyed steel.....                                                                     | 203 |
| <i>Xin Zheng, Yujian Zuo, Hongxin Tian, Yingshuo Wang</i>                                                                                                                   |     |

|                                                                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| The microstructure and properties of high-strength structural steel for fruit auxiliary picking equipment.....                                              | 208 |
| <i>Lulu Feng, Yanjun Yang, Wenfeng Zhang, Weiwen Qiao, Xuefeng Tian</i>                                                                                     |     |
| Vector ducted propeller aerodynamic modeling and verification testing.....                                                                                  | 213 |
| <i>Peng Tang, Chuangxin Zhao, Sen Mao, Jiajie Tian, Shizhe Liang</i>                                                                                        |     |
| Study on the effect of annealing rate on the impact resistance of the H-ZLaF50 vehicle plate glass.....                                                     | 218 |
| <i>Wentao Jia, Jiaxin Liu, Yaohong Wang, Guanpeng Yao, Xiaofang Gao, Xuezhou Fang, Xiaoyong Kou, Guangyi Xu</i>                                             |     |
| Effect of intercritical quenching and tempering on microstructure and properties of DP1180 .....                                                            | 224 |
| <i>Zhiwei Zou, Bowen Jiang, Liejun Li, Jianping Ren, Jietao Dai</i>                                                                                         |     |
| Analysis and prevention of copper pipe corrosion .....                                                                                                      | 230 |
| <i>Jinpeng Xie, Yulin Teng, Li Zhang, Hui Li</i>                                                                                                            |     |
| Design and implementation of facility intelligent carbon dioxide incubator control system based on POA optimized fuzzy PID.....                             | 238 |
| <i>Qiangke Luo, Zeneng Zhao, Xingjiang Chen, Huanbo Zhang, Yong Liu</i>                                                                                     |     |
| Research on hydrogen induced cracking (HIC) performance of vessel steels.....                                                                               | 247 |
