2023 30th Asia-Pacific Software Engineering Conference (APSEC) APSEC 2023

Table of Contents

Message from the General Chair and Program Chairs	xv
Conference Organizers	xvii
Program Committee	xix
Keynotes	xxiii
Tutorials	xxvi

Technical Track

Unit Test Based Component Integration Testing
On the Effectiveness of Synthetic Benchmarks for Evaluating Directed Grey-box Fuzzers 11 Haeun Lee (Cyber Security Research Center, KAIST, Korea), Hee Dong Yang (Cyber Security Research Center, KAIST, Korea), Su Geun Ji (Cyber Security Research Center, KAIST, Korea), and Sang Kil Cha (Cyber Security Research Center, KAIST, Korea)
Test Case Level Predictive Mutation Testing Combining PIE and Natural Language Features 21
Rui Xu (Shandong University, China), Yuliang Shi (Shandong University; Dareway Software Co., Ltd, China), Zhiyuan Su (Jinan Inspur Data Technology Co., Ltd., China), Xinjun Wang (Shandong University; Dareway Software Co., Ltd, China), Zhongmin Yan (Shandong University, China), and Fanyu Kong (Shandong University, China)
Taxonomy of Architecture Maintainability Smells31Paula Rachow (Universität Hamburg, Germany), Marion Wiese (UniversitätHamburg, Germany), and André van Hoorn (Universität Hamburg, Germany)
 Analytical Modeling and Empirical Validation of Performability of Service- and Cloud-Based Dynamic Routing Architecture Patterns
Light-Weight MBSE Approach for Construction Equipment Domain - An Experience Report . 51 Johan Cederbladh (Mälardalen University, Sweden) and Jagadish Suryadevara (Volvo Construction Equipment, Sweden)

On the Reliability of Coverage Data for Fault Localization
Do App Developers Follow the Android Official Data Security Guidelines? – An Empirical Measurement on App Data Security
 FSFP: A Fine-Grained Online Service System Performance Fault Prediction Method Based on Cross-Attention
Reinforcement Learning Guided Symbolic Execution for Ethereum Smart Contracts
Effective Anomaly Detection for Microservice Systems with Real-Time Feature Selection 101 Siqi Zhou (Southern University of Science and Technology, China), Xian Zhan (Southern University of Science and Technology, China), Linlin Li (Southern University of Science and Technology, China), and Yepang Liu (Southern University of Science and Technology, China)
Architectural Design Decisions for Data Communication of Cyber-Physical Systems
Towards Requirements Engineering Activities for Machine Learning-Enabled FinTech Applications 121 Yishu Li (City University of Hong Kong, China), Jacky Keung (City 121 University of Hong Kong, China), Kwabena Ebo Bennin (Wageningen 121 University and Research, Netherlands), Xiaoxue Ma (City University of 101 Hong Kong, China), Yangyang Huang (City University of Hong Kong, 101 China), and Jingyu Zhang (City University of Hong Kong, China) 101
On the Impact of Development Frameworks on Mobile Apps
An Empirical Study on the Stability of Explainable Software Defect Prediction

Refactoring Programs Using Large Language Models with Few-Shot Examples
Improving Code Refinement for Code Review Via Input Reconstruction and Ensemble Learning
Jiawei Lu (Zhejiang University, China), Zhijie Tang (Zhejiang University, China), and Zhongxin Liu (Zhejiang University, China)
QoS-Aware Graph Contrastive Learning for Web Service Recommendation
LogFold: Enhancing Log Anomaly Detection through Sequence Folding and Reconstruction
Xiaonan Shi (Tongji University, China), Rui Li (Northeastern University, United States), Qingfeng Du (Tongji University, China), Cheng He (Di-Matrix Information Technology Co., Ltd, China), and Fulong Tian (Di-Matrix Information Technology Co., Ltd, China)
Natural Language Processing-Based Requirements Modeling: A Case Study on Problem Frames
Jiahao Wei (Guangxi Normal University, China), Xuan Chen (Guangxi Normal University, China), Hongbin Xiao (Guangxi Normal University, China), Shangzhi Tang (Guangxi Normal University, China), Xiaolan Xie (Guilin University of Technology, China), and Zhi Li (Guangxi Normal University, China)
Sentiment Analysis for Requirements Elicitation from App Reviews: A Systematic Mapping Study
SAB: Stacking Action Blocks for Efficiently Generating Diverse Multimodal Critical Driving
Scenario 211 Shuting Kang (University of Chinese Academy of Sciences; Institute of Software Chinese Academy of Sciences, China), Heng Guo (University of Chinese Academy of Sciences; Institute of Software Chinese Academy of Sciences, China), Zitong Bo (University of Chinese Academy of Sciences; Institute of Software Chinese Academy of Sciences, China), Lijun Zhang (Institute of Software Chinese Academy of Sciences, China), Qian Dong (Institute of Software Chinese Academy of Sciences; Automotive Software Innovation Center (Chongqing), China), Yunzhi Xue (Institute of Software Chinese Academy of Sciences; Automotive Software Innovation Center (Chongqing), China), and Yanjun Wu (Institute of Software Chinese Academy of Sciences, China)
CP Decomposition and Set Theory based Root Cause Analysis in Online Service Systems 221 Qianbo Wei (Chinese Academy of Sciences; University of Chinese Academy of Sciences, China), Qian Tan (Chinese Academy of Sciences; University of Chinese Academy of Sciences, China), Yan Zhang (Chinese Academy of Sciences; University of Chinese Academy of Sciences, China), Zhen Xu (Chinese Academy of Sciences; University of Chinese Academy of Sciences, China), and Hongyan Tan (Chinese Academy of Sciences; University of Chinese Academy of Sciences, China)

Interpreting CodeBERT for Semantic Code Clone Detection
Context-Adaptation Bugs in Micro-Clones
 P-DATA: A Task-Level Parallel Framework for Dependency-Aware Value Flow Taint Analysis 249 Rulin Xu (National University of Defense Technology, China), Xiaoguang Mao (National University of Defense Technology, China), and Luohui Chan (National University of Defense Technology, China)
Improving Vulnerability Detection with Hybrid Code Graph Representation
MUSE: A Multi-feature Semantic Fusion Method for ROS Node Search Based on Knowledge Graph
 WMWatcher: Preventing Workload-Related Misconfigurations in Production Environment 279 Shulin Zhou (National University of Defense Technology, China), Zhijie Jiang (National University of Defense Technology, China), Shanshan Li (National University of Defense Technology, China), Xiaodong Liu (National University of Defense Technology, China), Zhouyang Jia (National University of Defense Technology, China), Yuanliang Zhang (National University of Defense Technology, China), Jun Ma (National University of Defense Technology, China), and Haibo Mi (National University of Defense Technology, China)
Reusability Challenges of Scientific Workflows: A Case Study for Galaxy
Histree: A Tree-Based Experiment History Tracking Tool for Jupyter Notebooks

Formal Verification of Interrupt Isolation for the TrustZone-based TEE
A Single-Sample Pruning and Clustering Method for Neural Network Verification
AMPT: Automatic Mixed-Precision Tuning Based on Accuracy Gain
Developer's Cognitive Effort Maintaining Monoliths vs. Microservices - An Eye-Tracking Study
Defining Bad Smells and Automating Their Detection in Goal-Oriented Requirement Analysis Method iStar
Understanding Developers' Contribution Motivation in Stack Overflow: A Systematic Review 359
Yı Yang (National University of Defense Technology, China) and Xinjun Mao (National University of Defense Technology, China)
 Exploring Trade-Offs in MLOps Adoption
Family-based Model Checking using Probabilistic Model Checker PRISM

Automated Simulation-based Integration Testing for Multiple PLCs in a Reactor Protection System 386 Hyeongseok Eun (KEPCO E&C, Republic of Korea), Eunkyoung Jee (KAIST, Republic of Korea), Doo-Hwan Bae (KAIST, Republic of Korea), Younggeul Kim (KEPCO E&C, Republic of Korea), and Yoonhee Lee (KEPCO E&C, Republic of Korea)
Parameterized Search Heuristic Prediction for Concolic Execution
Verifying Exception-Handling Code in Concurrent Libraries
 Assessing the Effectiveness of Vulnerability Detection via Prompt Tuning: An Empirical Study

SEIP - Software Engineering in Practice

 Investigating Multi- and Many-Objective Search for Stability-Aware Configuration of an Autonomous Delivery System	5
Automating Test Generation of Industrial Control Software through a PLC-to-Python Translation Framework and Pynguin	I
Cost-Benefit Analysis for Modernizing a Large-Scale Industrial System	I
 Quality Assurance of a GPT-based Sentiment Analysis System: Adversarial Review Data Generation and Detection)

A Novel Statistical Measure for Out-of-Distribution Detection in Data Quality Assurance 458 <i>Tinghui Ouyang (National Institute of Informatics, Japan), Isao</i> <i>Echizen (National Institute of Informatics, Japan), and Yoshiki Seo</i> <i>(National Institute of Advanced Industrial Science and Technology, Japan)</i>
A Method for Requirements Elicitation and Consensus-Building for Ideas in the Vehicle System Concept Design using GSN
Timing-Aware Variability Resolution in EAST-ADL Product Line Architecture
Migrating Individual Applications into Software Product Lines using the Mobioos Forge Platform
Refining Use-after-Free Defense: Eliminating Dangling Pointers in Registers and Memory . 493 Xun An (Institute of Information Engineering, Chinese Academy of Sciences; University of Chinese Academy of Sciences, China), Qihang Zhou (Institute of Information Engineering, Chinese Academy of Sciences, China), Haichao Du (Institute of Information Engineering, Chinese Academy of Sciences, China), Zhenyu Song (Institute of Information Engineering, Chinese Academy of Sciences, China), and Xiaoqi Jia (Institute of Information Engineering, Chinese Academy of Sciences, China)
Maturity Assessment Model for Industrial Data Pipelines
Assessing Safety of an Automated Vehicle Through Model-Driven Analysis and Simulation 514 Morayo Adedjouma (Université Paris-Saclay, CEA, List, France), Fabien Gaudin (Sherpa Engineering, France), and Philippe Fiani (Sherpa Engineering, France)
Quality Assurance for ML Devices A Risk-Based Approach
Scalable Fault Tree Analysis for Functional Safety Software

EDU - Software Engineering Education

A Decision Tree of Bioengineering Study and Career Path for Educational Guidance Wantana Areeprayolkij (Chiang Mai University, Thailand) and Mengzhen Li (Chiang Mai University, Thailand)	539
Unit Testing Challenges with Automated Marking Chakkrit Tantithamthavorn (Monash University, Australia) and Norman Chen (Monash University, Australia)	544

Bridging the Gap Between Academic Curricula and Industrial Practice with DevOps Education 549

Nick Patrikeos (University of New South Wales, Australia), Yuchao Jiang (University of New South Wales, Australia), and Fethi Rabhi (University of New South Wales, Australia)

- Toward Enhancing Software Developers' Persuasion and Engagement in Gamification 564 Masateru Tsunoda (Kindai University, Japan), Hidetsugu Suto (Kindai University, Japan), and Takeshi Yamada (Kindai University, Japan)

ERA - Early Research Achievements

Automated Detection of Dark Patterns Using In-Context Learning Capabilities of GPT-3 569 Yasin Sazid (University of Dhaka, Bangladesh), Mridha Md. Nafis Fuad (University of Dhaka, Bangladesh), and Kazi Sakib (University of Dhaka, Bangladesh)
A Machine Learning Based Approach to Detect Machine Learning Design Patterns
On Mutation Testing of Graph Database Queries in the Cypher Language
A Pilot Study of Testing Infrastructure as Code for Cloud Systems
Investigating Technology Usage Span by Analyzing Users' Q&A Traces in Stack Overflow 589 Saikat Mondal (University of Saskatchewan, Canada), Debajyoti Mondal (University of Saskatchewan, Canada), and Chanchal K. Roy (University of Saskatchewan, Canada)
TLDBERT: Leveraging Further Pre-Trained Model for Issue Typed Links Detection

A Methodology for Resilient Safety-Critical Infrastructures using Statistical Model Checking
Rajesh Kumar (Birla Institute of Technology and Science, India) and Nitish Yadav (Birla Institute of Technology and Science, India)
Performance Diagnosis for Microservice-based Systems via Intra-/Inter-Trace Analysis 604 Zheheng Liang (Joint Laboratory on Cyberspace Security of China Southern Power Grid; Guangdong Power Grid, China), Guoquan Wu (Institute of Software, Chinese Academy of Sciences; University of Chinese Academy of Sciences; Joint Laboratory on Cyberspace Security of China Southern Power Grid, China), Lei Cui (Joint Laboratory on Cyberspace Security of China Southern Power Grid; Guangdong Power Grid, China), and Zhenyue Long (Joint Laboratory on Cyberspace Security of China Southern Power Grid; Guangdong Power Grid, China)
Automated Runtime Transition between Virtual and Platform Threads in the Java Virtual Machine
Towards Formal Verification of Behaviour-Driven Development Scenarios using Timed Automata
Towards Safety Assessment of Robot Behaviors in SMACH
On Code Example-Aided Just-In-Time Learning for Programming Education
 TABot: A Teaching Assistant Chatbot for Software Engineering Courses
ChatGPT for Vulnerability Detection, Classification, and Repair: How Far Are We?

Posters

 An Empirical Study on Regression Techniques for Software Defect Number Prediction637 Shihan Wang (Beijing Jiaotong University, China), Yuxin He (Beijing Jiaotong University, China), Rongrong Shi (Beijing Jiaotong University, China), Chiyuan Jing (Beijing Jiaotong University, China), Ying Liu (Beijing Jiaotong University, China), and Haonan Tong (Beijing Jiaotong University, China)

Detecting Bot on GitHub Leveraging Transformer-based Models: A Preliminary Study 639 Jin Zhang (Hunan Normal University; Changsha University of Science and Technology, China), Xingjin Wu (Hunan Normal University, China), Yang Zhang (National University of Defense Technology, China), and Shunyu Xu (Hunan Normal University, China)
Detecting Common Weakness Enumeration through training the Core Building Blocks of Similar Languages based on the CodeBERT Model
Enhancing Logic Error Detection Through Program Pseudocodes
Exploring Collaboration Patterns in GitHub using Discrete Time Markov Chain
Exploring Loss Scenarios of STPA with Reinforcement Learning: A Case Study of Platform
Screen Door
Funding sources in top Software Engineering conference publications
Assessing Opaque Predicates: Unveiling the Efficacy of Popular Obfuscators with a Rapid Deobfuscator
Can ChatGPT correct code based on logical steps?
Consistency of Code: A prompt based approach to comprehend functionality
Symbolic Execution of MPI Programs with One-Sided Communications
Test Case Generation for Cross-Blockchain Smart Contract

Unsatisfiable Core Based Constraint Solving Cache in Symbolic Execution	61
Visualizing Program Behavior with a Ball and Pipes for Computer Science Unplugged 6 Sumika Jinnouchi (Kindai University, Japan) and Masateru Tsunoda (Kindai University, Japan)	,63
