SPIE

Volume 12848

Proceedings of SPIE, 1605-7422, V. 12848

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Three-Dimensional and Multidimensional Microscopy: Image Acquisition and Processing XXXI*, edited by Thomas G. Brown, Tony Wilson, Laura Waller, Proc. of SPIE 12848, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PUPIL AND PSF ENGINEERING

12848 02 **Chernoff information for creating maximally distinctive engineered point spread functions for multi-color single molecule imaging** [12848-3]

MULTIDIMENSIONAL IMAGE RECONSTRUCTION AND ANALYSIS

12848 03 **Hyperspectral microscopy as a particle exposure assessment tool** [12848-6]

12848 04 **Direct blood cell flow imaging in microvascular networks** [12848-8]

NEW INSTRUMENTATION AND METHODS

12848 05 **Imaging the brain in vivo with reflectance phase-contrast confocal microscopy at 1650nm** [12848-11]

QUANTITATIVE PHASE, TOMOGRAPHIC AND HOLOGRAPHIC MICROSCOPY

12848 06 **Epi-mode 3D quantitative phase imaging with quantitative oblique back illumination microscopy (qOBM): recent advances in functional and dynamic contrast (Invited Paper)** [12848-18]

12848 07 **Multispectral digital holographic microscopy with tunable supercontinuum lasers** [12848-22]

LIGHT SHEET MICROSCOPY

12848 08 **Fast volumetric seizure model imaging in zebrafish brain with light sheet microscopy** [12848-24]

12848 09 **Three-dimensional multi-directional light-sheet microscopy with structured illumination** [12848-25]

COMPUTATIONAL IMAGING I

- 12848 0A **Light-field microscopy to study cardiac arrhythmias in zebrafish larvae** [12848-27]
- 12848 0B **On-the-fly deconvolution of diagonally-scanned Airy lightsheet microscopy** [12848-28]
- 12848 0C **Image projection through a multimode fiber with reference-lessly retrieved transmission matrix** [12848-30]

POSTER SESSION

- 12848 0D **Design and fabrication of universal resolution targets for microsphere-assisted microscopy** [12848-2]
- 12848 0E **Normalized level set model for segmentation of low-contrast objects in 2- and 3-dimensional images** [12848-38]
- 12848 0F **Development of long axial range 3D single-particle tracking by PSF engineering using birefringent substrates** [12848-39]
