Volume 12849

Proceedings of SPIE, 1605-7422, V. 12849

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Single Molecule Spectroscopy and Superresolution Imaging XVII*, edited by Ingo Gregor, Felix Koberling, Rainer Erdmann, Proc. of SPIE 12849, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SUPERRESOLUTION MICROSCOPY AND NANOSCOPY I

12849 02 **A multi-colour 2D and 3D structured illumination microscope using MEMS scanning mirrors**
[12849-6]

NEW TECHNOLOGIES AND METHODS

12849 03 **Increasing speed and brightness in super-resolution microscopy with renewable fluorophores**
[12849-27]

12849 04 **Self-interference digital holography with computational aberration correction** [12849-10]

SUPERRESOLUTION MICROSCOPY AND NANOSCOPY III

12849 05 **Ultra-specific detection of nucleic acids by intramolecular referencing (Invited Paper)**
[12849-25]

12849 06 **Single NV center in nanodiamond for quantum sensing of protein dynamics in an ABEL trap**
[12849-8]

POSTER SESSION

12849 07 **Enhanced obSTORM imaging through cubic spline PSF modeling** [12849-30]

12849 08 **ZOLA 3D, single molecule microscope technological transfer from research lab to ISO 9001 core facility** [12849-31]

12849 09 **Combined NAD(P)H and lipofuscin FLIM revealed the development of metabolic syndrome in the liver of epigenetically altered rats** [12849-32]
