**Volume 12872**

Proceedings of SPIE 0277-786X, V. 12872

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Applications in Microelectronic and Optoelectronic Manufacturing (LAMOM) XXIX*, edited by Laura Gemini, Jan Kleinert, Godai Miyaji, Proc. of SPIE 12872, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## **BESSEL BEAM GLASS PROCESSING: JOINT SESSION WITH CONFERENCES 12872 AND 12873**

---

- 12872 02 **Non-disruptive Bessel-beam array generation for high-throughput shadow mask laser patterning (Invited Paper)** [12872-2]
- 12872 03 **Laser singulation of high refractive index glasses for augmented reality waveguides** [12872-5]

---

## **FUNCTIONAL GLASS: JOINT SESSION WITH CONFERENCES 12872 AND 12873**

---

- 12872 04 **Developing laser-induced graphene from colorless polyimide for enhanced performance in pressure sensors and triboelectric nanogenerators** [12872-7]

---

## **GLASS DRILLING AND SELECTIVE LASER ETCHING (SLE): JOINT SESSION WITH CONFERENCES 12872 AND 12873**

---

- 12872 05 **Rapid and high throughput formation of through glass vias (Invited Paper)** [12872-8]
- 12872 06 **Selective laser etching of displays: closing the gap between optical simulations and fabrication** [12872-9]

---

## **NOVEL SYSTEMS FOR MICROELECTRONIC AND OPTOELECTRONIC MATERIALS PROCESSING I**

---

- 12872 07 **Laser-lift-off of GaN-based transistors with an ultra-short-pulsed deep UV laser** [12872-12]

---

## **LASER-BASED MANUFACTURING OF MICROFLUIDIC, PHOTONICS AND OPTOELECTRONIC DEVICES I**

---

- 12872 08 **Multilevel diffraction gratings inside silicon towards spectral filtering** [12872-19]
- 12872 09 **Microfabrication of thermoset polymer PDMS using laser-induced bubble (microFLIB) and its mechanism study** [12872-21]
- 12872 0A **Laser induced forward transfer with high resolution for microelectronics applications** [12872-22]

**LASER-BASED MANUFACTURING OF MICROFLUIDIC, PHOTONICS AND OPTOELECTRONIC DEVICES II**

---

12872 0B **Study of laser-based transfer of graphene via laser induced transfer process for the on-chip integration of photodetector** [12872-23]

12872 0C **Production of Yb:YVO<sub>4</sub> nanoparticles by pulsed laser ablation in liquid using a femtosecond laser** [12872-24]

**NOVEL LASER PROCESSING BASED ON BEAM SHAPING AND PULSE TRAIN ARRANGEMENT TECHNIQUES**

---

12872 0D **GHz burst pumped third-harmonic pulses for precise microfabrication of silicon** [12872-29]

**POSTER SESSION**

---

12872 0E **Comparison of plate type cylindrical lens-based and VCSEL-based flat-top beams used in large area laser selective reflow for microelectronics industry applications** [12872-11]

12872 0F **Formation of a low-dilution pure copper layer by wire-based laser metal deposition with blue diode laser (Best Student Poster Award)** [12872-32]

12872 0G **Pure copper layer coating with multibeam laser metal deposition system with blue diode lasers** [12872-33]

12872 0H **Numerical modeling of pulsed laser ablation processes in ns and fs regime** [12872-34]
