Volume 12879

Proceedings of SPIE 0277-786X, V. 12879

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonic Technologies in Plant and Agricultural Science*, edited by Dag Heinemann, Gerrit Polder, Proc. of SPIE 12879, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 PHOTONICS DEVICES IN PLANT AND AGRICULTURAL SCIENCE

- 12879 02 **A video-rate hyperspectral camera for monitoring plant health and biodiversity** [12879-1]
- 12879 03 **Multi- and hyperspectral imaging of plants and their properties by means of highly integrated and MEMS-based systems** [12879-2]
- 12879 04 **Development of a portable and low-cost OCT system for horticultural research** [12879-4]

SESSION 2 PHOTONICS IN THE FOOD CHAIN

- 12879 05 **Investigating the treatment point of plants for laser weeding** [12879-7]
- 12879 06 **Detection of spoiled food along the supply chain with novel sensors for packed food** [12879-8]

SESSION 3 SPECTROSCOPIC METHODS IN PLANT SCIENCE

- 12879 07 **Portable shifted excitation Raman difference spectroscopy for agri-photonics: from on-site precision agriculture to smart farming** [12879-10]
- 12879 08 **Determination of hydrogen-producing bacteria contamination in milk by Raman gas spectroscopy** [12879-11]
- 12879 09 **Perspectives of micromechanical assessment of the apple fruit cuticle** [12879-12]
- 12879 0A **Analysis and differentiation of toxic and non-toxic cyanobacteria using Raman spectroscopy** [12879-27]

SESSION 4 OPTICAL MONITORING OF PLANT STATUS

- 12879 0B **Towards automated phenotyping in plant tissue culture: in situ fluorescence monitoring** [12879-15]
- 12879 0C **Hyperspectral remote sensing approach for rapid detection of potato virus Y** [12879-18]

12879 OD **In situ plant peel spectral attenuation of chlorophyll fluorescence excitation as a tool in precision agriculture and photobiology studies** [12879-26]

POSTER SESSION

12879 OE **Automating the purity analysis of oilseed rape through usage of hyperspectral imaging** [12879-21]

12879 OF **Evaluation of far-UVC 222 nm in the decontamination and increase of shelf life of fruits** [12879-22]

12879 OG **A fast analysis approach for crop health monitoring in hydroponic farms using hyperspectral imaging** [12879-23]

12879 OH **Monitoring of macro- and micronutrients in vine leaves by short-wave infrared hyperspectral imaging** [12879-24]

12879 OI **Laser remote sensor for oil palm fruit ripeness assessment** [12879-25]

12879 OJ **Urban green proximal sensing with portable photonics-based devices: preliminary results in the metropolitan city of Cagliari** [12879-28]

DIGITAL POSTER SESSION

12879 OK **Variability in plant cell water dynamics as a genetic discriminatory method using terahertz quantum cascade laser-based laser feedback interferometry** [12879-14]
