Volume 12882

Proceedings of SPIE 0277-786X, V. 12882

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Components and Materials XXI*, edited by Shibin Jiang, Michel J. Digonnet, Proc. of SPIE 12882, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

RARE-EARTH DOPED MATERIALS I

- 12882 02 **Dynamics of polymers with neodymium doped nanoparticles under optical excitation**
[12882-3]
- 12882 03 **Measuring transmission at the Christiansen wavelength for dynamic sand samples** [12882-4]

AMPLIFIERS AND LASERS

- 12882 04 **Ultra-broadband quantum dot coherent comb lasers** [12882-6]
- 12882 05 **Tailorable semiconductor laser platform in the 7xx nm regime** [12882-7]
- 12882 06 **Dual fiber laser pumped tunable mid-infrared laser source with high speed modulation**
[12882-9]

RARE-EARTH DOPED MATERIALS II

- 12882 07 **A stable Gd doped BaO CaO PO glass** [12882-10]
- 12882 08 **Strategies to reduce radiation induced gain degradation in erbium doped fiber** [12882-13]

NANOMATERIALS AND LITHIUM NIOBATE DEVICES

- 12882 09 **Investigation of self-injection locking threshold on a quantum dot comb laser** [12882-15]

FILTERS AND GRATING BASED DEVICES

- 12882 0A **Reflective liquid crystal polarization volume grating with high diffraction efficiency and large diffraction angle for optical communication wavelength band** [12882-20]

12882 0B **Segmented design and control in contra-directional couplers for large bandwidth tunability**
[12882-21]

12882 0C **Optical evanescent field sensor based on point-by-point laser inscribed Bragg grating in planar polymer ridge waveguide** [12882-22]

SUBWAVELENGTH OPTICAL ELEMENTS

12882 0D **CMOS-compatible MIS-Schottky heterojunctions for plasmonic waveguide modulation**
[12882-25]

12882 0E **Predictive model comparisons to optical scatter measurements of structured diffusers**
[12882-26]

RARE-EARTH DOPED MATERIALS III

12882 0F **Multi-core optical fibers with adapted functionalities for imaging and sensing applications**
[12882-30]

OPTICAL SWITCHES

12882 0G **Dense wavelength division (de-)multiplexer for space application** [12882-33]

12882 0H **Switchable reciprocal metasurfaces for infrared scene projection** [12882-36]

12882 0I **Performance analysis of DKDP electro-optic modulators in the presence of piezoelectric coupling** [12882-38]

OPTICAL FIBERS II

12882 0J **Hollow core photonic crystal fiber bundle for high energy ultra-short pulse laser applications**
[12882-42]

12882 0K **PANDA polarization maintaining fiber with a mechanical reinforcing outer layer for tight bend applications** [12882-44]

12882 0L **Photomechanical bimorph fibers** [12882-46]

DETECTORS

12882 0M **A novel design of a compact, freeform-based condenser lens for use with photomultiplier tubes to achieve high collection efficiencies** [12882-47]

- 12882 ON **Effect of performances on structural differences of VIS-SWIR photodetectors for multispectral imaging and sensing** [12882-48]
- 12882 OO **Very high gain and low noise GaAsSb/AlGaAsSb avalanche photodiodes for 1550nm detection at room temperature** [12882-50]

POSTER SESSION

- 12882 OP **Synthesis and characterization of tellurite-air glass transversely disordered optical fiber** [12882-45]
- 12882 OQ **Sensitive detection of short wavelength radiation with spectrum down-converting nanoparticles** [12882-51]
- 12882 OR **Determination of optical constants of n- and p-type GaAs as a function of carrier concentration** [12882-54]
- 12882 OS **Wavelength tunable filter based on MMI in optical fibers** [12882-60]
- 12882 OT **Integrated broadband bent directional coupler for use in telescope interferometry in the visible (600 nm – 820 nm)** [12882-61]
