SPIE

Volume 12884

Proceedings of SPIE 0277-786X, V. 12884

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Ultrafast Phenomena and Nanophotonics XXVIII*, edited by Markus Betz, Abdulhakem Y. Elezabi, Proc. of SPIE 12884, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

QUANTUM OPTICAL PHENOMENA

- 12884 02 **Solid-state quantum emitters for photon generation excited by the SUPER scheme (Invited Paper)** [12884-2]
- 12884 03 **Microscopic simulations of the dynamics of excitonic many-body correlations coupled to quantum light** [12884-3]

SPIN AND MAGNETIZATION DYNAMICS

- 12884 04 **Chiral phonon-induced magnetization in cerium fluorides (Invited Paper)** [12884-5]

CARRIER DYNAMICS IN PEROVSKITES

- 12884 05 **Ultrafast photoluminescence dynamics in templated self-assemblies of perovskite nanocrystals** [12884-8]

PLASMONICS

- 12884 06 **Non-Planckian mid-infrared radiation originating from hot plasmons in graphene (Invited Paper)** [12884-15]
- 12884 07 **Theory of anomalous phase shift in the reflection of graphene surface plasmons by metallic nano-plates** [12884-16]

CARRIER DYNAMICS IN SEMICONDUCTORS AND NANOSTRUCTURES I

- 12884 08 **Photoexcitation in germanium probed by attosecond transient reflectivity spectroscopy (Invited Paper)** [12884-20]
- 12884 09 **Lepidocrocite TiO₂ nanofilaments: optical properties revealed by ultrafast transient absorption** [12884-22]

2D MATERIALS I

12884 0A **Ultrafast dynamics in 2D materials and heterostructures visualized with time- and angle-resolved photoemission (Invited Paper)** [12884-23]

2D MATERIALS II

12884 0B **Electrical conductivity-morphology relationships of liquid-exfoliated graphite** [12884-27]

OPTICAL SOURCES AND NONLINEAR OPTICAL PHENOMENA

12884 0C **Understanding the mechanisms behind optical gain in bulk solution processible semiconductors** [12884-31]

12884 0D **Enhanced sum frequency generation using vertically stacked Mie resonators** [12884-34]

CARRIER DYNAMICS IN SEMICONDUCTORS AND NANOSTRUCTURES II

12884 0E **Improved efficiency of generating femtosecond photon echoes from quantum dots using chirped pulses and time resolved measurement by frequency up-conversion technique** [12884-37]

12884 0F **Carrier dynamics in cuprous oxide-based nanoparticles and heterojunctions** [12884-38]

CARRIER DYNAMICS IN SEMICONDUCTORS AND NANOSTRUCTURES III

12884 0G **Ultrashort-laser pulse induced plasma dynamics in semiconductor nanowires** [12884-39]

12884 0H **Optical simulation of laser-induced tunnel ionization based on a curved waveguide** [12884-41]

POSTER SESSION

12884 0I **Polarization dependence of laser induced recollision and inner-shell excitations** [12884-42]
