SPIE

Volume 12887

Proceedings of SPIE 0277-786X, V. 12887

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Oxide-based Materials and Devices XV*, edited by David J. Rogers, Ferechteh H. Teherani, Proc. of SPIE 12887, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

P-TYPE OXIDES

- 12887 02 **Li-doped IrO₂/Si heterojunctions for CMOS-integrated optoelectronics** [12887-2]
- 12887 03 **Nickel oxide hole transport layer engineering for mitigation of photo segregation in mixed halide organic-inorganic lead halide perovskites** [12887-4]

GALLIUM OXIDE I

- 12887 04 **Split and unrelaxed Ga vacancies in β -Ga₂O₃ (Invited Paper)** [12887-7]

GALLIUM OXIDE II

- 12887 05 **Thermal properties of Ga₂O₃ thin films and devices prepared on sapphire and SiC substrates by liquid-injection MOCVD (Invited Paper)** [12887-12]
- 12887 06 **Impacts of device processing on contact interfaces to (010) β -Ga₂O₃** [12887-13]

GALLIUM OXIDE III

- 12887 07 **Crystal growth and power device applications of β -Ga₂O₃ (Invited Paper)** [12887-16]

GALLIUM OXIDE IV

- 12887 08 **O-H centers in β -Ga₂O₃ with a Ga(1) vacancy at their core (Invited Paper)** [12887-21]

GALLIUM OXIDE V

- 12887 09 **Heteroepitaxy and annealing studies of orthorhombic gallium oxide films on nanostructured AlN templates (Invited Paper)** [12887-24]

GALLIUM OXIDE VI

- 12887 0A **Chromium doped gallium oxide nanowire-based thermometer and the study of the anisotropic refractive index temperature dependence (Invited Paper)** [12887-26]
- 12887 0B **Modeling of the gate leakage in MOSFETs with Al₂O₃/β-Ga₂O₃ gate stack (Invited Paper)** [12887-29]
- 12887 0C **Heterogenous integration of gallium oxide with diamond and SiC (Invited Paper)** [12887-30]

VARIOUS OXIDES/APPLICATIONS I

- 12887 0D **Lithium niobate long-period waveguide gratings integrated with bismuth ferrite (BiFeO₃) resistive random access memory** [12887-31]
- 12887 0E **Material characterization of silicon dioxide cladding for photonic devices** [12887-35]

PHOTODETECTORS

- 12887 0F **Bismuth ferrite (BiFeO₃)-based metal-semiconductor-metal photodetectors realized by the design of the experiments approach** [12887-37]

VARIOUS OXIDES/APPLICATIONS II

- 12887 0G **High quality ZnMgAlO thin films by ultrasonic spray pyrolysis: tuning of optoelectronic properties for use as TCO, window layer, and buffer layer in all-oxide solar cells** [12887-42]

VARIOUS OXIDES/APPLICATIONS V

- 12887 0H **Layer transfer technique of epitaxial rutile TiO₂ thin films for photonic applications (Invited Paper)** [12887-56]

VARIOUS OXIDES/APPLICATIONS VI

- 12887 0I **Plasma conduction mechanism in topological insulators** [12887-57]
- 12887 0J **Comparison of PLD-grown p-NiO/n-Ga₂O₃ heterojunctions on bulk single crystal β-Ga₂O₃ and r-plane sapphire substrates** [12887-3]

12887 OK **The path to low temperature crack-free high refractive index inorganic thin films** [12887-64]

POSTER SESSION

12887 OL **A solution-processed p-type CuAlO₂ thin film and its applications in gas sensing at room temperature** [12887-59]

12887 OM **Chemically induced dynamic polarization by magnetic field on nanoionic photocatalysis via 2-propanol oxidation** [12887-60]

12887 ON **Superconducting crystal dense plasma parameters** [12887-61]

12887 OO **Comparative study of ZnO and WO₃ thin films grown by pulsed laser deposition at similar substrate temperatures** [12887-62]

12887 OP **Use of yttria-stabilised zirconia substrates for zinc oxide mediated epitaxial lift-off of superior yttria-stabilised zirconia thin films** [12887-66]
